DEPARTMENT OF REVENUE AND AGRICULTURE.

### Weekly Report on the state of the Season and Prospects of the Crops.

**Madras.**—*For week ending 15th March.*—No rain fell during the week. The water supply is generally sufficient. Some small sowings are proceeding. The standing crops are generally good. The harvest yield is almost normal. Fodder is sufficient. The condition of cattle is good. Prices are almost stationary.

**Bombay.**—*For week ending 15th March.*—Rain fell in parts of Sind and one taluka of Dharwar and has proved beneficial to the late crops in Shikarpur and the Upper Sind Frontier. The standing crops have been damaged by high winds or drought in parts of Sind and by rats in parts of Bijapur. American cotton has been blighted in two talukas of Dharwar. The harvesting of the late crops is progressing in seventeen and preparations for next season are being made in eleven districts. Cotton picking continues in parts of Gujarat, Kathiawar and the Karnatik. Fodder is sufficient except in parts of Sind and Baroda. Prices have risen in three and fallen in six districts.

**Bengal.**—*For week ending 13th March.*—Rain fell during the week in the east and north of the Province. The spring crops are being gathered, and the outturn is good. The collection of opium continues, and a fair yield is expected everywhere except in Darbhanga, where it is reported to be meagre. Transplantation of spring rice is almost over. Ploughing for autumn rice and jute is in progress, and sowing has begun in parts of North Bengal. Sugarcane is still being pressed, and in some districts the planting of the new crop has begun. The fodder supply is sufficient except in parts of Midnapore. The price of common rice continues practically stationary.

**North-Western Provinces and Oudh.**—*For week ending 15th March.*—Slight showers fell in parts during the week, otherwise clear and seasonable weather has prevailed. The standing crops are thriving and are being irrigated where necessary. The harvesting of the spring crops, the pressing of sugarcane and the extraction of opium continue. Planting of the new cane crop has commenced in parts. Prospects are favourable. Markets are well stocked. Fodder is sufficient. Prices have a rising tendency in a few districts, but are otherwise stationary or falling.

**Punjab.**—*For week ending 15th March.*—Good rain fell in Shahpur and Peshawar and slight falls are reported from parts of the Umballa, Ferozepore, Multan and Sialkot districts. More is badly wanted throughout the province. Ploughings for the autumn crops continue. The condition and prospects of the standing irrigated crops are generally reported to be average. The crops on unirrigated areas have failed for want of rain in Delhi and are below the average in other districts. The spring crops are being damaged by rats in parts of Umballa and by caterpillars in parts of Ferozepore. The condition of cattle is reported fair in all districts except Delhi. Fodder is scarce in Delhi, Umballa and Shahpur but sufficient elsewhere. Prices are rising in Ferozepore and Rawalpindi, falling in Hissar and Shahpur but are unchanged elsewhere. Wheat is selling from 15½ to 19½, gram 19 to 22, barley 28, bulrush millet 18 to 21, maize 25 to 32½, great millet 23 and rice 13 to 14 seers per rupee.

**Central Provinces.**—*For week ending 14th March.*—The weather is generally clear and the heat is increasing rapidly. The threshing of the autumn crops has almost been completed. The reaping of the spring crops is in full

swing in the north of the provinces and has nearly been completed in the south. The planting of sugarcane is in progress in Chanda and Bhandara. The preparation of land for monsoon sowings has commenced in Wardha. Fodder is scarce in Sambalpur and in the Warda tahsil of Chanda. The price of wheat and gram has fallen in seven and four districts respectively with the gathering of the harvest. The quotations for *juar* (*sorghum vulgare*) and rice are well below the normal almost everywhere. The cheapest prices are:—wheat 19½, gram 32, rice 22 and *juar* 28½ seers per rupee. The dearest prices are wheat 12, gram 16, rice 11 and *juar* 20 seers per rupee.

**Burma.**—*For week ending 11th March.*—In Upper Burma the cultivation of dry weather paddy is progressing favourably. Cotton is being picked in Thayetmyo and the harvesting of early peas and beans, wheat, maize, gram and other miscellaneous island or river side crops has begun in several districts. The standing crops are in good condition. The price of paddy shows a slight increase in Prome, Amherst and Myingyan and a small decrease in Thongwa, Bassein, Pokoko and Mandalay; elsewhere it is stationary.

**Assam.**—*For week ending 14th March.*—Rain fell in all districts and has facilitated the cultivation of garden crops. Linseed and tea have been slightly damaged by hail in south Sylhet. Ploughing for early and late broad cast rice in the Assam Valley districts and for low land winter rice in Sylhet continues. Gathering of mustard and pulses, hoeing of tea and pressing of sugarcane are in progress. The outturn of mustard is below the average. The prospects of sugarcane are generally good. Plucking of tea has commenced in the Nowgong district. Land is being prepared for jute in Goalpara. Fodder is scarce in the Naga Hills. Prices—common rice, Silchar, Dhubri, Gauhati, Tezpur and Nowgong 16, Sylhet 17, Sibsagar 12, and Dibrugarh 13½ seers per rupee.

**Mysore and Coorg.**—*For week ending 15th March.*—**MYSORE:** Prospects of crops are good. Paddy has been harvested in parts of Tumkur. Prices have risen slightly in Kolar and Tumkur and have fallen in Bangalore, Mysore and Shimoga.

**COORG:**—The threshing of rice and picking of coffee have been completed. Water and fodder for cattle are sufficient. Prices of food grains are stationary.

**Berar and Hyderabad.**—*For week ending 15th March.*—**BERAR:** The weather is growing warm. The harvesting of the winter crops is nearing completion. Ploughing of fields for the ensuing monsoon crop is in progress. Fodder and water are scarce in parts of the province. Prices are almost steady.

**HYDERABAD:** No rain fell during the week. The spring harvest is still proceeding. The standing winter rice crop is in fair condition. Prices of grain continue steady. Prices—wheat 9½, coarse rice 10½ and *jowari* 22½ seers per current sicca rupee.

**Central India.**—*For week ending 15th March.*—No rain fell during the week. Agricultural operations are in progress in all Agencies. The standing crops are in fairly good condition. Prices are below normal in Bhopawar, but are normal elsewhere. The condition of opium is good.

**Rajputana.**—*For week ending 15th March.*—Agricultural operations are progressing satisfactorily except in Merwara. The state of the crops is generally good, except in Ajmere-Merwara. Cattle are generally in good condition. Fodder is scarce in Sirohi, Marwar, Kherwara, Meywar, Haraoti, Ajmere, Jeypur and Bikanir. Prices are rising in two States, falling in one and are steady elsewhere. Emigration from the distressed Ajmere villages and from Merwara continues: 112 persons emigrated during the week. The total emigration from Merwara up to date numbers 4,313 persons. The numbers

employed on relief works were—390 in Ajmera, 5,200 in Marwar and 960 in Marwar. The price of grain in Marwar is 15 seers per rupee.

**Kashmir.**—*For week ending 14th March.*—Rain fell twice during the week. The weather is now fine. Prices continue below normal. The price of rice is 27 seers per rupee.

**JAMMU PROVINCE:** *For week ending 15th March.*—Slight rain fell during the week. The condition of the standing crops is fair. Fodder is sufficient. Prices are generally stationary, wheat selling at 18, and maize at 24 seers per rupee.

**Nepal.**—*For week ending 11th March.*—Slight rain fell during the week. The weather is seasonable. The prospects of the wheat crop are good. The price of rice is 9 seers per rupee.

T. W. HOLDERNESS,  
*Secretary to the Government of India.*

SUPPLEMENT TO  
**The Gazette of India.**

No. 12.1      CALCUTTA, SATURDAY, MARCH 25, 1899.

**OFFICIAL PAPERS.**

*A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.*

*Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

*No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.*

## FINANCIAL STATEMENT FOR 1899-1900.

## PART I.

## INTRODUCTION.

In presenting my Financial Statement of March 1898 I alluded to the calamities of famine, war, pestilence, and earthquake which had fallen upon us during the year then closing, and I went on to refer to the promise of brighter times introduced by the abundant harvest of 1897. The recovery of the country has been more rapid than any of us anticipated at the time I allude to; another good harvest has been gathered, and although the plague still casts a shadow over the land, the general condition of the people as evidenced by the Returns of Trade and of Revenue is prosperous, and the famine of 1896 and 1897 is now little more than a memory, its effects being obliterated by the return of prosperous seasons. I cannot, however, pass from the subject without deriving from it one lesson which it seems to me to afford—namely, that the margin between prosperity and adversity in India must be a very narrow one, for if we have learned that one bountiful harvest suffices to restore the country after a widespread and severe famine, we have learned also that the failure of the seasonal rains in a single month of the year is sufficient to set back a full tide of prosperity; and that this is a possibility which in the administration of India, and in its financial administration especially, we dare not leave out of account.

2. In the two calamitous years of which I told the history last March, namely, 1896-97 and 1897-98, I had to shew that the accounts of the Empire were in deficit to the aggregate amount of, as nearly as possible, seven crores of rupees (Rx. 6,988,100 since increased to Rx. 7,064,233). In the two succeeding years (those of which I present the estimates to-day) I am glad to say that this deficit has been, or will be, more than covered, for so complete is the reversal of last year's position that in passing from 1897-98 to 1898-99 we pass from a deficit of Rx. 5,359,211 to a surplus of Rx. 4,759,400, and in my Budget Estimates for next year I anticipate a surplus of Rx. 3,931,600. I lay these figures before the Council at the very commencement of my Statement, as I have no doubt they are anxious to know, as soon as possible, the general drift of the figures which I now proceed to explain in greater detail.

## Accounts of 1897-98.

3. The Accounts of 1897-98 were, as usual, published in the first half of January, and the results then shewn compare as follows with the anticipations formed in March 1898:—

	Revenue.	Expenditure.	Deficit.
	Rx.	Rx.	Rx.
Estimated in March 1898 . . .	96,361,300	101,844,600	5,283,100
Actual Accounts . . .	96,442,004	101,801,215	5,359,211
Accounts { Better + Worse — . }	—119,496	+43,385	—76,111

The differences on the whole were very small, as the accounts under each of the heads of Revenue and Expenditure closely followed the Revised Estimate. Indeed, had it not been that we determined after the close of the year to make certain grants (aggregating Rx. 88,100) to the Provincial Governments of Bombay and of Bengal in further reimbursement to them of their famine expenditure, the difference in the whole account between Revised Estimate and Actuals would have been only Rx. 12,000.

## Revised Estimates of 1898-99.

4. In the Budget Estimate for 1898-99 I estimated the results of the year to be a surplus of Rx. 891,400. But we now find that mainly through abundant revenue, military economies on the North-West Frontier, and very favourable exchange, the result of the year will be a surplus, as I have already stated, of Rx. 4,759,400. I shall explain afterwards that on a review of the financial position of the several Local Governments, whose balances have been exhausted by famine and plague, and who have still to meet pressing demands for expenditure while the expansion of their revenues has for a time been set back by the calamities referred to, we have decided to make them grants in aid of their resources, out of the surplus that has accrued to us on the Imperial account. The total amount of these grants is Rx. 700,000, and thus the surplus of the year is reduced from Rx. 4,759,400 to Rx. 4,059,400. The money may be described as expenditure brought to account by anticipation, that is to say, it goes at present merely to swell Provincial balances, and when actually spent on the purposes in consideration of which it is granted, it has not again to be charged against the surplus of the year, but passes through the Provincial adjusting entry.

5. The detail of the differences between the Revised Estimates for 1898-99, as now presented, and the amounts taken in the Budget Estimates prepared twelve months ago are set out in the following statement:—

## Estimates of 1898-99.

	Budget.	Revised.	Revised Better	Revised Worse.
<b>ENGLAND.</b>				
<b>STERLING IN ENGLAND—</b>				
Revenue	£ 188,000	232,500	44,200	
Expenditure	£ 16,474,800	16,323,700	151,100	
Net EXCHANGE ON ABOVE	Rx. 9,120,500	8,045,000	1,074,900	
<b>Net charges</b>	25,407,000	24,137,800	1,270,200

Irrigation	3,211,500	3,218,200	...	6,700
Military Works and Special Defences	1,135,800	1,113,700	22,100	
Civil Works	4,702,100	4,491,600	208,500	
Army (Ordinary Charges)	16,025,800	16,311,500	84,300	
Warlike Operations	1,458,000	1,023,700	434,300	
<b>Provincial Adjustment—</b>	60,418,300	59,325,800	1,092,500	
Add on (+) or Deduction (—) made for increase or decrease of Provincial and Local Balances	—116,800	+717,900	...	834,700
Special grants to Provincial Governments	...	+700,000	...	700,000
<b>NET EXPENDITURE CHARGED AGAINST REVENUE IN INDIA</b>	60,301,500	60,743,700	...	442,200
<b>Surplus</b>	891,400	4,059,400	3,168,000	

(a) Including interest and receipt under Civil Works.

(b) This entry in the Indian portion of the accounts is a minus one, as the interest passed to the charge of Railway and Irrigation is greater than the whole amount of interest payable in India.

6. The first point to note is that, except for a small falling-off under Stamps and Registration, every one of the Revenue heads shows better results than anticipated in the Budget Estimates. The improvement under Land Revenue is mostly in Burma and the North-Western Provinces. In Opium we have got much better prices in Bengal than we estimated for, namely, Rx. 4,164,000 against Rx. 3,900,000, and in Bombay the low rate of the pass-duty, as compared with previous years, has led to a revival of the export which last year shewed a very considerable decline. The increase in Salt Revenue, which now produces 9 crores against the 8½ which it gave us in the two famine years, is a satisfactory indication of the improvement in the condition of the people, and the Customs Revenue continues to increase as trade continues to flourish.

7. Post Office and Telegraph shew a falling-off, due in the latter case partly to the cessation of hostilities on the North-Western Frontier, but chiefly to the more extensive use of deferred telegrams which are now delivered by hand, and in the former case to reduction of rates of postage. We calculate that by the increase, from one tola to one-and-a-half, of the unit of weight for inland postage we diminish the annual revenue by Rx. 60,000, and by adopting the Imperial Penny Postage (for India, one anna) we give up Rx. 40,000. A considerable portion of this last item will be recovered for us by an arbitration given in our favour, in respect of the distribution, between the English and the Indian Post Offices, of the subsidy charges payable to the Peninsular and Oriental Company and by reductions of the scale of charge in respect of continental transit.

8. Under Railways—Net Earnings—we have received Rx. 778,100 more than we estimated, the important items being—

		Rx.
1. North-Western	Better	410,000
2. Great Indian Peninsula	Better	416,000
3. Bombay, Baroda and Central India	Better	210,000
4. Rajputana-Malwa	Better	70,000
5. Eastern Bengal	Worse	110,000
6. Southern Mahratta	Worse	80,000
7. South Indian	Worse	50,000
8. Madras	Worse	55,000
9. Assam-Bengal	Worse	31,000
Net of the above	Better	780,000

The improvement is due generally to large exports of grain consequent on good winter crops, and in one case to postponement of works of repair and renewal.

The Plague is responsible for the falling-off on the Railways in Southern India.

An inferior jute crop and the postponement of jute deliveries in Calcutta was the cause of the worse result on the Eastern Bengal State Railway, and inclusion in the Working Expenses of the revenue share of repairs of earthquake damages caused the reduction on the Assam Bengal-Railway.

9. On the expenditure side, the first considerable improvement is under Opium, and is due to our failure to obtain as good a crop as we hoped. We have been able to recommence the building up of our Reserve, but the good season for which for many years we have waited has not yet come, and the produce still remains short of our standard. There has also been a considerable saving in the expenditure of the Salt Departments, and fair amounts in the other Revenue Departments. The Civil Departments shew the usual considerable savings in their Budget Estimates, but the amount has been more than swallowed up in the expenditure caused by Plague. The head "Medical"

alone shews an excess over estimate of Rx. 327,800, most of which is in Bombay, and all of which for practical purposes falls on the Imperial Account, for the Provincial Governments are not able to bear the expenditure without assistance in the form of grants from Imperial.

10. The Army expenditure in India (ordinary) is less by Rx. 84,300 than estimated in the Budget, and of the Budget provision of Rx. 1,458,000 in India for Warlike Operations only Rx. 1,023,700 has been spent, the Military authorities having, from the very beginning of the year, found it practicable to reduce the forces maintained on the North-West Frontier.

#### Rate of Exchange.

11. The rate of exchange taken for the purpose of the Budget Estimate last March was 15½ pence (or rather £1 = R15½), that being the rate actually realized in 1897-98. At the opening of the year 1898-99 the current rate was 15½ or 15½, but under the influence of a strong demand in April and May (in each of which months the Secretary of State sold two millions sterling of Council Bills) it quickly rose to 16 pence and over. This demand was due mainly to unusually large exports of Rice, Wheat, and Seeds, the figures of which for the five principal months of export are shown in the following table:—

*Exports (Value in Rupees) of Rice and Wheat (including Flour) and Seeds by Sea from British India during February to June 1896, 1897, and 1898.*

		February.	March.	April.	May.	June.
Rice	1896	2,50,79,157	2,35,35,019	1,28,19,258	87,78,324	1,05,82,552
	1897	2,05,74,378	2,26,73,146	85,42,095	74,73,502	72,22,083
	1898	2,11,33,697	2,39,73,430	1,74,35,984	1,39,93,271	1,00,28,152
Wheat	1896	13,68,050	14,41,371	20,32,888	27,38,742	21,72,359
	1897	3,28,052	1,83,882	3,47,801	5,03,124	6,14,133
	1898	9,99,271	55,10,941	1,09,23,719	2,85,78,799	2,28,64,833
Seeds	1896	68,45,149	96,72,087	1,08,31,633	1,27,32,470	1,10,86,314
	1897	25,08,515	30,02,053	43,92,610	1,09,06,210	85,56,518
	1898	58,76,128	74,23,872	88,45,785	1,25,27,552	1,16,97,108
Total all three.	1896	3,12,92,356	3,46,48,477	2,51,83,779	2,42,49,536	2,38,41,225
	1897	2,34,10,945	2,58,59,081	1,32,82,506	1,88,82,836	1,63,92,736
	1898	2,80,09,096	3,69,08,243	3,72,05,488	5,50,99,621	4,45,90,093

12. The position thus gained at the beginning of the year has never been lost, and the rate has continually fluctuated about 16 pence, now a little over it and now a little under it. In the latter half of the year the rate has never been below 15½ pence. The drawings have now for some time stood at Rx. 700,000 a week, and we expect when the year closes to have remitted by Council Bills £19,000,000 equal to Rx. 28,540,000, giving, as nearly as possible, an average rate of sixteen pence. The Revised Estimates for 1898-99 are accordingly made up at this rate.

13. For next year I have made the modest estimate of 15½d. I fully anticipate we shall realize, as this year, something closely approaching to 16 pence, but our continual practice in India is to avoid sanguine estimating, and following this principle I am loth to take a figure which may have the taint of being, under existing circumstances, the best possible.

14. It may be noted that not only are the remittances of the current year the largest on record (there being hitherto only one year, 1881-82, in which they exceeded £18 millions), but we have in addition to these remittances received in India in exchange for silver at the rate of Rs. 15 per £ sterling, Rx. 2,616,400 of gold which we now hold as part of the currency reserve in addition to Rx. 255,400 similarly held on 1st April 1898.

#### Budget Estimates, 1899-1900.

15. The Budget Estimates of Revenue and Expenditure for the coming year 1899-1900 made up at this rate of exchange shew a surplus of Revenue of Rx. 3,932,600. It will be best perhaps to explain the figures by comparing them with the Revised Estimate for the current year, as exhibited in the Statement in paragraph 5 above.

#### Budget Estimates of 1899-1900 compared with the Revised Estimates of 1898-99.

	Revised, 1898-99.	Budget, 1899-1900.	1899-1900, Better than 1898-99.	1899-1900, Worse than 1898-99.

<b>Surplus</b> . . . . .	4,059,400	3,932,600	...	126,800

(a) Including Interest and Receipts under Civil Works.

16. Under Revenue heads in India the collection of arrears of Land Revenue still goes on, but we do not expect next year quite so much as in the current year. Under Salt and Customs we expect a slight advance over the Budget Estimates of 1898-99, but have not estimated to receive so great an advance over these as we shall certainly receive in the current year. The current prices of Opium warrant our estimating for a considerable increase in the revenue under this head.

17. Under Railways the estimates are for a small advance in net earnings. The details are as follow:—

	Budget, 1898-99. Rx.	Revised, 1898-99. Rx.	Budget, 1899-1900. Rx.
State Railways—Gross	19,382,600	19,695,800	20,237,100
Working Charges	9,777,500	9,876,000	10,047,000
Net	9,612,100	9,819,200	10,190,100
Guaranteed Railways—Net	2,421,000	2,995,000	3,192,500
<b>TOTAL NET</b>	<b>12,036,100</b>	<b>12,814,200</b>	<b>13,382,600</b>

18. The Great Indian Peninsula Railway contributes Rx. 130,000, the Madras Railway Rx. 65,000, and the East Indian Railway Rx. 60,000 of the improvement shewn in Budget, and we expect the Eastern Bengal and Southern Mahratta Railways to recover from their low figures of 1898-99. The increasing mileage of the East Coast Railway will also bring in better returns; on the other hand, there are heavy renewals on the North-Western Railway to be provided for. Under Civil Departments we have to provide for considerable additions to Police expenditure (partly due to Plague); and we have also made fairly ample estimates for Plague expenditure, the charges under "Medical" in India being as follows:—

	Total. Rx.	Including Plague Expenditure. Rx.
1894-95	1,003,438	...
1895-96	1,020,077	...
1896-97	1,065,158	19,000
1897-98	1,323,952	297,000
1898-99, Revised	1,342,900	508,900
1899-1900, Budget	1,678,100	354,200 + 209,500

The last-mentioned Rx. 209,500 is shewn separately, because it is in the nature of a reserve in the "India" Section of the Accounts, and if actually spent, it will not pass under "Medical" in the Imperial Portion of the Accounts, but be dealt with as a transfer.

19. We have increased the total provision for Military Works to Rx. 1,322,300, against expenditure in 1897-98 and 1898-99 of about Rx. 1,168,385 and Rx. 1,197,600, the purpose of the increase being to meet charges likely to fall upon us in respect of places of defence and similar works on the North-West Frontier.

20. The Military Estimates shew large savings in India as compared with the current year, the India figures being—

	Ordinary Expenditure. Rx.	Warlike Operations. Rx.	Total. Rx.
1896-97	17,243,137	18,206	17,261,343
1897-98	16,514,547	3,847,992	20,362,539
1898-99, Budget	16,625,800	1,458,000	18,083,800
1898-99, Revised	16,541,500	1,023,700	17,565,200
1899-1900, Budget	16,873,400	38,900	16,912,300

### No Remission of Taxation.

21. In view of the surpluses as shewn in the Revised and Budget Estimates, the Government of India have carefully considered the question whether they should propose, at present, any remission of existing taxation. The conclusion to which they have come is that any such proposal would be premature, and this mainly on two grounds. The first is that we have, as it were, to make up for arrears. As stated in my opening paragraph, we have had in the past two years deficits aggregating Rs. 7,064,233, and we ought to regard ourselves as under an obligation to recover our position by accumulating counterbalancing surpluses. The second and weightier reason is that we have in contemplation, as is well known, certain extremely important measures of currency reform, which are under the consideration of a Committee sitting at the India Office in London. Whatever the advice of that Committee may be, we consider we are bound to prepare for any measures that may result from it by preserving as strong a financial position as possible, and we consider we would act unwisely if we were to reduce our financial strength by remitting existing taxation and run the risk of finding ourselves, by our own action, less free than we would otherwise be to undertake any measures of currency reform that may seem desirable.

### Railway Construction.

22. I have, in former Financial Statements, referred to the policy recently established of laying down a programme of Railway Construction for three years in advance. The first of these programmes was for the three years ending 31st March 1899. This programme was at first intended to include an expenditure of 27 crores of rupees, but was afterwards extended to 29½ crores. Latterly, however, financial difficulties have obliged us somewhat to curtail the expenditure, and we expect to expend against the programme of 29½ crores the following amounts :—

	Rs.
In 1896-97 (actuals) . . . . .	8,658,800
" 1897-98 ( " ) . . . . .	8,145,500
" 1898-99 (Revised Estimate) . . . . .	8,397,500
<b>TOTAL</b> . . . . .	<b>25,191,800</b>

23. I leave to my Honourable Colleague Sir A. Trevor the task of stating in detail the results of the expenditure. It is sufficient here to set them out in the most general form (the figures of the Railways of Native States and of other Railways that lie outside our accounts being omitted) :—

	Standard Gauge.	Metre Gauge.	Special Gauges.	Total.
<i>March 31, 1896—</i>				
Mileage open . . . . .	10,430	6,842	36	17,308
" under construction . . . . .	1,490	1,086	...	2,576
<b>TOTAL</b> . . . . .	<b>11,920</b>	<b>7,928</b>	<b>36</b>	<b>19,884</b>
<i>March 31, 1899—</i>				
Mileage open . . . . .	11,728	7,522	36	19,286
" under construction . . . . .	814	971	77	1,863
<b>TOTAL</b> . . . . .	<b>12,542</b>	<b>8,493</b>	<b>113</b>	<b>21,148</b>

24. I divide the Railway Construction in the present estimates, for convenience sake with reference to our accounts, into four categories, namely:—

*First.*—State Railway Construction; money found by Government, but also by debentures in the case of the East Indian and Assam-Bengal Railway Companies.

*Second.*—Construction by Assisted and Working Companies out of funds raised by them or in some cases advanced by Government to them. Also Branch Line Companies under a firm guarantee.

*Third.*—Open line capital and new construction by the old Guaranteed Companies.

*Fourth.*—Construction by Companies outside the accounts of the Government, and also construction by Branch Line Companies on rebate terms.

The above classification slightly differs from that of last year's Statement, as under new arrangements every portion of the above comes within the programme, except the fourth category, *viz.*, Company construction outside the accounts of Government, and Branch Line Companies not under firm guarantee.

25. The Estimates of Capital construction for the two years 1898-99 and 1899-1900 now stand as follows, the figures for programme expenditure in the Revised Estimate of 1898-99 being modified so as to correspond with the new classification:—

	Revised Estimate, 1898-99. Rs.	Budget Estimate, 1899-1900. Rs.
<b>FIRST CATEGORY—STATE RAILWAYS—</b>		
Funds available by Famine Grant	695,400	490,000
Grant under—		
48.—State Railway Construction	2,882,200	3,465,000
East Indian Railway Company's Debentures	1,573,800	750,000
<b>TOTAL</b>	<b>5,151,400</b>	<b>4,705,000</b>
<b>SECOND CATEGORY—ASSISTED COMPANIES</b>	<b>3,155,300</b>	<b>3,009,900</b>
<b>THIRD CATEGORY—OLD GUARANTEED COMPANIES</b>	<b>851,600</b>	<b>1,107,800</b>
<b>TOTAL "PROGRAMME"</b>	<b>9,158,300</b>	<b>8,822,700</b>
<b>Add—FOURTH CATEGORY (outside programme)</b>	<b>1,470,100</b>	<b>950,300</b>
<b>TOTAL</b>	<b>10,628,400</b>	<b>9,773,000</b>

*N.B.*—The Chittagong Port Works, connected with the Assam-Bengal Railway, shown in last year's Statement as Miscellaneous Public Improvements, are now included as "Railway Construction."

26. Having now carried to a fairly successful issue this policy of temporary activity in railway construction, we think it wise, both from a railway and from a financial point of view, to curtail for a time the rate of progress of railway construction. The nine or ten crores a year sanctioned in 1897 was not meant to be permanently adopted, and we deem it desirable now to allow a short time for the earning capacity of the lines recently constructed to develop itself, before again undertaking special burdens in the direction of capital outlay upon railways.

27. For these reasons we deemed it advisable to fix about 20 crores as the limit of our expenditure for the next three years; and a programme was accordingly prepared for expenditure as follows:—

	Rs.
1899-1900	6,772,700
1900-1901	6,728,400
1901-1902	6,821,000
<b>TOTAL</b>	<b>20,322,100</b>

but we have had to alter these figures for the following reason. In the Budget Estimates of 1898-99, we proposed to spend under the first three years' programme a sum of Rx. 10,788,900 in the year 1898-99, but the inability of the workshops in England to meet the demands which were made upon them by ourselves and the various constructing companies has reduced the expenditure of 1898-99 to Rx. 8,387,500. Many of the orders, however, will be completed and paid for in 1899-1900, and we have therefore to provide, under the new three years' programme, in 1899-1900 not only the intended Rx. 6,772,700, but a considerable amount in addition, which may be regarded as arrears of the old programme handed on to the new one. The amount estimated for is therefore Rx. 8,822,700.

28. The following are the entries under the first category (State Railways) :—

	Revised, 1898-99.	Budget, 1899-1900.
<i>Expenditure by State Agency—</i>		
Open lines—	Rx.	Rx.
North Western . . . . .	228,300	212,300
Oudh and Rohilkhand . . . . .	95,700	72,800
Eastern Bengal . . . . .	150,500	257,200
East Coast . . . . .	60,000	40,000
Warora Colliery . . . . .	—6,300	—2,100
Umaria Colliery . . . . .	—7,100	—100,000
Stores transactions . . . . .	—15,800	—7,500
TOTAL . . . . .	505,300	472,700

*Lines under construction—*

Rae Bareilly-Benares . . . . .	54,400	4,000
Bhatinda-Ferozepur Conversion . . . . .	64,700	...
Mari-Attock . . . . .	142,500	25,000
Jullundur-Hoshiarpur—(Land) . . . . .	—100	...
Ghaziabad-Moradabad . . . . .	238,000	332,600
Indus Bridge . . . . .	108,400	35,000

Lump deduction on account of probable lapse Reserve . . . . .	250,000 ...	... 162,600
<b>TOTAL FROM IMPERIAL FUNDS</b> . . . . .	<b>5,151,400</b>	<b>4,705,000</b>

29. The items in the second category (Assisted Companies) are :—

	Revised, 1898-99.	Budget, 1899-1900.
	Rx.	Rx.
Bengal-Nagpur . . . . .	1,861,000	1,770,000
Indian Midland . . . . .	203,000	165,000
Burma Railways . . . . .	700,000	800,000
Bengal Central . . . . .	78,100	40,000
Lucknow-Bareilly . . . . .	15,300	6,900
Southern Mahratta . . . . .	44,900	40,000
Mysore . . . . .	35,000	20,000
Hardwar-Dehra . . . . .	150,000	88,000
Bhramaputra-Sultanpur . . . . .	68,000	80,000
<b>TOTAL</b> . . . . .	<b>3,155,300</b>	<b>3,009,900</b>

30. The estimate under the third category (old Guaranteed Companies) provides for :—

	Revised, 1898-99.	Budget, 1899-1900.
	Rx.	Rx.
<i>Open Line Capital—</i>		
Great Indian Peninsula . . . . .	73,600	74,000
Madras . . . . .	20,100	60,000
Bombay, Baroda and Central India . . . . .	459,100	410,000
<i>Extensions—</i>		
Calicut-Cannanore . . . . .	70,600	200,400
Amalner Palgaon-Chalagaon Dhulia . . . . .	128,200	363,400
<b>TOTAL</b> . . . . .	<b>851,600</b>	<b>1,107,800</b>

31. The principal projects classed under the fourth category and outside the "programme" are:—

	Revised, 1898-99. Rx.	Budget, 1899-1900. Rx.
Bengal Dooars Extensions . . . . .	40,000	200,000
Bengal and North-Western Railway Extensions . . . . .	445,000	365,000
Tapti Valley . . . . .	650,000	230,000
South Behar . . . . .	304,000	77,500
Smaller Branch Lines . . . . .	131,100	77,800
<b>TOTAL</b> . . . . .	<b>1,470,100</b>	<b>950,300</b>

#### Capital Expenditure on Irrigation.

32. The amount of Rx. 750,000 has hitherto been provided for expenditure on Irrigation. In 1899-1900 a further amount of Rx. 100,000 is provided under this head. The grant for 1898-99 which was of the usual amount, Rx. 750,000, has not been fully worked up to, owing chiefly to the approaching completion of the Chenab Canal and partly to it not having been found possible to start work on the Jhelum Canal in the early part of the year.

33. The principal works under this head are at present:—

	Revised, 1898-99. Rx.	Budget, 1899-1900. Rx.
Mandalay Canal . . . . .	90,000	100,000
Fatehpur Branch of the Lower Ganges Canal . . . . .	63,600	42,600
Chenab Canal . . . . .	151,500	80,000
Jhelum Canal . . . . .	36,200	210,000
Jamrao Canal . . . . .	142,200	133,900
Other Projects . . . . .	208,700	283,500
<b>TOTAL</b> . . . . .	<b>692,200</b>	<b>850,000</b>

#### Remittance and Debt.

34. The following account shews in a shortened form the requirements of the Secretary of State; the figures are drawn up so as to shew separately the transactions on account of Government, and the transactions arising out of the operations of Railway Companies:—

	Revised, 1898-99. £	Budget, 1899-1900. £
<i>Requirements on Government Account—</i>		
Excess of expenditure on Revenue Account . . . . .	16,091,200	16,324,500
Expenditure not charged to Revenue . . . . .	791,100	682,100
Net payments on Remittance Accounts, etc . . . . .	225,400	268,800
<b>Total Requirements</b> . . . . .	<b>17,107,700</b>	<b>17,275,400</b>
<i>Transactions of Railway Companies—</i>		
Net receipts on account of Capital . . . . .	2,183,100	1,970,000
Payments for Stores, etc . . . . .	2,718,000	3,181,700
<b>Net Outgoings</b> . . . . .	<b>534,900</b>	<b>1,211,700</b>
<b>Net Funds required</b> . . . . .	<b>17,642,600</b>	<b>18,487,100</b>

35. The following figures shew the manner in which the above requirements have been or are to be financed :—

	Revised. 1898-99. £	Budget. 1899-1900. £
By Council Bills (net Remittance) . . .	19,000,000	17,000,000
By addition to Permanent Debt . . .	1,912,800	...
Less reduction of Temporary Debt . . .	-1,500,000	...
By reduction of Cash Balance . . .	...	1,487,100
Deduct—Addition to Cash Balance . . .	-1,770,200	...
	<u>17,642,600</u>	<u>18,487,100</u>

36. In last year's Financial Statement I mentioned that the Secretary of State intended, besides renewing £6,000,000 outstanding temporary debt, to raise £6,000,000 permanent debt. This amount was raised in July in the form of India 2½ per cent stock, but it was issued at a considerable discount (namely at a rate of £88 10s. 5d. per cent), and produced only £5,297,700 in cash. With the money he discharged permanent debt to the extent of £3,384,900, so that the net amount raised by addition to sterling debt was £1,912,800. The Secretary of State has decided that the discount on the loan, viz., £702,300, shall not be charged upon the revenues of the year, but shall be discharged by a Sinking Fund at the rate of interest borne by the loan, viz., 2½ per cent, lasting over 50 years. There are already one or two Sinking Funds of the kind in connection with the sterling debt; £12,622 being the total charge appearing in the Accounts of 1897-98. The amount added by the new Sinking Fund is about £7,000.

37. The heavy drawings of the year, by Council Bills, enabled the Secretary of State to improve upon his intention of renewing the £6,000,000 outstanding temporary debt, and he renewed only £4,500,000 of it. The remainder of the excess of drawings went towards increase of the Cash Balance, which is estimated to stand, on 31st March 1899 at the unusually high figure of £4,304,400.

38. For next year, 1899-1900, the Secretary of State estimates to draw £17,000,000 by Council Bills, and though he does not estimate for any increase or decrease in either permanent or temporary debt, he considers that in view of the high balances which his Estimates, both Revised and Budget, show, he may find it possible to pay off some of the outstanding temporary debt.

39. In March last we estimated that we would have to raise a rupee loan of Rx. 3,000,000 in India, but as the time approached for our doing so, we found both that improved revenues had added to our resources, and the market was not favourable for so large a loan. We therefore limited our proposed loan to an amount of Rx. 1,200,000 under 3½ per cent conditions, and this amount was raised on August 24th at an average rate of R94 12½ annas per cent. The price remained about this figure for some months, but has recently advanced to over par.

40. We reckon that in India we shall be able next year to meet all the demands upon our Treasuries without raising any new debt, but it must be understood that all these announcements about the amount of contemplated remittances and loans are subject to the usual reservation of entire liberty to the Secretary of State to alter his plans as he may find occasion.

#### PROVINCIAL FINANCE, 1892 to 1899.

(The tabulated figures in this part are hundreds of Rx., that is, two ciphers are omitted.)

41. The progress of Provincial Finance is easiest studied by considering separately :—

*First.*—The amount of net Revenue, of which a definite portion settled by the terms of the "Contract" is at the disposal of the Provincial Government for its expenditure on Civil Administration.

*Second.*—The modification of this Provincial share of net Revenue, caused by special arrangements, different in each Province, in connexion with certain portions of Irrigation and Railway Administration, involving in some cases a small net outlay and in some a small net revenue.

*Third.*—The appropriation of the funds thus obtained towards the Provincial Expenditure, and especially the relation between the increase of expenditure and the increase of available funds.

42. The first figures to be set out are, therefore, the totals of the net revenues, that is, the revenues less expenditure directly charged against them. They are as follow, the figures being quite independent of any considerations as between Imperial and Provincial:—

*Total Ordinary Revenues—*

	Contract, 1892.	1892-93.	1893-94.	1894-95.	1895-96.	1896-97.	1897-98.	1898-99, Revised.	1899-1900, Budget.
Central Provinces .	1,243.6	1,244.0	1,231.2	1,171.3	1,252.9	1,089.5	1,048.5	1,322.9	1,398.7
Burma (a) . . .	3,613.3	...	...	...	...	...	3,948.2	4,147.0	4,013.8
Assam . . . . .	814.0	842.9	967.5	997.1	1,003.4	1,023.3	995.8	1,017.3	1,047.7
Bengal . . . . .	7,081.6	7,325.2	7,445.8	7,606.9	7,714.8	7,823.5	7,835.9	7,998.8	8,058.9
North-Western Pro- vinces and Oudh .	7,677.8	7,716.1	7,778.9	7,589.1	7,866.2	6,655.6	7,864.8	8,419.1	8,470.1
Punjab . . . . .	7,060.1	3,133.8	3,261.1	3,223.5	3,290.5	3,224.3	3,409.8	3,561.8	3,530.4
Madras . . . . .	6,817.1	7,106.2	7,469.2	7,645.6	7,719.3	7,458.8	7,263.7	8,015.5	7,988.0
Bombay (b) . . .	5,412.1	5,459.1	5,646.1	5,550.6	5,618.2	5,367.0	5,625.2	5,950.2	5,943.0

(a) The figure against Burma in the column "Contract, 1892" represents the Contract of 1897.

(b) The figures relating to alienated Land Revenue, an entry peculiar to Bombay, are omitted from both sides.

43. The next statement shews the portion of these revenues which, according to the Provincial contract in each case, is credited to Provincial Account. The figures stand as follows, and it may be noted that the revision of the contract made with effect from 1897-98 onward, was such as to cause little change in the total of the Provincial share, except in the two Provinces of Bengal and Madras where it was reduced by Rx. 90,000 and Rx. 130,000 respectively, and in the North-Western Provinces where it was increased by about Rx. 120,000, namely, the cessation of a temporary reduction of Rx. 50,000, and a direct addition of about Rx. 70,000. (The figures are as they stand before the addition of the contributions from Imperial entered at the end of the table in paragraph 47 and the special grants-in-aid and expenditure therefrom of which mention is made in paragraphs 65 and 66 below):—

*Provincial Share of Revenues—*

	Contract, 1892.	1892-93.	1893-94.	1894-95.	1895-96.	1896-97.	1897-98.	1898-99, Revised.	1899-1900, Budget.
Central Provinces .	613.3	652.5	647.3	623.9	619.6	598.9	566.1	713.1	770.8

(a) The figure against Burma in the column "Contract, 1892" represents the Contract of 1897.

44. I offer some comments on these two statements, shewing them in parallel columns :—

	Total Imperial plus Provincial.	Provincial Share only.																		
Central Provinces.	Fairly continuous progress—a small drop in 1894-95 due, as the details shew, to failure of Land Revenue—Recovery in 1895-96. Then a serious loss of Revenue in the two famine years 1896-97 and 1897-98. But complete recovery in the early future is anticipated.	The Province obtained in the earlier years little or no margin of revenue beyond that allowed for in the Contract of 1892, and in the famine years there was very great loss as compared with that standard. If the anticipations for 1898-99 and 1899-1900 are realized, it will be very fairly off.																		
Burma	No figures are here shewn for the years preceding 1897-98, the accounts having been completely changed in that year by the incorporation of Upper and Lower Burma as a single Province of account. The revenue is considerably in excess of that which was taken as the standard for the framing of the Provincial Contract of 1897. The falling-off in 1899-1900 is under "Forests," and may perhaps be due only to cautious estimating.	Revenue considerably in excess of the standard taken for the contract.																		
Assam	Revenue steadily progressive. The effect of the earthquake in 1897-98 is shewn only in a slight slackening of the rate of progress.	Has all along enjoyed a considerable excess of revenue—at present nearly 30 per cent (Rx. 170 to 190 thousands) over the contract figure of 1892. But of this amount Rx. 23,000 represent a special addition made to meet the South Lushai expenditure transferred to Assam.																		
Bengal	Also shews a steady progressive revenue. Owing presumably to the famine the progress from 1896-97 to 1897-98 was rather less than in other years. The falling-off was mainly under "Excise," as Land Revenue in Bengal is little subject to variation in consequence of famine.	<p>The accounts of the Province were greatly affected by the withdrawal from the Province in 1897 of the extremely progressive revenue of the Eastern Bengal Railway the share of Revenue substituted therefor not being so progressive. Combining the ordinary revenue and the Railway account the figures stand thus:—</p> <table><tr><td>Standard of 1892</td><td>2,806,3</td></tr><tr><td>1892-93</td><td>2,662,4</td></tr><tr><td>1893-94</td><td>3,011,0</td></tr><tr><td>1894-95</td><td>3,193,2</td></tr><tr><td>1895-96</td><td>3,235,7</td></tr><tr><td>1896-97</td><td>3,328,0</td></tr><tr><td>1897-98</td><td>3,297,8</td></tr><tr><td>1898-99</td><td>3,248,7</td></tr><tr><td>1899-1900</td><td>3,267,0</td></tr></table> <p>which certainly may be called fairly progressive, the figures of the last two years being due in part, it may be hoped, to caution in estimating. The new contract, commencing from 1897-98, involved a reduction of about Rx 90,00 in the Provincial share.</p>	Standard of 1892	2,806,3	1892-93	2,662,4	1893-94	3,011,0	1894-95	3,193,2	1895-96	3,235,7	1896-97	3,328,0	1897-98	3,297,8	1898-99	3,248,7	1899-1900	3,267,0
Standard of 1892	2,806,3																			
1892-93	2,662,4																			
1893-94	3,011,0																			
1894-95	3,193,2																			
1895-96	3,235,7																			
1896-97	3,328,0																			
1897-98	3,297,8																			
1898-99	3,248,7																			
1899-1900	3,267,0																			

	Total Imperial plus Provincial.	Provincial Share only.
<i>North-Western Provinces.</i>	A fairly progressive revenue till the famine year, then a tremendous falling-off in Land Revenue (1896-97). Partial recovery in 1897-98 and in the following two years very high figures due to recovery of famine arrears.	The unequal operation of the Irrigation account and the change effected in it in 1897 renders it necessary to combine the figures for this Province as in the case of Bengal. They stand thus— Standard of 1892 . . . 2,215.4 1892-93 . . . 2,265.2 1893-94 . . . 2,314.5 1894-95 . . . 2,234.1 1895-96 . . . 2,170.3 1896-97 . . . 2,160.2 1897-98 . . . 2,432.4 1898-99 . . . 2,641.5 1899-1900 . . . 2,632.2 The story of these figures is shortly this,— At first a little improvement over the standard taken for settlement. In 1895-96 a failure of irrigation revenue, 1896-97 famine, and consequent failure of revenue. Thereafter the rapid recovery of the Province and the realizations of famine arrears of revenue bring in ample resources. The new contract, commencing from 1897-98, increased the assets by about Rx. 120,000. The same as in the other column.
<i>Punjab</i>	Steady progress as reckoned over the whole period, but a slight set back in the famine year.	
<i>Madras</i>	Shews a very progressive Revenue, the advance being only temporarily interrupted by famine.	Rapid increase of revenue up till the famine year—from that time figure fairly steady, but not advancing. The Provincial share from 1897-98 onwards would stand about Rx. 130,000 higher but for the revision of contract which came into operation from that year.
<i>Bombay</i>	An increase up to the famine year, then a considerable set back which has not yet been fully recovered.	The same remark as the first one in the case of Madras.

45. The sets of figures which I next shew are those relating to the Irrigation and Railway portion of the Provincial contracts, which I have described as coming in in modification of the amount of ordinary revenue otherwise at the disposal of the several Governments. The amount of modification thus imposed has, except in two cases, only slightly changed during the period under review, and the figures are, therefore, of no great importance except in the cases referred to, namely, Bengal and the North-Western Provinces, and these have been dealt with above:—

#### *Railways and Irrigation Accounts—*

	Contract, 1892.	1892-93.	1893-94.	1894-95.	1895-96.	1896-97.	1897-98.	1898-99. Revised.	1899-1900. Budget.

\* The figure against Burma in the column "Contract, 1892" represents the Contract of 1897.

46. The next step is to examine the expenditure of the various Governments and observe how far they have kept the increase of it within the limits imposed by the increase of revenue. I shew separately the ordinary expenditure and the direct expenditure upon famine and plague.

47. The details are as follow, and the figures have to be compared with the general statement of available resources in the right column under paragraph 44 above:—

*Expenditure Account—*

	Contract, 1892.	1892-93.	1893-94.	1894-95.	1895-96.	1896-97.	1897-98.	1898-99, Revised.	1899-1900, Budget.

\* The figure against Burma in the column "Contract, 1892" represents the Contract of 1897.

48. *Central Provinces.*—The expenditure up to the famine year rose 2 or 3 lakhs (Rs. 20,000 or 30,000) above the standard of 1892; and since, as already observed, there was no margin of revenue, this resulted in the exhaustion of the ample balance, Rs. 205,400 with which the Province started. The strain of the famine year reduced the balance (apart from direct famine expenditure) still further to a deficit of Rs. 52,600 in 1896-97, and a further deficit of Rs. 204,100

in 1897-98, both of which were made up by grants from the Imperial Exchequer. The Province started in 1898-99 without any balance at all, and it is now expected that there will be a deficit in the year of Rx. 11,200, which must again be made up by a grant from Imperial Revenues. In 1899-1900 its estimated expenditure is well within its means.

The Province has taken practically no share of the cost of famine, which has been entirely Imperial—Rx. 1,640,245.

49. *Burma*.—Has not spent up to the rate of its increase of revenue, and has in consequence an ample and increasing balance. It is arranging now to expend part of the amount in meeting certain demands for Provincial Public Works, and has also made other proposals for expenditure on the public services.

50. *Assam*.—Had a comfortable balance, all along, of 10 lakhs (Rx. 100,000) more or less, keeping its increase of expenditure well up to, but not in excess of, its increase of revenue. The repair of earthquake damages imposed heavy charges in 1897-98 and 1898-99, which have largely exhausted the Provincial balance of Rx. 94,400 and absorbed also a grant of Rx. 160,000 by the Government of India; the balance being reduced for 31st March 1899 to about Rx. 25,000. In 1899-1900, after providing for absolutely necessary expenditure for Public Works and for the repair of earthquake damages, the estimates shew a deficit of Rx. 54,900.

The expansion of ordinary expenditure has been very considerable during the period under review.

51. *Bengal*.—The revenue of this Province, as above shewn, has afforded a margin for expansion of Provincial expenditure—namely, Rx. 2,806,300 in 1892 to (say) Rx. 3,300,000 in 1899-1900. The expenditure, however, was kept well in hand, so that the balance increased from Rx. 225,500 in March 1893 to Rx. 582,000 in March 1896. But this high balance sank to Rx. 92,200 two years later, as Rx. 518,400 out of it were spent in direct famine and plague charges. The ordinary expenditure in the two years now under estimate is taken at Rx. 3,141,600 and Rx. 3,272,000, which may be regarded as within the means of the Province, though it leaves a small deficit on the estimates of 1899-1900.

The Imperial Exchequer incurred famine charges in Bengal up to a total of Rx. 576,821 (about half of the total), but did not otherwise contribute by grants-in-aid to the resources of the Province.

The Province of Bengal has not had much plague expenditure to bear out of its own account, but we have made to it in 1898-99 a grant-in-aid of Rx. 20,000 which it will distribute to those Municipalities and Local Bodies whose funds have been most severely affected by expenditure on plague.

52. *North-Western Provinces*.—The Province had the advantage of starting in 1892 with a large balance still remaining on the credit side, but the rate of its annual expenditure was in excess of its annual revenue (having been found by reduction of balances), and when in the year before the famine a very favourable monsoon caused a failure of irrigation revenue (an important item in North-Western Provinces finance), the Province found its balance on March 31, 1896, reduced below the stipulated minimum of 20 lakhs (Rx. 200,000), and, as already said, a rate of current expenditure in excess of its current revenue by between 10 and 15 lakhs. During the strain of the famine year nothing could be done to amend this state of things, and the balance was overspent by Rx. 263,600, the amount being accordingly made up by grants-in-aid out of the Imperial Exchequer in the two years 1896-97 and 1897-98.

Under these circumstances, the Province contributed nothing towards the direct famine expenditure, the whole of which, Rx. 2,064,025, was found out of Imperial resources.

For 1898-99 it stands, as explained, without any balance to its credit, and its estimates stand as follows:—

	1898-99. Rx.	1899-1900. Rx.
Revenue Accounts . . . . .	2,641,500	2,632,200
Expenditure Accounts . . . . .	2,421,500 (a)	2,607,700 (b)
Results . . . . .	+ 220,000	+ 24,500

(a) Includes Rx. 19,800, Plague.

(b) Includes Rx. 20,800, Plague.

The handsome surplus which comes in in 1898-99 is due to the recovery by the North-Western Provinces of the arrears of the revenue due in 1896-97 and 1897-98, in compensation for the loss of which Imperial made the grants-in-aid of Rx. 263,600 above alluded to. In the coming year, 1899-1900, the Government, North-Western Provinces, propose to increase their scale of expenditure all round to a rate which they will not be able to maintain after the arrear collections (which add some lakhs to the present scale of revenue) are exhausted and the revenue falls back to its ordinary amount.

In anticipation of this surplus of 1898-99 and 1899-1900 it was stipulated that the benefit of these arrear collections was (*quoad* the Provincial share) to be considered as not applicable to current expenditure, but to be reserved (to the extent of 75 per cent of it) for building up the exhausted Provincial balance. The Government, North-Western Provinces, have fulfilled this pledge, and are now appropriating these arrears to a temporary increase of expenditure bearing in mind the impending diminution in the amount of their annual income as compared with the figures of 1898-99 and 1899-1900.

53. *Punjab*.—The Province has all along proceeded on fairly prosperous lines. The balances which were continually diminishing before the famine year are now on the rise, and the expenditure is within the amount of revenue available. The Province escaped any severe share in the calamities of 1896 and 1897, and the Imperial expenditure on famine was less than 3 lakhs (Rx. 30,000), the Province itself contributing about 12 lakhs (Rx. 120,000) or, including "Local," nearly 16.

54. *Madras*.—The expanding revenues of this Province have carried it through its period of disaster. It contributed moderately, that is, a total of a little over 20 lakhs (Rx. 200,000), towards its famine expenditure, the Government of India having undertaken all the rest (*vis.*, Rx. 732,995) so as to leave the Province with an opening balance of Rx. 71,800 in 1898-99. The Government of India further propose to make a grant to Madras of the amount of direct famine and plague expenditure incurred by it in 1898-99, namely, Rx. 20,700, and to estimate for next year a similar grant of Rx. 64,100. They also grant a further sum of Rx. 30,000 in 1898-99, placing the amount at the disposal of the Local Government for grants-in-aid to such Municipalities and Local Bodies as have been most affected by plague expenditure. With its famine and plague expenditure thus made up the Province shows a fair surplus on its transactions of 1898-99, and a small deficit in 1899-1900.

The detailed figures are:—

	1898-99. Rx.	1899-1900. Rx.
Revenue Accounts . . . . .	2,655,700	2,632,400
Deduct—Railway and Irrigation Account	310,900	313,900
Net available Revenue . . . . .	2,344,800	2,318,500
Proposed Expenditure, excluding Plague and Famine . . . . .	2,266,300	2,331,200
Plague and Famine . . . . .	20,700	64,100
TOTAL . . . . .	2,287,000	2,395,300

55. *Bombay*.—The continuous advance of the expenditure of the Province while the advance of the revenue was entirely set back by the famine year, has brought a strain upon the finances, irrespective of the direct effect of famine and plague expenditure. The figures may be set out as follows :—

	Revenue Account as modified by Irriga- tion and Railway figures.	Ordinary Expenditure Account.	Excess of Expenditure.
	Rx.	Rx.	Rx.
1892 standard . . . . .	2,409,500	2,409,500	
1892-93 . . . . .	2,410,100	2,434,000	
1893-94 . . . . .	2,475,200	2,455,700	
1894-95 . . . . .	2,480,000	2,526,500	6,200
1895-96 . . . . .	2,604,900	2,560,200	
1896-97 . . . . .	2,403,200	2,588,900	185,700
1897-98 . . . . .	2,483,600	2,605,400	121,800
1898-99 . . . . .	2,560,800	2,534,600	26,200 (Excess of Revenue.)
1899-1900 . . . . .	2,578,400	2,604,700	26,300 (Excess of Expenditure.)

The above figures exclude all direct Famine and Plague expenditure, and shew that the revenue and expenditure were in equilibrium for the first four years of the period under review, but that in the next two (the years of calamity), by reason of the falling-off in revenue, without an intermission of the increase in expenditure, the Provincial balance had to bear a reduction of Rx. 307,500.

The actual condition of the account till the end of 1897-98 was as follows :—

Balance, March 31, 1892 . . . . .	Rx.	407,000
Reduced by excess of ordinary expenditure—	Rx.	
1892-93 to 1895-96 . . . . .	6,200	
1896-97 . . . . .	185,700	
1897-98 . . . . .	121,800	
	313,700	
	93,300	
Further reduction by direct famine and plague expen- diture not included in the above—		
1896-97 . . . . .	35,400	
1897-98 . . . . .	191,500	
	226,900	
Net over-expenditure of balance till 31st March 1898 . . . . .	133,600	
Cancelled by general grant-in-aid in 1897-98 of . . . . .	183,600	
Leaving credit balance on 31st March 1898 of . . . . .	50,000	

The Revised Estimates for Bombay for 1898-99 show :—

Revenues Account . . . . .	2,554,900	Surplus on ordinary account Rx. 26,200.
Irrigation and Railway Account . . . . .	+ 5,900	
Expenditure Account, excluding Plague and Famine . . . . .	2,534,600	
Plague and Famine Expenditure . . . . .	354,800	

56. Putting the figures of the various provinces together, the following shews the facts up to March 31, 1898:—

Statement in Rx.	FAMINE AND PLAGUE EXPENDITURE (DIRECT).		Grants-in-aid by Imperial to Provincial.
	From Imperial sources.	From Pro- vincial and Local sources.	
Central Provinces	1,640,245	8,820	256,700
Burma	54,975	63,336	...
Assam	...	...	80,000 (a)
Bengal	576,821	553,951	...
North-Western Provinces	2,064,025	...	263,600
Punjab	27,502	157,920	...
Madras	732,995	228,601	...
Bombay	1,242,760	27,887	183,600

(a) For earthquake.

57. The Government of Bombay, both in respect of its Provincial account and in respect of its Municipalities, have been very hardly pressed by plague expenditure. They have submitted to us an examination of the financial condition of their principal Municipalities, and we have agreed to their giving out of their general revenues relief to their Municipalities to the extent of Rx. 228,078, of which the greater part goes to the City Corporation. Including this grant from their revenues, the Government of Bombay will have spent in direct charges of famine and plague—

	Famine. Rx.	Plague. Rx.	TOTAL. Rx.
1896-97	24,000	11,400	35,400
1897-98	...	191,500	191,500
1898-99	24,800	330,000	354,800
TOTAL			581,700

Out of the expenditure of the first two years, aggregating Rx. 226,900, the Provincial Government have met out of their ordinary revenues Rx. 43,300, and the balance Rx. 183,600 has been made up by special contributions by Imperial; in the same way its balance of Rx. 50,000, and Rx. 26,200, its surplus of 1898-99, fall far short of the charges Rx. 354,800 of 1898-99, and it is necessary for the Imperial Government to make a further grant-in-aid of Rx. 278,600 leaving the province, on April 1899, with an opening balance of *nil*. The total direct expenditure on plague and famine which has been borne by the province comes to Rx. 43,300 in the first two years and Rx. 76,200 in the last, or Rx. 119,500 in all.

It is anticipated that Rx. 126,400 of Plague expenditure will be incurred in Bombay in 1899-1900, and an equal amount of grant-in-aid from Imperial to Provincial has been estimated for in that year.

58. The grants shewn in the above paragraphs may be regarded as grants in the ordinary way of business, that is, grants made on the principle that in any case of extreme calamity, when Local aid has been exhausted, the charge must fall, as far as possible, on Provincial resources, and when they are exhausted the Imperial Government must bear the burden; and I think a liberal interpretation has been given to this Imperial responsibility, for we have taken over the direct Provincial expenditure on famine and plague of the two Provinces most affected by plague, without insisting upon their first defraying any part of it out of their own balances, and it is our desire at present to go still farther. On one or two past occasions, when Imperial finances have been subjected to great stress, we have called upon the Provincial Governments to give us aid out of their resources,

and under present circumstances, when Imperial finance by the recovery of exchange and from other causes is prosperous, and Provincial finance has been sore smitten by the consequences of famine and plague, we consider that a portion of our surplus cannot be better employed than in restoring the financial condition of the various provinces and relieving them from the financial difficulties which accompany the emergence from a state of famine and plague, so as to enable them to carry on their ordinary administration and meet their ordinary administrative necessities.

59. In the case of Bombay, though, as above described, we have made large grants towards the direct expenditure on famine and plague, yet the effect of these two calamities is still shewn in the falling-off in revenue and in indirect expenditure (on police and the like) which accompanies plague measures. We propose on these considerations to make to Bombay a grant of Rx. 150,000.

60. Bengal has not been affected by plague expenditure to anything like the same extent as Bombay; but, on the other hand, its finances have suffered from the very large extent to which the famine expenditure was met from Provincial and Local resources. We propose to make to it a similar grant of Rx. 150,000. This is in addition to the assistance already undertaken to be given from Imperial sources towards the European General Hospital at Calcutta, and also in addition to Rx. 20,000 mentioned in paragraph 51.

61. In Assam the only immediate difficulties arise in connection with earthquake damages. Towards this we have already given Rx. 160,000, and the Chief Commissioner has asked for Rx. 67,500 more. We propose now to close this account by a grant of Rx. 100,000.

62. The accounts of the Central Provinces are weighted only in respect of the very small balance it at present possesses, and the Estimates of 1898-99, as already stated, produces a deficit of Rx. 11,200; we propose to make it a grant of Rx. 50,000.

63. The claim of Madras arises mainly in respect of the fact that, at the last revision of the Provincial contracts, a larger resumption of revenue was made from it than from any other province. We propose to make a grant to it of Rx. 100,000, besides the above mentioned grants for the Famine and Plague expenditure, namely, Rx. 50,700 in 1898-99 and Rx. 64,100 in 1899-1900.

64. Burma in our opinion requires no assistance, nor, if we make a strict reckoning, do the North-Western Provinces or the Punjab. But the expenditure in these two provinces has been limited by the consideration of their general financial position, and they have also had to bear some expenditure, both direct and indirect, upon plague. We propose to give to the former a grant of Rx. 100,000, and to the latter a grant of Rx. 50,000.

65. All these amounts will be granted in the accounts of the year 1898-99, and the same amount (less the excess expenditure in the Central Provinces, Assam, Bengal, Madras, and Bombay already provided for by the Provincial Governments in their estimates) will be entered in the Estimates of 1899-1900 as expenditure out of Provincial balances under the head of Civil Works,—not as an invitation to the several Local Governments to expend the amounts in that year, but as a permission to them to do so (by re-appropriation or otherwise), if on a consideration of their general financial position and of the necessity of keeping a balance in hand, they deem it advisable. The amounts thus entered include in the case of Bengal and Madras the payments they may make against the grants of Rx. 20,000 and Rx. 30,000 referred to in paragraphs 51 and 54. The Provincial Governments should, however, bear in mind that the grants now made are grants made once for all, and that it will be dangerous for them to take them as warranting any expenditure of a recurring character; also that the Government of India in making the grants admits against itself no liability to make

good to Provincial Governments the loss or expenditure incurred by them in respect of the kinds of expenditure to which it has had regard in assessing the distribution of the grants ; but admits merely that as in times of Provincial financial prosperity it has called upon the provinces to come to the aid of the general exchequer, so in times of Imperial financial prosperity it is reasonable and expedient that it should depart from a strict interpretation of its financial relations to the Provincial Governments and aid them when at the same time they have had, and have, special financial misfortunes pressing on them. Perhaps I may refer in this connexion to paragraphs 127, 128 and 129 of Major Baring's (Lord Cromer's) financial statement of 1883.

66. These several free grants, as they may be called, are specially entered in the figures attached to the Financial Statement and are in addition to those entered at the end of the statement in paragraph 47. They are :—

	Rx.
Central Provinces . . . . .	50,000
Assam . . . . .	100,000
Bengal . . . . .	150,000
North-Western Provinces . . . . .	100,000
Punjab . . . . .	50,000
Madras . . . . .	100,000
Bombay . . . . .	150,000
<b>TOTAL . . . . .</b>	<b>700,000</b>

67. We have made fairly ample provision next year, namely, Rx. 126,400 in connection with the estimates of Bombay, Rx. 64,100 in Madras, and Rx. 209,500 not yet appropriated, for expenditure on combating the plague, which we may not unlikely have to meet in the future out of Imperial resources as we have done in the past. But we are not prepared, in a general way, to pay, out of Imperial resources, all the direct expenditure which the plague may cause, or to relieve Municipalities and other Local Bodies from the burden which necessarily falls upon them in respect of sanitary and medical expenditure caused by the approach or the advent of plague. Still less can we undertake to make up to Provincial Governments the excess expenditure which may have to be incurred under Police or in the other ordinary departments of Provincial Administration, or invite them to deal with ordinary administrative demands upon them with the same freedom which might be possible and even advisable, were we not all in the presence of a threatening calamity that necessitates our husbanding our resources as far as is possible.

### TWENTY YEARS' FINANCE.

68. Following up a purpose which I set before myself in last year's Financial Statement, I published, contemporaneously with the Finance and Revenue Accounts of last year, a summary of these accounts for the twenty years ending March 31, 1898. The summary was necessarily a statement of figures only, with no attempt at criticism, and I desire here to give some continuous account of the results which the figures shew, and explain where our Revenue and Expenditure have during these twenty years increased or decreased. The plan I adopt is to take one set of figures as the standard of the Revenue and Expenditure at the beginning of the period (or rather, say, for the year 1879), and another set as representing the standard for 1896 (that is, before the famine burst on the land). These seventeen years may be taken as a period of practically continuous financial history.

69. For the first of these two standards I take the average of the figures of 1878-79 and 1879-80. If we eliminate the war figures of these two years, which

in a comparison such as the present ought to be excluded, we obtain the following figures:—

	1878-79. Rx.	1879-80. Rx.
Surplus or Deficit . . . . .	+ 2,134,098	- 1,227,893
War Expenditure, India . . . . .	600,109	4,591,644
"    England . . . . . £	76,110	174,480
Surplus if war be excluded . . . . .	2,810,317	3,538,231

But we have still further to modify these figures by reason of the fact that they did not provide for the full famine liability of Rx. 1,500,000, the Famine Insurance being at the time in suspense, owing to the heavy war expenditure. This consideration adds Rx. 1,187,177 and Rx. 1,396,353 to the expenditure and reduces the surpluses to Rx. 1,623,140 and Rx. 2,141,878; or an average of Rx. 1,882,509.

That is, if we exclude consideration of war expenditure, and if we take Rx. 1,500,000 as the proper annual measure of famine liabilities, we had in 1879 a surplus of revenue of Rx. 1,882,500.

70. To find the similar figure for 1896, I take the figures of the Budget of that year which may be taken as expressing the standard of Revenue and Expenditure at the time. They are as follows, namely:—

	Rx.
Revenue in India (Budget) . . . . .	97,316,800
Expenditure, England, net (Budget) . . . . . £	15,738,300
Exchange (according to rate actually realized) . . . . .	10,222,300
India (Budget), less Rx. 20,000 war . . . . .	69,368,500
Add—Amount wanting to make up Rx. 1,500,000 Famine Insurance . . . . .	500,000
Total . . . . .	95,826,100
Surplus of Revenue . . . . .	1,490,700

71. We have therefore, comparing the standard of 1879 with that of 1896, a slightly worse position in the latter of the two years. I have made a careful analysis both of the increase of Revenue and of the increase of Expenditure between the two years, and I find it to be as follows:—

#### Imperial Account.

	Rx.	Rx.	Rx.
Increase of Revenue under Salt, Customs, Tributes and Miscellaneous . . . . .	...	3,810,000	
Imperial Share of Increase of Revenue under Revenues provincially administered . . . . .	...	5,429,400	
Increase of net Revenues under Post Office, Telegraph, and Mint . . . . .	...	457,400	
Improvements under Debt Services, Railways, and Irrigation (excluding consideration of exchange) . . . . .	6,327,500		
Deduct—Loss by exchange charged against Railway Liabilities . . . . .	2,608,300		
		3,719,200	
Famine Insurance reduced in account by transfer to the preceding head of charges for interest on Indian Midland and Bengal-Nagpur Railways . . . . .	...	401,500	
Cessation of Railway Construction out of Revenue . . . . .	...	845,800	
Total available Improvement . . . . .	...		14,663,300

<i>Absorbed as follows:—</i>	Rx.	Rx.	Rx.
Deterioration of Opium Revenue . . .	...	3,679,800	
Addition to charges for exchange. (Rate diminished from 19'85 pence to 14'45 pence) . . . . .	7,337,300		
<i>Deduct</i> —Amount taken to Railway Account . . . . .	2,608,300		
		4,729,000	
Deficit on Civil Administration of Upper Burma . . . . .	...	455,300	
Army Services: net Charges increased from Rx. 16,693,700 to Rx. 22,167,800 (irrespective of exchange) . . . . .	...	5,474,100	
Charges under "Political" increased from Rx. 427,100 to Rx. 898,700 . . .	...	471,600	
Civil and Miscellaneous charges in India increased from Rx. 1,189,200 to Rx. 1,541,300 . . . . .	352,100		
<i>Less</i> —Savings by decrease under Assignments and Territorial Pen- sions and Stationery . . . . .	223,800		
		128,300	
Sterling Expenditure other than Army, Debt Services, and Railways in- creased (excluding exchange) from £2,486,400 to £2,920,200 . . . . .	...	433,800	
Total . . . . .	...	...	15,371,900
Excess of demand over available means . . . . .	...	...	708,600

#### Provincial Account.

Increase of Provincial share of Reve- nue under Revenues provincially ad- ministered (a) . . . . .	...	4,102,700	
Increase in net charges for Provincial Civil Administration from Rx. 14,374,900 to Rx. 18,160,800 . . .	...	3,785,900	
Balance of increase of Revenue not absorbed . . . . .	...	...	316,800

(a) That is,  $\frac{1}{2}$  of Land Revenue and of Excise:  $\frac{1}{2}$  of Assessed Taxes, Forest, and Registration:  $\frac{1}{2}$  of Stamps.

The deterioration on Imperial Account, Rx. 708,600, less the improvement on Provincial Account, Rx. 316,800, gives a net deterioration of Rx. 391,800, namely, a reduction in the surplus of Revenue from the standard of Rx. 1,882,500 in 1879 to that of Rx. 1,490,700 in 1896.

72. This list shews that the resources made available by increased revenue and careful administration have practically been absorbed by (1) Loss of Opium Revenue, (2) Increase of Exchange Charges, (3) Increase of Military Expenditure, (4) Increase of Political Expenditure, (5) Increase of Provincial Expenditure, i.e., of charges of Civil Administration, (6) Net Charges on account of Upper Burma.

73. On the first two of these no remark need be made here; they are misfortunes we have had to accept. The last may also be passed over without remark; the occupation of Upper Burma was a measure forced upon us by

political necessity, apart from any question of finance. The Province will, we trust, shortly meet the expenses of its civil administration, but naturally it does not as yet fully pay its way. The other three heads call for special explanation.

74. The subject of Military Expenditure is too vast to be entered on in detail. A general explanation of its increase was given by Sir Henry Brackenbury in the Budget Debate of 26th March 1896 and by Sir Edwin Collen on the same date in 1897. In respect of their military charges the Government of India feel the same necessity which presses upon all other Military Powers, and which has imposed upon even the most pacific nations increased burdens. Both our military system in its details and our general military and defensive policy are closely linked with those of England; and we cannot escape the necessity of increasing our defensive expenditure in the same way, though not perhaps to the same extent, that England does.

75. In illustration of this point I present the following figures; the English ones are taken from the Statistical Abstract of the United Kingdom, 1882 to 1896, pages 10 and 11:—

	DEFENSIVE EXPENDITURE, UNITED KINGDOM (a.)			DEFENSIVE EXPENDITURE, INDIA (b.)
	Army.	Navy.	Total.	Army and Military Works.
	£	£	£	Rx.
1882-83	15,133,451	10,259,853	25,393,304	16,928,587
1883-84	16,095,326	10,728,781	26,824,107	18,079,134
1884-85	18,600,338	11,427,064	30,027,402	16,955,165
1885-86	17,027,084	12,660,509	29,687,593	17,340,369
1886-87	18,429,272	13,265,401	31,694,673	19,413,293
1887-88	18,167,196	12,325,357	30,492,553	20,548,766
1888-89	15,919,738	12,999,895	28,919,633	20,305,140
1889-90	17,345,812	13,842,241	31,188,053	20,511,504
1890-91	17,550,023	14,125,358	31,675,381	20,821,160
1891-92	17,258,900	14,150,000	31,408,900	22,570,532
1892-93	17,541,700	14,302,000	31,843,700	23,705,932
1893-94	17,939,700	14,048,000	31,987,700	23,537,693
1894-95	17,899,800	17,545,000	35,444,800	23,966,973
1895-96	18,459,800	19,724,000	38,183,800	23,976,714
1896-97	18,269,800	22,170,000	40,439,800	24,384,447

(a) Excluding Expeditions and Naval Defence Fund.

(b) Excluding Special Defences and the following Expeditions: (1) Egypt, (2) Quetta, (3) Burma, (4) Chin-Lushai, (5) Chitral.

76. The result of these figures is to shew that while the Defence Expenditure in the United Kingdom has increased by 59 per cent, that in India has increased by only 44 per cent, even including the increase due to the fall of exchange, which affects Indian Military Expenditure in a special degree, owing to the

	£		
Net English Expenditure	4,000,000	large proportion of it that is measured by	
British Soldiers' pay	1,590,000	a sterling standard. The statement of	
<b>TOTAL</b>	<b>5,590,000</b>	expenditure in the United Kingdom is free	
		from disturbance by this cause; while, on	
		the other hand, the increase of Indian	
		expenditure includes Rx. 2,526,000 directly	
		due to this cause alone; and if this amount	
		were excluded, the percentage of increase	
		would be reduced to 29.	

77. The two most recent measures causing considerable increase of Military Expenditure were the raising of the pay of native soldiers in 1895, and of that of British soldiers in 1898. The former of these concessions had been delayed on financial grounds for a length of time which all our military advisers considered to be open to objection. The second measure, the increase of British soldiers' pay, is the

result of the determination of Her Majesty's Government on a question of general imperial policy.

78. Under the head of Political Expenditure, the increase measured by percentage is even more considerable; in amount it is Rx. 471,600. A few remarks will shew that this increase has been caused solely by the necessities of external policy. Two-fifths of the whole amount arises from the one item of Rx. 180,000 for the subsidy of His Highness the Amir of Afghanistan; and the Afghan Refugees cost at least Rx. 60,000 more. The period under consideration, moreover, has witnessed the rise and development of the Baluchistan Agency, which now accounts for Rx. 130,000 of the outlay charged under this head; the appointment of an Agent on the Perso-Afghan Frontier (Rx. 13,000); the occupation of the Gilgit and Chitral Frontier (Rx. 16,000); and considerable new expenditure, say, Rx. 40,000, in controlling the tribes and employing levies along the North-Western Frontier. The head "Political" contained also in 1896 Rx. 14,000 expended on the African Coast of the Gulf of Aden (the corresponding revenues are under Miscellaneous), and the scheme of Imperial Service Troops has caused a further increase of Rx. 22,000.

79. I pass to the figures shewn against Provincial (including Local) net expenditure, which has increased during the period under review from Rx. 14,374,900 to Rx. 18,160,800. These are the charges of Civil Administration generally, and under such heads increasing outlay is not only justifiable but inevitable, in every country in which civilization is not stationary or retrograding. The system of Provincial finance is based on the theory that the increase in the Provincial share of the Revenues can be set aside for increase of expenditure upon Civil Administration, and that, if the increase is kept within this limit, we have by this limitation, under ordinary circumstances, sufficiently taken into consideration the financial difficulties arising from falling exchange, from the necessities of Military and Political Expenditure, from wars and famines. We proceed, therefore, on the assumption that there is no objection to the Provincial share of the normal growth of Revenue being, as fast as it accrues, spent on administrative improvements. As has often been pointed out, a Provincial Government can do nothing with its money except spend it; it cannot, for example, utilize a surplus for remission of taxation.

### Conclusion.

80. The statement which I have laid before the Council exhibits, I think, a very favourable condition of Indian Finance. Some of these favourable elements are, I admit, temporary only, and due in a large measure to a specially active trade, others however are permanent and betoken the return of the prosperity and progress which I noted in my statement of March 1896, and which were so rudely interrupted by the outbreak of famine. The plague, though it is a great anxiety to both Imperial and Provincial Administrations, is, financially speaking, well within our power to cope with, and as the first responsibility for the measures taken in connexion with it rests with the Provincial Administrations, I have been particular to examine the position of the Provincial Financial Accounts, and trust that the measures of relief and assistance sanctioned by the Government of India and set out in the statement will enable them to face the difficulties in which they are placed, though I take for granted they do not claim relief from their share in the anxieties which are inseparable from financial administration in India.

## PART II.

## DETAILS OF THE ACCOUNTS AND ESTIMATES.

## Section I.—The Accounts of 1897-98.

81. The Revised Estimate of 1897-98 was framed for a deficit of Accounts of Rx. 5,283,100; in the closed Accounts this figure rises to Rx. 5,359,211, or 1897-98. Rx. 76,111 worse than was anticipated when the Revised Estimate was framed.

The variations between the figures finally entered in the Accounts of the year and those assumed for the purposes of the Budget and the Revised Estimate are explained in the Appropriation Report published in the *Gazette of India* of the 18th instant.

The following statement compares the Revised Estimates with the Accounts of the year:—

		Revised Estimate.	Accounts.	Accounts, better.	Accounts, worse.
<b>REVENUE.</b>					
India	Rx.	96,262,000	96,139,287	...	122,713
England	£	192,000	193,662	1,662	...
Exchange	Rx.	107,500	109,055	1,555	...
<b>TOTAL</b>	<b>Rx.</b>	<b>96,561,500</b>	<b>96,442,004</b>	<b>...</b>	<b>119,496</b>
<b>EXPENDITURE.</b>					
India—					
Imperial, Provincial, and Local	Rx.	77,136,300	76,939,069	197,231	...
Adjustment of Provincial and Local Surplus or Deficit	Rx.	—705,700	—457,678	...	248,022
<b>NET</b>	<b>Rx.</b>	<b>76,430,600</b>	<b>76,481,391</b>	<b>...</b>	<b>50,791</b>
England	£	16,241,000	16,198,263	92,737	...
Exchange	Rx.	9,123,000	9,121,501	1,499	...
<b>TOTAL</b>	<b>Rx.</b>	<b>101,844,600</b>	<b>101,801,215</b>	<b>43,385</b>	<b>...</b>
<b>DEFICIT</b>	<b>Rx.</b>	<b>—5,283,100</b>	<b>—5,359,211</b>	<b>...</b>	<b>76,111</b>

82. The Revenue in India was less than the sum anticipated in the Revised Estimate by Rx. 122,713, and the Expenditure finally chargeable against that Revenue, after making allowance for the adjustment of the sums by which Provincial and Local Revenues were in surplus or deficit, exceeded the forecast by Rx. 50,791. In India, therefore, the Accounts as a whole turn out worse than the Estimate by Rx. 173,504. Against this must be set an improvement in Revenue in England of Rx. 3,217, and a decrease in Expenditure in England of Rx. 94,176—in all Rx. 97,393, including exchange. The sum of Rx. 76,111, being the difference between the results obtained in India and England, represents the total falling-off in the Accounts as compared with the Revised Estimate of the year. 1897-98. General Results.

83. The Land Revenue actually realised fell short of the Revised Estimate by Rx. 248,658. In the North-Western Provinces the collections were over-estimated by Rx. 157,820, and in Bombay by Rx. 104,384; while in Burma a sum of Rx. 46,270 was collected in excess of the Estimate. Owing to the fact that the largest instalment of Land Revenue falls due towards the close of the financial year, there is at all times a difficulty in making a precise forecast of the March collections, and in the past year the Estimate was also indirectly affected by the 1897-98. Revenue in India.

famine, which left it uncertain to the last moment to what extent it would be possible to enforce any given measure of compliance with the revenue demand of the year.

The Opium Revenue proved worse than the Estimate by Rx. 62,528, due to a decline in the exports of Malwa Opium to China. On the other hand, the realisations under Customs show an improvement of Rx. 63,895, and the Railway Revenue rose by Rx. 90,857 owing to a slight increase of traffic on some of the Railways towards the close of the year.

1897-98.  
Expenditure in India.

84. On the Expenditure side the outlay on Famine Relief during the last weeks of the year was less by Rx. 66,112 owing to the cessation of operations earlier than had been anticipated. In the Railway Revenue Account there was a saving of Rx. 125,704 on the Revised Estimate mainly under Working Expenses. Army Expenditure shows an excess of Rx. 62,239 due to increased payments to Native Troops on account of compensation for dearness of provisions and forage.

1897-98.  
Revenue and Expenditure in England.

85. The reduction in Expenditure in England of £92,737, or including Exchange Rx. 94,176, consists for the most part of a saving under Army Charges of £67,773. The increase in Revenue in England comes to the trifling sum of £1,662, or including Exchange Rx. 3,217, and consists mainly of recoveries on account of stores.

86. The Expenditure not charged to Revenue amounted to Rx. 4,328,541 as compared with Rx. 4,604,600 entered in the Revised Estimate.

#### Section II.—Revised Estimate of 1898-1899.

1898-99.  
Statement of the gross figures.

87. The following is a general comparison of the Budget Estimates with the Revised Estimates of 1898-99:—

	Budget.	Revised.	Revised, better.	Revised, worse.
<b>REVENUE.</b>				
India . . . . Rx.	98,791,700	101,217,400	2,425,700	
England . . . . £	188,300	232,500	44,200	
Exchange . . . . Rx.	105,400	116,200	10,800	
<b>TOTAL . Rx.</b>	<b>99,085,400</b>	<b>101,566,100</b>	<b>2,480,700</b>	
<b>EXPENDITURE.</b>				
India—

<b>SURPLUS . Rx.</b>	<b>891,400</b>	<b>4,059,400</b>	<b>3,168,000</b>	

1898-99.  
General features.

88. The leading characteristic of 1898-99 is the rapid recovery of the revenue from the effect of the unfavourable conditions prevailing in the two preceding years. Under all heads of Revenue, except Stamps and Registration, the sums actually realised are largely in excess of the forecast framed a year ago. The general prosperity of the people has added to the receipts under Salt and Customs; abundant harvests have increased the Railway Revenue; Opium has sold for higher prices and has cost less to produce; the burden of famine

relief has been removed; military expenditure has been reduced earlier and to a larger extent than was anticipated; and the charge for exchange has been less by a crore of rupees than that assumed in framing the Budget. The only adverse feature is the revival and extension of plague which has increased the medical expenditure in every Province and injuriously affected some branches of revenue.

89. The Revenue in India is expected to exceed the Budget Estimate by 1898-99. *General Results.*  
 Rx. 2,425,700, and besides this there will be a reduction of expenditure of Rx. 1,006,800 made up of Rx. 518,600 under Army, Rx. 305,200 under Opium, and Rx. 208,500 under Public Works—Buildings and Roads. Of this total improvement in India of Rx. 3,432,500, Rx. 1,534,700 occurs under Provincial and Local, and Rx. 1,897,800 under Imperial. The Revenue in England shows an increase of £44,200, and the Expenditure a decline of £151,100. Adding to these a reduction of the net charge for exchange by Rx. 1,074,900, the final result is an increase of the surplus of the year by Rx. 3,168,000 from Rx. 891,400 to Rx. 4,059,400.

90. The more important increases of Revenue in India occur under the 1898-99. *Increase of Revenue in India.*  
 following heads:—

	Rx.
Land Revenue . . . . .	111,200
Opium . . . . .	349,600
Salt . . . . .	319,200
Provincial Rates . . . . .	92,100
Customs . . . . .	307,900
Forests . . . . .	102,400
Miscellaneous . . . . .	102,100
Railway Receipts . . . . .	884,200
Irrigation Major Works . . . . .	193,200

91. The increase of Rx. 111,200 in the collections of Land Revenue 1898-99. *Land Revenue.*  
 includes the following amounts in excess of the Estimate:—

	Rx.
Burma . . . . .	100,800
North-Western Provinces and Oudh . . . . .	52,000
Bombay . . . . .	33,600

In Burma the continuous expansion of cultivation induced by a fertile soil and light settlements and the revision of assessment-rates have added to the ordinary revenue, and the yield of the Capitation Tax has been raised by the natural increase of population. In the North-Western Provinces and Oudh large sums are expected to be realised on account both of ordinary arrears and of revenue suspended during the famine. The enhanced collections in Bombay include arrears due to plague in some districts and to bad seasons in others; while in Sind the revenue has been raised not only by these causes, but by a favourable inundation greatly extending the area under spring crops.

Account must also be taken of the following decreases:—

	Rx.
Madras . . . . .	32,100
Central Provinces . . . . .	35,000
India . . . . .	10,900

The decrease in Madras is due to a fall in the sales of lands benefited by the Periyar Irrigation Scheme in Madura; the Central Provinces figures are affected by suspensions of revenue and smaller recoveries of arrears; and the decline under India General is caused by the failure of the rains and general scarcity in Ajmir, and by drought, locusts, and low prices in Baluchistan where the Land Revenue is collected in produce.

92. Although the collections of Land Revenue in 1898-99 are expected to exceed the Budget Estimate, the Imperial share of the total collections will be considerably less by reason of the special contributions given in aid of Provincial resources which involve a re-adjustment of the Imperial and Provincial shares of the revenue.

The following table compares the respective shares as they appear in the Budget and Revised Estimates :—

	LAND REVENUE, BUDGET OF 1898-99.		LAND REVENUE, REVISED ESTIMATES OF 1898-99.	
	Imperial share.	Provincial share.	Imperial share.	Provincial share.
	Rx.	Rx.	Rx.	Rx.
Distribution according to Provincial Settlement	16,237,900	11,330,300	16,264,300	11,415,100
Add or Deduct— Special contribution in aid of Plague and Famine expenditure and of General Resources of Provincial Governments	—150,000	+150,000	—1,129,300	+1,129,300
Distribution according to Estimates	16,087,900	11,480,300	15,135,000	12,544,400

The contribution of Rx. 150,000 entered in the Budget Estimate of 1898-99 includes Rx. 80,000 granted to Assam in aid of expenditure incurred on the repair of Earthquake damages, and Rx. 70,000 to Bombay in aid of Plague expenditure. The amount in the Revised, Rx. 1,129,300, is made up as follows :—

	Rx.
General contribution in aid of Provincial resources as stated in paragraph 66 of this Statement	700,000
Special contribution in aid of Earthquake expenditure in Assam	80,000
Special contribution in aid of Plague expenditure by Local Bodies in Bengal	20,000
Special contribution in aid of Famine and Plague expenditure in Madras (Provincial and Local)	30,700
Special contribution in aid of Famine and Plague expenditure in Bombay	278,600
TOTAL	1,129,300

1898-99.  
Opium Revenue.

93. The receipts from Opium in Bengal are likely to exceed the estimate by Rx. 264,500, the bulk of which represents the difference between Rx. 1,000 a chest, the price assumed in the Budget for Bengal Opium, and Rx. 1,055, the average actually realised. At the same time the quantity sold during the last three months of the year has risen by 450 chests, representing an increase in revenue of Rx. 51,600. More favourable conditions in the China market, aided by the reduction of the pass-duty on Malwa Opium from Rx. 600 to Rx. 500 per chest, which took place in October 1897, seem to have brought about a substantial recovery of the trade, though the exports have as yet hardly returned to the

level at which they stood before the great decline of 1896-97 and 1897-98. The result is an increase in the receipts over the estimate of Rx. 84,000.

94. Of the increase of Rx. 319,200 under Salt, the sum of Rx. 215,000, which has been realised in Madras, represents mainly the recovery of revenue deferred under the credit system from the previous year. The revenue brought to account during the year has probably also been to some extent enhanced by the fact that the rise in the price of Government paper during the last few months has tended to discourage resort to the credit system and to stimulate cash sales. 1898-99.  
Salt Revenue.

The receipts of the Northern India Salt Department show an increase of Rx. 52,200 due partly to normal development, but mainly to the revival of trade in Kohat salt consequent on the pacification of the frontier.

95. An increase of Rx. 23,200 in Bengal is due to the receipts under Local having been under-estimated in the Budget. In the North-Western Provinces Rx. 17,100 and in Madras Rx. 22,900 have been added in the collection of arrears, and in Bombay the increase of Rx. 17,600 has followed the rise in Land Revenue. 1898-99.  
Provincial  
Rates.

96. Of the rise of Rx. 307,900 under Customs, Rx. 199,100 occurs in Burma, —Rx. 66,200 under Imports, chiefly Manufactured Articles, Liquors, and Articles of Food and Drink, and Rx. 130,000 under Export Duty on Rice. Bengal accounts for Rx. 105,000 distributed over Articles of Food and Drink, Silver Bullion and Coin, Oils, and Liquors; and Bombay shows Rx. 37,000 comprising considerable increases under Oils, Liquors, Silver Bullion and Coin, Articles of Food and Drink, and Excise on Cotton Goods, and substantial decreases under Manufactured Articles and Import Duty on Cotton Goods. A decline of Rx. 34,200 in Madras occurs under Spirits and Liquors, Imported Cotton Goods, and Miscellaneous Exports. 1898-99.  
Customs Revenue.

97. The increase of Rx. 102,400 under Forests is made up of a rise of Rx. 199,500 in Burma, mainly due to the large demand for, and high market value of teak timber, which has added Rx. 111,500 to the royalty paid by the Bombay-Burma Trading Corporation for the forests from which they derive their supplies. The increase also includes a sum of Rx. 12,000 paid by the same Company in connection with mal-practices committed by their employés. A reduction of Rx. 71,400 in Bombay is ascribed to the depression in trade caused by the continuance of plague, and to the smaller demand for locomotive fuel in Sind and for forest produce in general. 1898-99.  
Forest Revenue.

98. The increase of Rx. 102,100 under Miscellaneous Revenue includes one sum of Rx. 57,400 recovered from the Burma Railway Company for the value of work done by famine labour on the Meiktila-Myingyan Railway, and another of Rx. 37,500 realised in Madras by the sale of cloth manufactured at Government expense during the recent famine in order to afford relief to weavers in distress. 1898-99.  
Miscellaneous.

99. The great rise of Rx. 884,200 in Railway Revenue in India is mainly due to the general development of traffic of all kinds which results directly and indirectly from the opening of new sections of line, and to the large export of grain which was rendered possible by the harvesting of good winter crops. The more important increases occur on the following lines:— 1898-99.  
Railway Revenue.

	Rx.
North-Western . . . . .	310,000
Great Indian Peninsula (net) . . . . .	416,000
Bombay, Baroda and Central India (net) . . . . .	210,000
East Indian . . . . .	200,000
Rajputana-Malwa . . . . .	160,000

and the more important decreases on the following :—

	Rx.
Eastern Bengal . . . . .	110,000
Southern Mahratta . . . . .	115,000
South Indian . . . . .	70,000
Mysore . . . . .	55,000
East Coast, including Bezwada-Madras . . . . .	60,000
Madras (net) . . . . .	55,000

The reduction on the Eastern Bengal State Railway was due to a short jute crop, and that on the Railways in Southern India to the effect of plague on the passenger traffic. The falling-off on the East Coast Railway was caused by delay in opening the Bezwada-Madras Section.

100. The increase of Rx. 193,200 in Irrigation Revenue is distributed as follows :—

	Rx.
North-Western Provinces and Oudh . . . . .	56,200
Punjab . . . . .	120,800
Other Provinces . . . . .	16,200

In the North-Western Provinces the area irrigated during the past *Kharif* season was larger than had been anticipated. A similar expansion of irrigation occurred on the Bari Doab, Sirhind, and Swat River Canals in the Punjab and on the Deccan and Guzarat Canals in Bombay, while in Sind a better supply of water produced an enhanced demand. The receipts were also raised by the recovery of outstanding balances on the Western Jumna Canal and in the Deccan and Guzarat.

101. The only decrease of any moment in the revenue of the current year occurs under the head of Telegraph Receipts, which show a falling-off of Rx. 154,800 made up as follows :—

	Rx.
Indian Telegraph . . . . .	114,400
Indo-European Telegraph . . . . .	40,400

The falling-off under the former head is due partly to the cessation of military operations on the North-West Frontier, but chiefly to the fact that, since the practice of delivering deferred telegrams by hand instead of sending them by post has been introduced, this class of message has gained greatly in popularity, and has to a considerable extent taken the place formerly occupied by ordinary and urgent messages. The decline in the Indo-European receipts occurs in the message traffic with the Indian Telegraph Department transferred at Karachi.

102. The more important increases of expenditure in India are :—

	Rx.
Medical . . . . .	327,800
State Railways: Working Expenses . . . . .	106,100
Guaranteed Companies: Surplus Profits, Land, and Supervision . . . . .	106,100
Mint . . . . .	49,000

103. The large increase under Medical is due to the impossibility of making an accurate forecast of the expenditure required to guard against the spread of the plague in new directions, and to combat the disease where it has once become established. The cost of these operations continues to be far heavier in Bombay than elsewhere, and out of the total increase of Rx. 327,800 in the expenditure entered under Medical no less than Rx. 268,200 has been incurred in that province. The following statement gives an estimate of the cost in each province under Imperial, Provincial, and Local heads of the preventive and remedial

measures undertaken in 1896-97, 1897-98, 1898-99, and contemplated in 1899-1900:—

*Statement of direct and indirect expenditure connected with the plague under the various heads of Accounts for the years 1896-97, 1897-98, 1898-99, and 1899-1900.*

<b>GRAND TOTAL, FOUR YEARS.</b>	358,200	41,200	70,000	79,000	69,200	212,700	839,600	1,570,800

104. The Statement illustrates the gradual spread of plague since its first appearance in Bombay in 1896-97. In that year the measures undertaken to check the progress of the disease cost Rx. 23,700, of which Rx. 18,100 was spent in the area where it was actually prevalent, the balance representing outlay on railway inspection and similar measures designed to guard against its extension to provinces not then infected. In 1897-98 the total expenditure rose to Rx. 348,600, including Rx. 252,000 in Bombay and Sind. In addition to this, Bengal devoted Rx. 32,200 to the development of protective measures on lines of railway and to watching arrivals from infected areas; the North-Western Provinces and Oudh spent Rx. 25,900 in suppressing the outbreak of plague at Hardwar; and the Punjab spent Rx. 15,400 on preventive operations in the districts of Jullundur and Hoshiarpur. In 1898-99 there was a further increase of the total expenditure, as shown in the Revised Estimate, to Rx. 580,900, including Rx. 390,100 in Bombay, Rx. 58,300 in Madras where the plague has appeared in several districts, Rx. 48,100 in the Punjab, Rx. 27,400 in the North-Western Provinces, Rx. 19,600 in Bengal where protective arrangements were maintained and an outbreak occurred in Calcutta, and Rx. 20,200 under India General which includes the cost of combating the outbreak in Bangalore.

105. The estimate for next year amounts to Rx. 617,600, and provides for an increase of expenditure in Madras from Rx. 58,300 to Rx. 147,700; while the charges in Bombay are taken at Rx. 179,400, or Rx. 210,700 less than the Revised figures of the current year. A provision of Rx. 209,500 has been made under India General in order to meet requirements which cannot now be foreseen.

106. During the four years covered by the Statement the total expenditure by Government and District Funds in India amounts to Rx. 1,570,800, to which must be added £22,560 (including Exchange Rx. 34,862) spent in England on payments to doctors and nurses engaged for service in India. Even where plague itself has not appeared the necessity of maintaining inspection camps on the chief lines of communication imposes a severe burden on Provincial finances and strains the resources of the medical staff. The Statement takes no account of the heavy expenditure incurred by Native States and Municipalities except in so far as it includes grants made by the Bombay Government in aid of municipal outlay on plague.

The expenditure from the Home Treasury on account of pay, passage, etc., of medical officers and lady nurses in each of the four years has been or will be as follows:—

	Sterling. £	Exchange. Rx.	Total. Rx.
1896-97 . . . . .	1,013	669	1,682
1897-98 . . . . .	11,247	6,333	17,580
1898-99 (Revised) . . . . .	5,300	2,700	8,000
1899-1900 (Budget) . . . . .	5,000	2,600	7,600
<b>TOTAL</b> . . . . .	<b>22,560</b>	<b>12,302</b>	<b>34,862</b>

1898-99.

State Railways:  
Working Expenses.

107. The rise in the Working Expenses of State Railways represents for the most part the cost of earning the increased revenue mentioned in paragraph 99 above. It is due chiefly to the heavier traffic worked, the greater lengths of mileage open, and to more extensive renewals of stock and permanent-way. Some lines have also had to provide for special repairs of the damage caused by the earthquake of 12th June 1897 and by floods. The more important increases occur on the following Railways:—

	Rx.
East Indian . . . . .	190,000
Rajputana-Malwa . . . . .	90,000
Assam-Bengal . . . . .	36,000

These are, however, to some extent counterbalanced by a decrease in the Working Expenses of the other lines noted below :—

	Rx.
North-Western . . . . .	100,000
East Coast, including Bezwada-Madras . . . . .	40,000
Southern Mahratta . . . . .	35,000
Mysore . . . . .	23,000
Oudh and Rohilkhand . . . . .	20,000

108. The increase of expenditure under Surplus Profits, Land, and Supervision is made up of an increase under Surplus Profits of Rx. 197,300 and a decrease under Land and Supervision of Rx. 91,100. Under the former head no provision was made in the Budget Estimate for the payment of surplus profits to the Madras Railway Company, and the goods earnings of the Bombay, Baroda and Central India and the Great Indian Peninsula were under-estimated. The charges under Land and Supervision are reduced owing to less land being taken up for the Calicut-Cannanore Branch in Madras and certain minor lines in Bombay than had been originally expected.

109. The increase in Mint expenditure occurs partly under temporary establishment and overtime allowances for the recoinage of Bhopal and Kashmir rupees—an outlay more than counterbalanced by an increase in the Mint receipts. But the major portion of the increase is due to a loss of Rx. 40,000 on copper coinage in 1898-99. The gain or loss on copper coinage represents the difference between the face value of the coins actually put into circulation and the cost of making and distributing them. Of the enormous quantity of copper coin issued in the famine years for relief payments, a large proportion is now returning from circulation because it is in excess of the normal requirements of the people. The Estimate provides for the resulting loss on the coins so returned.

110. The more important decreases of expenditure occur under the following heads :—

	Rx.
Land Revenue . . . . .	59,600
Opium . . . . .	305,200
Salt . . . . .	53,400
Education . . . . .	60,300
Political . . . . .	83,000
Subsidised Railway Companies : Land and Subsidy . . . . .	81,200
Civil Works . . . . .	208,500
Army . . . . .	518,600

111. The decrease of Rx. 59,600 under Land Revenue occurs for the most part under the heads of Salaries, Exchange Compensation Allowance, Establishments, and Savings under Survey and Settlement in the North-Western Provinces, the Punjab, and Burma. The decrease of Rx. 15,400 in Madras is mainly under Local, and arises from delay in giving effect to a scheme for raising the pay of village accountants.

112. Under Opium the reduction of Rx. 305,200 in the estimated expenditure is almost wholly under Payments to Cultivators, which vary from year to year with the yield of the crop. The greater part of it occurs in Behar, where the sums likely to be required seem to have been greatly over-estimated.

113. Of the decline of Rx. 53,400 under Salt, Madras accounts for Rx. 25,100, more than half of which is under the Purchase and Freight of Salt. A decrease of Rx. 12,500 in Bengal is due to the whole of the Preventive Staff sanctioned for Orissa not having been appointed during the year. A similar decline in the expenditure of the Northern India Salt Department is due to smaller payments of salaries, reduction of charges for manufacture, and to the abolition of the Indus Preventive Line.

1898-99.  
Education  
Expenditure.

114. The decline of expenditure on Education is largest in Bengal (Rx. 17,200), owing to the charges on account of salaries being over-estimated, and in Bombay (Rx. 12,700) where the outlay was affected by the prevalence of plague.

1898-99.  
Political  
Expenditure.

115. Of the reduction of Rx. 83,000 under Political Expenditure, more than half is due to the subsidy to the Amir of Kabul not having been drawn in full. An apparent saving is also caused by the charges for the escort of the Burma-China Boundary Delimitation Commission being adjusted in the Military Accounts.

1898-99.  
Subsidised  
Railway Com-  
panies: Land and  
Subsidy.

116. The decrease in the payments to Subsidised Railway Companies occurs wholly in the item of land, and is due to the programme of the year not having been worked up to in the case of the Bengal and North-Western, Bhagalpur-Baidyanath, Mymensingh-Jamalpur, Amritsar-Sarhali, Jullundur-Hoshiarpur, and several other Railways.

1898-99.  
Civil Works.

117. Of the entire saving of Rx. 208,500 anticipated under the head of Civil Works, Rx. 118,800 occurs in the Local Section of the Estimates, and is due partly to the failure of District Boards to work up to their estimates, and partly to the estimates themselves having been revised in Bombay and Madras in order to provide funds for plague purposes. The former cause accounts for differences of Rx. 35,000 in Bengal, Rx. 21,400 in the North-Western Provinces and Oudh, and Rx. 12,400 in Burma; and the latter for decreases of Rx. 26,100 in Bombay, and Rx. 22,000 in Madras.

In the Provincial Section the savings amount to Rx. 69,600, of which the North-Western Provinces and Oudh contribute Rx. 9,000, Bombay Rx. 13,500, and Madras Rx. 18,400. In the North-Western Provinces the decrease is due partly to expenditure proceeding at a slower rate than was expected, and partly to the transfer of the Ghazipur Steam Ferry to the Bengal and North-Western Railway. In Bombay grants were reduced on general financial grounds after the Budget was passed, and in Madras savings were caused by a transfer to the Educational Department and by the non-payment of grants to Municipalities for water-supply projects.

1898-99.  
Army  
Expenditure.

118. The large decrease of Rx. 518,600 in Army Expenditure in India comprises the following important reductions:—

	Rx.
Military operations and special services due to the demobilisation of the Tirah Expeditionary Force in April 1898, and the substitution of the Khyber Brigade with moveable column for the Khyber Force as originally constituted . . . . .	291,100
Saving on Exchange Compensation Allowance owing to the rise in exchange . . . . .	41,200
Reduced expenditure under Army and Garrison Staff and Regimental Pay and Allowances with reference to recent actuals . . . . .	24,500
Saving arising from the short strength of the Army . . . . .	55,700
Saving on account of Troops serving in East Africa and Mauritius and charged to the Imperial Government . . . . .	33,400
Transfer to the Civil Estimates of charges for the pay of officers on plague duty . . . . .	24,100
Lapse of provision for increase of Commissariat-Transport Officers . . . . .	20,000
Reduced price of food and forage . . . . .	65,000

119. One cause of saving which affects not only Army Expenditure, but most of the important heads of Expenditure in India, is the rise in the rate of exchange, on the basis of which the Exchange Compensation Allowances have been calculated. The average rate assumed in the Budget Estimate of 1898-99 for this calculation was  $15\frac{1}{2}d.$ ; but the four quarterly rates with reference to which the allowances have been actually paid are  $15\frac{3}{4}d.$ ,  $15\frac{1}{2}d.$ ,  $15\frac{1}{4}d.$ , and  $15\frac{1}{2}d.$ , yielding an average for the whole year of  $15\frac{1}{4}d.$  The consequent saving amounts to Rs. 119,000.

1898-99.  
Exchange  
Compensation  
Allowances.

120. The Sterling receipts are expected to exceed the Budget Estimate by £44,200. The three important items composing this increase are: £18,000 under Interest on temporary investments of Cash Balance, the rates of interest realised being higher; £9,000 representing larger miscellaneous receipts connected with the supply of stores to India; and £10,400 under Army receipts, mainly in connection with the Indian Troop Service and other effective services.

1898-99.  
Revenue in  
England.

121. The Sterling expenditure is expected to be less than the Budget Estimate by £151,100. The important variations comprising this difference are (1) a reduction of £83,300 in the charge for interest on loans; (2) a saving of £145,200 in the Army effective and non-effective charges; and (3) increases of £36,300 and £24,400, respectively, under Civil Furlough Allowances and Military Works.

1898-99.  
Expenditure in  
England.

The Interest charges are less by £83,300, of which £35,400 represents a decrease in interest on India  $2\frac{1}{2}$  per cent Stock owing to the loan this year not having been issued so early as was expected; £44,900 comes under reduction in interest on India Bills, due to a smaller amount of Bills being issued; while in addition to these savings, £10,000 provided to meet interest on temporary loans from the Bank of England was not required. On the other hand, the discount on the loan of £6,000,000 India  $2\frac{1}{2}$  per cent Stock issued in July 1898 amounted to £702,300. As this sum is exceptionally large, it has been decided to depart from the usual practice of entering the whole of it as a charge on the Revenue of the year, and to reduce the amount of debt incurred in excess of the money actually raised by means of a Discount Sinking Fund spread over 50 years, the rate of interest adopted in the calculation for the Sinking Fund being  $2\frac{1}{2}$  per cent. A sum of £7,000 has accordingly been entered in the Revised Estimate as the first investment towards this Sinking Fund.

As regards Army charges, the reduction in the demands for stores—mainly Ordnance stores—amounted to £105,000, and the payments for pay and pensions of non-effective and retired officers of the Indian Service and for furlough allowances of officers of that service are expected to be less than the Estimate by £88,000. On the other hand, arrear payments of £34,500 due to the War Office for effective and non-effective Army charges of the year 1897-98 have been made in the current year; there has also been an excess charge of £17,000 under the head of Troop Service.

The payments for Civil Furlough and Absentee Allowances have exceeded the Estimates owing to the exceptionally large number of officers on furlough, and the demands for stores required for the Bangalore Water-works have swelled the expenditure on account of Military Works.

122. The net charge for Exchange on Sterling expenditure is less than in the Budget Estimate by Rs. 1,074,900. The net Sterling expenditure is less by £195,300, and the Exchange on this difference at the rate of £1 = R 15.6, the rate of the Budget Estimate, is Rs. 109,400, which is the saving in Exchange due to the decrease in Sterling payments. The direct saving from the rise in the rate of Exchange from £1 = R 15.6 to £1 = R 15 is, therefore, Rs. 965,500.

1898-99.  
Exchange.

## Section III.—Budget Estimate of 1899-1900.

1899-1900.  
Statement of the  
gross figures.

123. The following is a general comparison of the Budget Estimate of 1899-1900 with that of 1898-99:—

		1898-99.	1899-1900.	1899-1900, better.	1899-1900, worse.
<b>REVENUE.</b>					
India . . . . .	Rx.	98,791,700	101,615,900	2,854,200	
England . . . . .	£	188,300	207,100	18,800	
Exchange . . . . .	Rx.	105,400	108,500	3,100	
<b>Total</b> . . . . .	Rx.	99,085,400	101,961,500	2,876,100	
<b>EXPENDITURE.</b>					
India—					
Imperial, Provincial, and Local	Rx.	72,610,100	73,762,600		1,152,500
Adjustment of Provincial and Local Surplus or Deficit . . . . .	Rx.	—116,800	—924,700	807,900

England . . . . .	£	16,474,800	16,531,600		56,800
Exchange . . . . .	Rx.	9,225,900	8,659,400	566,500	
<b>Total</b> . . . . .	Rx.	98,194,000	98,028,900	165,100	
<b>SURPLUS</b> . . . . .	Rx.	891,400	3,932,600	3,041,200	

1899-1900.  
Main features.

124. The year opens with fair promise. Except in limited areas in the Central Provinces and the Punjab the agricultural prospects are good, and the bulk of the population have returned to the standard of living which prevailed before the scarcity compelled them to reduce their consumption of all but absolute necessities. An expansion is accordingly looked for under all the principal heads of Revenues, except Registration fees, which are really payments for services rendered; and Railway receipts, which are a good test of general prosperity, are expected to show a corresponding increase. The only serious rise of expenditure is in the medical charges connected with the plague: the other increases represent improvements of administration, or outlay required to earn increased revenue.

1899-1900.  
General Results.

125. The Revenue in India is expected to exceed the estimated receipts of 1898-99 by Rx. 2,854,200, while the Expenditure, after allowing for the adjustment of Provincial and Local surpluses or deficits, will be increased by Rx. 344,600. In England an improvement of £18,800 in Revenue is anticipated against a rise in Expenditure of £56,800. At the same time the net charge for exchange will be reduced by Rx. 569,600, so that the combined account works out to a surplus of Rx. 3,932,600, being Rx. 3,041,200 in excess of the estimated surplus of 1898-99.

1899-1900.  
Increases of Re-  
venue in India.

126. The following are the most important increases of Revenue in India:—

Land Revenue . . . . .	73,700
Opium . . . . .	673,900
Excise . . . . .	60,900
Provincial Rates . . . . .	91,500
Customs . . . . .	58,200
Assessed Taxes . . . . .	55,900
Forest . . . . .	55,100

Railways—

State, Gross Receipts . . . . .	854,500
Guaranteed, Net Traffic Receipts . . . . .	768,500

Irrigation—

Major Works—Direct Receipts . . . . .	139,800
Land Revenue due to Irrigation . . . . .	71,100

127. The growth of Land Revenue is most marked in Burma, where 1899-1900. Rx. 107,900 is expected to accrue from revision of assessments and increase in Land Revenue. cultivation. In the North-Western Provinces and Oudh Rx. 110,300 will be gained by enhancements of revenue resulting from the regular revision of settlements. An increase of Rx. 34,300 in the Central Provinces is due to provision having been made for the recovery of famine arrears. Decreases of Rx. 113,500 in Madras and of Rx. 25,400 in Bombay are caused by the reduction of the arrear balances which swelled the receipts in the current year added in the latter case to a less favourable inundation in Sind.

128. The Estimate anticipates an increase of Rx. 587,300 in the Opium Revenue in Bengal. Prices show an almost unbroken rise throughout the past year; 1899-1900. Opium Revenue. the average per chest has gone up from Rx. 1,023 in 1897-98 to Rx. 1,055 in the current year and the price realised at the sale of March 1899 is Rx. 1,149 against Rx. 948 at the same time a year ago. Rx. 1,100 has accordingly been taken as the average price for the ensuing year. In Bombay it is assumed that the revival of the trade in Malwa Opium, which has followed on the reduction of duty, will continue unabated, and that the number of chests exported will be the same as in the current year. On this basis an increase in revenue of Rx. 84,000 is looked for.

129. The Excise Revenue has been slow to recover from the depression 1899-1900. Excise Revenue. caused by the famine, and the Estimate anticipates only the moderate increase of Rx. 60,900. To this the North-Western Provinces and Oudh contributes Rx. 67,500 due to the normal growth of revenue and to the introduction of administrative reforms, while Burma, Bengal, and Bombay look forward to increases of about Rx. 25,000 apiece. On the other hand, the actuals of the current year in Madras point to a decline in revenue which is estimated at Rx. 110,000.

130. Of the increase of Rx. 91,500 under Provincial Rates, Bengal contributes 1899-1900. Provincial Rates. Rx. 38,700 arising from the completion of revaluations in the Districts of Dinajpur and Backerganj. In Madras an increase of Rx. 21,600 is looked for from Village Service Funds.

131. In Bengal an increase of Customs Revenue, amounting to Rx. 55,000, 1899-1900. Customs Revenue. is anticipated, mainly under Liquors, Articles of Food and Drink, and Silver Bullion and Coin. In Burma an aggregate improvement of Rx. 51,200 is expected under Export Duty on Rice and various heads of Import Duty, specially Liquors, Articles of Food and Drink, and Manufactured Articles. The Estimate for Madras shows a decline of Rx. 34,200, chiefly under Liquors, Imported Cotton Goods, and Exports.

132. The increase under the head of Assessed Taxes is largest in Bengal 1899-1900. Assessed Taxes. (Rx. 25,000) and in Madras (Rx. 15,000), and is due to progressive revision of the assessments and to general improvement in the administration of this head of revenue.

133. An increase of Rx. 69,700 under Forest Revenue anticipated in Burma 1899-1900. Forest Revenue. really represents a decline from the abnormal receipts for which credit has been taken in the Revised Estimates. The demand for teak at the present high prices is expected to fall off; the Bombay-Burma Trading Corporation will reduce their exports of timber from the Pyinmana forests, and the revenue obtained in the form of royalty will be diminished in proportion.

1899-1900.  
Railway Revenue.

134. The Railway Revenue of the coming year is estimated at Rx. 1,623,000 in excess of the amount taken in the Budget of 1898-99. The forecast is justified by the excellent promise of the spring crops and by the additional mileage likely to be opened for traffic during the year.

1899-1900.  
Irrigation Revenue.

135. The Estimate of Irrigation Direct Receipts for 1899-1900 is based upon the normal expectations of Revenue, and anticipates a falling-off from the exceptionally high returns indicated by the Revised Estimate of the current year. As compared with the Budget of 1898-99, it provides for an increased Revenue of Rx. 139,800, which includes an increase of Rx. 80,200 in the Revenue from the Canals in the Punjab, and Rx. 54,100 from Canals in the North-Western Provinces and Oudh, due in each case to the growth of the demand for canal irrigation.

1899-1900.  
Decrease of Revenue.

136. The only important decrease of Revenue in India occurs under Telegraph Receipts, which show a falling off of Rx. 130,400 as compared with the Budget of 1898-99. This, however, represents an advance of Rx. 24,400 on the Revised Estimate of the current year, and indicates that the growth of operations in India is overtaking the decrease of Revenue brought about for the time being by the cessation of military operations, the extended use of deferred messages, and the falling-off in the Indo-European message traffic transferred at Karachi.

1899-1900.  
Decreases of Expenditure.

137. The chief reductions in Expenditure in India occur under the following heads:—

	Rx.
Army Services . . . . .	1,171,500
Interest on Ordinary Debt . . . . .	202,000
Famine Relief . . . . .	79,400
Construction of Protective Railway . . . . .	178,300

1899-1900.  
Army Expenditure.

138. The following are the principal causes which have contributed to bring about the important decrease of Rx. 1,171,500 in Army charges:—

	Rx.
Reduction of Military Operations and Special Services . . . . .	1,176,500
Saving under pay of British troops due to exchange being taken at 1s. 4d. instead of 1s. 3½d. the rupee . . . . .	120,000
Saving in Exchange Compensation . . . . .	20,800
Saving under Regimental Pay and Allowances . . . . .	45,000
Fall in the prices of food-supplies . . . . .	60,000
Saving due to the cost of the 1st Bengal Infantry stationed at Mauritius being debited to Her Majesty's Government . . . . .	21,200
	<u>1,443,500</u>

Against the above important decreases in expenditure the following increases are provided for:—

Provision of messing allowance made for the whole year instead of for part only as in 1898-99 . . . . .	114,600
Smaller deduction in India on account of excess provision in the Home Estimates . . . . .	48,300
Mobilisation Equipment of the additional corps included among the extra units of the field Army . . . . .	39,500
Reserve of compressed fodder to facilitate mobilisation operations . . . . .	37,600
Re-establishment of Cantonment Hospitals . . . . .	20,700
	<u>260,700</u>

139. As was explained in last year's Financial Statement, the decrease of Interest charges represents for the most part the interest on the difference between the Capital Expenditure on Railways and Protective Works and ordinary loans contracted in India. 1899-1900.  
Interest on Debt.

140. Except in a small portion of the Central Provinces where the people have not yet recovered from the famine of 1897-98, and in the South eastern districts of the Punjab where both the *kharif* and the *rabi* have suffered from want of rain and the area protected by irrigation is small, the prospects of the coming year are excellent, and it has not been found necessary to make any substantial provision for the relief of scarcity. Out of Rx. 85,000 provided last year to meet the probable wants of certain districts in Madras where the cold weather rains had partially failed, only Rx. 1,700 was spent and the small sum of Rx. 5,700 now entered is almost entirely intended to meet the possible requirements of Hissar and the neighbouring districts of the Punjab. 1899-1900.  
Famine Relief.

141. The Budget Estimate of 1898-99 provided Rx. 668,300 for outlay on the construction of Protective Railways, and this was raised during the year to Rx. 695,400 distributed as follows:— 1899-1900.  
Construction of  
Protective  
Railways.

	Rx.
East Coast Railway . . . . .	50,000
Bezawada-Madras . . . . .	559,400
Godavari Bridge . . . . .	166,400
Guntakul-Mysore . . . . .	— 400
South Indian . . . . .	— 200,000
	<hr/>
	695,400

For the coming year the Expenditure has been placed at Rx. 490,000 allotted to—

	Rx.
East Coast Railway . . . . .	40,000
Bezawada-Madras . . . . .	30,000
Godavari Bridge . . . . .	200,000
South Indian . . . . .	50,000
Madura-Paumben . . . . .	100,000
Tinnevely-Quilon . . . . .	70,000
	<hr/>
	490,000

If to this latter sum be added Rx. 370,400, being the net charge for the Indian Midland and Bengal-Nagpur, two Protective Railways constructed by Companies; Rx. 603,900 set apart for Reduction of Debt; Rx. 30,000 allotted for Protective Irrigation Works; and Rx. 5,700 for the relief of distress, the resulting total makes up the sum of Rx. 1,500,000 set apart for expenditure on Famine Insurance.

142. The rate of exchange assumed in the Budget Estimates for 1899-1900 for the purpose of calculating Exchange Compensation Allowances is 15½d. the rupee, and the total saving under the various heads of Expenditure affected by this item of charge, amounts to Rx. 56,400. 1899-1900.  
Exchange  
Compensation  
Allowances.

1899-1900.  
Increases of  
Expenditure in  
India.

143. The chief increases of Expenditure in India anticipated in the Budget occur under the following heads:—

	Rx.
3.—Land Revenue . . . . .	65,600
Police . . . . .	102,600
Medical . . . . .	463,000
Reduction of Debt . . . . .	278,100
State Railways:	
Working Expenses . . . . .	276,500
Interest on Debt . . . . .	98,900
Guaranteed Companies:	
Surplus Profits, Land, and Supervision . . . . .	250,700
Irrigation, Minor Works and Navigation . . . . .	51,500
Military Works . . . . .	163,800
Civil Buildings and Roads . . . . .	648,700

1899-1900.  
Land Revenue  
Charges.

144. The Madras Estimate under 3.—Land Revenue includes an increase of Rx. 38,700 mainly intended to provide for a long standing scheme for the improvement of the position of Taluk Gomastahs, for the revision of Village Establishments, and the extension of Survey and Settlement. In Burma the charges of District Administration are being raised by Rx. 27,800 to meet the increased demands of a young Province with a growing Revenue.

1899-1900.  
Police Charges.

145. In Bengal an addition of Rx. 30,200 has been allotted under Police charges for improving the investigating staff of the District Police, and for strengthening the force in Calcutta. A provision of Rx. 27,200 has been made in the North-Western Provinces for adding to the number of Assistant District Superintendents and introducing reforms in the Rural Police System of Oudh. There are also smaller increases in the Punjab, Madras, Bombay, and Assam due partly to plague charges and partly to the reorganisation of the force and the cost of supplying improved arms and accoutrements.

1899-1900.  
Medical Charges.

146. Every Province, except the Punjab, anticipates a rise in Medical Expenditure, the largest increases being Rx. 131,500 in Madras and Rx. 79,200 in Bombay, both mainly on account of the plague expenditure shown in detail in paragraph 103 above. As the general resources of both these Governments have been seriously reduced by famine and plague, the Government of India have as is explained above, come to their aid with contributions from Imperial Revenues. The specific contributions thus passed in the Estimates through the Land Revenue head are Rx. 64,100 in Madras, and Rx. 126,400 in Bombay. In addition to the increases shown under Provincial expenditure on plague a reserve of Rx. 209,500 has been provided under India General in order to meet any unforeseen necessities which may arise during the year.

1899-1900.  
Reduction of Debt.

147. As no necessity for the relief of Famine is anticipated and the expenditure on Protective Railways and Irrigation Works has been reduced, an additional sum of Rx. 278,100 required to make up the Famine Insurance grant to the full amount of Rx. 1,500,000 will be charged under Reduction of Debt.

1899-1900.  
State Railways.

148. The increase of Rx. 276,500 under the Working Expenses of State Railways is due to provision being made for heavier traffic, a greater length of open line, and extensive renewals of permanent-way and other works which have been left unfinished during the current year.

1899-1900.  
Railway  
Interest.

149. The increase in the Railway Interest represents the interest payable on the new capital outlay to be undertaken on Railways.

1899-1900.  
Guaranteed  
Companies.

150. The increase of Rx. 250,700 under Guaranteed Companies is accounted for by the fact that the moiety of surplus profits payable to the Bombay, Baroda and Central India Railway is estimated at Rx. 187,000 against Rx. 117,000 in

1898-99, while the amount due to the Great Indian Peninsula is expected to rise from Rx. 60,000 to Rx. 270,000. It is improbable that the Madras Railway will earn surplus profits during the coming year, but a small provision of Rx. 10,000 has been made to cover the contribution to the Provident Fund and any small amount of surplus profits that may be declared.

*Surplus Profits,  
Land, and  
Supervision.*

151. The greater portion of the increase under Minor Works and Navigation occurs in Burma and Bombay, and is due to the gradual extension of the works classified under this head.

*1899-1900.  
Minor Works and  
Navigation.*

152. The increase of Rx. 163,800 on account of Military Works includes a sum of Rx. 150,000 which has been added to the ordinary grant for Military Works in order to provide for defensive works beyond the administrative frontier of India.

*1899-1900.  
Military Works.*

153. The increase under Civil Buildings and Roads is occasioned by the fact that the greater part of the free grants made to Provincial Governments in aid of their general resources have been entered under this head with the object of rendering them available for immediate expenditure if the financial position of the Governments concerned admits of it.

*1899-1900.  
Civil Buildings  
and Roads.*

154. The increase of £18,800 in Sterling receipts in England occurs almost entirely under Army Receipts, and is due to larger receipts under the head of Indian Troop Service and larger recoveries on account of the value of clothing, accoutrements, etc., in the possession of Regiments on their transfer from the Indian to the British establishment.

*1899-1900.  
Revenue in  
England.*

155. The Sterling expenditure in England is estimated at £16,531,600 as compared with £16,474,800, the forecast for the current year.

*1899-1900.  
Expenditure in  
England.*

Of the variations which bring out this result, reduced interest payments account for £45,100. The charges on account of the Post Office are less by £17,400 owing to a more favourable adjustment of the cost of the Eastern Mail Service as between the English and Indian Post Offices.

The payments of interest on capital deposited by Railway Companies show an increase of £42,600 due to further deposits of capital made by the East Indian Railway, the Bengal-Nagpur Railway, and the Indian Midland Railway. A decline in the charges on account of the Assam-Bengal Railway is owing to the rate of interest guaranteed on the Company's share capital having been reduced from 3½ to 3 per cent.

The Civil Superannuation and Pension Charges show an increase of £43,300, owing to a gradual increase in the claims to pension.

Under Effective Army charges the total in 1899-1900 is about the same as in the Budget Estimate of 1898-99, but the cost of the Indian Troop Service and the Miscellaneous charges will be less by £8,000, while, on the other hand, the estimate of the payments to the War Office in respect of British Forces serving in India is higher by £9,000.

Under Non-Effective Army Charges there will be a total increase of £21,000 made up of an increase in the payments to the War Office of £37,000, of small increases under Miscellaneous Pensions and other charges aggregating £4,000, and a reduction of £20,000 in the charges for pay and pensions of non-effective and retired officers of the Indian Service.

156. The charge for Exchange on the net Sterling expenditure during the coming year is less by Rx. 569,600 than in the Budget Estimate of 1898-99. The net Sterling expenditure is more than in the Estimate of 1898-99 by £38,000, and the exchange on this difference at the rate of £1=R15'6, being the rate assumed in the Budget Estimate for 1898-99, is Rx. 21,300. The direct saving from the rise in the rate of exchange from £1=R15'6 to 15'7½d. the rupee, the rate taken for the coming year, amounts, therefore, to Rx. 590,900.

*1899-1900.  
Exchange.*

157. Throughout the period covered by the statement the Land Revenue of the area included under India General, has been below the standard of Rx. 175,000 attained in 1893-94. It escaped the influence of the famine of 1896-97, but during the present year there has been a marked drop in the revenue owing to a failure of the rains and general scarcity in Ajmir. An improvement is looked for in the coming year.

158. In the Central Provinces the whole area was affected by famine which began earlier and lasted longer than anywhere else in India. The effect on the Land Revenue was marked and extended over 1896-97 and 1897-98. Since then there has been a return of prosperity and the Revised Estimate includes Rx. 56,000 and the Budget Rx. 36,000 on account of famine arrears. Recent information shows that there has been some failure of crops in the wheat-growing areas of Saugor and Damoh, and the Budget has been framed on more cautious lines than was proposed by the local officers.

159. The Land Revenue in Burma received only a slight check in 1896-97 and then resumed its normal course of steady progress due to extension of cultivation, revision of low assessments based on provisional data, and the enhanced yield of the capitation tax which follows the growth of population in a new Province with large areas of fresh land.

160. Assam was untouched by the famine, and the figures of 1896-97 show an increase in the Land Revenue. In the following year the revenue was affected by the earthquake which reduced for the time being the tax-paying capacity of the people, while in Kamrup and Nowgong large tracts of land have been rendered uncultivable by the sand that has been thrown up. The reduction of revenue from this cause is estimated by the Chief Commissioner at not less than a lakh of rupees. Allowance has been made for this in framing the Budget of 1899-1900.

161. In Bengal the Land Revenue being permanently settled at very low rates is to a great extent beyond the reach of famine, but the calamity of 1896-97, which extended to the whole of North Behar, to a large part of Chota Nagpur and Western Bengal and to isolated tracts in Central Bengal, directly affected the rental of Government Estates where the State is itself the landlord, and reduced the recoveries of survey charges in Behar.

162. Distress in the North-Western Provinces began early and was widely diffused but the recovery of the country has been rapid. The Revised Estimate includes Rx. 440,000 on account of suspensions of revenue, and the Budget anticipates recoveries of Rx. 417,300 on this account besides Rx. 77,800 due to revision of settlements.

163. In the Punjab the revenue rose directly the famine was over, and although during the current year the estimate has not been worked up to and suspensions of revenue have been necessary in Hissar and the neighbouring districts, it is hoped that this will be counteracted by extension of cultivation along the Chenab Canal and in the Montgomery district.

164. The Revenue in Madras is improving in the manner characteristic of the Province. The balance in arrear at the close of 1896-97 has been steadily reduced and the Budget anticipates an increase of Rx. 70,900 from the resettlement of the Kistna and Godavari districts and from extension of cultivation.

165. In spite of famine and plague in Bombay arrears of revenue amounting to Rx. 250,500 have been recovered in the current year and a favourable inundation in Sindh has swelled the revenue by expanding the cultivated area. In the coming year there will be smaller arrears to collect, and the conditions in Sindh are expected to be less favourable, but Rx. 51,000 will be added to the demand by revision of settlements.

166. Throughout the period comprised in the table the revenue derived from the sale of Bengal Opium follows the average price per chest offered at the Calcutta sales, which in its turn is determined mainly by the dollar and tael prices obtained in China. The growing competition of the Chinese drug has prevented the prices in China from rising in proportion to the increased value of the rupee due to the Currency legislation of 1893. The trade has also been handicapped by the uncertainties of exchange and the stringency of the Indian money market. These latter conditions have now improved and somewhat larger stocks are available for the China market. It is therefore hoped that the rise of Opium revenue in the current year, which was due largely to a scanty crop in China, may continue.

The decline in the exports of Malwa Opium which the table brings out, and its recent revival, are due to the same causes as those which affected Bengal Opium. The revival has been helped by the reduction of the pass-duty, which was found to be more than a declining trade could bear, to Rs500 per chest.

The receipts from Excise Opium are governed by the same causes as Excise Revenue generally, but as the consumers of opium are a comparatively well-to-do class, the returns are perhaps somewhat less sensitive to the influence of famine.

167. The main items of expenditure are payments to cultivators, the amount of which varies directly with the number of chests of Bengal Opium produced, and the quantity of Malwa Opium purchased for excise purposes which depends on the anticipated demand. The increase in charges is also due to the fact that the position of the officers of the Opium Department, which had long been admitted to be unsatisfactory, has of late years been bettered.

#### SALT.

	Accounts, 1895-96.	Accounts, 1896-97.	Accounts, 1897-98.	1898-99.		1899-1900, Budget.

<b>TOTAL</b> . . . . .	<b>8,861,845</b>	<b>8,421,705</b>	<b>8,594,225</b>	<b>8,728,000</b>	<b>9,047,200</b>	<b>8,757,200</b>
<b>Charges</b> . . . . .	<b>521,044</b>	<b>573,352</b>	<b>473,747</b>	<b>519,600</b>	<b>466,100</b>	<b>537,300</b>

(a) Chiefly sales on local manufacture.

(b) Chiefly duty on imported salt.

168. The fluctuations of the aggregate Salt Revenue correspond closely to the material condition of the mass of the people who consume salt. A sharp decline in the famine year 1896-97 has been followed by a gradual rise which in the Revised Estimate for the current year exceeded the standard of the revenue of 1895-96. The Bengal statistics, however, follow a somewhat different course. There the receipts rose in 1896-97 and fell in 1897-98 when the revenue of every other Province shows a rise. In explanation of this it may be observed, first, that large portions of the area supplied from Bengal escaped famine altogether, while the cultivating classes found their purchasing power greatly augmented by high prices; secondly, that the demand of 1897-98 was affected by the earthquake and cyclone of 1897; and thirdly, that imported salt is less sensitive to local influences than salt produced in the country.

The increase in the revenue in Northern India during the current year is mainly due to the revival of traffic in Kohat Salt since the cessation of the frontier disturbances. It is doubtful, however, whether the demand will continue on the same scale during the coming year; and reduced receipts are also expected from the salt produced at Sambhar, Didwana and Pachbdra. For Burma and

Bengal the estimate is normal; in Madras it assumes a consumption of about 70 lakhs of maunds. The Bombay estimate has been taken at a moderate figure in view of the uncertainty arising from the prevalence of plague.

## STAMPS.

	Accounts, 1895-96.	Accounts, 1896-97.	Accounts, 1897-98.	1898-99.		1899-1900, Budget.
				Budget.	Revised.	
REVENUE.						
Court Fees and Plain Paper . . . .	3,221,216	3,216,005	3,305,376	3,201,100	3,411,000	3,442,800
Commercial and other Stamps . . . .	1,418,873	1,476,870	1,436,034	1,478,900	1,396,300	1,425,800
Other Revenue . . . . .	83,904	84,867	75,633	75,900	32,600	28,500
TOTAL . Rx.	4,724,053	4,777,742	4,817,043	4,855,900	4,839,900	4,897,100
Charges—						
India . . . . . Rx.	95,158	97,006	97,908	99,700	97,100	100,400
England (Stores) . . . . . £	43,492	40,808	35,814	37,800	36,500	39,300
Exchange . . . . . Rx.	33,044	26,967	20,185	21,100	18,200	20,600
TOTAL . Rx.	171,694	164,781	154,027	158,600	151,800	160,300

169. The Stamp Revenue depends on such a wide variety of transactions that fluctuations in its aggregate yield can hardly be ascribed to any single cause. Scarcity, for example, exercises a converse effect on the demand for the two main classes of Stamps. On the one hand it compels self-denial in the pursuit of litigation, on the other it promotes the execution of documents for the purpose of raising money. Both these tendencies are reflected in the revenue returns. The receipts from Court-fees drop sharply in the famine year, but they recover at once, and their progress is so rapid that its effect was greatly under-estimated in framing the Budget of the current year. In the case of Commercial Stamps the course of development is reversed. The revenue rises in the famine year and falls continuously from that time to a level below that of 1895-96. It was over-estimated in the Budget of the current year, and the figure taken for 1899-1900 represents only a moderate advance on the standard of 1895-96.

## EXCISE.

	Accounts, 1895-96.	Accounts, 1896-97.	Accounts, 1897-98.	1898-99.		1899-1900, Budget.
				Budget.	Revised.	
REVENUE.	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Bengal . . . . .	1,337,850	1,339,931	1,274,775	1,325,000	1,335,000	1,350,000
North-Western Provinces . . . .	540,459	446,444	451,496	490,000	557,500	557,500
Madras . . . . .	1,438,405	1,480,657	1,461,945	1,530,000	1,390,000	1,420,000
Bombay . . . . .	1,164,147	1,099,650	1,094,906	1,120,000	1,146,000	1,146,000
Other Provinces . . . . .	1,232,556	1,238,518	1,206,243	1,252,300	1,302,500	1,304,700
TOTAL . . . . .	5,722,417	5,614,200	5,489,454	5,717,300	5,731,000	5,778,200
Charges . . . . .	207,057	212,855	240,463	250,200	243,000	261,800

170. The progress of Excise Revenue, like the growth of the receipts from Court-fees, is a fair test of the ability of the people to spend money on luxuries. The years of scarcity show accordingly a marked decline, and in Bombay, owing probably to plague and the apprehension to which it gives rise, the

standard of 1895-96 has not yet been regained. In Madras, on the other hand, the effect of the famine and apprehended plague in reducing revenue was for a time neutralised by the extension of the tree-tax system of raising revenue from toddy. This system attained its present maximum application in 1897-98. The increase of charges is due to the adoption of more efficient methods of administration and prevention.

#### PROVINCIAL RATES.

	Accounts, 1895-96.	Accounts, 1896-97.	Accounts, 1897-98.	1898-99.		1899-1900, Budget.
	Rx.	Rx.	Rx.	Budget.	Revised.	Rx.
<b>REVENUE.</b>						
District Local Funds . . . . .	2,184,443	2,086,080	2,269,731	2,326,600	2,402,300	2,374,400
Provincial Cesses, including Famine Insurance . . . . .	664,081	657,260	641,731	671,600	670,000	675,600
Village Service and Patwaris . . . . .	734,443	667,487	678,399	726,400	737,100	748,600
Other Cesses . . . . .	124,038	126,028	133,429	135,400	142,700	152,900
<b>TOTAL</b> . . . . .	3,707,005	3,536,855	3,723,290	3,860,000	3,952,100	3,951,500
<b>Charges</b> . . . . .	52,675	54,301	52,530	52,400	55,700	60,600

171. As was pointed out last year, the revenue from Provincial Rates is determined by the causes affecting Land Revenue, to which in most Provinces the rates bear a definite relation. The rise of revenue in the last three years corresponds therefore to the recovery of Land Revenue from famine influences. It should be added, however, that in tracts where the Land Revenue is permanently settled the revenue from Provincial Rates is increased independently of the Land Revenue by the periodical revaluation of the aggregate rental of a district for the purpose of levying these cesses.

<b>Charges</b> . . . . .	222,948	203,386	211,379	215,400	215,300	232,300

172. The decline in the revenue from import duties in 1896-97 was due not merely to the effect of the famine in reducing the demand for manufactured articles and metals but also to the exemption of cotton yarns from duty and the reduction of the duty on cotton manufactures from 5 to  $3\frac{1}{2}$  per cent. The volume of the trade in cotton goods was not affected until the following year when the imports declined greatly. Since then business has revived, but it is still suffering from the effects of the plague in Bombay, a great producing and distributing centre, and from the overstocking of markets in China and Japan. The revenue from oils is derived chiefly from kerosene. The trade in this article fluctuates greatly and the cheaper oils from Russia and Sumatra are now beginning to compete successfully with the finer American oil. The increase under articles of food and drink is due to the imports of beet-sugar, principally from Germany and Austria, which has been poured into India in considerable quantities. The extraordinary rise in the imports of silver, especially in a year when the effects of the famine were still severely felt, is a phenomenon of which no satisfactory explanation has been found, but the trade is now diminishing and with a large demand springing up for gold, the decrease next year is expected to be considerable. The export duty shows a great contraction in 1896-97 and 1897-98 owing to great quantities of Burma rice, which would otherwise have been exported to foreign countries and have paid duty accordingly, being diverted to India to meet the famine demand. The large exports of 1898-99 followed on a bumper crop in Burma, the chief exporting province, but such a harvest is not expected to recur and the surplus available for export to foreign countries during 1899-1900 is likely to be considerably less than in the previous year.

## ASSESSED TAXES.

	Accounts, 1895-96.	Accounts, 1896-97.	Accounts, 1897-98.	1898-99.		1899-1900, Budget.
	Rx.	Rx.	Rx.	Budget. Rx.	Revised. Rx.	Rx.
Deduction by Government from Salaries, Pensions, and Interest payments . . . . .	447,688	439,259	444,404	479,800	447,400	449,700
Other Collections . . . . .	1,387,501	1,433,550	1,450,971	1,413,100	1,482,700	1,499,100
<b>TOTAL</b> . . . . .	<b>1,835,189</b>	<b>1,872,809</b>	<b>1,895,465</b>	<b>1,892,900</b>	<b>1,930,100</b>	<b>1,948,800</b>
<b>Charges</b> . . . . .	<b>29,868</b>	<b>30,323</b>	<b>32,278</b>	<b>32,700</b>	<b>33,100</b>	<b>33,500</b>

173. The progress of this branch of revenue depends upon the general prosperity of the classes from which it is collected and upon the improvements constantly being introduced in the methods of assessing and levying the tax. The people by whom it is paid are to a great extent either independent of adverse seasonal influences, or derive a profit from their direct or indirect results, and the revenue accordingly does not show any distinct variation in relation to scarcity.

## FOREST.

	Accounts, 1895-96.	Accounts, 1896-97.	Accounts, 1897-98.	1898-99.		1899-1900, Budget.
	Rx.	Rx.	Rx.	Budget. Rx.	Revised. Rx.	Rx.
Revenue . . . . .	1,660,504	1,733,869	1,739,514	1,735,000	1,838,000	1,790,700
Expenditure . . . . .	911,161	993,955	1,001,689	1,050,500	1,010,200	1,067,700
<b>Net</b> . . . . .	<b>749,343</b>	<b>739,914</b>	<b>737,825</b>	<b>685,100</b>	<b>827,800</b>	<b>723,000</b>

174. The revenue under Forest has recovered from the effects of the famine and has resumed its normal rate of progress. The great increase shown in the Revised Estimate of the current year is due to the exceptional demand for teak timber which is not expected to be maintained during 1899-1900.

#### INTEREST RECEIPTS.

176. The reduction in the Interest expenditure which has taken place during the period is due on the one hand to an increase in the amount of interest charged against Railways and Irrigation, and on the other to the reduction in the rate of exchange.

## POST OFFICE, TELEGRAPH, AND MINT.

177. The Postal revenue displays unbroken progress throughout the period, and its advance in the coming year would have been more marked but for the introduction of the one-anna rate of postage to the United Kingdom and British Possessions and the concurrent reduction in the Inland rates of letter postage. At the same time a substantial addition has been made to the expenditure in order to provide for administrative improvements which have been needed for a long time.

178. The Telegraph receipts of 1897-98 were abnormally high owing to the great use of the telegraph in connection with frontier wars, famine, and plague. The decline experienced in the current year and anticipated in the next year is due partly to the cessation of military operations and partly to the increased popularity of deferred telegrams.

179. The increase in the Mint expenditure in 1898-99 is explained in paragraph 109 above.

## CIVIL DEPARTMENTS.

(a) Includes Upper Burma charges up to 1896-97.

180. The progressive increase of total expenditure during the first three years of the period was partially arrested in 1898-99, but has been resumed in the Budget for the current year. This includes a large increase under Medical rendered necessary by the persistence of plague in Bombay and its spread to Madras, and likely to be further enhanced by the recent appearance of the disease in Calcutta. Provision has been made in Burma for the appointment of an additional Judicial Commissioner and for increasing the salaries of the Civil Administrative Staff, while in Bengal two Additional District and Sessions Judges and several temporary Subordinate Judges and Munsifs are to be appointed. The Police are to be strengthened in Bengal, the North-Western Provinces, Madras and Bombay.

183. The Revised Estimate of net receipts on State Railways is better than the Budget Estimate for 1898-99 by Rx. 207,100. The improvement is chiefly on the North-Western and Rajputana-Malwa Railways, due to a large traffic in grain, seeds and cotton.

184. The reduction in the Interest charges in India follows on the smaller outlay on Construction due to short shipments of stores from England. The rise in the rate of Exchange has caused a considerable saving on the Sterling charges, thus making the net result considerably better than in the original estimate.

185. The net receipts from State Railways in 1899-1900 are estimated at Rx. 370,900 higher than the Revised Estimate for 1898-99 in anticipation of a further improvement in traffic based on the excellent prospects of the spring crops and on the additional mileage which it is expected will be opened during the year. The increase in the Estimate of Working Expenses amounts to Rx. 170,400 and is due to heavier traffic, increased open mileage, and provision

for heavy renewals of way and works unfinished in 1898-99. There is also an increase in Interest charges, chiefly in India, due to the progress of Capital Outlay.

186. The Revised Estimate of net receipts from Guaranteed Railways exceeds the original Estimate by Rx. 571,000. This result is due to a marked improvement in goods traffic on the Great Indian Peninsula and Bombay, Baroda and Central India Railways following on an amelioration of the unfavourable conditions which obtained during the last two years, as well as to a reduction in the outlay on renewals on the Bombay, Baroda and Central India Railway.

The increase in Surplus Profits and other charges in India is more than covered by the saving in Exchange on Sterling Interest, leaving the net result, Rx. 606,600, better than the original Estimate.

A further improvement in traffic is expected in 1899-1900, but owing to the increase in Surplus Profits, etc., payable in India, and to the lower rate of Exchange adopted, the net result falls short of the Revised Estimate by Rx. 30,700 only.

#### IRRIGATION.

IRRIGATION.		Accounts, 1895-96.	Accounts, 1896-97.	Accounts, 1897-98.	1898-99.		1899-1900, Budget.

187. The Revised Estimate of direct receipts from Major Works is better than the Budget Estimate for 1898-99 by Rx. 193,200. The increase occurs chiefly in the Punjab and the North-Western Provinces and Oudh, and is due to a larger area having been irrigated in the past *kharif* season than was anticipated. The small increase of Rx. 22,700 in the receipts from Minor Works is due partly to the same cause, and partly to the revenue in the Montgomery District which was hitherto shown as Indirect, having been treated as Direct receipts in accordance with the new Schedule of Water-rates. The Budget Estimate for 1899-1900 has been based on normal demands for water in the *kharif* season of 1899 and besides allowing for an increase of Rx. 30,800 in the revenue from the Chenab Canal due to development of irrigation, provides also for favourable *rabi* irrigation in the Punjab generally. The increase of irrigation in 1898-99 caused a small increase in Working Expenses. The increase of Rx. 27,100 in Working Expenses provided for in 1899-1900 is due to additional lengths of canals and distributaries being opened for irrigation.

188. The financial results obtained during 1896-97 and 1897-98 from Irrigation Works, for which Capital and Revenue Accounts are kept, are given below :—

				1896-97.	1897-98.
MAJOR WORKS.				Rx.	Rx.
<i>Capital Outlay—</i>

<i>Local—</i>						
Expenditure . . . .	1,777,057	1,685,125	1,564,010	1,745,600	1,626,800	1,713,500
Receipts . . . .	292,671	295,521	281,069	293,400	294,700	292,000

189. The expenditure on Provincial and Local Civil Works during 1898-99 is expected to fall short of the Budget Estimate by Rx. 69,600 and Rx. 118,800. This is due partly to the expenditure having been over-estimated in some Provinces, and partly to the restriction of outlay in Bombay and Madras in order to provide funds for expenditure in connection with plague.

190. The estimated expenditure on Military Works in 1899-1900 is higher than the Budget Estimate of the previous year by Rx. 137,200. This is chiefly due to provision to the extent of Rx. 150,000 having been made for defensive works beyond the administrative frontier.

191. Under Imperial Civil Works the expenditure in 1899-1900 is less than the Budget Estimate of the previous year by Rx. 45,600, owing for the most part to the completion of the Bangalore Water-works.

In the Provincial and Local Section of the Estimates, the provision for expenditure depends chiefly on the state of the Provincial and Local balances, and in 1899-1900 considerable additions have been made in the Provincial Section in connection with the free grants to Local Governments of Rx. 700,000, as explained in paragraph 65; the total increase over this year in the Provincial Section is Rx. 790,000, and in the Local Section Rx. 86,700.

192. The variations in the above figures have been explained in paragraphs 118, 120, 121, 138, 154, and 155 above.

### Section VI.—Capital Expenditure on Public Works not charged against Revenue.

193. In paragraph 177 of the Financial Statement for March 1898 the programme sanctioned by the Secretary of State for the construction of Railways in India during the three years 1896-97 and 1897-98 and 1898-99, which involved the expenditure of 29½ crores of rupees, was referred to and explained.

The year 1898-99 being the last of the three years to which the programme of 29½ crores applied, it was considered necessary to prepare a new programme of Railway Construction for the three years from 1899-1900 to 1901-2. The large Cash Balances in the Indian Treasuries, which justified the policy of extending Railway Construction which was adopted in 1895-96, have now been exhausted. The new estimate of expenditure has accordingly been framed at a moderate figure, and a programme for the next three years working up to Rx. 20,322,100 has been sanctioned by the Secretary of State. In consequence, however, of the heavy lapse on the grant for 1898-99, amounting to Rx. 2,401,400, much of which is due to short outlay in England consequent on the engineering strikes and the failure of contractors to complete orders placed with them for stores, it has been decided, with the concurrence of the Secretary of State, to add a sum of Rx. 1,060,000, representing a portion of this lapse, to the grant for 1899-1900. A further addition of Rx. 1,050,000 has since been provisionally sanctioned under certain conditions, subject to the Secretary of State's approval. This new programme includes all Railway Construction for which Government undertakes any responsibility or gives any guarantee, and includes therefore, in addition to the classes of outlay provided for in the earlier programme, (1) the Capital expenditure of the three old Guaranteed Companies, and (2) outlay on branch lines of Railway incurred by Private Companies on firm guarantee by Government. The details of the new programme may be compared as follows with the corresponding expenditure in the three years ending with 1898-99:—

	1896-97, Actuals.	1897-98, Actuals.	1898-99, Revised.	Total.	1899-1900.	1900-1.	1901-2.	Total.

IV.—Branch Lines on firm guarantee.	1,008	124,251	218,000	343,259	168,000	59,200	...	227,200
<b>Total</b>	<b>8,945,225</b>	<b>8,701,274</b>	<b>9,158,300</b>	<b>26,804,799</b>	<b>8,822,700</b>	<b>5,728,400</b>	<b>6,821,000</b>	<b>21,372,100</b>

194. The Budget Estimate of 1898-99 provided for an expenditure of Rx. 13,051,300 on Railways, Irrigation Works, and Miscellaneous Public improvements, including Rx. 1,129,900 on account of expenditure under head of Open Line Capital by the three old Guaranteed Companies and 134,500

for Branch Lines with a firm guarantee. The total sum was distributed as follows:—

	Rx.
34.—Construction of Protective Railways . . . . .	668,300
48.—State Railways—Construction . . . . .	4,951,300
49.—Irrigation . . . . .	750,000
50.—Miscellaneous Public Improvements . . . . .	48,000
Capital of Indian Railway Companies . . . . .	3,475,000
Guaranteed Railways—Open Lines . . . . .	1,125,900
"    "    Extensions . . . . .	70,000
Branch Line Companies . . . . .	334,500
East Indian Railway Company's Debentures . . . . .	944,300
<b>TOTAL</b> . . . . .	<b>13,051,300</b>

195. During the course of the year it became apparent that, owing to the late arrival of English stores consequent on the engineering strikes in England and other causes, it would be impossible to work up to the amount of the Budget Estimate. It was also decided that expenditure on the jetties at Chittagong should not be treated as Miscellaneous Public Improvements not charged to Revenue, but should form a part of the expenditure under "48.—State Railways—Construction," the necessary adjustment in regard to previous expenditure being duly carried out. The Revised Estimates for Capital expenditure on Railways and Irrigation Works during 1898-99 have accordingly been prepared as under:—

	Rx.
34.—Construction of Protective Railways . . . . .	695,400
48.—State Railways—Construction . . . . .	2,882,200
49.—Irrigation . . . . .	692,200
Capital Account of Indian Railway Companies . . . . .	2,937,320
Guaranteed Railways—Open Lines . . . . .	552,800
"    "    Extensions . . . . .	298,800
Branch Line Companies . . . . .	218,000
East Indian Railway Company's Debentures . . . . .	1,573,800
<b>TOTAL</b> . . . . .	<b>9,850,500</b>

or for a sum less by Rx. 3,200,800 than the amount of the Budget Estimate.

In addition to the above sum, the Branch Line Companies not in receipt of a firm guarantee and the Companies whose accounts are outside the Government accounts are expected to spend during the year Rx. 1,470,100 as under:—

Branch Line Companies—

	Rx.
Ahmedabad-Parantij . . . . .	600
Mymensingh-Jamalpur . . . . .	70,000
South Behar . . . . .	204,000
Tapti Valley . . . . .	650,000
	<b>924,600</b>

Outside the Government Accounts—

Bengal and North-Western Railway Extensions . . . . .	445,000
Segowlie-Raksaul . . . . .	20,500
Nilgiri . . . . .	40,000
Bengal Doorgs Extensions . . . . .	40,000
	<b>545,500</b>

Thus making a total of Rx. 11,320,600 for all Railways and Irrigation Works in India.

196. In Despatch No. 351 (Financial), dated 10th November 1898, from the Government of India, to the Secretary of State, it was proposed to incur expenditure to the extent of Rx. 20,322,100 on the construction of Railways during the three years 1899-1900 to 1901-2, distributed as under :—

	Rx.
1899-1900 . . . . .	6,772,700
1900-1 . . . . .	6,728,400
1901-2 . . . . .	6,821,000
<b>TOTAL</b> . . . . .	<b>20,322,100</b>

The Secretary of State's approval to this forecast was conveyed in his telegram dated 10th January 1899.

197. The programme of proposed expenditure during 1899-1900 provides for a sum of Rx. 6,772,700. The reasons for the heavy lapse on the grant for 1898-99, amounting to Rx. 2,401,400, have already been stated in paragraph 193 above, and it has been explained that a sum of Rx. 2,150,000 has been added to the grant for 1899-1900. With this addition the total amount available for expenditure on construction of Railways will stand at Rx. 8,922,700. From this figure, however, it will be necessary to deduct a sum of Rx. 100,000 on account of the Capital cost of the Umaria Colliery which will be transferred to the Rewa Durbar with effect from 1st April 1899. The net amount entered in the Estimates for construction of Railways therefore stands at Rx. 8,822,700.

This sum has been distributed for expenditure on Railways as under :—

	Rx.
34.—Construction of Protective Railways . . . . .	490,000
48.—State Railways—Construction . . . . .	3,465,000
Capital of Indian Railway Companies . . . . .	2,841,900
Branch Line Companies . . . . .	168,000
Guaranteed Railways and Extensions . . . . .	1,107,800
East Indian Railway Company's Debentures . . . . .	750,000
<b>Total amount available</b> . . . . .	<b>8,822,700</b>

In addition to the above, further Capital expenditure will also be incurred in 1899-1900 by Branch Line Companies not in receipt of a firm guarantee, and other Companies whose accounts are outside the Government accounts, to the extent of Rx. 950,300 as under :—

	Rx.
<b>Branch Line Companies—</b>

Bengal Doars Extensions . . . . .	200,000
<b>TOTAL</b> . . . . .	<b>580,700</b>

The provision for Irrigation Works amounts to Rx. 350,000.

The total Capital expenditure on Railways and Irrigation Works in 1899-1900 accordingly amounts to Rx. 10,623,000.

#### 48.—State Railways—Construction.

198. The Budget grant for 1897-98 amounted to Rx. 5,838,600 as under:—

	Rx.
Total provision in Forecast	10,130,000
	Rx.
<i>Deduct</i> —Capital of Indian Railway Companies (Rx. 3,710,000 less Rx. 1,200,000 for East Indian Railway)	2,510,000
Provision for Burma Railways	1,000,000
Additional provision for expenditure in England on the Assam-Bengal Railway (Rx. 199,300—Rx. 80,000)	119,300
	3,629,300
	6,500,700
<i>Deduct</i> —Amount provided for East Indian Railway from debentures raised by Company	662,100
Grant available	5,838,600

The whole amount was shown under the head 48.—State Railways—Construction.

The Revised Estimate provided for a total expenditure of Rx. 3,903,400 under the same head, against which the actual expenditure incurred amounted to Rx. 3,632,005, thus falling short of the Revised Estimate by Rx. 271,395 and of the Budget provision by Rx. 2,206,595.

199. The amounts provided for Railway Construction this year and next are—Revised Estimate, 1898-99, Rx. 5,151,400, and Budget Estimate, 1899-1900, Rx. 4,705,000. These figures include provision to the extent of Rx. 695,400 and Rx. 490,000, respectively, under the head 34.—Construction of Protective Railways. The distribution of the above totals is given in paragraph 28 of this Statement.

200. The distribution of the total expenditure on Railway Construction through State and Companies' agency in each of the three years from 1897-98 to 1899-1900, as given in paragraph 193, is as follows:—

	1897-98, Accounts.	1898-99, Revised.	1899-1900, Budget.
<i>Expenditure in England.</i>			
1. State Lines	809,010	788,000	681,000
2. Old Guaranteed Railways	761,182	937,600	818,800
3. Extensions of ditto	763	86,300	130,900
4. Other Guaranteed or Assisted Railways	748,921	756,800	996,000
TOTAL	£ 2,319,876	2,568,700	2,626,700

	1897-98, Accounts.	1898-99, Revised.	1899-1900, Budget.
<i>Exchange on Expenditure in England.</i>			
1. State Lines	455,570	394,000	356,700
2. Old Guaranteed Railways at contract rate	69,198	85,200	74,500
3. Extensions of ditto at average rates	466	44,000	68,200
4. Other Guaranteed or Assisted Railways at contract rates	462,842	394,100	517,700
TOTAL . Rx.	988,076	917,300	1,017,100
<i>Expenditure in India.</i>			
1. State Lines . . . . . Rx.	3,348,109	3,969,400	3,667,300
2. Old Guaranteed Railways (net repayments) . . . . . Rx.	—398,838	—470,000	—349,300
3. Extensions of ditto . . . . . Rx.	5,048	168,500	304,700
4. Other Guaranteed or Assisted Railways . . . . . Rx.	2,314,752	1,786,400	1,328,200
5. Branch Lines on firm guarantee . . . . . Rx.	124,251	218,000	168,000
TOTAL INDIA . . . . .	5,393,322	5,672,300	5,178,900
TOTAL OF PROGRAMME . . . . .	8,701,274	9,158,300	8,822,700
To the above should be added the following amounts on account of expenditure on other Companies' lines and expenditure on Railway Construction from Provincial Revenues:—			
Other Branch Lines . . . . .	563,685	924,600	369,600
Railways outside of Government accounts . . . . .	903,550	545,500	580,700
Provincial State Lines . . . . .	3,792	4,200	3,600
GRAND TOTAL . . . . .	10,172,301	10,632,600	9,776,600

## 49.—Irrigation—Construction.

201. The figures are:—

Accounts, 1897-98.	Budget, 1898-99.	Revised, 1898-99.	Budget, 1899-1900.
Rx.	Rx.	Rx.	Rx.
692,431	750,000	692,200	850,000

The expenditure during the current year is likely to fall short of the Budget Estimate by Rx. 57,800 owing chiefly to delay in starting work on the Jhelum Canal. In order to meet the heavy demands for expenditure on this and other projects, the Budget grant for 1899-1900 has been fixed at Rx. 850,000.

## 50.—Miscellaneous Public Improvements.

Accounts, 1897-98.	Budget, 1898-99.	Revised, 1898-99.
Rx.	Rx.	Rx.
4,105	48,000	—4,100

202. As was explained in paragraph 185 of the Financial Statement of March 1898, this head was opened in the Accounts of 1897-98 to record the expenditure on the construction of certain jetties and landing-sheds at Chittagong in connection with the Assam-Bengal Railway. It has now been decided to classify this expenditure under the head "48.—Railways—Construction," and the expenditure of Rs. 4,105 recorded in 1897-98 has accordingly been written back in 1898-99.

### Section VI.—Ways and Means.

#### HOME TREASURY.

203. The following table sets out the transactions of the Home Treasury as they appear in the Budget and Revised Estimate for 1898-99 and in the Budget for the coming year :—

	Budget, 1898-99.	Revised, 1898-99.	Budget, 1899-1900.
RECEIPTS.	£	£	£
Council Bills . . . . .	16,000,000	19,000,000	17,000,000

<b>Add—Closing Balance . . . . .</b>	<b>2,242,854</b>	<b>4,304,444</b>	<b>2,817,344</b>
<b>TOTAL . . . . .</b>	<b>33,335,854</b>	<b>33,363,944</b>	<b>28,526,044</b>

204. In the Budget Estimate of 1898-99 the net disbursements of the Home Treasury, excluding Loans and Council Bills, were taken at £18,540,700. The intention then was to provide £16,000,000 of this by the sale of Bills on India, and to meet the balance, £2,540,700, by raising Sterling loans in England. According to the Revised Estimates the net disbursements, apart from the discount on the loan raised during the year by means of 2½ per cent India Stock, will be £17,642,600, so that if the sales of Council Bills had been restricted to £16,000,000, loan funds would have had to meet only £1,642,600, instead of £2,540,700 as originally contemplated. But the new loan of the year was

raised at a heavy discount, amounting to £702,300, on a total debt of £6,000,000; while, on the other hand, the Secretary of State has taken advantage of the improvement in the cash balances in India and of the favourable prospects of the season to raise his drawings in 1898-99 to £19,000,000. The larger balances thus made available have enabled the Secretary of State to reduce temporary borrowing on India Bills from £6,000,000 to £4,500,000, and the cash balance of the Home Treasury at the end of the year is now expected to exceed the opening balance by £1,770,200. Although, for the reasons explained above, the sale of Bills on India to the extent of £18,000,000 only would have been more than sufficient to cover the net disbursements of the Home Treasury in 1898-99, the Secretary of State has drawn a million in excess of this sum with the object of fully meeting the large mercantile demand for remittance arising from the brisk trade of the year. The drawings of 1899-1900 will be reduced by a corresponding amount.

205. In accordance with the intention announced in paragraph 194 of the 1898-99. last Financial Statement, India Stock for £6,000,000 was issued in July 1898. Sterling Loans. The new stock was issued at 2½ per cent: but owing to the unfavourable state of the money market at the time, the loan was taken up at the heavy discount of £11 9s. 7d. per cent. The total amount tendered was £22,385,300, and the minimum rate of accepted tenders was £88 5s. 6d. It is usual, when the amount of discount on a new loan is moderate, to charge off the whole amount against the Revenues of the year in which the loan is raised; but as in the present case the discount comes to the large sum of £702,300, it has been decided, in accordance with an arrangement sanctioned in 1886, to create a Sinking Fund for its discharge by annual payments for 50 years at an interest of 2½ per cent per annum. Accordingly, the money actually raised by the loan, namely, £5,297,700, is shown in the table in paragraph 203 as a receipt on account of the loan, and the annual payment to the Sinking Fund, amounting to about £7,000, is, as already explained in paragraph 121, shown as expenditure.

In accordance with the programme settled at the beginning of the year, 384,700l. of Oudh and Rohilkhand Railway 4 per cent Debenture Stock was discharged on the 6th May 1898, and 3,000,000l. India Debentures bearing interest at 3½ per cent were also discharged on their expiry on 16th August 1898.

206. In March last it was intended to raise 6,000,000l. in 1898-99 by means 1898-99. of India Bills so as to replace an equivalent amount falling due in the year; but Temporary Debt. in consequence of the larger amount received for Bills of Exchange on India only 4,500,000l. of temporary debt had to be replaced, and the remainder was discharged by a reduction in the cash balances. Of the 4,500,000l. India Bills issued during the year, 2,500,000l. were issued in May 1898 and 2,000,000l. in September, both issues being for twelve months. The results of the loans were as follows:—

Month of issue.	Amount tendered.	Amount accepted.	Average rate of interest per cent per annum.
	£	£	£ s. d.
May 1898 . . . . .	18,809,000	2,500,000	2 2 6
September 1898 . . . . .	7,175,000	2,000,000	2 12 0

207. The net issues to Railway Companies in England in 1898-99 are now Capital of Railway Companies. estimated to be 597,600l. against 640,500l. entered in the Budget Estimate, showing a reduction of 42,900l. only. The following are the usual details:—

	Budget.	Revised.
	£	£
RECEIPTS.		
Subscribed Capital—		
(a) State Lines . . . . .	1,335,100	1,151,800
(b) Guaranteed Lines . . . . .	1,829,500	836,800
Miscellaneous . . . . .	3,000	43,200
TOTAL . . . . .	3,167,600	2,031,800

ISSUES.	Budget.	Revised.
	£	£
For discharge of Debentures—		
(a) State Railways . . . . .	835,100	600,000
(b) Guaranteed Lines . . . . .	656,500	205,500
For Stores, Establishment Charges, etc.—		
(a) State Railways . . . . .	865,300	759,700
(b) Guaranteed Lines . . . . .	1,451,200	1,064,200
TOTAL . . . . .	3,808,100	2,629,400

Debentures of the Rohilkhand-Kumaon, Southern Mahratta, Madras, and Bombay, Baroda and Central India Railway Companies, aggregating £686,100, were renewed instead of being replaced by fresh Capital as was contemplated in the Budget programme. The Capital receipts from the Bombay, Baroda and Central India, the Great Indian Peninsula Railway, and the Madras Railway were less by 541,700*l.* than the original estimate. On the other hand, the Indian Midland and Bengal-Nagpur Railways raised 51,800*l.* more, making the net decrease in the amounts of new Capital 1,176,000*l.* as shown above. The item "Miscellaneous" includes 37,490*l.* received from the Bombay, Baroda and Central India Railway Company as contribution from the Fire Insurance Fund towards the cost of renewing Warren girders.

The estimates of the demands of the Companies for stores, establishment charges, etc., have proved too high except in the case of the Bengal Central, the Bengal-Nagpur, and the Burma Railways.

208. The following are the details of the remittance transactions of Railway Companies working State lines in India, to which advances of funds are made in England for the purchase of stores, etc., against adjustment in India by debit to the Railway Accounts :—

	Budget.	Revised.
	£	£
Advances for purchase of Stores—		
East Indian Railway . . . . .	700,000	714,400
Rajputana-Malwa . . . . .	65,000	70,600
South Indian Railway . . . . .	65,000	47,300
Bengal and North-Western Railway . . . . .	75,000	107,000
	905,000	939,300
East Indian Railway Debentures . . . . .	600,000	1,000,000
Transfer fees, etc. . . . .	2,500	2,000
	602,500	1,002,000
Net Remittance from India . . . . .	302,500	—62,700

The East Indian Railway has been authorised to raise 1,000,000*l.* instead of 600,000*l.* entered in the Budget Estimate, and the advances for purchase of stores are now expected to be largely in excess of the original estimates furnished by the several Companies.

Family and other  
remittances.

209. The increase in the net payments on account of family and other remittances of £34,300 is the result of a number of large differences. The demands for Railway stores required by Native States have greatly exceeded the estimates sent from India, and the Revised Estimates also include 10,000*l.* estimated to be refunded to the Imperial Government in settlement of the expenses attending the employment of Native Indian Troops at Suakin. On the other hand, the repayments by Her Majesty's Government of expenses attending the employment of Indian Native Troops sent to Mombassa are expected to exceed the original estimate by 18,600*l.*

210. The net disbursements at the Home Treasury in 1899-1900, excluding <sup>1899-1900.</sup> Loans and Council Bills, are estimated at £18,487,100 against £18,540,700 in the <sup>Home Treasury.</sup> Budget Estimate of 1898-99. As already stated in paragraph 204, the Secretary of State's present estimate of the drawings in 1898-99 will produce a large increase in his cash balances during the year, and this increase will be drawn upon to a considerable extent to meet the requirements of 1899-1900. It is therefore the present intention of the Secretary of State to draw during 1899-1900 £17,000,000 by Bills on India. <sup>Ways and Means.</sup>

No increase in the Sterling debt in 1899-1900 is contemplated at present, nor is it proposed to issue any India Stock in the year; but India Bills falling due in 1899-1900 will be covered by fresh issues of a corresponding amount.

According to the programme now announced, the net disbursements of the Home Treasury will be met, in the year 1899-1900, by the sale of Bills on India to the amount of £17,000,000 and by a reduction in the cash balances of £1,487,100.

211. It should be understood that in stating the present intentions of the Secretary of State no sort of pledge is given that he will adhere to the programme.

#### INDIA.

212. The following is a summary of the Estimate of Ways and Means in India:—

	1898-99.		1899-1900.
	Budget.	Revised.	Budget.

11. Council Bills—Sterling Amount	16,014,500	18,595,200	17,152,100
Exchange	8,945,500	9,371,800	8,952,600
Add—Closing Balance	16,208,952	17,072,043	16,679,443
<b>TOTAL</b>	<b>47,019,652</b>	<b>46,960,843</b>	<b>48,204,543</b>

The headings in italics are connected with, and explained by, the corresponding figures of the Secretary of State's account in England. The others refer to purely Indian transactions.

1898-99.  
General Summary.

213. The excess of revenue in India over the expenditure charged against it was taken in the Budget Estimate of 1898-99 at Rx. 26,298,400, and it was assumed that it would be possible to pay Rx. 24,960,000 on account of Council Bills during the year with the help of a rupee loan of Rx. 3,000,000 and with a reduction in the cash balances of Rx. 513,400. The early cessation of warlike operations on the frontier, the partial failure of the opium crop which reduced the payments to cultivators, and a satisfactory improvement in Railway and other revenues so far improved the cash balances as to enable Government to reduce the rupee loan of the year to Rx. 1,200,000 without curtailing the drawings of the Secretary of State in the early part of the year. As the year advanced, a steady increase of the revenue and large lapses in the grants for Capital expenditure added constantly to the balances and rendered it possible to meet without difficulty payments for Council Bills considerably in excess of the Budget Estimate. It is now estimated that the revenue in excess of expenditure will amount to Rx. 28,196,200; that the balances of Provincial Governments and Local Funds will be increased by Rx. 1,417,900 instead of being reduced by Rx. 116,800 as anticipated in the Budget; and that the Capital expenditure of Government not charged to Revenue will be Rx. 1,618,600 less than the original estimate. The net result of these and other variations is that in spite of the proposed rupee loan having been reduced by Rx. 1,800,000, Rx. 28,067,000 will be paid on account of Council Bills, and the year will close with a cash balance of Rx. 17,072,043, being Rx. 1,089,600 in excess of the opening balance of the year.

Rupee Loan of  
1898-99.

214. It was announced in paragraph 200 of the last Financial Statement that a new loan of Rx. 3,000,000 would be raised in India in 1898-99. But owing to the scarcity of loanable Capital, due partly to famine and plague and partly to the Exchange Banks having remitted their surplus balances to England, the prospects of raising such a large amount in the Indian market were unfavourable. As a review of the Ways and Means in June 1898 showed that owing to a general improvement in revenue prospects a loan of Rx. 1,200,000 might be sufficient, it was decided to borrow that amount only. The state of the market made it impossible to attempt a 3 per cent loan, and the loan was therefore raised at  $3\frac{1}{2}$  per cent as in 1897-98.

The loan of Rx. 1,200,000 was issued on 30th July 1898, and tenders for it were received on 24th August 1898. The unfavourable state of the money market affected the result, and the loan was raised at a discount of Rs-3 $\frac{1}{2}$  annas per cent.

1899-1900.  
Main features.

215. The Revenue Account for 1899-1900 as now made up closes with a surplus of Rx. 3,932,600. The Capital expenditure on Railways and Canals not charged to Revenue must of necessity be provided for either from the surplus revenue, or by reducing the cash balances, or by contracting a loan. In 1899-1900 the requirements for Capital expenditure are—

	Rx.
(1) Government expenditure in India	3,275,600
(2) Government expenditure in England (£ 682,100 converted at 15 $\frac{1}{2}$ d. the rupee)	1,039,400
(3) Net disbursements to Railway Companies in India	1,355,600
(4) Net disbursements to Railway Companies in England (£475,700 converted at 15 $\frac{1}{2}$ d. the rupee)	724,900
<b>TOTAL</b>	<b>6,395,500</b>

Of the total sum of Rx. 6,395,500 thus required in England and in India for the purpose of Capital expenditure during 1899-1900, £1,487,100 or

Rx. 2,266,100 has already been rendered available in the manner explained in paragraph 210 above by the increase in the Secretary of State's balances resulting from the larger drawings of Council Bills during the current year, and the remainder Rx. 4,129,400 will be more than covered by the surplus revenue estimated at Rx. 3,932,600 and an estimated reduction in the cash balances in India of Rx. 392,600. Accordingly no new rupee loan will be required in India for the purpose of Capital expenditure in 1899-1900.

Apart from the revenue surplus mentioned above, there will be a net receipt on account of Unfunded Debt—chiefly Savings Bank deposits—of Rx. 521,900, and Rx. 603,900 (included in "Other items" in the table in paragraph 212) out of the Famine Insurance Grant of Rx. 1,500,000 will be available for appropriation in reduction of debt. Against these important receipts there will be taken the expenditure of Provincial Governments from accumulated balances (Rx. 924,700), the payments for rupee debt discharged (Rx. 190,000), and the loans by Government (Rx. 248,800). The payments of Council Bills in 1899-1900 as entered in the Estimates will be Rx. 26,104,700 including exchange, or Rx. 1,144,700 more than the corresponding figure in the Budget Estimates of 1898-99.

216. As above stated, no rupee loan in India will be required in 1899-1900, and it is not the present intention of the Government of India to raise any such loan in the year. Full liberty is, however, reserved as usual to alter the programme, as now announced, to any extent that may be considered desirable.

217. The following table gives the details of the transactions of Savings Banks during the last few years and the estimated transactions for 1898-99 and 1899-1900:—

YEAR.	Net additions to deposits, cash.	Interest.	Total addition.
1890-91 . . . . .	250,700	279,700	530,400
1891-92 . . . . .	317,900	306,200	624,100
1892-93 . . . . .	548,900	339,400	888,300
1893-94 . . . . .	179,900	368,000	547,900
1894-95 . . . . .	—84,500	297,000	212,500
1895-96 . . . . .	247,700	338,500	586,200
1896-97 . . . . .	—581,100	346,600	—234,500
1897-98 . . . . .	—657,100	327,000	—330,100
1898-99, Budget . . . . .	156,700	327,500	484,200
1898-99, Revised . . . . .	—90,300	325,700	235,400
1899-1900, Budget . . . . .	126,500	330,600	457,100

218. The Budget Estimate of 1898-99 anticipated a small addition of Rx. 156,700 to the net deposits, but according to the present estimates there will be a net withdrawal of Rx. 90,300 apart from interest. This result is attributed to the low price ruling for Government securities throughout the greater part of the year having encouraged small investors to withdraw their money from Savings Banks and buy Government paper. The price of  $3\frac{1}{2}$  per cent Government securities is now above par, and in preparing the Budget Estimates for 1899-1900 allowance has been made for a small addition to the net deposits of Rx. 126,500.

219. The transactions during the year 1898-99 under the head of Loans by Government are now expected to result in a net receipt of Rx. 262,500 against Rx. 62,200 entered in the Budget Estimate, an increase in the receipts of Rx. 200,300. This increase is made up of an increase in the recoveries of Rx. 174,400 and a decrease in the advances of Rx. 25,900. As is usually the case, the allotments asked for by Provincial Governments on behalf of local

*Loans by Government for local purposes.*

authorities could not be fully utilised by reason of delays in maturing the schemes of improvement for which the loans were required. The amounts so lapsing are largest in the North-Western Provinces and Oudh.

The recoveries were also larger than the original estimates, chiefly in the Central Provinces and the North-Western Provinces.

Provision has been made in the Budget Estimate of 1899-1900 for net issues on account of loans to the extent of Rx. 248,800 made up of allotments of advances aggregating Rx. 989,600 and recoveries of past loans, Rx. 740,800. The following are the figures of gross recoveries and issues for the six years ending 1899-1900:—

	Issues.	Recoveries.
1894-95 . . . . .	686,806	512,267
1895-96 . . . . .	744,789	506,246
1896-97 . . . . .	1,337,194	542,638
1897-98 . . . . .	1,466,739	958,153
1898-99, Revised . . . . .	771,700	1,034,200
1899-1900, Budget . . . . .	989,600	740,800

It will be observed that the large issues of the later years of the period have been to a great extent met by large recoveries which in their turn were rendered possible by the liberal scale on which certain classes of loans were given in years of scarcity. The estimates for next year include a large provision for loans to agriculturists and cultivators in the Punjab required partly for the relief of distress apprehended in the Hissar District, but chiefly in connection with the Chenab Canal Colonisation Project from which a substantial increase of revenue is expected. Allowance has been made for plague loans as far as they can be foreseen at present. A sum of Rx. 100,000 representing the Capital cost of the Umaria Colliery is also included in the figures as a loan to the Rewa Durbar. The Colliery will be transferred to the Durbar with effect from 1st April 1899, and pending recovery of the cost the amount is written off the Capital Account of Railways by transfer to the Loan Account.

Cash Balance.

220. The year 1899-1900 is estimated to close with a cash balance in the Indian Treasuries of Rx. 16,679,443, which is less than the opening balance of the year by Rx. 392,600.

J. WESTLAND.

CALCUTTA;  
March 20, 1899.

## Memorandum by the Honourable Major-General Sir Edwin Collen, K.C.I.E., on Military Expenditure.

The estimates with which the Military and Marine Department of the Government of India is concerned, are—

- I.—Indian Military Estimates.
  - II.—Home (India) Military Estimates.
  - III.—Military Works Estimates.
  - IV.—Marine Estimates.
2. They will be dealt with in this memorandum in the order given above.

### I.—Indian Military Estimates.

#### *Revised Estimates, 1898-99.*

3. The revised Indian Military Estimates for 1898-99, compared with the budget for the year, show a net saving of Rx. 520,800 caused by an increase in receipts of Rx. 2,200 and a decrease in expenditure of Rx. 518,600.

Comparison—  
Revised for 1898-99,  
and  
Budget for 1898-99.

4. The more important causes which have led to the decrease in expenditure are as under :—

- (a) There is a decrease of Rx. 344,300 on account of military operations and an increase of Rx. 53,200 on account of special services, thus giving a net decrease of Rx. 291,100 on account of military operations and special services. The decrease on account of military operations is mainly due to the large expenditure on account of field operations on the North-West Frontier, which was anticipated when the budget was framed, not having been incurred, owing to the cessation of those operations earlier than was expected, and also to various changes in the strength and organisation of the forces which were mobilised. On the other hand, the increase on account of special services is chiefly caused by the augmented garrisons in the Malakand and Tochi Valley not having been reduced on as early a date as was anticipated.
- (b) Another cause of decrease, amounting to Rx. 65,000, was the fall in the prices of food supplies for men and animals.
- (c) There was also a decrease of Rx. 41,200 on account of exchange compensation allowance, owing to exchange having been favourable during the year.
- (d) Again, savings accrued owing to the authorised strength of British infantry being short by one battalion for a part of the year (Rx. 36,700); to the employment of the 1st Bengal Infantry at Mauritius, and to the retention for service in East Africa of the 27th Bombay Infantry and the head-quarters wing of the 4th

Bombay Rifles for longer periods than were anticipated. The Military Estimates were relieved of expenditure on account of the two latter items to the extent of Rx. 18,000 and Rx. 15,400, respectively, the charges having been borne by Her Majesty's Imperial Government. The Military Estimates were further relieved of expenditure to the extent of Rx. 24,100 on account of the pay and allowances of officers whose services were placed at the disposal of the Civil Department for plague duty.

- (e) A lapse of Rx. 20,000 has also occurred in the budget for 1898-99, as the orders of the Secretary of State on the question of increasing the establishment of Commissariat-Transport officers could not be given effect to in that year.
- (f) In addition to the foregoing, the following are the chief causes which contributed towards reducing expenditure :—
  - (i) Under Grant 1 (*Army and Garrison Staff*) there are savings amounting to Rx. 14,500 owing chiefly to absence of officers on furlough.
  - (ii) Under Grant 3 (*Regimental Pay, Allowances and Charges*) there are savings to the extent of Rx. 29,000, owing to fluctuations in the strength of the troops.
  - (iii) Under Grant 4 (*Commissariat Establishments, Supplies and Services*) the savings aggregate Rx. 28,500, and are due to smaller purchases of malt-liquor owing to decreased consumption (Rx. 14,000); and to less expenditure on other accounts.
  - (iv) Under Grant 10 (*Ordnance Establishments, Stores and Camp Equipage*) the savings aggregate Rx. 20,000 owing chiefly to fluctuations in establishments and smaller purchases of camp equipage and other stores.

5. The total decrease in expenditure was, however, to some extent counterbalanced by certain increases, the more important of which are the following :—

- (a) Special bounties and advances of deferred pay were paid to a limited number of men of certain British regiments serving in India, to induce them to extend their service with the colours. This causes an increase to the extent of Rx. 31,900.
- (b) Judging from the experience of the first nine months there will be larger expenditure to the extent of Rx. 15,000 on account of the ordinary conveyance of troops and stores.
- (c) Owing to the existence of plague in India, it has been found necessary to give additional grants-in-aid, to certain cantonments in the Bombay Command, to meet expenditure on plague operations.
- (d) Under Grant 9 (*Medical Establishments, Supplies and Services*) there is larger expenditure to the extent of Rx. 10,000 chiefly in the purchase of medical supplies.

*Estimates, 1899-1900.*

6. The estimates for 1899-1900, in the net, amount to Rx. 16,095,700, or Rx. 1,153,100 less than the budget for 1898-99. This is due to a decrease in receipts of Rx. 16,400 and in expenditure of Rx. 1,171,500.

Comparison—  
Budget for 1898-99,  
and  
Estimate for 1899-1900.

7. In comparing the estimates of next year with the budget for the current year, it will be found that the decrease in *receipts* is mainly due to less issues on payment of commissariat supplies being anticipated than in the current year owing to the cessation of field operations.

8. The decrease in *expenditure* is accounted for as follows:—

- (a) A saving of Rx. 1,176,500 occurs in the provision for military operations and special services.
- (b) In consequence of the higher rates of exchange adopted for the estimates of 1899-1900, a saving of Rx. 120,000 is anticipated in the pay of British troops and of Rx. 20,800 in exchange compensation allowance.
- (c) A saving, amounting to Rx. 60,000, is due to an anticipated fall in the prices of food supplies for men and animals as compared with the prices adopted for the current year's budget.
- (d) Again, savings to the extent of Rx. 21,200 will accrue owing to the cost of the 1st Bengal Infantry while stationed at Mauritius being borne by Her Majesty's Government.
- (e) Another cause of saving, resulting directly from the cessation of field operations, is that the provision for expenditure on account of non-effective services is reduced by Rx. 22,500 as regards extra pensionary allowances, and by Rx. 14,500 for war medals.
- (f) In addition to the foregoing, the following reductions in expenditure are anticipated:—
  - (i) Under Grant 3 (*Regimental Pay, Allowances and Charges*) savings to the extent of Rx. 45,000 are anticipated owing to probable fluctuations in strength and other causes.
  - (ii) Under Grant 4 (*Commissariat Establishments, Supplies and Services*) savings, amounting to Rx. 32,800, are expected, owing to (1) smaller purchases of malt-liquor (Rx. 12,800); (2) to the special grant (Rx. 10,000) made in the preceding year for purchase of transport animals to complete the authorised complement of mobilisation animals not having been repeated; and (3) to smaller provision (Rx. 10,000) as against Rx. 20,000 in 1898-99 having been made for additional officers for the Commissariat-Transport Department.
  - (iii) Under Grant 6 (*Clothing Establishments, Supplies and Services*) reduced expenditure of about Rx. 17,400 is anticipated, owing to smaller purchases of certain articles being necessary.
  - (iv) Under Grant 10 (*Ordnance Establishments, Stores and Camp Equipage*) there will be savings, aggregating Rx. 10,300, due chiefly to anticipated variations in establishments, and also to a smaller provision having to be made for the conversion of the equipment of the batteries of the field army to that suitable for the 15-pounder projectiles.

9. The foregoing decreases in expenditure will, however, be partly counter-balanced by certain increases, of which the following are the more important :—

- (i) Increased provision to the extent of Rx. 114,600 has been made for messing allowance to the British Army. In this connection it may be mentioned that, as explained in my memorandum of last year, the details connected with the measures to be adopted in India, in furtherance of the improvements made in the position of the non-commissioned officers and men of the British Army in all parts of Her Majesty's dominions, were not settled when the budget for 1898-99 was closed; provision, therefore, was made therein for only Rx. 200,000. During the currency of that year the matter was, however, finally settled, and with the sanction of the Secretary of State certain measures were adopted in India with effect from the 1st June 1898. These measures involve the abolition of deferred pay, and the grant of a gratuity on discharge or transfer to the Army Reserve; also the grant of messing allowance of 2½ annas per diem in addition to usual pay and extra-duty pay, and the free issue of groceries, for which the soldier had up to that time been required to pay 9 pies per diem. I may mention that the soldiers who were in the service at the time these changes were introduced had the option of accepting them, or continuing under the arrangements they were intended to supersede. These considerations and the fact that expenditure for the whole, instead of a part, of a year has to be provided for, account for the increase in the provision for this allowance in the estimate of next year.
- (ii) Provision to the extent of Rx. 39,500 has been made for providing the mobilisation equipment of the additional corps (line of communications) included among the extra units of the field army; and of Rx. 37,000 for maintaining a reserve of compressed fodder to facilitate mobilisation requirements. A sum of Rx. 18,400 has also been provided for the supply of camel saddles for the 3rd and 4th Divisions and extra units of the field army.
- (iii) A sum of Rx. 20,700 has been provided for the re-establishment of Cantonment Hospitals.
- (iv) There will also be increased expenditure to the extent of Rx. 17,200 due to the raising of an additional Native mountain battery.
- (v) Increased provision, amounting to Rx. 16,800, has also been made on account of the ordinary movements of troops and stores, as it is anticipated that the reliefs next year will be heavier than they were this year.
- (vi) Larger provision to the extent of Rx. 14,000 has been made for camps of exercise.
- (vii) Another cause of increased expenditure, amounting to Rx. 13,800, is the return of the head-quarters wing of the 4th Bombay Rifles and the anticipated return from Mombassa early next year of the 27th Bombay Infantry, the cost of which during its absence from India has been borne by Her Majesty's Imperial Government.
- (viii) There will also be larger expenditure to the extent of Rx. 10,000 on account of medical supplies and services.

(ix) The expenditure side of the budget estimate for next year is also increased by reason of a smaller deduction in India to adjust excess provision in the Home Estimate—Rs. 48,300.

10. A statement is appended showing the net amounts under each of the 20 Grants for effective and non-effective services, and for military operations:—

		Net decrease Rx. ...		1,155,100		

\* The bulk of subscriptions of officers to Indian Military Service Family Pensions is received in India, while most of the expenditure is incurred at home. The receipts in India, therefore, exceed the expenditure in India, and hence, as the figures in the above statement are net, there must be a minus entry.

† In my memorandum on military expenditure last year the heading "Military Operations" did not appear, although it did appear in the Financial Statement, the charges being included in my memorandum under Grant 14. The figure adopted above differs from that in the Financial Statement for last year, by reason of a change in classification involving a redistribution between ordinary charges and warlike operations.

## II.—Home (India) Military Estimates.

### *Revised Estimates, 1898-99.*

11. The second of the estimates with which the Military Department is concerned is the Home estimate for army effective and non-effective charges. The Home Budget Estimates for 1898-99 provided for a gross expenditure of £4,469,300, while in the Revised Estimates provision has been made to the extent of £4,324,100.

Comparison—  
Revised for 1898-99,  
and  
Budget for 1898-99.

12. The saving of £145,200 in the Revised, as compared with the Budget Estimate for 1898-99, is chiefly due to decrease in the payments for ordnance stores, owing, to a great extent, to the reduction of demands made by India. It is also due to reduced payments on account of the furlough allowances of officers of the Indian Service, and of the pay and pensions of non-effective and retired officers of the Indian Service. These decreases are, however, partly counter-balanced by larger payments having been made to the War Office in settlement of their claims for 1897-98 on account of the effective and non-effective service of the British forces serving in India, than were anticipated when the Budget Estimate was framed.

13. There is also an increase of £10,400 on account of receipts in the Revised, as compared with the Budget Estimates for 1898-99, due chiefly to larger receipts being anticipated on account of the Indian Troop Service, and in the value of articles in possession of regiments on their transfer from the Indian to the British establishment.

14. The net figures of the revised, therefore, show a saving of £155,600 on those of the Budget Estimate for 1898-99 due, as explained above, to a decrease in expenditure of £145,200 and an increase in receipts of £10,400.

### *Estimates, 1899-1900.*

Comparison—  
Budget for 1899-00,  
and  
Estimate for 1899-1900.

15. The receipts and expenditure for 1899-1900 are as follows :—

				Receipts.	Expenditure.	Net expenditure.
				£	£	£
Effective	...	...	...	51,000	1,996,300	1,944,400
Non-effective	...	...	...	15,500	2,496,800	2,481,300
Total				67,400	4,493,100	4,425,700

16. Compared with the budget for 1898-99, larger receipts to the extent of £18,100 are anticipated in 1899-1900, owing to the same causes as those which have led to the figures on account of receipts being increased in the Revised Estimate for 1898-99. The total gross expenditure for 1899-1900 is, however, higher by £23,800 than the amount provided in the budget for the preceding year, owing chiefly to larger amounts being provided for payment to the War Office on account of the effective and non-effective services of the British forces serving in India, as the amounts adopted on this account in the budget of the preceding year were too low. These increases in expenditure are partly counter-balanced by provision for one transport for trooping service less than in the preceding year having been made, and by reduced expenditure being anticipated on account of pay and pensions of non-effective and retired officers of the Indian Service.

17. The gross charges on account of effective services include payments to the War Office in respect of the British forces serving in India, amounting, as estimated in the coming year, to £730,000, as against £721,000 in the estimates for 1898-99. These charges are based on the capitation rate of £7-10 for each man borne on the establishments of the British forces in India, with the addition of the charge for deferred pay issued to British soldiers on discharge or transfer to the reserve. In connection with the deferred pay, it may be mentioned that during the current financial year it was decided to abolish this concession and to substitute for it a gratuity, the effect of which will be to ultimately reduce military expenditure at Home. The other items included in the gross effective charges are furlough allowances and pay during the voyage of British forces serving in India (£103,000); furlough allowances of officers of the Indian Service (£230,000); Indian Troop Service (£260,600); passage of officers and troops otherwise than in transport (£12,000); miscellaneous (£19,000); and stores for India (£629,700).

The gross charges on account of non-effective services are made up of the retired pay, etc., of the British forces for service in India (£354,000); pay of the non-effective Colonels of Royal Artillery (£24,800); while the pay and pensions of non-effective and retired officers of the Indian Service amount to £1,800,000, the miscellaneous pensions to £86,000, and the Indian Military Service Family Pensions to £32,000.

18. The net expenditure for 1899-1900 is more by £5,706 than that for the preceding year; and, as explained above, this is due to an increase of £18,100 in receipts and an increase of £23,800 in gross expenditure.

19. Subsequent to the estimate of 1899-1900 being closed, it was decided to defer the supply from England of certain stores to the value of £11,093 for which provision was included in those estimates. This over-provision in the Home Estimates has been adjusted by a corresponding deduction in the Indian Estimates with the result that, as compared with the net expenditure of 1898-99, there will be a saving in 1899-1900 of £5,393 in the Home Expenditure.

20. The figures of actual expenditure in 1897-98, of the *Budget and Revised Estimates* for 1898-99, and of the *Estimate* for 1899-1900, are given below in detail for convenience of comparison :—

	Accounts, 1897-98.	Budget Estimate, 1898-99.	Revised Estimate, 1898-99.	Estimate, 1899-1900.
EFFECTIVE.	£	£	£	£
Payments to War Office in respect of British Forces serving in India ...	729,719	721,000	744,400	730,000
Furlough Allowances and Pay during voyage of British Forces serving in India ...	98,820	108,000	112,000	108,000
Furlough Allowances of officers of the Indian Service ...	195,800	230,000	202,000	230,000
Indian Troop Service ...	228,944	267,600	284,600	260,600
Passage of officers and troops otherwise than in transports ...	17,737	19,000	12,000	19,000
Miscellaneous ...	31,651	20,000	19,500	19,000
Stores for India ...	527,141	627,900	522,900	629,700
<b>Total ...</b>	<b>1,829,882</b>	<b>1,993,500</b>	<b>1,897,400</b>	<b>1,996,300</b>
NON-EFFECTIVE.				
Payments to War Office for Retired Pay; etc., of British Forces for service in India ...	506,847	517,000	527,500	554,000
Pay of non-effective Colonels of Royal Artillery ...	24,518	24,800	24,200	24,800
Pay and pensions of non-effective and retired officers of the Indian Service ...	1,771,591	1,820,000	1,700,000	1,800,000
Miscellaneous pensions, etc. ...	84,443	84,000	84,500	86,000
Indian Military Service Family Pensions ...	27,446	30,000	30,500	32,000
<b>Total ...</b>	<b>2,414,845</b>	<b>2,475,800</b>	<b>2,426,700</b>	<b>2,496,800</b>
<b>Total, Effective and Non-Effective ...</b>	<b>4,244,227</b>	<b>4,469,300</b>	<b>4,324,100</b>	<b>4,493,100</b>

21. The following table shows, in detail, the expenditure for stores (including freight) from 1893-94 to 1899-1900 :—

	ACCOUNTS.					Revised Estimate, 1898-99.	Estimate, 1899-1900.
	1893-94.	1894-95.	1895-96.	1896-97.	1897-98.		
	£	£	£	£	£	£	£
Clothing ...	200,699	210,107	210,613	158,825	177,184	169,500	193,400
Ordnance and Miscellaneous ...	547,202	823,141	235,850	290,835	209,377	269,700	352,200
Medical ...	26,494	22,075	19,942	26,446	22,512	21,600	30,200

### III.—Military Works Estimates.

Excluding English expenditure and exchange, the budget estimate for 1898-99 amounted to Rx. 1,135,800; the revised estimate of expenditure amounted to Rx. 1,113,700. There has, therefore, been less expenditure in India of Rx. 22,100.

The budget estimate for 1899-1900, excluding English expenditure and exchange, amounts to Rx. 1,299,600, or Rx. 185,900 more than that of 1898-99. The difference is due to an extra grant of Rx. 14,500 for the Barrack Department duties in the Madras Command, now taken over by the Military Works Department, and to a provision of Rx. 150,000 for defence works on the North-West Frontier.

The heads of the Military Works estimate are in round figures:—

	Rx.
For original works, including works in progress and those to be commenced	400,800
„ repairs	349,000
„ establishment	298,000
„ Barrack Department establishment, supplies, and tools and plant	86,000

The new works, 108 in number, including 63 in progress and 105 not commenced, comprise fourteen water-supply works on which Rx. 47,300 is to be spent, and Rx. 22,100 for coast and inland fortifications, the balance being made up of drainage works, hospitals, barracks, and Ordnance, Commissariat, Marine, and Remount requirements. Many of these new works are of a minor character, or are renewals. The demands are very large, and no fewer than 354 works cannot be provided for. If they had been provided for it would have meant an addition of Rx. 940,000 to the budget.

The laborious task of re-constructing the organization for the performance of the military works services has been completed, and I hope that the new arrangements will come into force at an early date.

### IV.—Marine Estimates.

#### *Revised Estimates, 1898-99.*

The net figures of the Budget Estimate of the Royal Indian Marine for 1898-99 were Rx. 142,500, the Revised Estimate stands at Rx. 123,200, showing a decrease of Rx. 19,300. This decrease in the net expenditure is caused by excess receipts amounting to Rx. 17,500, and a reduction in expenditure to the extent of Rx. 1,800.

The excess under receipts is chiefly due to large recoveries from the Home Government in connection with the employment of Royal Indian Marine vessels on Imperial Service.

The increases in expenditure (aggregating Rx. 8,400) are chiefly due to smaller recoveries for stores issued to, and works executed for, other departments

The decreases in expenditure (aggregating Rx. 10,200) are principally due to savings in matters of establishments and up-keep; reduced expenditure on repairs to Her Majesty's ships in Indian seas and Royal Indian Marine vessels at outstations; smaller payments of exchange compensation allowances; temporary vacancies and other items.

Taking the increase against the decrease, there is a net decrease of Rx. 1,800, and adding these figures to the increased receipts, Rx. 17,500, the result is a decrease of Rx. 19,800 in the Revised as compared with the Budget Estimate.

#### *Estimates, 1899-1900.*

The net figures of the Marine Estimate for 1899-1900 are Rx. 130,950 against Rx. 142,500, the figures of the budget for 1898-99 showing a decrease of Rx. 5,550. This decrease is caused by an increase in receipts, amounting to Rx. 7,900, due to anticipated recoveries in connection with the employment of the *Cize* on Imperial Service, counterbalanced by increased expenditure to the extent of Rx. 2,350.

Comparison—  
Budget for 1898-99,  
and  
Estimate for 1899-1900.

#### **General Remarks.**

Having reviewed the estimates with which the Military and Marine Department of the Government of India is concerned, I would now offer the following remarks in connection with the work of the Army Departments under the administrative control of the Military Department.

The past year has happily been one during which the army of India has enjoyed a much-needed rest, but the experiences of the year 1897-98 have shown certain weak points in the military system, and every department has been engaged in considering what remedies shall be applied, while the whole question of the military position on the North-West Frontier has been examined.

The deficiencies in the transport service have also been engaging attention, and a strong Committee under the presidency of Lieutenant-General G. B. L. Sanford, was formed to consider the organisation of that important service. The Committee has submitted a valuable and elaborate report and their recommendations are now under our immediate consideration. The question of improving the ambulance transport has been taken up, and the proposals of a Committee have been submitted. Another weakness that made itself conspicuous during the late campaigns was the deficiency in mountain artillery. We have received the Secretary of State's permission to raise an additional battery.

A decision has been arrived at regarding the gauge of frontier railways; the Nowshera-Dargai line will be pushed on the 2-foot 6-inch gauge; and we have formulated proposals for providing a stock of the plant required for field service tramways and railways.

Another subject to which we have given our attention is that of house accommodation in cantonments. As is well known, difficulties have frequently occurred in obtaining house accommodation in cantonments for officers of the army, and the existing rules on the subject having been found inadequate, it has been considered expedient to make better provision for that purpose by means of legislation. A bill was introduced on the 4th November 1898. The memorials

from house-owners and the opinions of local Governments and Administrations are being carefully considered.

I have already alluded to the proposed re-organisation of the transport. Last year I mentioned that the insufficiency of the existing complement of commissariat-transport officers had been brought specially to notice in the late campaigns. After very full consideration a large increase to the establishment was recommended. The Secretary of State for India has sanctioned an immediate increase of twelve officers and has called for further information to enable him to decide what further addition is necessary.

With a view to supply the hospitals and British troops with pure milk, steps are being taken to improve the management of dairies generally, and to work dairy and grass farms in conjunction. The supply of grass to the mounted branches has been, in recent years, a matter for anxious consideration, but I hope that we are now in a fair way to attain something like success. An experimental training class for British non-commissioned officers and men in scientific grass farming has been opened at Allahabad, and other measures are being taken to generally improve the supervision of grass farms, and to make them paying concerns. The rules for the provision of grass lands for the horses of Native cavalry in the Bengal and Punjab Commands have been extended to the Native cavalry in the Bombay Command.

Considerable progress has been made in various matters connected with the manufacture and supply of munitions of war. Proposals have been made for the establishment of a factory for the manufacture of cordite on a large scale. This will enable us to be independent of England for our cordite supply and will effect a considerable economy. A site has been decided upon at Jubbulpore for the establishment of a Central Gun-Carriage Factory for all India. The three existing factories at Madras, Bombay, and Fatehgarh cannot be kept up to date economically, and the establishment of a central factory will effect a saving in the cost of establishments. The Harness and Saddlery Workshops in the Bombay Arsenal have been closed, and the work transferred to Madras. In dealing with the working of the Ordnance Department during 1897-98 in my last year's memorandum, I referred to the fact that in order to provide a central authority for the expeditious and economical supply of stores to the arsenals and depots in India, the whole of the ordnance factories in this country had been placed under the direct control of the Director-General of Ordnance in India. I would now add that as a necessary sequel to this arrangement a central office for dealing with the audit and accounts of these factories has been ordered to be formed with effect from the 1st April 1899. Pole draught is being substituted for shaft draught in batteries of horse and field artillery in India. Horse artillery batteries are also being equipped to take cordite cartridges with 12-pr. projectiles, while the field batteries are being altered to carry 15-pr. projectiles with cordite cartridges. It has been decided to carry out the re-armament of British cavalry in India with the Lee-Enfield Magazine carbine, and the artillery with the Martini-Enfield carbine as funds become available.

The equipment of additional corps of the field army for duty on the lines of communication under the plan of mobilisation will be proceeded with in 1899-1900.

The provision of remounts for the army is always a matter of the greatest importance. Various improvements and economies have been effected, and on the whole it may be claimed that satisfactory Australian and country-bred remounts are issued to the army. With a view to developing mule-breeding in India, the purchase of additional donkey stallions from Cyprus was sanctioned, and we have engaged to take a certain number of stallions annually. The increasing difficulty of obtaining donkey stallions from the continent renders it imperative that other sources of supply should be opened up.

There is no more important question than that of the sanitary condition of the army. A great deal remains to be done, but year by year we are making improvements, endeavouring to find out defects and how to remedy them. More troops are stationed in the hills during the hot weather, barracks rebuilt or renewed, and a supply of good water provided at an increasing number of stations. Investigations have been specially made into the sources of the water-supply at various places, and the most stringent precautions have been taken locally to protect the men, as far as possible, from impure water. In the Native Army a considerable progress has been made in re-building the lines; but there are still many lines which ought to be renewed. Valuable sanitary work has been done by the officers appointed for the purpose, and special investigations have been made at those stations which have been particularly afflicted by enteric disease; and water-supply and drainage schemes have been pushed on. It is hoped that the establishment of cantonment hospitals will do much to mitigate the severity of a certain class of diseases. Owing to the conservancy arrangements in cantonments in the Bombay Command being of an unsatisfactory nature, measures are being taken for gradually introducing into that Command the system which has proved successful in the Bengal and Punjab Commands. Funds have been specially provided for the improvement of the sanitary condition of the important military station of Quetta.

#### **Marine Department.**

During the past year the work in the dockyards at Bombay and Kidderpore (Calcutta) has been normal, notwithstanding the difficulties which the occurrence of plague in the former place gave rise to. The vessels of the Royal Indian Marine have been employed in the usual trooping service, which has extended to Mauritius and Durban. Experiments have been made, with some success, in sending convalescents for a sea trip during the trooping voyages. Two vessels of the Indian Marine have been many years in the service, and, although at present efficient, arrangements will have to be made to replace them before many years elapse.

EDWIN H. H. COLLEN,

*The 20th March 1899.*

*Major-General.*

**Memorandum by the Honourable Sir Arthur Trevor, K.C.S.I.,  
on the conclusions of the Conference of 1898 on Railway  
extensions in India.**

The Railway Conference of 1898 met at Viceregal Lodge, Simla, on the 15th

**PRESIDENT :**  
His Excellency the Viceroy. (The Earl of  
Elgin).

**MEMBERS :**  
The Honourable Sir James Westland, K.C.S.I.  
The Honourable Major-General Sir E. H. H.  
Collen, K.C.I.E.  
The Honourable Sir Arthur Trevor, K.C.S.I.  
Mr. F. R. Upcott, Secy. to the Govt. of  
India, P. W. Dept.  
Mr. A. R. Becher, Accountant General, P. W.  
Dept.

**SECRETARY :**  
Captain W. J. McElhinny, R.E., Offg. Under-  
Secy. to the Govt. of India, P. W. Dept.  
(Railway Branch).

and 16th August 1898, and was constituted  
as noted in the margin. A representative of  
the Revenue and Agricultural Department  
was not included on the Committee this  
year, as with the exception of a group of  
light lines in the Madras Presidency, which  
are not urgent and the projects for which  
are incomplete, there were no famine lines  
brought forward that had not already been  
discussed in former years.

2. Twenty-three new projects were considered, of which five were set aside,  
one was recommended for construction by a Native State, and the remaining  
seventeen were held over as not yet ripe for a decision.

The line recommended for construction is the Tonk Branch, 10 miles in  
length and estimated to cost Rs. 40,000. It will connect Tonk with the Jeypore-  
Chambal Railway.

3. Of lines held over or set aside at the Conference of 1897, and neither  
hitherto included in the programme nor brought under negotiation outside the  
programme, two have now been recommended for construction by, or on the re-  
sponsibility, direct or indirect, of Government, one by a Branch Line Company,  
and two for construction without assistance by Native States and private enterprise.

The lines in question are shown below :—

No.	Name.	Approximate length.	Approximate cost.	Locality and agency.
	(a) By or on the responsibility, direct or indirect, of Government.	Miles.	Rs.	
1	Nowshera-Mardan . . . .	40	117,500	Punjab. As part of the North Western rail- way.
2	Midnapur-Jherria . . . .	122	1,221,200	Southern Bengal. As part of the Bengal Nagpur railway.
	(b) Open to Branch Line Compa- nies.			
1	Chandipur-Taki . . . .	39	172,000	Bengal. Branch of Bengal Cen- tral railway.
	(c) Reserved for Native States.			
1	Shoranur-Cochin . . . .	64	917,700	Madras. Branch of Madras rail- way.
	(d) By private enterprise.			
1	Ammāyanayakanur-Kuruvanath .	75	500,000	Madras. Branch of South Indian railway.

4. Of the two lines recommended for construction by, or on the responsibility of, Government, No. 1, the Nowshera-Mardan, has been estimated for, and provision has also been made in the ensuing programme of railway construction for its commencement.

No. 2, the Midnapore-Jherria, has been accepted for early commencement of construction for the reason that it will open out all the coal-fields at present demanding railway facilities, and at the same time provide a valuable connection for the traffic between Upper India and the east and south coasts of India. The line, which will also have a famine protective value, has been provided for within the programme.

The Chandipur-Taki Railway has been accepted for construction without any Government guarantee, and arrangements are being made by the Promoters for carrying out the survey and preparation of the detailed project by the agency of the Bengal Central Railway Company. The Shoranur-Cochin railway has also been accepted for construction by the Native State of Cochin without any Government guarantee, while the formation of an independent Company to construct the Ammayanayakanur-Kuruvanath as a tramway without a guarantee under the provisions of the Indian Tramways Act, XI of 1886, has been agreed to, subject to certain conditions.

5. As has been explained on former occasions, the extent to which it is possible to give effect to the recommendations of the Conference in regard to Capital Expenditure on railways other than such as are made by Branch Line Companies under the terms of Government of India Resolution No. 514 R. C., dated 17th April 1896, or by Native States or private Promoters without financial assistance, has been governed up to the end of the year now closing by the limitations of a programme covering the three years, 1896-97 to 1898-99. This programme provided for a total expenditure of Rx. 29,660,000, against which we expect to spend the following amounts:—

	Rx.
In 1896-97 (Actuals) . . . . .	8,658,800
" 1897-98 ( " ) . . . . .	8,145,500
" 1898-99 (Revised Estimate) . . . . .	8,387,500
<b>TOTAL</b> . . . . .	<b>25,191,800</b>

The Budget Estimate for 1898-99 was prepared for Rx. 10,788,900, but owing to the late arrival of English stores consequent on the engineering strikes in England and other causes, the impossibility of working to the original programme was recognized some time ago, and the Revised Estimate has been reduced accordingly to the sum of Rx. 8,387,500 above shown.

For the three years, 1899-1900 to 1901-1902, on which we are about to enter, it has been thought advisable that we should work on a somewhat less ambitious programme, providing about 6 crores a year for new lines and extensions as against nearly 8½ crores under the previous programme. The chief object of this reduction is to give time for the earnings to overtake the expenditure. The forecast which has been prepared and approved by the Secretary of State works out accordingly to Rx. 20,322,100, distributed as under:—

	Rx.
1899-1900 . . . . .	6,772,700
1900-1901 . . . . .	6,728,400
1901-1902 . . . . .	6,821,000
<b>TOTAL</b> . . . . .	<b>20,322,100</b>

The additional amount, approximately Rx. 750,000 in each year, which it will be observed has been provided, is due to the inclusion in programme limits from this year of the open line Capital expenditure of the three guaranteed companies and the anticipated expenditure by branch line companies financed on the basis of a firm guarantee instead of a rebate, which items have hitherto been dealt with outside the programme.

The sum set down for expenditure during 1899-1900 is Rx. 6,772,700. In consequence, however, of the heavy lapse, amounting to Rx. 2,401,400, on the grant for 1898-99, to which reference has already been made and which was in a great measure due to short outlay in England consequent on the failure of contractors to complete orders placed with them for stores, it has been agreed, with the concurrence of the Secretary of State, to add a sum of Rx. 1,060,000, representing a portion of this lapse to the grant for 1899-1900, and a further sum of Rx. 1,090,000 subsequently reduced to Rx. 990,000 has been provisionally added under certain conditions with the concurrence of Finance Department, subject to Secretary of State's approval. With this addition the total amount available for expenditure on construction of Railways during 1899-1900 will stand at Rx. 8,822,700.

This sum has been distributed for expenditure on Railways as under :—

	Rx.
34.—Construction of Protective Railways . . . .	490,000
48.—State Railways—Construction . . . .	3,465,000
Capital of Indian Railway Companies . . . .	2,841,900
Branch Line Companies . . . .	168,000
Guaranteed Railways and Extensions . . . .	1,107,800
East Indian Railway Company's debentures . . . .	750,000
<b>Total amount available . . . .</b>	<b>8,822,700</b>

6. Statement A appended to this memorandum gives the programme as modified up to date, and shows also the progress made with such of the lines accepted by Government on the recommendation of the Conference for early construction as have been brought within the programme. The distribution of the amount it shows as available for expenditure during 1899-1900 and subsequent years will, of course, be liable to modification according to circumstances.

7. Statements B and C show how matters stand in regard to lines recommended for early construction at the cost of Branch Line Companies, Native States, etc., outside the programme, and either actually taken in hand or under consideration and negotiation with a view to construction; and statement D summarises the actual and anticipated progress of railway construction generally for the two years, 1898-99 and 1899-1900.

A. C. TREVOR.

## APPENDIX A.

---

Statement showing the expenditure actually incurred and the estimated further expenditure to be incurred on railways to end of 1901-1902.

## APPENDIX B.

Statement showing Railways recommended since 1895-96 for early construction outside the programme by the agency of—

- (i) Branch Line Companies,  
 (ii) Native States,  
 (iii) Railway Companies to which free land and minor concessions are given, which have actually been commenced or arranged for, omitting those shown in last year's Appendix B as completed.

Railway.	Length.	Estimated or approximate cost.	REMARKS.
	Miles.	Rs.	
<b>(I) BY BRANCH LINE COMPANIES.</b>			
<b>(a) Lines shown as under construction in 1897-98.</b>			
Sagowlie-Rukeaul . . . . .	18	99,800	Completed and opened to traffic.
Open . . . . .	18	99,800	
South Behar . . . . .	79	1,129,407	Under construction by the agency of the East Indian Railway Company. More than 4ths finished.

## APPENDIX D.

*Memorandum on the construction of railways.*

1. At the commencement of 1898-99, *i.e.*, on the 1st April 1898, the total length of railways open for traffic was 21,198·08 miles, made up as follows:—

[illegible]

- 1. Although for convenience claimed amongst State railways, this line is the property of the Bengal Central Railway Company.
- 2. Worked by the Indian Midland Railway Company.
- 3. Worked by the Bombay, Baroda and Central India Railway Company.
- 4. Worked by the Great Indian Peninsula Railway Company.
- 5. Although forming an integral part of the East Coast State railway, this line is shown separately as it is worked by the Nizam's Guaranteed State Railways Company.
- 6. Worked by the Madras Railway Company.
- 7. Includes the Kharid-Kohri and Multah-Bahlan railways and 612 miles of ordinary line not used for public traffic.
- 8. Worked by the North Western State railway.
- 9. Excluding the Berwade extension, vide footnote (c).
- 10. Worked by the East Indian Railway Company.
- 11. Excluding 126 miles. Tramway troop siding, constructed but not used for ordinary public traffic.
- 12. Although for convenience claimed amongst State railways, this line is the property of the Bengal and North-Western Railway Company.

- (a) Worked by the Southern Mahratta Railway Company.
- (a) Worked by the Bombay Indian Railway Company.
- (a) Estimated 9.00 million of the Lucknow-Bareilly railway between Ballia) and Allahgh.
- (a) Including 4.50 miles of Bhavnagar Dock estates and Jangal quarry Ham.
- (a) Worked by the Dahanu-Bombay-Judged-Purandar railway.
- (a) Including 8.50 miles of Bhe-Sunder Bhat estate sidings.
- (a) Estimated a railway from the 1st May 1886. Previously omitted.
- (a) Worked by the Eastern Bengal Assam railway.
- (a) Including the mileage of the Chittra-Congorailway, which is treated as a steam tramway for administrative purposes only. This line was damaged by floods and was opened up on 30th April 1887 only. It was reopened for goods traffic from 23rd December 1887.
- (a) Including 3.00 miles from Patnakhali to the Ganges connected but not worked. This length was open for traffic from the 1st to the 15th October 1887.
- (a) Includes the Gauthai-Jamuna branch section, 7.75 miles, temporarily closed to traffic from 13th June 1887 on account of damages done by collisions.

**TOTAL** • (c) 4,293.66

There was thus a grand total of railways completed and in hand, on the 1st April 1898, of miles **25,493·74**

[illegible]

(2) The length between Basal (New Pind-Mulhail) and Lassar, 18 miles, is a part of the open mileage of the Khudhar branch.  
(3) Including the existing South Indian, metre gauge, railway between Basal and Solapur, 27.8 miles, subsequently taken over and converted to the standard gauge.  
(4) The mileage given is exclusive of 6.5 miles of the existing Hyderabad-Mulhail metre gauge railway to be converted to the metre gauge.  
(5) Excluding the Khudhar-Peepur section 15.05 miles.  
(6) Includes the mileage of the proposed multipurpose railway, which is treated as a main line for administrative purposes only.

8. During 1898-99, i.e., from 1st April 1898 to 31st March 1899, 540·62 miles of new railway were authorized as follows:

	Miles.	Miles.	Miles.
(i) Agra-Delhi branch— Agra to Delhi . . . . .	(a) 121·16		
Bombay-Nagpur— Bombay to Midnapore . . . . .	(b) 5·00	129·16	
(ii) South Indian— Nagpur to Nagore . . . . .	(c) 4·07		
Bombay— Bombay to Mysore . . . . .	87·70	198·20	345·87
(iii) Jodhpore-Mekran (Mekran section)— Jodhpore to Bhakkar . . . . .	(d) 63·70		
Mekran to Bhakkar . . . . .	7·90	71·60	
(iv) Tezpur-Ballpara (2' 6")— Tezpur to Ballpara . . . . .	(f) 20·10		
Howrah to Amta . . . . .	(g) 29·76		
Howrah to Jangalbalpur (branch) . . . . .	(h) 10·25	169·30	
Howrah to Bhokhalla (2' 6")— Kandah to Bhokhalla . . . . .	(i) 10·25		
Chanditola to Jangal (branch) . . . . .	(j) 20·20		
Right bank of the Churni river near Bhokhalla to the left bank of the Churni river at Krishnagar . . . . .	(k) 63·00		
(v) Gwalior-Chambal ghât (2' 6")— Gwalior to Mandla . . . . .	(l) 43·79		
(vi) East Indian— Hathras Road to Hathras City . . . . .	6·61		
Bombay-Nagpur— Sind to Nagpur . . . . .	135·48	224·83	360·31
Bombay to Barang (Cuttack) . . . . .	160·00		
Indian Midland— Bombay to Katul . . . . .	68·00		
(vii) North Western— Lyallpur to Toba Tek Singh . . . . .	40·00		
Quetta and Kohli-Khand . . . . .	158·49		
Kashmir to Baramulla . . . . .	6·59	20·59	405·26
Pandhara to the Ganges . . . . .	14·59		
Pandhara to Pandhara . . . . .	1·84		
East Coast, including Bewada-Madras— Temporary Port station to permanent Port station . . . . .	76·00	(d) 236·20	
Port to Gudur . . . . .	24·24		
Gudur to Nellore . . . . .	124·12		
(viii) Madras— Wajah Road to Ratipet . . . . .	4·38		
(ix) Southern Punjab (Delhi-Bombay)— Karnal to Kuthi . . . . .	(d) 23·00	49·26	
Tapi Valley— Kankar Khari to Vyara . . . . .	26·26		
(x) Bengal and North-Western— Company's section— Bachman to Tulpur . . . . .	(d) 18·50		
Ganga bridge at Bahramghat and approach . . . . .	3·27		
Ganga Ganga Road line— Tulpur to Amnagar . . . . .	21·30		
Amnagar to Amnagar . . . . .	63·95	(f) 231·29	316·67
Amnagar to Tulpur . . . . .	21·25		
Amnagar to Gwalior . . . . .	200·00		
South Indian— Kandah to Gudur . . . . .	(e) 26·84		
Amnagar to Gudur . . . . .	(h) 19·00	87·43	
Amnagar to Gudur . . . . .	19·02		
(xi) Brahmaputra-Jamsherd— Bachman to Tulpur . . . . .	23·50		
Mymensingh-Jamsherd-Jamsherd— Mymensingh to Singhpur . . . . .	83·00	91·40	
Singpur to Bakaul . . . . .	16·00		
Mylor— Mylor to Cooner . . . . .	(d) 16·00		
(xii) Jodhpore-Mekran— Mekran section— Jodhpore to Bhakkar . . . . .	41·07	91·50	
Bhakkar to Bhakkar . . . . .	(d) 20·08		
(xiii) Mysore-Nagpur— Nagpur to Nagpur . . . . .	1·60		
(xiv) Tezpur-Ballpara (2' 6")— Tezpur to Ballpara . . . . .	(f) 20·10		
Howrah to Amta (2' 6")— Telukhata (Howrah) to Amta . . . . .	(g) 29·76	88·10	
Howrah to Jangalbalpur (branch) . . . . .	(h) 10·25		
Howrah to Bhokhalla (2' 6")— Kandah to Bhokhalla . . . . .	(i) 10·25		
Chanditola to Jangal (branch) . . . . .	(j) 20·20		
(xv) Rajpala (2' 6")— Rajpala to Umalia . . . . .	4·00		
(xvi) Cochin-Bombay (2' 6")— Slight bank of the Tansa river to the town of Cochin . . . . .	(d) 23·33	24·80	
Cochin to Alipore . . . . .	11·40		
(xvii) Gwalior-Bombay (2' 6")— Gwalior to Mandla . . . . .	(l) 43·77		

Standard gauge—	Miles.	Miles.
(i) State lines worked by com- panies . . . . .	129·16	129·16

Metre gauge—	
(ii) State lines worked by com- panies . . . . .	136·97

Gwalior-Chambharn—			
Gwalior to Bind		(a) 40.00	

(a) Commencement of work not yet authorized.

(b) Correction of mileage.

(c) Provisionally mentioned.

(d) Including 51.00 miles of the Hyderabad-Bhandipalli standard gauge railway to be converted to the metre gauge.

(e) Including 5.04 miles of existing light railway.

\* Made up as follows:—

	Miles.
Completed and in hand at the beginning of 1898-99	20,000.74
Sanctioned during 1898-99	94.00
	20,094.74
Deduct—	
Decrease due to realignment of the Assam-Bengal Railway	0.30
Net decrease due to minor correction of mileage	4.00
	4.30
Add—	
Gorah bridge and approaches at Bahramghat, previously omitted	3.27
Increase due to new alignment of the Mar-Attock Railway	2.70
Increase due to new alignment of the Calcutta-Cannanore Railway	2.00
Increase due to new alignment of the Mandlay-Moulon Railway	13.20
	18.17
	20,081.11

5. And the mileage under construction or sanctioned for construction on the 31st March 1899 will be 3,430.15 miles, made up, as follows:

## Standard gauge—

(i) State lines worked by companies . . . . . 1,430.20

(ii) State lines worked by the State . . . . . 239.60

(iii) Guaranteed companies . . . . . 135.05

(iv) Assisted companies . . . . . 238.14

(v) Lines owned by native states and worked by companies . . . . . 74.12

(vi) Lines owned by native states and worked by State railway agency . . . . . 80.32

1,201.52

## Metre gauge—

(vii) State lines worked by companies . . . . . 927.93

(viii) State lines worked by the State . . . . . 76.13

(ix) Assisted companies . . . . . 178.77

(x) Lines owned by native states and worked by companies . . . . . 427.79

(xi) Lines owned and worked by native states . . . . . 295.41

1,906.03

## Special gauges—

(xii) State lines worked by companies . . . . . 66.67

(xiii) State lines worked by the State . . . . . 20.04

(xiv) Assisted companies . . . . . 121.40

(xv) Lines owned by native states and worked by companies . . . . . 43.50

(xvi) Lines owned and worked by native states . . . . . 80.83

392.58

TOTAL . . . . . 3,430.15

Making a grand total of railways completed and in hand at the commencement of 1899-1900 of miles 26,081.11\*

And showing, after allowing for corrections of mileage, an advance on the previous year, of miles . . . . . 586.08

6. It is expected that the following lengths of unfinished line will be opened for public traffic in 1899-1900 :

	Miles.	Miles.
<b>Standard gauge—</b>

Calcutta, 24th March, 1899.

GOVERNMENT OF INDIA.  
DEPARTMENT OF REVENUE AND AGRICULTURE.

**Weather Review of India for the week ending at 8 a.m. on  
Saturday, March 11th, 1899.**

Although no storm, during the week under review, has been comparable with that which crossed India during the previous week, yet the weather over Northern India has been feebly disturbed and unsettled and two or three shallow storms have crossed the country from West to East. As a result thunderstorms with light rain and hail have been experienced over North-West and North-East India, and dust-storms and gales of wind over the Gangetic Plain. On the first day of the week the showers were received over Assam, Upper Burma and East Bengal, but on the next day, the 6th, they were reported only from North-West India, where they were fairly general; on the 7th the showers were few and were experienced about equally in the North-West and North-East; similar weather prevailed on the 8th, but on the 9th the rainfall area extended both in the North-West and North-East, while the rainfall amounts were heavier in the North-East. On the 10th, rain almost ceased, but on the 11th, it recommenced in the North-West though it remained very light and scattered in the North-East. While this feebly unsettled and showery weather prevailed over Northern India, conditions in Central and Southern India were very quiet, and fine, dry weather, with generally higher temperatures than usual, prevailed throughout the week. In Northern India temperature conditions were fairly steady, thus in North-East India the mean temperature was more or less below the normal throughout the week, while in North-West there was an equally steady excess. The amount and extent of the deficiency in the North-East, as of the excess in the North-West, varied from day to day, but, generally speaking, the temperature conditions were very constant during the week.

**Daily Summary.—Sunday, March 5th.**—The barometer was falling briskly to rapidly over North-West India and a shallow storm was shown over the Western desert. Pressure was also relatively less over Bengal, while it was relatively high over the central parts of the country and the Assam Valley. The winds were Southerly and South-Westerly on the Bay coast, Easterly in North Bengal and Bihar and more or less variable elsewhere. The sky was cloudy in parts of North-West and North-East India and rain had fallen at Lashio, Mymensingh, Silchar, Sibsagar and Darjeeling, and a light snow-storm was reported from Minimarg (Kashmir). The mean temperature was low for the season over Bengal, Assam and Burma and across the head of the Peninsula; elsewhere it was excessive.

**Monday, March 6th.**—Pressure had changed little except over the east of the Punjab, Rajputana, the west of the North-Western Provinces, and the adjoining parts of Central India and the Central Provinces. In these regions the barometer had fallen briskly to rapidly, due to the advance of the depression which, on the previous day, was shown over the Western desert. A well marked Easterly current of wind blew across Bengal and up the Gangetic Plain, but elsewhere the winds were more or less variable. The sky remained cloudy in parts of North-West and North-East India. Light snow had fallen at Minimarg and light rain over the North-West Himalayas as well as at Sialkot, Rawalpindi, and Bhamo. The weather was very cool over North-East India and very hot for the time of year over North-West India, but elsewhere the mean temperature was about normal.

**Tuesday, March 7th.**—The depression noticed on the two preceding days had reached the east of the North-Western Provinces and the west of Bengal. Otherwise, there had been no great change. Easterly winds continued in North Bengal and up the Gangetic Plain, while North-Westerly winds were reported over Rajputana and North Bombay and variable breezes elsewhere. The sky was slightly cloudy in the extreme North-East and extreme North-West, while a thunderstorm had given 1.32 inches of rain and hail to Chittagong, and showers had been received at Silchar, Darjeeling, Mussooree, Simla and Murree. The heat was less than usual in Assam, Burma and the south of the Peninsula, but was excessive elsewhere, more particularly within a region extending from Jhansi through Rajputana to Upper Sind.

**Wednesday, March 8th.**—The barometer had risen briskly over the North-Western Provinces, and the depression which was shown there on the 7th had travelled east-south-eastward to Lower and South-West Bengal. At the same time a fresh depression had appeared over the Western desert. Strongish

South-Westerly winds were blowing at the head of the Bay and Easterly breezes continued to be reported from North Bengal, but elsewhere the wind directions were very variable. The sky was cloudy in parts of North-East and North-West India and showers had been received at Narayanganj, Silchar, Sibsagar, Mussooree and Chakrata. The heat remained low for the time of year in Assam, Burma and the south of the Peninsula, and high in all other places.

*Thursday, March 9th.*—The Bengal depression\* had practically filled up, while on the contrary that noticed over the Western desert had travelled to the South Punjab and become deeper. The weather had continued cloudy and showery in parts of North-East India and had become more cloudy and unsettled in the North-West under the influence of the new storms. The temperature conditions were unchanged.

*Friday, March 10th.*—The barometer had risen everywhere. The depression noticed over the South Punjab had passed on down the Gangetic Plain and was shown over the North-Western Provinces where it was filling up. The winds were variable throughout the country. There had been no change in the general weather. Cloudy skies continued to be reported in the North-West and North-East, and showers had been received at a few stations. The Assam Valley, Central Burma and part of Madras reported lower temperatures than usual, but elsewhere the heat was excessive.

*Saturday, March 11th.*—Pressure had continued to increase. Readings were high along the foot of the hills and relatively high and very uniform over the Peninsula and the central parts of the country, while a band of low pressure extended from Upper Sind to the head of the Bay. Northerly to Easterly winds with showery and cloudy weather prevailed to the north of the band, while fine quiet weather prevailed to the south with light variable winds. The heat was excessive, except in Central Burma and in Madras.

**Temperature.**—The weather had been hotter than usual over by far the greater part of the country during the week under review. In North-West India the showers, which fell on and near the hills on most days of the week, had comparatively little influence on the temperature and never reduced the mean temperature to below the normal, but in the North-East, on the contrary, the showers exercised a considerable effect, and for several days Bengal, Assam and Burma reported temperatures below the normal average. Over the Peninsula the temperature conditions were more nearly normal, but towards the close of the week an area of low temperature appeared in the extreme South and subsequently extended northward over a considerable part of Madras.

The following table gives mean temperature variation data for the week :—

PROVINCE.	MARCH 1899.							Mean variation of week.
	5th.	6th.	7th.	8th.	9th.	10th.	11th.

Central India . . . . .	+1·5	+4·9	+5·9	+2·3	+3·7	+4·9	+4·6	+4·0
Central Provinces . . . . .	—0·5	+1·7	+3·8	+2·8	+1·9	+3·6	+4·6	+2·6
Berar . . . . .	—1·2	+0·1	+3·3	+3·4	+1·6	+3·7	+3·5	+2·1
West Coast . . . . .	+0·7	+0·6	+0·5	—0·5	+0·5	+1·0	+0·1	+0·4
Bombay Deccan . . . . .	+0·1	+1·0	+1·5	+0·4	+0·9	+2·0	+0·8	+1·0
Mysore . . . . .	+2·9	+1·0	+0·4	+2·1	+1·6	+0·9	—0·1	+1·3
Madras Coast . . . . .	+2·2	—0·1	+0·6	—0·1	+0·5	—0·3	—0·5	+0·3
Madras Deccan . . . . .	+1·7	+1·7	+2·2	+1·4	+1·3	+0·9	+0·5	+1·4
South India . . . . .	+0·3	+1·1	—1·7	—2·1	—2·0	—1·2	—3·1	—1·2
Mean for whole of India . . . . .	+1·4	+2·0	+2·6	+2·2	+2·1	+2·4	+2·0	+2·1

The general temperature of the whole country was higher than usual on each day of the week, the excess ranging from  $1^{\circ}4$  on the 5th to  $2^{\circ}6$  on the 7th. The provincial variations show that the mean temperature was lower than usual on all days in Burma, on every day but one in Assam and on every day but two in South India, but that elsewhere with one or two trifling and unimportant exceptions the heat was steadily excessive throughout the week. The excess averaged over  $6^{\circ}$  in Rajputana, over  $5^{\circ}$  in Sind and over  $4^{\circ}$  in Chota Nagpur, the North-Western Provinces, the Punjab and Central India. The following were the highest maxima recorded on each day :—

March 5th, Cuddapah . . . . .	102°·2
" 6th " . . . . .	101°·2
" 7th, Cuttack . . . . .	101°·9
" 8th, Cuddapah . . . . .	102°·7
" 9th " . . . . .	102°·7
" 10th " . . . . .	102°·7
" 11th " . . . . .	103°·2

**Rainfall.**—As shown in the earlier portions of this summary the whole of Burma, the Peninsula and the central parts of India have experienced fine quiet weather during the week under review and no rain whatever has fallen during that period over these regions. On the contrary, over Northern India the weather has been feebly disturbed, the unsettledness being caused by a series of slight depressions or storms which drifted from west to east across the country. The effect of these storms or depressions on the weather was everywhere slight, but this was particularly the case while they were traversing the North-West Provinces and West Bengal where their presence was mainly manifested in dust-storms and strong winds and where they hardly occasioned any rainfall. In Baluchistan and North-West India the depressions gave fair showers, more particularly on the hills, and the weather was squally and gusty, but it was mainly in North-East India that the influence of the depressions was felt, and in some parts of this area the falls of rain were moderately heavy.

The rainfall table at the close of the summary shows that during the week under review, rain averaging one-tenth of an inch or more was received in eleven of the rainfall divisions, *viz.*, East Bengal, the three Assam divisions, North Bengal, the Bengal hills, the hills of the North-Western Provinces, the Central Punjab, the Punjab hills, Sind and Baluchistan, the heaviest average actual fall being  $2\cdot47$ " in the Surma division of Assam and the lightest  $0\cdot10$ " in the Punjab hills. In all other parts of the country the rainfall of the week has been actually or practically *nil*. The average actual rainfall was heavier than the average normal rainfall by small or moderate amounts in East Bengal, the Assam hills, the Brahmaputra Valley, North Bengal and the Bengal hills, and by a considerable amount in the Surma district, but in all other places the fall was lighter than usual. The principal cases of deficiency were shown in the North Punjab and the North-West Himalayas.

The following are the principal large totals recorded at individual stations during the week :—

East Bengal—Munshiganj, Dacca . . . . .	2·11 inches.
Assam—Sylhet . . . . .	3·50 "
Mandakata, Gauhati . . . . .	2·14 "

The three concluding columns of the table show that for the two weeks ending 11th March the rainfall has been heavier than usual in East Bengal, the Assam divisions and Bengal hills, but that in all the remaining divisions it has been less than the normal, and that over a considerable part of the country no rain whatever has been received.

W. L. DALLAS,

Asst. Meteorological Reporter  
to the Government of India.

SIMLA, the 16th March 1899.

T. W. HOLDERNESS,

Secretary to the Government of India.

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

## Weekly Report on the state of the Season and Prospects of the Crops.

**Madras.**—*For week ending 18th March.*—No rain fell during the week. Water supplies are adequate generally. Some small sowings are proceeding. The standing crops are generally good. The harvest continues to yield an almost normal outturn. Pasture is scanty but fodder is sufficient. The condition of cattle is generally good. Prices are almost stationary, but are slightly dearer in the Deccan and southern districts.

**Bombay.**—*For week ending 22nd March.*—Slight rain fell in parts of Sind during the week. The standing crops have been injured by high winds and rain in one taluka of Hyderabad and by rats in two talukas of Bijapur. American cotton has been blighted in two talukas of Dharwar. The opium crop has been damaged in parts of Baroda territory. The reaping of the late crops is progressing in sixteen and preparations for next season are being made in twelve districts. Cotton-picking continues in parts of Gujarat and the Karnatak. Fodder is sufficient. Prices have fallen in ten and risen in two districts; elsewhere they are stationary.

**Bengal.**—*For week ending 20th March.*—There was no rain during the week. Fine dry weather is reported throughout the Province. The harvesting of the spring crops, pressing of sugarcane, and lancing of opium continue. Spring rice and other crops in the ground are doing well. Ploughing for autumn rice and jute is in progress, and sowing has commenced in parts. Rain is wanted in some districts. There is plenty of fodder everywhere, except in parts of Midnapore. The price of rice is reported to have risen in some places, but prices are on the whole stationary.

**North-Western Provinces and Oudh.**—*For week ending 22nd March.*—With the exception of showers in the hill districts and in two of the western submontane districts, the weather has been clear during the week. The harvesting of the spring crops is progressing and threshing has begun in parts. Sugarcane planting continues and extra crops are being sown and irrigated. The extraction of opium is proceeding. Prospects are good. Supplies and fodder are sufficient. Prices are stationary or falling.

**Punjab.**—*For week ending 22nd March.*—Rain fell during the week in the Sialkot, Rawalpindi, Peshawar and Dera Ismail Khan districts. Ploughings for the autumn crops and cultivation of extra spring crops are in progress. Crops on irrigated lands are generally fair, but those on unirrigated areas are mostly suffering from the long drought; they have failed in Delhi and are withering in Lahore. Rain is badly wanted throughout the province. The yield of the spring crops is generally expected to be decidedly below the average. The standing crops have been damaged by rats in parts of Umballa, by caterpillars in parts of Ferozepore and Lahore and by hail in parts of Sialkot. Cattle are generally in good condition; their condition is reported poor in Delhi only. Fodder is said to be sufficient in all districts, except in Delhi, Umballa, Lahore, Shahpur and Dera Ismail Khan. Prices, especially of wheat, are rising in Shahpur, falling in Delhi, Umballa, Amritsar, Rawalpindi and Peshawar, and are unchanged elsewhere. Wheat is selling from 15½ to 20, gram 20 to 22, barley 28, bulrush millet 18 to 22½, maize 26 to 32, great millet 23 and rice 13 to 14 seers per rupee.

**Central Provinces.**—*For week ending 21st March.*—The weather is clear; the nights and mornings are cool but the day temperatures are high for the

season. The reaping of the spring crops is approaching completion in most districts and threshing has commenced. The planting of sugarcane is in progress in Chanda, Bhandara and Sambalpur. Some signs of distress are appearing in the open part of Damoh owing to want of employment. Water is getting scarce in parts of Mandla and Betul. Fodder is scarce in Sambalpur and in the Warora tahsil of Chanda. The price of wheat, gram and juar has fallen in 6, 3 and 5 districts respectively. The price of rice is on the whole steady, but there is a rise in the rate in Saugor and Seoni. The cheapest prices are:—wheat 21, gram 32, rice 22 and juar 28½ seers per rupee. The dearest prices are:—wheat 12, gram 16, rice 11 and juar 21 seers per rupee.

**Burma.**—*For week ending 18th March.*—In Upper Burma the transplanting of dry weather paddy has been completed in several districts. The reaping of island and other miscellaneous crops is becoming more general. The standing crops continue to promise well everywhere. The price of paddy has risen slightly in Thaton and Pakokku and fallen to some extent in Prome and Thongwa; elsewhere it is stationary.

**Assam.**—*For week ending 21st March.*—Slight rain fell in Upper Assam and in the Naga Hills during the week. Ploughing for early and late broadcast rice in the Assam Valley districts is in progress. Sowing of early rice in the Assam Valley and of lowland winter rice in Sylhet has commenced. The gathering of mustard has been almost completed. The gathering of pulses, hoeing and plucking of tea and pressing of sugarcane continue. The prospects of sugarcane and tea are good. Land is being prepared for jute in Goalpara and for sugarcane in Darrang. Fodder is scarce in the Naga Hills. Water is insufficient in Nowgong and in parts of Sylhet. Prices—common rice, Sylhet 19. Silchar, Dhubri, Gauhati, Tezpur and Nowgong 16, Sibsagar 13 and Dibrugarah 14 seers per rupee.

**Mysore and Coorg.**—*For week ending 22nd March.*—**MYSORE:** The standing crops are in good condition. Paddy has been harvested in parts of Tumkur and ragi (*eleusine coracana*) in Mysore. Prices have risen slightly in Hassan and Kadur and have fallen in Bangalore, Kolar, Chitaldroog and Shimoga.

**COORG:** No crop standing. Water and fodder for cattle are sufficient. Prices of food grains are stationary.

**Berar and Hyderabad.**—*For week ending 22nd March.*—**BERAR:** The days are hot, but the nights and mornings are cool. The harvesting of the winter crops has almost been completed. Land is being prepared for the ensuing rain crop. Fodder and water are insufficient in parts of four districts. Prices are fluctuating.

**HYDERABAD:** No rain fell during the week. The spring harvest is still proceeding. The standing winter rice crop is in fairly good condition. Prices of grain continue to fall in parts. Prices—wheat 9½, coarse rice 10½ and jowari 23½ seers per current sicca rupee.

**Central India.**—*For week ending 22nd March.*—No rain fell in Central India during the week. Agricultural operations are in progress throughout the Agency. The standing crops are in fairly good condition. The condition of opium is good. Prices are above the normal in Bundelkhand, but are normal elsewhere.

**Rajputana.**—*For week ending 22nd March.*—Slight rain fell in Bikanir during the week. Agricultural operations are satisfactory except in Merwara. The condition of the crops is generally good, except in Ajmere-Merwara. Crops are being harvested; the average estimated spring outturn in Ajmere is 11½ annas and in Merwara 6 annas. Fodder is scarce in 9 states. Prices are rising in 2 states, falling in 2, fluctuating in 1 and steady elsewhere. Emigration from the distressed Ajmere villages and from Merwara continues: 63 persons

emigrated during the week. The total emigration from Merwara up to date numbers 4,329 persons. The numbers employed on relief works were 401 in Ajmere, 4,225 in Merwara and 965 in Marwar. The price of gram in Marwar is 15, in Ajmere 18 and in Beawar 22 seers per rupee.

**Kashmir.**—*For week ending 21st March.*—The weather is fine. Prices continue below the normal. The price of rice is 27 seers per rupee.

**JAMMU PROVINCE:** *For week ending 22nd March.*—No rain fell during the week. The condition of the standing crops is fair. Fodder is sufficient. Prices are generally stationary, wheat selling at 18 and maize at 24 seers per rupee.

**Nepal.**—*For week ending 18th March.*—No rain fell during the week. The weather is seasonable with high winds. The price of rice is 8½ seers per rupee.

T. W. HOLDERNESS,

*Secretary to the Government of India.*

SUPPLEMENT TO

# The Gazette of India.

---

No. 13.1

CALCUTTA, SATURDAY, APRIL 1, 1899.

---

## OFFICIAL PAPERS.

*A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.*

*Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

*No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.*

Weather Review of India for the Week ending at 8 a.m. on  
Saturday, March 18th, 1899.

Last week, it will be remembered, the weather was unsettled over Northern India, and a series of slight storms passed across that part of the country from the westward to the eastward. These unsettled conditions continued during the greater part of the week under review. The first of the storms was shown over the Western desert on Sunday, 12th March, occasioning snow and rain in Kashmir and rain in Baluchistan, Sind and the West and North Punjab. By the morning of the 13th the storm had practically disappeared, but showers continued to be received over the extreme north-west of India. On the morning of the 14th the weather was nearly clear and appeared quite quiet, but on the 15th pressure was giving way rapidly in the extreme north-west and rain had commenced in Baluchistan. On the following day a diffused depression was shown over the Kashmir Himalayas and the north and centre of the Punjab, and the weather was again rainy over Baluchistan, Lower Sind, the West and North Punjab and the Kashmir Himalayas. The storm disappeared or was transferred with great rapidity to the eastward. During the day a large high pressure area was developed over North-West India; the weather cleared and became everywhere fine, while strong westerly and west-north-westerly winds, such as prevail over Northern India during the hot weather, were established over the Gangetic Plain. Rain is unusual at this season in Sind, and, as a result of the rainfall noticed above, the mean temperature of Sind has been considerably—and of Gujarat slightly—below the normal average. In nearly all other places the heat during the week has been excessive, but in South India, owing to local causes, the first-half of the week was cooler than usual.

**Daily Summary.**—*Sunday, March 12th*—Pressure had given way briskly to rapidly over the Punjab, and a storm, at the centre of which the barometer read slightly below the normal, was traversing that province. The winds were irregular over the greater part of the country, but were gusty and squally in the north-west. The weather was very unsettled and showery in the north-west and in Baluchistan, and snow and rain had fallen on the hills and rain on the plains around the north-west frontier of India. Peshawar, Cherat and Hyderabad had received over 1 inch in twenty-four hours. The mean temperature was low over the Indus Valley, Gujarat and the south of the Peninsula, about normal in Burma and Assam and high elsewhere. In Eastern Rajputana the excess was more than  $9^{\circ}$ ; while at Jacobabad and Salem the deficiency was over  $5^{\circ}$ .

*Monday, March 13th.*—The barometer had risen in the north-west, but had fallen in all other parts of the Indian region. The storm noticed over the Punjab had almost disappeared, and a well-marked high pressure area was shown over North Bombay, Central India and Rajputana where the barometer was considerably to largely higher than usual. The winds varied considerably in direction, but were gusty and unsteady in force, and gales had been experienced at several north-west stations. The sky was practically clear of cloud at 8 A.M., but the weather had been unsettled, with snow and rain on the hills, and rain over Baluchistan and parts of the Punjab and of the North-West Provinces. The mean temperature remained low over the Indus Valley and that neighbourhood, as well as over the south of the Peninsula, normal over the Central Punjab, and much above the average elsewhere. The principal variations from the normal were  $+12.3^{\circ}$  at Cawnpore,  $-8.8^{\circ}$  at Hyderabad (Sind) and  $-5.3^{\circ}$  at Salem.

*Tuesday, March 14th.*—The barometer had risen briskly in the West Punjab, fallen briskly to rapidly over the North Gangetic Plain and North-East India and changed slightly elsewhere. A well-marked high pressure area overlay North-West and Central India and a low pressure area Bengal, Assam and

Upper Burma, so that gradients were steepish over the Gangetic Valley. A fresh north-westerly to westerly wind prevailed down the Gangetic Valley and across Bengal and a light north-east wind over the Central Provinces. In the Peninsula pressure was uniform and the winds light and variable. The weather was cloudy on the hills, and there had again been snow in Kashmir and rain at Sialkot, Rawalpindi, Srinagar and Murree. The mean temperature had increased over the Indus Valley, so that the depression of temperature in that region was less than on the 13th, but the general conditions of temperature were unchanged, the following being the principal variations from the normal: Cawnpore  $+9.8^{\circ}$ , Rawalpindi  $-4.0^{\circ}$  and Salem  $-4.5^{\circ}$ .

*Wednesday, March 15th.*—Pressure was high over North-West and Central India, low over Bihar and uniform over the Peninsula. Steepish gradients continued to be reported down the Gangetic Valley, and the westerly and west-north-westerly wind over that region was strong. Elsewhere the winds were generally variable, but in the Indus Valley and Baluchistan the direction was between south and east, and a fresh depression was approaching the north-west frontier where the barometer was falling rapidly. The weather was cloudy on and near the hills in the extreme north-west and north-east, and showers were reported from Sibsagar, Quetta and Chaman. The mean temperature was low over a large part of North-West India, about normal in the south of the Peninsula and was excessive elsewhere.

*Thursday, March 16th.*—The barometer was falling over the Punjab, and the depression which had been advancing towards the north-west frontier on the previous day was shown over that province. It was giving squally unsettled weather to a large part of North-West India and had occasioned snow and rain in Kashmir and rain over Baluchistan, Lower Sind and the West and North Punjab. The mean temperature was again much lower than usual in the Indus Valley, about normal over the Peninsula and higher than usual elsewhere.

*Friday, March 17th.*—The depression had either disappeared or had been transferred rapidly eastward to Bengal, and a large anti-cyclone, with pressure largely above the normal average, had been established over North-West India. North-westerly winds were blowing in Northern India, north-easterly winds in the centre and variable winds elsewhere. Calms were reported in the north-east. The weather was fine throughout almost the whole country, but snow had been received in Kashmir and thundershowers over the North-West Himalayas and some submontane stations. The mean temperature was slightly to very largely below the normal over the extreme north-west of India and slightly below over the east of the Peninsula, while elsewhere the heat was excessive. The following variations from the normal explain the distribution of the mean temperature relatively to the average: Jacobabad  $-10.3^{\circ}$ , Jhansi  $+5.7^{\circ}$ , False Point  $-1.2^{\circ}$ , Tونغoo  $+5.0^{\circ}$ .

*Saturday, March 18th.*—The barometer was falling everywhere, but there had been no important change in the pressure conditions. Strong westerly and west-north-westerly winds continued down the Gangetic Valley, moderate northerly and north-easterly winds over the central parts of the country and variable winds elsewhere. The weather was very fine with clear skies and very dry air, and the only rainfall reported was a few drops at Sibsagar. The temperature distribution was the same as on the preceding day. The weather was cooler than usual over North-West India and over the east of the Peninsula and was hotter than usual elsewhere. The principal variations were:  $-8.1^{\circ}$  at Jacobabad,  $-2.6^{\circ}$  at Vizagapatam and  $+7.1^{\circ}$  at Sibsagar.

**Temperature.**—The weather has been hotter than usual over the greater part of the country during the week under review. Owing, however, to some local influence the heat was steadily and considerably below the normal in the south of the Peninsula for the first four days of the week. A cool wave in the Indus Valley impinged on the high temperature area over Northern India on the 12th and became strongly marked on the following day, but thereafter it gradually broke up without advancing. On the 16th another cool wave appeared over the Indus Valley, and this had more vitality as it advanced eastward as far as the north of

the Central Provinces and the west of the North-West Provinces. Notwithstanding these two cold waves and the low temperature area in the south, the heat generally was excessive and for the whole country for the whole week averaged  $1\frac{1}{2}^{\circ}$  above the normal.

The following table gives the temperature variation data for the week :

PROVINCE.	MARCH 1899.							Mean variation of week.
	12th	13th	14th	15th	16th	17th	18th	
Burma	+1.0	+1.0	+2.9	+2.8	+2.6	+1.8	+1.9	+2.0
Assam	+0.9	+1.7	+2.9	+3.6	+2.4	+2.9	+4.9	+2.8
Bengal	+3.0	+3.6	+4.5	+3.8	+1.5	+1.2	+1.9	+2.8

Bihar	+3.5	+4.0	+6.0	+3.9	+2.5	+2.6	+3.7	+3.7
Chota Nagpur	+5.9	+5.9	+7.0	+3.3	+1.3	+1.1	+3.6	+4.0
N.-W. P. and Oudh	+5.5	+5.5	+5.6	+2.9	+2.2	+3.7	+1.9	+3.9
Punjab	+4.5	+4.5	+0.8	+0.4	+0.4	-2.5	-3.7	+0.6
Sind	-1.1	-6.1	-1.8	-1.9	-6.1	-7.9	-4.7	-4.2
Rajputana	+7.4	+3.8	+1.4	-0.3	+4.2	-2.0	-2.8	+1.7
Gujarat	-0.7	+0.4	+0.2	+1.4	+3.3	-4.6	-4.3	-0.6
Central India	+5.9	+5.1	+2.5	■	+1.2	+2.3	-1.7	+2.2
Central Provinces	+5.0	+5.0	+4.2	+1.0	+0.7	+0.6	+0.7	+2.5
Berar	+6.4	+5.6	+2.9	+1.0	+2.1	+3.8	+2.7	+3.5
West Coast	-0.4	-0.8	0	+0.7	+0.1	+0.8	+0.7	+0.2
Bombay Deccan	+1.0	+1.5	+0.9	+1.8	+2.0	+1.8	+1.1	+1.4
Mysore	-2.3	+0.5	+0.3	+2.5	+1.2	+1.2	+1.6	+0.7
Madras Coast	+0.3	+1.3	+0.6	+2.1	+2.2	+1.4	+0.3	+1.2
Madras Deccan	+4.6	-1.2	+0.2	+0.2	+0.9	+0.8	+0.5	+0.9
South India	-3.9	-3.5	-4.1	-2.3	+0.6	+0.3	+0.1	-1.8
Mean for whole of India	+2.5	+2.1	+2.0	+1.6	+1.4	+0.4	+0.5	+1.5

The heat was excessive on all days of the week, though on the last two days the excess was small and unimportant. The provincial variations exhibit a considerable depression of temperature in Sind and a slight depression in South India, while in the Punjab, Gujarat, the West Coast, Mysore and the Madras Deccan the mean temperature was normal and in the remaining provinces excessive. The hottest area relatively to the normal was Chota Nagpur with a mean excess of  $4^{\circ}$ .

The following were the highest maximum temperatures recorded on each day :

Sunday	March 12th	—Cuttack	103.4°
Monday	" 13th	—Do.	103.4°
Tuesday	" 14th	—Chanda	105.2°
Wednesday	" 15th	—Cuddapah	104.2°
Thursday	" 16th	—Do.	105.2°
Friday	" 17th	—Do.	104.2°
Saturday	" 18th	—Kurnool	104.8°

**Rain.**—Practically the whole of the rainfall of the past week has been due to the storms which appeared on the north-west frontier, and hence rain has been practically confined to North-West India. There has been light rainfall in Assam and North Bengal due to local showers, but this rainfall, though important and useful, has been light and scattered and attributable to purely local causes.

The rainfall in the north-east occurred in three divisions, *viz.*, the Surma division of Assam, the Brahmaputra division of Assam and the north division of Bengal. In the first division the rain fell on the 14th only; in the second it fell on the 12th, between the 14th and 16th and again on the 18th; and in the last apparently on the 18th. The amount of rain was very small in North Bengal; it was small in the Surma division and was moderate in the Brahmaputra division, the amount apparently increasing on ascending the valley. Turning to the north-west the rainfall occurred under the influence of two storms and fell as follows: in the west of the North-West Provinces on the 13th and 17th; in the Punjab on the 12th, 13th and 14th and again on the 16th and 17th; in Sind on the 12th and 16th; and in Baluchistan on the 12th and 13th and the 15th and 16th. The table at the close of the summary shows that rain fell during the week, in effective amount, only in six divisions, *viz.*, Assam (Surma), Assam (Brahmaputra), the Central Punjab, the North Punjab, Sind and Baluchistan. Of these six divisions four received more than the normal fall of rain, *viz.*, the Central Punjab + 0.19 inch, the North Punjab + 1.19 inches, Sind + 0.51 inch and Baluchistan + 1.11 inches. In all other parts of the country, even where rain has fallen, the amount has been less than usual, and in most places there has been no rain whatever. The deficiency has been considerable and important in parts of Assam and the North-West Himalayas where moderate showers are anticipated at this time, but elsewhere the normal fall is small and of little consequence.

The three concluding columns of the rainfall table show that the rainfall during the past three weeks has been unusually light, and that over a very large part of the Peninsula, of Burma, of the central districts and of the Gangetic Plain there has been no rain whatever. In these districts, however, the normal rainfall at this season is very light. In Assam and parts of Bengal and the Punjab, on the contrary, moderate rain is anticipated during the three weeks under review, and though in some cases this moderate rainfall has been received, in others it has been considerably short of the average. Thus, while East Bengal received more than, and Cachar and the Assam Valley about, the normal, Central and North Bengal have received only half the average and West Bengal practically no rain.

PROVINCE.	DIVISION.	RAINFALL DATA FOR WEEK ENDING MARCH 18TH, 1899.			RAINFALL DATA FROM FEBRUARY 26TH TO MARCH 18TH, 1899.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

### Weather Review of India for the Week ending at 8 a.m. on Saturday, March 25th, 1899.

Throughout the greater part of the week under review the weather has been controlled by anti-cyclonic conditions of pressure. On the first day of the week a large high pressure area was shown in the north-west and low pressure areas over Bengal on the one hand and the south of the Peninsula on the other. The high pressure area in the north-west by the next morning had moved to Rajputana and Central India and there remained until the 23rd. During this period westerly winds blew down the Gangetic Plain, north-easterly winds in the Central Provinces and variable winds elsewhere with fine dry and on the whole cool weather. On the 24th a change set in. Pressure gave way rapidly over Northern India, the anti-cyclonic movement of the winds ceased and on the 25th a slight but well-marked storm appeared in Upper Sind. Practically no rain fell over India, and the weather changed during the week from the conditions which ordinarily accompany fine weather in the cold season to ordinary hot weather, the change being accompanied with a very remarkable rise of temperature.

**Daily Summary.—Sunday, March 19th.**—Pressure was high and read considerably above the normal over North-West and Central India, while it was low and below the normal over Bengal and the south of the Peninsula. Fresh west-north-westerly and westerly winds prevailed down the Gangetic Plain, moderate north-easterly winds over the Central Provinces and variable local winds elsewhere. The weather was fine and the only rainfall reported was a shower at Sibsagar. The air was very dry in parts of West Bengal, Bombay, Rajputana and the Central districts. The heat was somewhat greater than usual over North-East India and the north and west of the Peninsula, but elsewhere the weather was cooler than the average.

**Monday, March 20th.**—Pressure had given way briskly in the extreme north-west, so that the high pressure area had been transferred eastward and lay over Rajputana and Central India. Pressure was more uniform generally than on the preceding day. The wind directions were unchanged, but the force had fallen. The sky was nearly clear of cloud and the air was daily becoming drier. A shower had been received in Tenasserim, but no rain had fallen over India. The weather was cooler than usual except over Burma, Assam and part of the west of the Peninsula.

**Tuesday, March 21st.**—There had been no important change in pressure or winds, though the north-east winds over the central parts of the country showed signs of dying down. The barometer was high for the time of year almost everywhere. The sky remained almost cloudless and the air very dry, while the only rainfall reported was a shower or two in Tenasserim. The heat remained somewhat greater than usual over Burma and at some west coast stations, while elsewhere the weather was unusually cool.

**Wednesday, March 22nd.**—The barometric changes continued generally slight. Pressure remained higher over Rajputana and Central India than elsewhere, but the differences were small. The winds were light. They blew from the westward in the north and from the eastward in the centre of the country, while elsewhere the directions were variable. The weather remained fine and dry, and no rain whatever was reported. Temperature had begun to rise and had risen above the average in the north-west, while it still remained high in Burma. Elsewhere the weather continued cool.

**Thursday, March 23rd.**—The barometer had fallen almost everywhere—particularly in the north. Pressure remained very uniform, though slightly higher in Rajputana than elsewhere. The winds varied a good deal and were generally light, but at the head of the Bay the usual strong southerly winds were reported. There was hardly any cloud, and there had been no rain over India. Temperature

had continued to rise—more particularly in the north-west. The heat was slightly excessive over Burma and very excessive over North-West India, while over the intervening region the weather was cooler than usual.

*Friday, March 24th.*—The barometric fall which had commenced on the preceding day had continued and had changed the whole pressure conditions. The fall had been rapid in the north, and a low pressure area had appeared over the Gangetic Plain with moderate gradients. The barometer read below the normal everywhere. The winds varied between north-west and south-west over Northern India and were variable over the Peninsula. The force at the head of the Bay was increasing. The change in the pressure conditions had been accompanied with some change in the general weather, the air having become somewhat damper and the sky slightly clouded. A thunderstorm had given some rain to the south of the Peninsula. The mean temperature remained high for the time of year over Burma and North-West India and lower than usual in the intervening region.

*Saturday, March 25th.*—The sudden barometric fall had ceased, but there had been no change in the general barometric conditions except that a small shallow storm had appeared in Upper Sind. The winds were also unaltered. The force was strong to a gale at Saugor Island. The sky had become still more cloudy—more particularly in the north-west, and a light shower had occurred at Cherat. Slight cloud was also reported from the south of the Peninsula and light rain from Trivandrum and Cochin. The weather was hotter than usual except in the south of the Peninsula. The excess was very large in the north-west.

**Temperature.**—There has been a remarkable change in the temperature conditions during the week under review. At the commencement of the week the mean temperature was low and the pressure high over North-Western and Central India, cold weather conditions in fact prevailing over the country. As the week advanced, however, there occurred a marked change. A wave of heat entered North-West India from the westward, and by the close of the week the weather was hotter than usual almost everywhere, but particularly so in the north-west.

The following table gives mean temperature variation data for the week:

PROVINCE.	MARCH 1899.							Mean variation of week.
	19th	20th	21st	22nd	23rd	24th	25th	
	•	•	•	•	•	•	•	•
Burma . . . . .	+1.5	+0.9	+1.7	+2.5	+2.0	+1.8	+1.4	+1.7

Bihar . . . . .	+1.3	—2.7	—2.2	—1.4	—2.2	—0.8	+1.9	—0.9
Chota Nagpur . . . . .	0	—2.6	—1.5	—1.7	+0.1	+1.4	+3.7	—0.1
N.-W. P. and Oudh . . . . .	—1.6	—2.7	—1.8	—2.5	—0.5	+1.4	+5.0	—0.4
Punjab . . . . .	—3.8	—3.2	—1.2	+1.4	+4.9	+7.2	+9.8	+2.2
Sind . . . . .	—1.9	—2.1	+0.6	—2.1	+5.3	+5.2	+5.8	+2.1
Rajputana . . . . .	—3.7	—3.5	—1.4	+0.6	+3.9	+6.9	+9.3	+1.7
Gujarat . . . . .	—1.9	—0.4	+0.3	+2.1	+4.6	+4.0	+4.0	+1.8
Central India . . . . .	—1.6	—4.0	—2.9	—1.6	—0.3	+2.6	+6.0	—0.3
Central Provinces . . . . .	+0.5	—2.5	—1.3	—0.9	—0.3	+0.8	+3.9	0
Berar . . . . .	+2.2	—0.2	+2.0	+1.9	+1.0	+1.7	+2.0	+1.2
West Coast . . . . .	+1.1	+0.4	+0.2	0	+0.2	+0.4	+0.1	+0.3
Bombay Deccan . . . . .	+0.5	+0.8	+0.6	+1.0	—0.1	—0.3	+1.4	+0.6
Mysore . . . . .	+0.1	+0.2	—1.2	—0.8	—2.5	—2.7	—0.7	—1.1
Madras Coast . . . . .	—1.7	—1.4	—3.0	—2.5	—2.6	—1.5	—0.9	—1.9
Madras Deccan . . . . .	—0.2	—0.5	—1.2	—1.3	—3.1	—2.4	—1.5	—1.5
South India . . . . .	—1.5	—2.0	—2.2	—1.6	—0.6	—0.7	—0.4	—1.3
Mean for whole of India . . . . .	—0.3	—1.3	—0.9	—0.3	+1.4	+1.3	+2.8	+0.2

The mean temperature of the first four days of the week for the whole country was less than usual, that for the last three days more than usual, so that the general average of the whole week for the whole country was just about the normal. The coolest day relatively to the normal was the 20th, the hottest the 25th. The provincial variations were not on the whole large, as the excess at the close of the week was largely balanced by the deficiency at the commencement, but there was a slight to moderate excess shown in Burma, the Punjab, Sind, Rajputana, Gujarat and Berar, and a slight deficiency in Mysore, Madras Coast, Madras Deccan and South India.

The following were the highest maxima recorded on each day:

March 19th	.	.	.	.	.	104.2°	at	Chanda.
" 20th	.	.	.	.	.	103.2°	"	Do.
" 21st	.	.	.	.	.	104.5°	"	Yamethin.
" 22nd	.	.	.	.	.	105.5°	"	Do.
" 23rd	.	.	.	.	.	106.3°	"	Ahmedabad.
" 24th	.	.	.	.	.	108.9°	"	Jacobabad.
" 25th	.	.	.	.	.	109.3°	"	Do.

**Rain.**—As mentioned above, there has been practically no rain throughout the Indian region during the week under review, and the rainfall table at the close of the summary shows that the Assam Valley and the Malabar coast district were the only divisions which received any rain during the week. In most places the average normal rainfall is small for the week under review, but in Assam and also in parts of the North-West Himalayas fair to moderate showers are anticipated, and in these regions the absence of rain is important. For the four weeks from the 26th of February to the 25th of March the total rainfall has been almost everywhere deficient. In East Bengal, the Assam Valley and Baluchistan the total fall has been about normal and in Sind it has been greater than usual, but in all other places it has been short, and over a considerable part of the country no rain whatever has been received throughout the entire period.

PROVINCE.	DIVISION.	RAINFALL DATA FOR WEEK ENDING March 25th, 1899.			RAINFALL DATA FROM FEBRUARY 26th TO March 25th, 1899.		
		Average actual rainfall of division.	Average normal rainfall of division.	Excess or deficit in inches.	Average actual rainfall of season to date.	Average per- centage rainfall February 26th to March 25th.	Excess or de- ficit of (per- centage) rain- fall expressed as a per- centage.

Asst. Meteorological Reporter to the

Government of India.

T. W. HOLDERNESS,

Secretary to the Government of India.

SIMLA, 30th March, 1899.

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

## Weekly Report on the state of the Season and Prospects of the Crops.

**Madras.**—*For week ending 25th March.*—Slight showers of rain fell in parts of Tinnevely, Travancore, and Cochin. The water-supply is sufficient. Some small sowings are being made under irrigation. The standing crops are generally in good condition. The harvest continues to yield an almost normal outturn and the yield of cotton is also about the average. Pasturage is scanty, but fodder is sufficient and the condition of cattle generally good. Prices are almost stationary in the Deccan, staple-grains having returned almost to their normal rates; but elsewhere they are generally still above the average, except rice in the Deccan and the Carnatic, where the price is below the normal.

**Bombay.**—*For week ending 29th March.*—American cotton has been blighted in two talukas of Dharwar. Reaping of the late crops is progressing in fourteen and preparations for next season are being made in fifteen districts. Cotton-picking continues in parts of Gujarat and the Karnatak and extraction of opium in Baroda territory. Fodder is sufficient, except in parts of Karachi. Agricultural stock is healthy. Prices have risen in five and fallen in five districts; elsewhere they are stationary.

**Bengal.**—*For week ending 27th March.*—No rain fell during the week, except showers accompanied by hail at Muzaffarpur. Ploughing and in some parts early sowings are proceeding and the prospects of spring rice and other standing crops are good. Rain is wanted in some districts. The spring harvest continues and the collection of opium is nearly over. The planting of sugarcane has begun in some parts. The fodder-supply is ample in every district, except in parts of Midnapore and the Sonthal Parganas. Prices are practically stationary.

**North-Western Provinces and Oudh.**—*For week ending 29th March.*—Seasonable weather prevailed during the week. Harvesting and threshing of the spring crops are progressing. Sowing and irrigation of the extra crops, extraction of opium, and planting of sugarcane continue. Prospects are favourable, markets well stocked, and fodder sufficient. Prices are stationary or falling.

**Punjab.**—*For week ending 29th March.*—Slight showers of rain fell in Peshawar. Sowings of the extra spring crops and also of sugarcane and cotton are proceeding, and reaping of the spring crops has commenced. The condition of the irrigated spring crops is generally reported to be average and of the unirrigated crops below the average and their yield is also expected to be below the average. Rain is still wanted. The poppy crop is poor in Lahore. Certain of the spring crops have been damaged by caterpillars in parts of Ferozepore and Lahore. Cattle are reported to be in fair condition in all districts, except Delhi. Fodder is scarce in Delhi, Umballa, Shahpur, and Dera Ismail Khan, and sufficient elsewhere. Prices, especially of wheat, the chief food-staple, are rising in Rawalpindi, falling in Delhi, Shahpur, Peshawar, and Dera Ismail Khan, and are

unchanged elsewhere. Wheat is selling from 16 to 20, gram 20 to 22, barley 28, bulrush-millet 18 to 22½, maize 24 to 32, great-millet 23, and rice 13 to 14 seers per rupee.

**Central Provinces.**—*For week ending 28th March.*—The weather is clear and unusually warm. The reaping of the spring crops is approaching completion in most districts and threshing is in progress. The planting of sugarcane continues in Chanda, Bhandara, and Sambalpur. Signs of distress are appearing in the open part of Damoh owing to want of employment. Water is getting scarce in some villages of Saugor, Mandla, Betul, and the Warora tahsil of Chanda. Fodder is reported to be insufficient in parts of Seoni, the Warora tahsil of Chanda, and the Sambalpur district. The price of wheat, gram, rice, and *juar* has fallen in five, four, two, and two districts, respectively, and there is a slight rise in the price of wheat, rice, and *juar* in three, one, and one districts, respectively; but the general range of prices is low. The cheapest prices are—wheat 21, gram 32, rice 22, and *juar* 28 seers per rupee. The dearest prices are—wheat 11½, gram 16, rice 11, and *juar* 21 seers per rupee.

**Burma.**—*For week ending 25th March.*—In Upper Burma harvesting of the miscellaneous crops continues. Most of the island crops, except tobacco, have been gathered in Pakòkku, and the reaping of pulses is nearing completion in other districts. Reaping of dry weather paddy has commenced in Kyaukse. The outturn of the miscellaneous crops is found to be less than last year in Mandalay. The price of paddy has fallen in Pegu, Tharrawaddy, and Pakòkku and risen very slightly in Rangoon. No changes in prices are reported from elsewhere.

**Assam.**—*For week ending 28th March.*—Rain fell in most districts during the week which has facilitated cultivation. Ploughing for and sowing of the early and late broadcast rice continue. Gathering of mustard and hoeing of tea are finished. The outturn of the mustard crop is below the average. Harvesting of pulses, plucking of tea, and pressing of sugarcane are in progress. Prospects of tea are good. Preparation of land for jute in Goalpara continues. Potatoes are being planted in the Khasi and Jaintia hills. Fodder is scarce in the Naga hills and water is insufficient in parts of Nowgong and Sylhet. Prices—common rice—Sylhet 21; Silchar, Dhubri, Gauhati, and Tezpur 16; Nowgong 15; Sibsagar 12; and Dibrugarh 14 seers per rupee.

**Mysore and Coorg.**—*For week ending 29th March.*—**MYSORE:** *Ragi* (*Eleusine coracana*) has been harvested in parts of Mysore and paddy in Chitaldroog. Prospects are good. Prices have risen slightly in Kolar and Shimoga.

**COORG:** Water and fodder for cattle are sufficient. Prices of food-grains are stationary.

**Berar and Hyderabad.**—*For week ending 29th March.*—**BERAR:** The weather is getting warmer. Preparation of land for the ensuing monsoon crop continues. A scarcity of fodder and water prevails in parts of the Province. Prices are almost stationary.

**HYDERABAD:** No rain fell during the week. The spring harvest is still proceeding. The standing winter rice crop is in fairly good condition. Prices

continue steady. Prices—wheat  $9\frac{1}{2}$ , coarse rice  $10\frac{3}{4}$ , and *jowari*  $23\frac{1}{2}$  seers per current sicca rupee.

**Central India.**—*For week ending 29th March.*—No rain fell during the week. Agricultural operations are in progress throughout Central India. The standing crops in some parts of Bundelkhand are in poor condition, but are good in other portions of the Agency. Agricultural stock and pasturage are in good condition. Prices continue above normal in Bundelkhand, but are normal elsewhere. The condition of opium is fair in Malwa and good in Gwalior and Bhopal.

**Rajputana.**—*For week ending 29th March.*—Agricultural operations are satisfactory, except in Merwara and the hilly tracts of Kherwara. The condition of the crops is generally good, except in Ajmere-Merwara. Harvesting of crops continues: the average estimated spring outturn in Ajmere is  $11\frac{1}{2}$  annas and in Merwara  $6\frac{1}{2}$  annas. Cattle are for the most part in good condition. Fodder is scarce in nine States. Prices are falling in three States and are steady elsewhere. 1,950 square miles with a population of 41,000 are affected by scarcity in Marwar. Emigration from the distressed Ajmere villages continues: 19 persons emigrated during the week. The total emigration from Merwara up to date numbers 4,329 persons. The numbers employed on relief works were—372 in Ajmere, 4,278 in Merwara, and 969 in Marwar. Prices—Ajmere  $19\frac{1}{2}$ , Beawar 22, and Marwar 15 seers per rupee.

**Kashmir.**—*For week ending 28th March.*—The weather is fine. Prices continue below normal. The price of rice is 27 seers per rupee.

**JAMMU PROVINCE:** *For week ending 29th March.*—No rain fell during the week. The condition of the standing crops is fair. Fodder is sufficient. Prices are generally stationary, wheat selling at 18 and maize at 24 seers per rupee.

**Nepal.**—*For week ending 25th March.*—No rain fell during the week. A shower or two would benefit the standing wheat crop. The price of rice is 9 seers per rupee.

Secretary to the Government of India.

## GOVERNMENT OF INDIA.

## PUBLIC WORKS DEPARTMENT.

CIVIL WORKS.  
MISCELLANEOUS.*Purchase in India of certain iron and steel work of local manufacture.*

Circular No. 2 Public Works, dated Simla, the 24th March, 1899.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Letter No. 3018 W., dated the 24th November 1898, from the Government of Madras, Public Works Department, requesting the inclusion of certain firms in the list given in Appendix B of Finance and Commerce Department Resolution No. 2587 S. R., dated 9th June 1898, of firms eligible to supply articles of iron and steel for the Public Service, with the right to tender only so far as the supply of safes and treasure chests is concerned.

RESOLUTION.—The Governor General in Council is hereby pleased to direct that bridge floor or roof work and other iron and steel work to which it is necessary to apply the tests prescribed in Appendix C of Government of India, Finance and Commerce Department, Resolution No. 2587 S. R., dated the 9th June 1898, may, when not obtained from Europe through the Secretary of State, be ordered only at the firms entered in Appendix B of that Resolution; but that other articles entered in Appendix A of the Resolution may be obtained from any firms who may be approved by Local Governments and Administrations.

SUPPLEMENT TO  
**The Gazette of India.**

No. 14.

SIMLA, SATURDAY, APRIL 8, 1899.

**OFFICIAL PAPERS.**

*A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.*

*Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

*No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

**Weather Review of India for the Week ending at 8 a.m. on  
Saturday, April 1st, 1899.**

The anti-cyclonic conditions of pressure and the fine weather which prevailed over India during last week have not held during the week under review. Pressure has been steadily low over Northern India, and slight depressions or storms have appeared in the north-west and north-east, so that in both these regions the weather has been disturbed and thunderstorms have occasioned both hail and rain. Of these storms the most severe was apparently that which visited Cachar on the evening of the 29th. Over the central parts of the country and the Peninsula pressure has been more uniform and steadier than over Northern India, but in these localities passing thunderstorms have occasioned light scattered showers. The temperature has been unsteady and has changed considerably during the week. In the early days of the week the heat was very excessive over North-West India and more or less excessive in nearly all parts of India except the south of the Peninsula. As the week advanced, however, and as showers of rain and hail fell disturbing the temperature conditions, the distribution of temperature relatively to the normal became much less regular, and the variations from the normal became smaller.

**Daily Summary.—Sunday, March 26th.**—The barometer had generally changed slightly. Pressure was low over the Western desert, over the Gangetic Plain and over Upper Burma, while it was high over the south-west of the Peninsula. The winds were southerly on the Bay Coasts, easterly along the foot of the Himalayas and variable elsewhere. At the head of the Bay the wind was strong to a gale, but elsewhere the force was low. The sky was slightly clouded over parts of North-West and of North-East India and of the

Peninsula, but was clear elsewhere, and the only rain reported was a light shower at Jalpaiguri. The heat was excessive except in parts of the Peninsula and of Tenasserim, the excess averaging  $10^{\circ}$  in Rajputana,  $7.8^{\circ}$  in the Punjab and over  $5^{\circ}$  in Bihar, Chota Nagpur, the North-West Provinces, Sind, Central India and Berar.

*Monday, March 27th.*—The barometer had been steady over North Bombay, but had fallen elsewhere, the change having been rapid over Bengal, etc. Pressure was low over Northern India generally, with a small central area of depression over West Bengal. The wind directions were about the average, except along the foot of the Himalayas, where easterly breezes were reported. The weather had cleared over the Peninsula, but had become more cloudy over both North-East and North-West India. Thunderstorms giving hail and rain had occurred over Assam; a snowstorm was reported from Minimarg and showers from Baluchistan. Elsewhere the weather had been fine. The mean temperature had fallen to below the normal over parts of Assam and Bengal, but elsewhere the distribution was generally the same as that on the preceding day, except that the excess in the north-west was less intense.

*Tuesday, March 28th.*—The barometer had fallen briskly to rapidly over the West Punjab, but was practically unchanged elsewhere. Pressure remained low over Northern India generally, and the only important change in the distribution was the appearance of a fresh depression over the West Punjab. The winds were variable between south and east over the Punjab, but elsewhere the directions were unaltered. At the head of the Bay the force remained strong to a gale. The sky was very cloudy over North-East India and part of the North-West Himalayas, but was clear or nearly so elsewhere. A little further snow had fallen on the Kashmir Himalayas, light rain at Peshawar, Bijapur, Colombo and in Baluchistan and Tenasserim, and moderate rain in parts of North-East India. The rainfall in the north-east had been accompanied with cooler weather than usual, the mean temperature having been from  $1^{\circ}$  to  $4^{\circ}$  below the normal in that region, but in nearly all other parts of India the heat was excessive, the excess being greatest and between  $10^{\circ}$  and  $12^{\circ}$  in the North Punjab.

*Wednesday, March 29th.*—Pressure had given way over part of North-East India, but had risen elsewhere—more particularly in the West Punjab. The depression noticed in that region on the 28th had moved northward and was disappearing over the North-West Himalayas. In other respects there was not much change. The winds remained variable over the Punjab, southerly on the coasts of the Bay and westerly to north-westerly over Rajputana, Central India and the Gangetic Plain. In the north of the Bay the force was still fresh to strong. Slight cloud was reported over a considerable part of the country and showers varying in amount from one cent to one-and-a-half inch had fallen over Assam, Kashmir, Baluchistan and at the stations of Barisal, Darjeeling, Cherat, Colombo, Belgaum, Bijapur and Tinnevely. The heat was less than usual over Assam and North Bombay, but elsewhere the mean temperature was excessive, the excess averaging over  $5^{\circ}$  in the Punjab and over  $6^{\circ}$  in Chota Nagpur.

*Thursday, March 30th.*—The barometer had risen everywhere, but more particularly in the north-west and north-east. Pressure was relatively low in Central Burma and in Bihar, but the pressure differences were small. The winds were northerly over North-West India, westerly down the Gangetic Valley and southerly on the Bay Coasts. The force remained strong at the head of the Bay. There was a good deal of cloud reported, and thunderstorms had occasioned showers at a few stations in Assam, the North-West Himalayas and the Peninsula. In Assam the storms were severe and the rain and hail heavy and destructive. The mean temperature remained low in Assam and in North Bombay, but elsewhere the heat was greater than usual, though in most provinces temperature had given way since the previous day.

*Friday, March 31st.*—The barometer had risen slightly in most places, and pressure was generally fairly uniform, though pressure was slightly lower in Bengal, Sind, the West Coast and Burma than elsewhere. The winds were practically unchanged. The sky was cloudy over Bengal and parts of the Central Provinces and of the Peninsula. Light scattered showers were reported

from a few places in the Peninsula and the Central Provinces. The temperature had continued to fall. The variations of the mean temperature from the normal were irregular, the heat being greater in some and less in other districts, than the average.

*Saturday, April 1st.*—The barometer had fallen fast over Assam and Upper Burma, but there had been no other change of importance. The winds were also unchanged. The sky was slightly clouded except in the north-west, and showers were again reported from Assam, Bengal, Tenasserim, the Central Provinces and the south of the Peninsula. Temperature had begun to rise in the north-west, but was still falling elsewhere. The temperature variations were irregular, but a wave of heat was apparently entering India from the north-west.

**Temperature.**—The principal feature in the temperature conditions of the past week has been the great excess of temperature over the north-west and centre during the first three days of the week. After the 28th the excess of temperature became less general and less intense, but on the whole the weather remained hot throughout the week.

The following table gives mean temperature variation data for the week:

PROVINCES.	MARCH 1899.						APRIL 1899.	Mean variation of week.
	26th	27th	28th	29th	30th	31st	1st	
Burma	+1.2	+1.7	+0.7	+0.8	+1.5	+1.5	+1.4	+1.3
Assam	+4.2	+2.0	-2.3	-3.5	-0.7	+2.2	+0.1	+0.3
Bengal	+2.7	+1.4	+1.9	+2.2	+4.0	+3.0	+1.0	+2.3
Orissa	+3.7	+2.3	+2.8	+3.1	+2.1	+1.4	+1.7	+2.4
Bihar	+5.0	+1.4	+2.6	+2.4	+2.6	+1.6	-1.0	+2.1
Chota Nagpur	+5.5	+5.5	+5.9	+6.2	+5.6	+4.2	+1.1	+4.9

Punjab	+7.8	+8.6	+7.4	+5.1	+2.2	+1.5	+1.0	+4.8
Sind	+5.1	+3.1	-0.2	-2.7	-2.2	-0.9	+2.5	+0.7
Rajputana	+10.2	+8.8	+5.9	+3.3	-0.4	+1.3	+2.0	+4.4
Gujarat	+1.8	+0.7	+1.4	-1.8	-2.3	-3.3	-1.3	-0.7
Central India	+5.0	+5.6	+5.4	+2.4	+0.9	+1.1	+1.4	+3.1
Central Provinces	+4.7	+5.2	+4.7	+3.4	+3.1	+2.5	+1.0	+3.5
Berar	+5.4	+5.5	+4.8	+4.2	+3.9	-0.2	-0.9	+3.2
West Coast	+1.1	+1.0	+1.3	+1.0	+0.7	-0.1	-0.7	+0.6
Bombay Deccan	+2.0	+3.1	+2.4	+2.6	+1.1	-0.5	-1.1	+1.4
Mysore	+0.7	-0.2	+2.5	+2.5	+0.7	-1.1	-0.6	+0.6
Madras Coast	+0.3	+0.3	+1.5	+1.6	+1.1	-0.1	+0.2	+0.7
Madras Deccan	-0.3	-0.7	+1.7	+2.8	+0.8	-2.1	-2.6	-0.1
South India	-0.4	+1.0	+1.3	+1.8	+1.3	+0.6	-1.2	+0.6
Mean for whole of India	+3.6	+3.1	+2.9	+2.0	+1.4	+0.7	+0.2	+2.0

On each day of the week the mean temperature of the whole country exceeded the normal, the amount of the excess varying from  $3.6^{\circ}$  on the 26th March to only  $0.2^{\circ}$  on the 1st April. The provincial variations show that the weather during the week was hotter than usual in all provinces except Gujarat and the Madras Deccan. In the case of Chota Nagpur, the Punjab and Rajputana the excess averaged over  $4^{\circ}$ .

The following were the highest maxima recorded on each day:

March 26th	108.2°	at Akola.
" 27th	108.6°	" Do.
" 28th	108.2°	" Chanda.
" 29th	107.7°	" Do.
" 30th	108.0°	" Chaibassa.
" 31st	106.1°	" Minbu.
April 1st	105.4°	" Cuttack.

**Rain.**—As previously mentioned the weather has been considerably more disturbed over India than was the case last week, a series of fairly general thunderstorms having given rain and hail to the north-east districts of India and scattered thunderstorms having given partial rain to the Peninsula, the Central Provinces, and some north-western stations. The thunderstorms in the north-east were associated with a low pressure area which first appeared over West Bengal and subsequently was transferred to North Bengal. This low pressure area was accompanied with strong southerly winds at the head of the Bay which probably poured large quantities of vapour into Bengal and Assam. The scattered thunderstorms over the Peninsula were associated with a shallow low pressure area over the Deccan districts. The rainfall returns for the week show that rain was received in Assam, mainly between the 27th and 30th of March; in East Bengal, between the 28th and 30th, and in other parts of Bengal between the 26th and 28th, while in the Peninsula the showers, which were in all cases light, were scattered throughout the week.

The table at the close of the summary shows that the average actual rainfall for the week was one-tenth of an inch or more in fourteen of the rainfall divisions, *viz.*, all three Assam divisions, the East, Deltaic, Central, North and hills divisions of Bengal, Malabar, South-Central Madras, Coorg, the Bombay Deccan, the Baluchistan hills, and South Madras, while fifteen more divisions received some rain during the week, though in each case the average fall was less than 0·10 inch. The storms were most severe and the rainfall heaviest in Assam and North Bengal. In the case of the Assam hills the average amounted to 8·19 inches, in the Cachar Valley to 5·40 inches, and in the Assam Valley to 2·57 inches, while in North Bengal the average was 2·05 inches and in the Bengal hills 1·80 inches. The thunderstorms in the Cachar and Sylhet districts on the 28th and 30th of March and in North Bengal on the 27th and 28th were severe and the rain and hail, in some places, very heavy.

The third column of the rainfall table shows that the actual average rainfall was in excess of the normal in the Cachar Valley (+2·29 inches), in the Assam hills (+6·60 inches), in the Assam Valley (+1·09 inches), in North Bengal (+1·50 inches), in the Bengal hills (+0·94 inch), in Malabar (+0·32 inch), in the Bombay Deccan (+0·16 inch), in Berar (+0·02 inch), and in the south of the East Coast (+0·03 inch), but that in all the remaining divisions the fall was short of the normal. In most cases the deficiencies were small and unimportant, but in East Bengal and parts of the Punjab the differences were moderate.

The principal totals at individual stations for the week under review were as follows:

East Bengal	Barisal	1·94 inches.
Assam	South Sylhet	7·45 "
	Barkhola	10·00 "
	Cherrapoonjee	42·82 "
	Sadiya	4·81 "
Bengal	Faridpur	2·85 "
	Alipur	6·58 "
	Darjeeling	2·19 "
Malabar	Trichur	2·20 "
	Trivandrum	1·14 "
Deccan	Chikode	1·62 "
	Badami	1·50 "

The three concluding columns of the table show some improvement in the condition of the season rainfall in Assam and Bengal as well as in the Deccan districts, but over the greater part of the country the total fall of rain from February 26th to the 1st of April is still very largely short of the normal.

PROVINCE.	DIVISION.	RAINFALL DATA FOR WEEK ENDING APRIL 1ST, 1899.			RAINFALL DATA FROM FEBRUARY 1ST TO APRIL 1ST, 1899.

W. L. DALLAS,

Asst. Meteorological Reporter to the

Government of India.

T. W. HOLDERNESS,

Secretary to the Government of India.

SIMLA, 6th April, 1899.

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

**Weekly Report on the state of the Season and Prospects of the Crops.**

**Madras.**—*For week ending 1st April.*—A few scattered showers fell in parts of the Circars and the Deccan, but more rain fell in the Southern districts and on the West Coast. The water-supply is normal for the season. Some sowings under irrigation continue. The standing crops are in good condition. The harvest continues in parts, yielding almost a normal outturn. Pasture has dried up, but fodder is sufficient. Cattle are in normal condition. Prices are almost stationary.

**Bombay.**—*For week ending 5th April.*—Slight rain fell in parts of the Deccan and the Karnatak and in one taluka of Ratnagiri during the week. Reaping of late crops is progressing in eleven and preparations for next season in fifteen districts. Cotton-picking continues in parts of Guzerat and the Karnatak. Fodder is sufficient, except in parts of Karachi. Agricultural stock is healthy. Prices have risen in one and fallen in seven districts; elsewhere they are stationary.

**Bengal.**—*For week ending 3rd April.*—There was rain during the week in all the districts of Bengal Proper, except those of the Burdwan division; while showers are also reported from the Patna, Champaran, Muzaffarpur, and Balasore districts. The rain has been very beneficial, but in parts of the Burdwan division and in the 24-Parganas district more is wanted for ploughing and early sowings and also for spring rice and other crops now in the ground. In Orissa the spring rice is coming into ear. The harvesting and threshing of the spring crops are still proceeding and sugarcane is being planted out in the Bhagalpur and Chota Nagpur divisions. The prospects of the *mahuā* (*Bassia latifolia*) crop, which is being gathered, are favourable. The fodder-supply is sufficient, except in places in Midnapore and the Sonthal Parganas. Prices continue almost stationary.

**North-Western Provinces and Oudh.**—*For week ending 5th April.*—Seasonable weather prevailed during the week. Harvesting and threshing of spring crops continue. Sowing and irrigation of extra crops and planting of sugarcane are also in progress. Extraction of opium has been completed in some places and continues in others. Prospects are favourable. Markets are well-stocked; supplies and fodder are sufficient; and prices are stationary to falling.

**Punjab.**—*For week ending 5th April.*—There was slight rain in parts of the Rawalpindi district only. Harvesting of spring crops has commenced. Sowings of extra spring crops and of certain autumn crops continue. The condition and prospects of the standing spring crops are average on irrigated and below average or poor on unirrigated areas. The yield is also expected to be below average generally. The poppy crop is poor in Lahore. Water is said to

be deficient in Hissar. The standing crops are being damaged by insects in parts of the Ferozepore and Multan districts. Cattle are in fair condition in all districts, except Delhi. Fodder is scarce in Delhi, Umballa, Lahore, Shahpur and Dera Ismail Khan, and sufficient elsewhere. Prices, especially of wheat, are falling generally; they are unchanged only in the Umballa and Multan districts. Wheat is selling from 16½ to 21, gram 20 to 23, barley 32, bulrush-millet 19 to 24½, maize 28 to 38, great millet 20, and rice 13 to 14 seers per rupee.

**Central Provinces.**—*For week ending 4th April.*—The weather is hot and occasionally cloudy. Thunderstorms have given light rain in thirteen districts. The reaping of spring crops is almost completed and threshing is in progress. The planting of sugarcane continues in Bhandara and Sambalpur. There is still a little demand for labour in parts of Damoh, and village relief has been extended somewhat in the Kurai tahsil of Saugor. The water-supply is becoming scanty in some villages of the Mandla, Betul, Wardha, and Chindwara districts. Fodder is reported insufficient in parts of Seoni, Nagpur, and Sambalpur. The price of wheat, gram, rice, and *juar* has fallen in some districts and there is a slight rise in other districts, but the general range of prices is low. The cheapest prices are—wheat 21, gram 32, rice 22, and *juar* 29 seers per rupee. The dearest prices are—wheat 12½, gram 18, rice 10, and *juar* 21 seers per rupee.

**Burma.**—*For week ending 1st April.*—In Upper Burma plucking of cotton is being completed in Thayetmyo and reaping of miscellaneous crops is progressing favourably everywhere. Dry weather paddy and other standing crops are in healthy condition. The price of paddy has risen in Pegu and fallen slightly in Thongwa, Amherst, Pakōkku, and Myingyan; no changes elsewhere.

**Assam.**—*For week ending 4th April.*—A violent hurricane with heavy hail is reported from Cachar on the 29th March and heavy rain from Sylhet. Rain in most districts has facilitated cultivation. The hailstorm caused some damage to tea in South Sylhet and to tea, vegetables, and fruits in Lakhimpur. Ploughing for and sowing of early and late broadcast rice continue. Gathering of pulses is finished and the outturn is good. Plucking of tea is in progress. Prospects are good. Pressing of sugarcane is nearly finished and the outturn is generally good. Ploughing for and sowing of jute continue in Goalpara and Sylhet. Water is insufficient in parts of Nowgong. Prices of common rice—Sylhet 19; Silchar, Dhubri, Gauhati, Tezpur, and Nowgong 16; Sibsagar 12; and Dibrugarh 14 seers per rupee.

**Mysore and Coorg.**—*For week ending 5th April.*—**MYSORE:** Slight rain fell in parts of the Kolar district. The standing crops are in good condition. Prices have slightly risen in Kadur and fallen in Kolar and Chitaldroog districts. *Ragi* (*Eleusine coracana*) has been harvested in parts of the Mysore district.

**COORG:** Rainfall 77 cents. Seasonable rain for coffee blossom has fallen generally. Prices of food-grains are stationary. Water and fodder for cattle are sufficient.

**Berar and Hyderabad.**—*For week ending 5th April.*—**BERAR:** The weather is warm and cloudy. Breaking up of land for the ensuing monsoon crop is in progress. Fodder is insufficient in parts of two districts. Scarcity of water prevails in parts of the Province. Prices are almost steady.

**HYDERABAD:** Rainfall during the week 3 cents. The spring harvest is still progressing. The standing winter rice crops are in fair condition. Prices of grain continue to fall. Prices—wheat 9½, coarse rice 10½, and *jowari* 24½ seers per current sicca rupee.

\* **Central India.**—*For week ending 5th April.*—No rain fell in Central India during the week. Agricultural operations are nearly completed in Bhopawar and are in progress elsewhere. The crops are in fairly good condition. Agricultural stock and pasturage are in good condition. Prices continue above normal in Bundelkhand and normal in other Agencies. The condition of the opium crop is fair in Malwa and good in Gwalior and Bhopal. The collection of opium is finished in Bhopawar.

**Rajputana.**—*For week ending 5th April.*—Agricultural operations are progressing satisfactorily, except in Merwara and the hilly tract of Kherwara in Meywar territory. The state of the crops is generally good, except in Ajmere-Merwara, where it is fair. The harvesting of crops continues; the average estimated spring outturn in Ajmere is 11½ annas and in Merwara 11 annas. Cattle are in poor condition in Marwar, Haraoti, and Ajmere; elsewhere they are in good condition. A scarcity of fodder prevails in the States reported last week. Prices are rising in Jhallawar; falling in Meywar; and are steady elsewhere. Thirty-two persons emigrated during the week from the distressed Merwara villages. The total emigration from Merwara up to date numbers 4,335. The numbers employed on relief works were—355 in Ajmere, 4,220 in Merwara, and 969 in Marwar. Prices—Ajmere 19½, Beawar 21, and Marwar 15 seers per rupee.

**Kashmir.**—*For week ending 4th April.*—The weather is fine. Prices continue below normal. Rice—27 seers per rupee.

**JAMMU PROVINCE.**—*For week ending 5th April.*—Slight rain fell during the week. Prices are falling slightly. Wheat is selling at 18 and maize at 25 seers per rupee. The condition of the standing crops is fair. Fodder is scarce.

**Nepal.**—*For week ending 1st April.*—Rainfall 0·24 inch. Weather hazy and windy. The wheat crop is doing well. Rice—9 seers per rupee.

T. W. HOLDERNESS,  
Secretary to the Government of India.

SUPPLEMENT TO  
**The Gazette of India.**

No. 154

SIMLA, SATURDAY, APRIL 15, 1899.

OFFICIAL PAPERS.

*A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.*

*Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

*No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the duty of the GAZETTE must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

**Weather Review of India for the Week ending at 8 a.m. on  
Saturday, April 8th, 1899.**

The general conditions of the weather have been the same as those reported last week. Pressure has been steadily low over Northern India and slight shallow depressions have, from time to time, appeared in the north-west and the north-east. Over the Peninsula on the contrary pressure has been uniform and relatively high. Dust and thunder storms have been frequent and widely extended in Northern India and scattered occasional showers have been experienced over the central districts of India and parts of the Peninsula. The storms were most general and extensive in the north-west on the 6th and in the north-east on the 7th, but in neither region were the storms so severe or the rain and hail so heavy as those which were experienced in the Surma Valley last week. The mean temperature of the whole country was about normal on the first three days, but was higher than usual during the remainder of the week.

**Daily Summary.**—*Sunday, April 2nd.*—Pressure had changed irregularly and generally slightly. The barometer read low over Northern India and two shallow depressions were shown,—one over Sind, the other over Assam. Over the Peninsula and the Central Provinces pressure was uniform and relatively high. The winds were between north-west and south-west over Northern India and variable over the Peninsula. The force was generally light to moderate. The weather was feebly unsettled, cloudy and showery over the north-east districts of India, the Central Provinces and the south of the Peninsula. The falls of rain and hail were generally very light, but in the south of the Peninsula falls of between 1 inch and 2½ inches were recorded. The heat was less than usual over the Peninsula, the central districts of India and the centre of the North-West Provinces, but both in North-West and North-East India the mean temperature was higher than usual. The following variations from the normal explain the distribution:—Jacobabad +6·4°, Saugor —3·5° and Bagra +6·4°.

*Monday, April 3rd.*—The barometer continued to change by small or slight amounts and pressure remained low in Northern India with shallow depressions in the north-west and north-east. Pressure remained fairly uniform over the Peninsula and Central Provinces. The wind directions were fairly normal. At Saugor Island, as is usual at this season, the southerly wind was strengthening. The weather was clear or nearly so of cloud almost everywhere and the rainfall had diminished, only a few light scattered showers being reported. The mean temperature remained high for the time of year over North-West India and Upper Burma, but elsewhere the weather was cooler than usual. At Hoshangabad the variation from the normal was  $-6.2^{\circ}$ , at Ranchi  $-7.4^{\circ}$ , at Silchar  $-5.3^{\circ}$ , and at Mooltan and Sialkot each  $+7.4^{\circ}$ .

*Tuesday, April 4th.*—The barometer had fallen briskly to rapidly over North-West India and the Gangetic Plain and depressions were shown,—one over Upper Sind, the other over Oudh, in both of which regions the pressure was considerably below the normal. In the Assam Valley the barometer had risen and a high pressure area was appearing; elsewhere the changes were unimportant. The wind directions were generally little changed, but the southerly wind at the head of the Bay continued to increase in strength. There had been a little rain in Assam, and light to moderate showers over the south of the Peninsula, but elsewhere the weather was fine. The mean temperature had generally risen. The heat was greater than usual over North-West India and over Burma, but was low for the time of year elsewhere. The following variations from the normal explain the distribution: Mooltan  $+9.2^{\circ}$ , Khandwa  $-3.9^{\circ}$ , Coimbatore  $-5.5^{\circ}$ , and Toungoo  $+4.4^{\circ}$ .

*Wednesday, April 5th.*—The small depression which lay over Upper Sind on the 4th had moved eastward to the neighbourhood of Bickaneer, while that over Oudh had more or less filled up. Pressure was highest in the Upper Assam Valley. The wind had become north-easterly over the Punjab and easterly along the foot of the hills, but elsewhere there had been no important change and the southerly winds at the head of the Bay still blew strongly. A few light showers were reported from the Punjab, the North-West Himalayas, and parts of the Peninsula, but in Assam the rain had ceased. The weather was cool over the south of the Peninsula, Assam, and the greater part of Burma, but was hotter than usual elsewhere. Over the Western desert the excess was between  $8^{\circ}$  and  $10^{\circ}$ .

*Thursday, April 6th.*—The barometer had risen over the Punjab and adjacent parts of the North-West Provinces and of Rajputana, as well as over the Assam Valley, and had generally fallen elsewhere. Pressure was lowest over West Bengal and the east of the North-West Provinces, and was highest in Upper Assam, but a slight high pressure area had appeared over the Punjab. The winds were southerly on the Bay Coasts, easterly along the foot of the hills in Bengal and the North-West Provinces, and more or less variable elsewhere. The force was strong and the wind gusty in Northern India and at the head of the Bay. Duststorms and thunderstorms had occasioned rain over North-West India, North Bengal, and the Assam Valley; but elsewhere the weather was fine. The rainfall amounts were, however, small and only exceeded half-an-inch at one station, Chakrata. The mean temperature was almost everywhere higher than usual, the greatest excess (between  $4^{\circ}$  and  $6^{\circ}$ ) lying within a band stretching from Sind eastward to Chota Nagpur.

*Friday, April 7th.*—The barometer had risen briskly over the Gangetic Plain, Bengal, and Lower Burma, and a well-marked high pressure area was developing in the extreme north-east. At the same time pressure was giving way over the Western desert and a shallow depression had appeared over Sind and Rajputana. A very shallow depression was also shown over the east of the Central Provinces. The wind remained southerly on the coasts of the Bay; it was south-easterly and easterly over Bengal and up the north side of the Gangetic Plain as far as the Punjab, while elsewhere the directions were variable. The easterly winds in Northern India and the southerly wind at the head of the Bay

were strong and gusty. The weather was very unsettled with duststorms, thunderstorms and rain in the north-east and slightly unsettled with thunder-showers in the Kumaun Himalayas, but elsewhere fine quiet weather prevailed. The heat was less than usual along the foot of the Himalayas from Sibsagar to Umballa, but elsewhere the mean temperature was higher than usual.

*Saturday, April 8th.*—The barometer had risen except at one or two west coast stations. The rise had been slight over the Western desert and rapid over the Punjab, so that the depression over the Western desert had concentrated and became better marked. Pressure remained highest in Burma and Assam. A well-marked cyclonic circulation of the winds prevailed over North-West India, but elsewhere the directions were similar to those reported on the 7th. The force remained strong at the head of the Bay and was strong to a gale in North-West India. Thunder and dust storms had occasioned rain over parts of North-West India, of North-East India, and of the south of the Peninsula. My-mensingh had received nearly 4 inches. The mean temperature had changed irregularly. It remained low for the time of year over parts of Burma and Assam, as well as over Bengal and the North Gangetic Plain. Elsewhere the heat was excessive.

**Temperature.**—The mean temperature during the week under review has been steadily higher than usual over North-West India, the excess in some places and on some days having been large. On the other hand, it has been steadily lower than usual over the west and south of the Peninsula, but elsewhere the temperature has been unsteady and has changed from day to day.

The following table gives the mean temperature variation data for the week :

Province.	April 1899.							Mean variation of week.
	2nd	3rd	4th	5th	6th	7th	8th	
Burma . . . . .	+1.8	+0.7	+1.0	—0.1	+1.4	+2.0	+0.9	+1.1
Assam . . . . .	+1.7	—1.5	—1.1	—0.8	—1.4	—2.2	—0.8	—0.9
Bengal . . . . .	+2.1	—1.4	+0.2	+1.1	+1.8	+1.3	—1.3	+0.5
Orissa . . . . .	—0.5	+0.4	—0.1	+1.1	+1.2	+2.2	+1.1	+0.8
Bihar . . . . .	+2.7	+0.6	—1.4	+1.3	+2.2	—1.0	—1.8	+0.4
Chota Nagpur . . . . .	+0.7	—4.0	—0.4	+2.6	+4.4	+4.0	+1.6	+1.7
N.-W. P. and Oudh . . . . .	+0.3	—0.7	+1.5	+4.0	+3.5	—1.1	—0.5	+1.0
Punjab . . . . .	+2.1	+4.6	+6.1	+7.5	+1.3	+1.9	+4.4	+4.0
Sind . . . . .	+3.4	+4.1	+5.6	+7.8	+3.5	+5.0	+5.3	+4.8
Rajputana . . . . .	+1.2	+2.0	+7.0	+7.8	+4.4	+3.0	+4.8	+4.3
Gujarat . . . . .	+1.3	+0.9	+4.5	+4.5	+3.0	+3.0	+2.8	+2.9
Central India . . . . .	—1.0	—1.1	+1.0	+3.8	+5.4	+1.1	+3.0	+1.9
Central Provinces . . . . .	—1.1	—2.4	—1.5	+1.3	+3.5	+2.8	+3.7	+0.9
Berar . . . . .	—1.9	—3.2	—1.7	+1.1	+2.8	+3.2	+4.5	+0.7
West Coast . . . . .	—1.2	—1.1	—0.7	—0.1	+0.1	+1.5	+0.5	—0.1
Bombay Deccan . . . . .	—1.4	—2.4	+0.1	+0.9	+0.4	+0.9	+0.9	—0.1
Mysore . . . . .	—2.5	—2.7	—3.1	—2.0	—0.5	+1.1	+1.1	—1.2
Madras Coast . . . . .	—0.5	+0.5	—0.2	+0.6	+0.7	+1.3	+1.2	+0.5
Madras Deccan . . . . .	—1.0	—0.8	—0.3	—0.2	+1.6	+1.7	+1.9	+0.4
South India . . . . .	—3.1	—2.8	—2.9	—2.8	—1.5	—0.2	+0.2	—1.9
Mean for whole of India . . . . .	+0.2	—0.5	+0.7	+2.0	+1.9	+1.5	+1.7	+1.1

For the first three days the mean temperature of the whole country was about normal, but on the 5th a rise set in and from that day to the close of the week the heat was excessive. In consequence the mean temperature of the whole country for the week was excessive.

The provincial variations show that the heat during the week was less than usual in South India and Mysore, about normal in Assam, Bengal, Orissa, Bihar, the Central Provinces, Berar, the West Coast, the Bombay Deccan, the Madras Coast and the Madras Deccan, and higher than usual elsewhere. The greatest excess was in the Punjab, Sind and Rajputana.

The following were the highest maxima recorded on each day:

April 2nd	.	.	.	.	.	106.6°	at Minbu.
" 3rd	.	.	.	.	.	106.1°	" Mandalay.
" 4th	.	.	.	.	.	107.4°	" Jacobabad.
" 5th	.	.	.	.	.	109.3°	" Do.
" 6th	.	.	.	.	.	107.8°	" Ahmedabad.
" 7th	.	.	.	.	.	108.5°	" Chaibassa.
" 8th	.	.	.	.	.	110.3°	" Jacobabad.

**Rainfall.**—As mentioned above, the week under review has been one of widely extended unsettled weather. There has been no large or serious storm, but the pressure differences have been moderate, and dust and thunder storms have been widespread and have occasioned rain over a very large part of the country. These storms were most general in Bengal on the 7th and 8th of April; in Assam on the 6th, 7th and 8th; in the North-West Provinces on the 5th and 6th; in the Punjab on the 6th, 7th and 8th; in the south of the Peninsula on the 2nd, 3rd and 4th; in the Central Provinces on the 2nd; and in Madras on the 2nd and 3rd. The above shows that rain fell in some part of the country on all days of the week, but while the falls were moderately heavy in North-Eastern, North-Western and South-Western India, they were very light and scattered in other parts of the country.

The rainfall table at the close of the summary shows that rain averaging one-tenth of an inch or more has been received during the week in no less than seventeen of the rainfall divisions, *viz.*, in the Surma, Hills and Brahmaputra divisions of Assam, East, Central and North Bengal, the hills and west submontane divisions of the North-West Provinces, the south-east and hills divisions of the Punjab, Malabar, South-Central Madras, Coorg, Mysore, the Bombay Deccan, the south of the East Coast and South Madras. Within these seventeen divisions the average actual rainfall ranges from 2.24 inches in the Assam Valley, 1.67 inches in Coorg, 1.38 inches in South-Central Madras, and 1.08 inches in the Assam Hills to 0.11 inch in the South-East Punjab and 0.10 inch in the Bombay Deccan. In addition to the above mentioned seventeen divisions, no less than twenty-two more divisions received rain, though the average fall per division was less than one-tenth of an inch. Still that thirty-nine divisions received rain during the week shows the very large area of country affected by the unsettled weather. The third column of the table shows that the average actual rainfall was heavier than the average normal in the case of seventeen divisions, *viz.*, the Assam Valley, East, Central and North divisions of Bengal, North Bihar, the Hills and the West and West submontane divisions of the North-West Provinces, the South-East Punjab, the Punjab Hills, Malabar, South-Central Madras, Coorg, Mysore, the Konkan, the south of the East Coast and South Madras. Elsewhere the week's rainfall was short of the average, the deficiency being large in Assam Surma, but generally unimportant in the other divisions.

The following were the principal large totals recorded at individual stations during the week :

Assam.	Tezpur	4'18 inches.
	Debrugarh	3'56 "
	Sonapur (Gauhati)	2'79 "
Bengal	Mymensingh	4'23 "
	Nator (Rampore Boalia)	1'66 "
	Dinajpur	1'43 "
Bihar	Purnea	1'12 "
N.-W. P.	Bijnor	1'13 "
	Pithoragarh	1'07 "
Punjab	Thanesar (Karnal)	0'74 inch.
Malabar	Perinselmanoa	3'70 inches.
Nilgiris	Kodanad	4'23 "
Mysore	Devanahalli	2'05 "
Deccan	Halkalanjada	1'30 "
East Coast	Kangundi (North Arcot)	2'75 "
South Madras	Palamcottah	2'92 "

The three concluding columns of the table give the state of the rainfall for the period 26th February to the 8th of April, and show that in general the actual rainfall is much behind the normal. In the case of the Hill and Brahmaputra divisions of Assam, North Bengal, Malabar, South-Central Madras, Coorg, Mysore, the Konkan and Sind the rainfall has been heavier than usual, but practically in all the remaining divisions it has been short, and in some parts of North-West India—more particularly on the hills—this deficiency has been considerable.

W. L. DALLAS,

Asst. Meteorological Reporter to the  
Government of India.

T. W. HOLDERNESS,

Secretary to the Government of India.

SIMLA, 13th April, 1899.

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

## Weekly Report on the state of the Season and Prospects of the Crops.

**Madras.**—*For week ending 8th April.*—Light showers fell in parts of the Circars and Bellary, and heavy rain in parts of the Central, West Coast, and Southern districts. The water-supply is becoming exhausted, but is almost normal for the season. Some sowings under irrigation are in progress. The standing crops are generally in good condition, but are suffering from exhaustion of the water-supply in parts. The harvest continues to yield a normal outturn. Pasture has dried up, but fodder is sufficient. The condition of cattle is normal. Prices are almost stationary.

**Bombay.**—*For week ending 12th April.*—Slight rain fell in parts of six districts. Harvesting of late crops is progressing in twelve and preparations for next season in eighteen districts. Cotton-picking continues in parts of Guzerat and Karnatak. Fodder is sufficient, except in parts of Sind. Agricultural stock is healthy. Prices have risen in seven and fallen in two districts; elsewhere they are stationary.

**Bengal.**—*For week ending 10th April.*—There was rain during the week in almost all parts of Bengal Proper and in places in North Bihar and in the Balasore and Hazaribagh districts. Ploughing is proceeding rapidly and the sowing of autumn rice and jute is going on in parts. The planting of sugarcane is also in progress. Spring rice is doing well, though some more rain is still required in the Burdwan and Presidency divisions. The spring crops are still being harvested in places. A good crop of *mahua* (*Bassia latifolia*) is being gathered in the Bhagalpur and Chota Nagpore divisions. The fodder-supply is everywhere sufficient, except at Midnapore. Prices continue practically stationary.

**North-Western Provinces and Oudh.**—*For week ending 12th April.*—The weather was generally unsettled during the week and rain has fallen in several districts. Harvesting of the spring crops is nearly over and threshing and winnowing are in active progress. Extra crops and sugarcane are being sown, planted and irrigated. Opium weighments have commenced. Prospects are favourable and supplies and fodder are sufficient. Prices show a tendency to rise in a few districts, but are generally stationary to falling.

**Punjab.**—*For week ending 12th April.*—Rain has fallen in all districts, except Delhi, Jullundur, Shahpur, and Peshawar. Harvesting of spring and sowings of extra spring and autumn crops continue. The condition and prospects of the standing irrigated crops are average and of unirrigated crops below average or poor. The yield is generally expected to be below average. Cattle are in fair condition, except in Delhi and parts of Dera Ismail Khan. Fodder is scarce in Delhi, Umballa, Lahore, Shahpur, Dera Ismail Khan, and parts of Hissar, and sufficient elsewhere. Prices, especially of wheat, are rising in Sialkot, Peshawar, and Dera Ismail Khan; falling in Hissar, Jullundur, and Rawalpindi;

and are unchanged elsewhere. Wheat is selling from 16½ to 21½, gram 20 to 23½, barley 32, bulrush-millet 19 to 29, maize 28 to 39, great millet 20, and rice 13 to 14 seers per rupee.

**Central Provinces.**—*For week ending 11th April.*—The weather is hot and occasionally cloudy, and high winds prevail almost everywhere. Slight showers of rain fell in eight districts. The threshing of spring crops is approaching completion and the planting of sugarcane continues in Bhandara and Sambalpur. In Saugor labourers find occupation in gathering *mahua* (*Bassia latifolia*) and other minor products from Government forests. In parts of Damoh also the forests have been thrown open to the poorer classes and village relief is being organised in the northern half of that district. The water-supply is becoming scanty in some villages of the Mandla, Betul, Wardha, and Chhindwara districts. Fodder is reported insufficient in parts of Seoni, Wardha, Nagpur, and Sambalpur. The price of wheat, gram, rice, and *juar* has fallen in some districts, and has slightly risen in others. A tendency to rise is shown mainly in the Jubbulpore division, but both there and elsewhere prices are below normal, the cheapest being—wheat 21, gram 35, rice 22, and *juar* 29 seers per rupee; the dearest prices are—wheat 12, gram 18, rice 10, and *juar* 19 seers per rupee.

**Burma.**—*For week ending 8th April.*—In Upper Burma sowing and transplanting of dry weather paddy are not yet completed in some districts. The crop promises well, except in Mandalay, where prospects are poor and in a few villages of the Ruby Mines district in which more water is needed. Wheat is being harvested in Sagaing and reaping of miscellaneous crops is progressing generally in Myitkyina and the Ruby Mines district. Land is being cleared for cultivation of hill side paddy. The price of paddy has fallen slightly in Rangoon, Pegu, and Pakokku, and has risen in Amherst.

**Assam.**—*For week ending 11th April.*—Rain in most districts has facilitated cultivation. Ploughing for and sowing of early and late broadcast rice continue. Transplanted early rice is somewhat damaged by rise of water in Sunamganj. Plucking of tea is in progress and prospects are generally good, except in Cachar, where red spider and blight prevail. Pressing of sugarcane is nearly finished; the outturn is poor in Sylhet, elsewhere it is generally good. Ploughing for and sowing of jute continue in Goalpara and Sylhet. Prices—common rice—Sylhet 19; Silchar, Dhubri, Gauhati, and Nowgong 16; Tezpur 15; Sibsagar 10; and Dibrugarh 14 seers per rupee.

**Mysore and Coorg.**—*For week ending 12th April.*—**MYSORE:** Rainfall 53 cents in the Civil and Military station and slight rain in parts of the Province. The standing crops are in good condition. Prices have slightly fallen in Bangalore, Hassan, and Shimoga; and have risen in Kolar, Kadur, and Mysore.

**COORG:** Rainfall 17 cents. Coffee has blossomed. Prices of food-grains are stationary. Water and fodder for cattle are sufficient.

**Berar and Hyderabad.**—*For week ending 12th April.*—**BERAR:** The weather is warm and occasionally cloudy. Preparation of land for the ensuing rain crop continues. Scarcity of fodder and water prevails in parts of the Province. Prices are fluctuating.

NOTE.—In the Assam report for the week ending 4th April delete the words "and heavy rain from Sylhet."

**HYDERABAD:** No rain during the week. The spring harvest is progressing and the standing winter rice crop is in fairly good condition. Prices of grain continue steady. Prices—wheat 9½, coarse rice 10½, and *jowari* 2½ seers per current sicca rupee.

**Central India.**—*For week ending 12th April.*—No rain during the week. Agricultural operations are in progress throughout Central India. The standing crops are in fairly good condition. Prices continue above normal in Bundelkhand. The condition of the opium crop is fair in Malwa and good in Gwalior and Bhopal.

**Rajputana.**—*For week ending 12th April.*—Agricultural operations are progressing satisfactorily, except in Merwara. The state of the crops is generally good, except in Ajmere-Merwara, where it is fair. The harvesting of crops is almost completed. Cattle are in poor condition in Marwar, Haraoti, and Ajmere; elsewhere they are in good condition. Fodder scarcity prevails in States reported last week. Prices are falling in two States and are steady elsewhere. Twenty persons emigrated from Ajmere and seven from Merwara during the week. The total emigration from Merwara up to date numbers 4,342. The numbers employed on relief works were—440 in Ajmere, 3,263 in Merwara, and 970 in Marwar. Prices—Ajmere 20½, Beawar 22, and Marwar 15 seers per rupee. The water-supply threatens to fail in Kherwara and remedial operations have been started.

**Kashmir.**—*For week ending 11th April.*—Rain fell during the week. The prospects of the spring crops are excellent. Prices continue below normal. Rice—27 seers per rupee.

**JAMMU PROVINCE.**—*For week ending 12th April.*—Slight rain fell during the week. Prices are stationary. Wheat is selling at 19 and maize 25 seers per rupee. The condition of the standing crops is fair. Fodder is scarce.

**Nepal.**—*For week ending 8th April.*—Rainfall 0·34 inch. The weather is cold, windy, and stormy. Crop prospects are good. The price of rice is 9½ seers per rupee.

T. W. HOLDERNESS,  
*Secretary to the Government of India.*

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

No. 11—124-2.

*Extract from the Proceedings of the Government of India, Department of Revenue and Agriculture (Civil Veterinary Administration),—dated Simla, the 7th April, 1899.*

Read—

The Annual Report of the Civil Veterinary Department in India for the official year 1897-98.

## RESOLUTION.

The Report of the Civil Veterinary Department for the year 1897-98 shows satisfactory progress in all directions. The results of the famine in the shape of high prices and scarcity of fodder continued to affect the operations of the Department and added in no small degree to the anxieties of the Inspector General and his officers. The number of Government stallions employed was somewhat smaller than in the previous year. The average number of mares covered per Government stallion employed in the three most important breeding centres—the North-Western Provinces, North Punjab and South Punjab—fell from 52 to 49. The Government of India, however, agree with the Inspector General that, considering the sufferings of these Provinces from scarcity, and the strain on the resources of the Punjab caused by the frontier campaigns, it is satisfactory that the decrease was not more marked. The increase in the corresponding figures for Baluchistan, which is one of the best breeding-grounds, is very satisfactory.

As in the previous year the high cost of feed and keep of Government stallions was unavoidable. The Inspector General exercised the closest personal supervision over expenditure under this head in all the Provincial departments under his charge, and the Government of India are satisfied that the utmost possible economy was observed.

The condition of the Bombay market for Arab stallions during the year was most unsatisfactory. In 1896-97 only half the usual number of horses was landed, but in the year under review, owing to previous losses sustained by dealers and fear of plague, only 1,500 horses were landed against a yearly average under normal conditions of 5,000. Under circumstances so unfavourable, it is creditable to Veterinary Colonel Queripel that he obtained the requisite number of Arab stallions of high class.

The suggestions for remedying existing defects in the accommodation provided for stallions on board hired transports have been referred to a Committee appointed to consider the matter.

2. The removal of the Punjab Stallion Depot at Babugarh to a site near the cantonment of Abbottabad has now been practically approved, and the plans and estimates for the new buildings are at present under the consideration of the Government of India. The location of the stables on the new site should have the best results, as regards the acclimatization and treatment of horses, and is likely to act as a stimulus to horse-breeding in the Punjab generally.

3. Steps have been taken to carry into effect the proposal of the Inspector General that the attention of Officers Commanding British Cavalry Regiments mounted on country-breds should be specially directed to the working of those horses whose pedigrees are known, for the purpose of comparing the working capabilities of horses got by the different classes of sires.

4. There was a reduction, for the most part due to the destruction of old donkeys who were no longer fit for breeding, in the number of donkey stallions employed as compared with the figure for the preceding year.

Similarly, there was a falling off in the percentage of mares covered per donkey stallion employed. These reductions were due to the peculiar circumstances of the year, considering which the results shown are satisfactory. In addition to scarcity there was the demand for transport for the late frontier expeditions, which undoubtedly caused a serious drain on the pony-mare supply, and of which the effect is likely to be seen to a still greater extent in the figures for 1898-99. To meet the demand for donkey stallions which exceeds the supply, the purchase of 25 additional jacks per annum for the next three years has recently been sanctioned.

5. The increase in the number of branded mares is satisfactory. Little advantage has been taken of the concession granted a few years ago of allowing unbranded mares to be covered on certificates granted by District Officers. The Government of India, however, agree that there is no harm in giving the system a further trial except in the Bombay Presidency proper, where no reasons for its continuance exist. There was a slight falling off in the total number of mares covered, but considering the various unfavourable conditions of the year the results are not unsatisfactory.

6. Though the season was less unfavourable to horse fairs and shows than the preceding year, owing to the plague and other causes a certain number could not be held, whilst in other cases the attendance was below the average. There was a falling off in the number of purchases made by the Army Remount Department, but the class of animals obtained was well up to the average of former years. On the other hand, the purchases made by the Native Cavalry exceeded by 94 the figure for the preceding year. It is satisfactory that the award of silver medals to owners of the best collections of brood mares and young stock is so much appreciated and continues to excite keen competition.

7. The Instruction Farms continue to fulfil a useful purpose. It was thought advisable during the year to sell the pony and donkey mares attached to the two Farms and gradually to increase the stock of big mares. The changes will have the advantage, amongst others, of enabling experiments to be carried out as to the value of the different crosses.

8. A considerable advance was made during the year towards completing the equipment of the bacteriological laboratory at Muktesar and placing the staff on a thoroughly satisfactory footing. As the result of an informal conference held at Simla which was attended by Veterinary-Colonel Queripel and Dr. Lingard, a Veterinary Officer has been posted as Assistant to the Imperial Bacteriologist to attend to the practical work outside the laboratory, as well as to assist in the laboratory itself. A trained German head laboratory assistant has been attached to the laboratory, and most of the buildings and appliances required have been provided. Government have unfortunately been deprived temporarily of Dr. Lingard's services owing to his being obliged to take sick leave, but Captain Leonard Rogers, I.M.S., has been appointed to carry on his work, and a number of important experiments are in progress in connection with rinderpest, whilst the manufacture of mallein and other reagents is being carried on. It is a source of satisfaction to Government that the laboratory is at length in working order and the various objects of the institution are being actively pursued.

Operations under the Glanders and Farcy Act have been extended during the year. In particular the Act was amended in order to meet the paucity of qualified Veterinary Practitioners in the North-Western Provinces and Oudh by utilizing with the express permission of the military authorities the services of Veterinary Officers of the Army Veterinary Department in cases of urgent necessity. Rules have been framed for the working of the Act in the Hyderabad Assigned Districts, and the difficulty caused by the absence of any qualified Veterinary Practitioner has been met by the appointment as Veterinary Surgeon under section 7 of the Act of the Superintendent, Civil Veterinary Department, or, in his absence, of the Senior Veterinary Assistant. Glanders was prevalent in most of the Provinces, but not to any serious extent except in Bombay City. Further information has been collected regarding *surra* disease which shows how widespread this fatal malady is. So far inquiries have been confined to the Punjab and the North-Western Provinces, and investigations should be directed to ascertaining whether the disease affects animals elsewhere in the Indian Peninsula and, if so, to what extent. It is to be regretted

that no progress has been made in investigating the Ludhiana disease or anthrax. The Imperial Bacteriologist may possibly be able to undertake this duty in the near future.

9. It is satisfactory that the Inspector General has succeeded in inducing the railway companies to adopt a uniform system for the cleansing of horse-boxes and railway trucks, and that the railways have now definitely adopted a uniform set of rules for this purpose.

10. The Inspector General's account of horse-breeding in the Native States shows a satisfactory state of things, and it is evident that the *durbars* generally conduct their operations with energy and intelligence.

11. There was a slight falling off in the number of horse, pony and donkey stallions maintained by District Boards, but the interest taken in horse-breeding by local bodies, more especially in Northern India, is well maintained and the demand for suitable stallions considerably exceeds the supply. The Arab sire maintains his popularity with the owners of mares, and there was an increase in the number of coverings and of foals. Pony-breeding continues to yield most encouraging results, the fillies produced not only being sufficiently well developed to admit of their being branded and served by Imperial stallions, but in a few instances being up to the remount standard.

12. Much attention was paid during the year to the investigation and prevention of cattle disease, and opportunity was taken of the visit of Dr. Koch to this country to depute as many officers as possible to attend the demonstrations of his methods kindly given by him at Muktesar.

13. Much good work was done in the veterinary dispensaries during the year and there is ample evidence of the steady increase of these institutions in popularity. Bombay still leads the way as regards numbers, but Bengal is rapidly drawing up, and the Punjab and the Central Provinces are doing their best with limited resources. The utility of dispensaries as a means not only of alleviating much suffering but of enlisting the sympathies and securing the confidence of the people in Western veterinary methods cannot be overestimated, and it is earnestly to be hoped that in provinces like Madras, where at present not a single dispensary exists, and in the North-Western Provinces, where there is only one, there will be no unavoidable delay in taking action in the matter.

14. The results of the final examinations held at the Veterinary Schools were generally satisfactory, the Lahore Veterinary School being the most successful. At the Bombay School only 7 out of 14 passed; but the fact that the curriculum of study is altogether of a higher standard, and the tests somewhat more stringent there than at other schools, is no doubt partly responsible for the somewhat disappointing result.

15. In conclusion the Government of India desire to endorse the tribute paid by the Inspector General to the excellent work of the officers of the Department, and are glad again to acknowledge the care, zeal, and energy with which Veterinary-Colonel Queripel carried on the administration of the Department in a year of more than ordinary difficulty.

SUPPLEMENT TO

# The Gazette of India.

No. 16.]

CALCUTTA, SATURDAY, APRIL 22, 1899.

## OFFICIAL PAPERS.

*A Supplement to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.*

*Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

*No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.*

GOVERNMENT OF INDIA  
HOME DEPARTMENT.

USE OF CHURCHES CONSECRATED FOR THE SERVICES OF THE CHURCH OF  
ENGLAND FOR THE SERVICES OF PRESBYTERIANS AND WESLEYANS.

NOS. 146—161.

*Extract from the Proceedings of the Government of India in the Home Department (Ecclesiastical),—under date Simla, the 20th April, 1899.*

Read—

The Resolution of the Government of India in the Home Department, Nos. 271—86, dated the 17th June 1898, regarding the use by other denominations of churches consecrated for the services of the Church of England.

RESOLUTION.

The Governor General in Council is pleased to prescribe the following rules to regulate the use of churches consecrated for the service of the Church of England for the services of other denominations in supersession of the rules contained in the Resolution of the Government of India read in the preamble :

- (1) A Church provided by Government and consecrated for the services of the Church of England may be used for the services of Presbyterians and Wesleyans.
- (2) The use of the Church shall be permissible both to Scotch Chaplains on the regular establishment and to Presbyterian and Wesleyan Ministers officiating with troops.
- (3) It shall be necessary to obtain the consent of the Bishop of the Diocese in each case.
- (4) The Bishop, or the Church of England Chaplain, or Clergyman of the Church of England performing the duties of Chaplain, shall, under the Bishop's instructions fix the hours at which the Church shall be made available to the Presbyterian, or Wesleyan congregations.
- (5) The care of the Church and Church furniture and the expenditure and control of the Church establishment shall remain exclusively in the hands of the Chaplain or Clergyman of the Church of England performing the duties of Chaplain.
- (6) The Bishop of the Diocese may withdraw his assent to use the Church for the worship of any congregation other than that of the Church of England whenever he shall think fit.
- (7) If in any case dissatisfaction is felt with any order passed under these rules either as to the use of a Church by a congregation not belonging to the Church of England or as to the hour at which it is made available for the use of such congregation, the Senior Chaplain of the Church of Scotland or the General Superintendent of the Wesleyan Church, as the case may be, may bring the matter before the Lieutenant-General of the Command, through the General Officer Commanding the District; and the Lieutenant-General shall then, if he considers this necessary, communicate with the Bishop in order, if possible, to arrange the matter with him. Should the Senior Chaplain of the Church of Scotland or the General Superintendent of the Wesleyan Church, as the case may be, be dissatisfied with the arrangement made between the Lieutenant-General of the Command and the Bishop, he shall be at liberty to ask the Lieutenant-General that the matter may be referred for final decision to the Metropolitan.

**ORDER.**—Ordered, that this Resolution be communicated to Local Governments and Administrations, the Most Reverend the Metropolitan, the Senior Chaplain of the Church of Scotland, Calcutta, the General Superintendent of the Wesleyan Church and the Foreign and Military Departments.

Ordered, also, that it be published in the *Gazette of India*.

[True Extract.]

A. H. L. FRASER,

*Offg. Secretary to the Government of India.*

## DEPARTMENT OF REVENUE AND AGRICULTURE.

### Weather Review of India for the Week ending at 8 a.m. on Saturday, April 15th, 1899.

The general conditions of weather have been unusual and irregular during the week under review. Pressure has been high over North-East India and relatively high along the foot of the Himalayas, while it has been low over the Western desert and over Ceylon and the south of the Peninsula. As a result, conditions have been favourable for easterly winds over a large part of India, and moist winds from easterly directions have prevailed over a considerable part of the country instead of the dry westerly winds which are usual at this season of the year. As a consequence, the weather has been much more unsettled than usual, and thunderstorms giving rain and hail have been very widespread, but have been particularly frequent over Upper Burma, Assam and Bengal, over the Punjab and the North-West Himalayas and over the southern half of the Peninsula. Accompanying the rainfall over North-East India and the Peninsula there has been very cool weather, but over North-West India the thunderstorms were too light and too local to largely affect temperature, which during the week in these regions has been generally excessive.

**Daily Summary.—Sunday, April 9th.**—The barometer had fallen almost everywhere, and the depression, which was noticed over the western desert at the close of the preceding week, had commenced an eastward movement down the Gangetic Plain. It was central near Agra where pressure was largely below the normal. Pressure was highest and slightly to moderately above the normal over Burma and North-East India. The winds were irregularly cyclonic over North-West India and southerly and south-easterly over the Peninsula and Lower Bengal, while along the foot of the hills in Bengal and the North-West Provinces the direction was easterly. The weather was unsettled and cloudy. Thunder and dust storms had occasioned rain over parts of Burma, Assam, Bengal, the North-West Himalayas, Malabar, the east of the Central Provinces and Madras. Generally the rainfall had been moderate or light. The mean temperature was low over Assam and Bengal, about normal over South Madras and higher than usual elsewhere.

**Monday, April 10th.**—The lowest pressures had been re-transferred westward, and the depression was again shown over the Western desert. Pressure remained highest over Burma, Assam and Bengal, and, while the barometer read 0.091 inch higher than usual at Sibsagar, it read 0.132 inch lower than usual at Multan and Deesa. The winds generally were little changed, but the easterly current in Northern India had increased and extended, and easterly and south-easterly winds blew from Central Bengal to the Punjab. The weather had been fairly fine, though here and there disturbed by thundershowers, over the Peninsula and the central parts of the country, but over Northern India and Burma showers had been remarkably prevalent. The mean temperature was falling almost everywhere, and the areas of deficient temperature over North-East India and over the south of the Peninsula were both increasing in extent and intensity. In North-West and Central India and part of Burma the heat still remained excessive.

**Tuesday, April 11th.**—Pressure had changed irregularly. The barometer continued to read unusually high in North-East India and unusually low in North-West India, so that conditions, favourable for easterly winds over Northern India, continued, and winds from easterly directions prevailed from Bengal to the Punjab. South-easterly winds prevailed over the Peninsula and variable winds over Lower Bengal. The weather had cleared, and the rainfall became lighter and less extensive over North-West India, but over Burma, Assam and Bengal rain had continued both general and heavy, and fair showers had been received over

the south of the Peninsula and some central districts. The area of deficient temperature continued to extend, and mean temperatures exceeding the normal were only reported from the extreme north-west of India and the Madras Coast districts. In Bengal the weather was remarkably cool. The following variations from the normal explain the general distribution of temperature relatively to the normal: Patna  $-15.2^{\circ}$ , Berhampore  $-14.0^{\circ}$ , Jacobabad  $+8.2^{\circ}$ , Madras  $+1.6^{\circ}$  and Madura  $-5.5^{\circ}$ .

*Wednesday, April 12th.*—Pressure continued to change irregularly. Pressure remained highest and higher than usual over Assam and Upper Burma and lowest and lower than usual over the Western desert, so that the general conditions were unaltered, and easterly and south-easterly winds continued over North and West Bengal and up the Gangetic Plain. In North-West India squally cyclonic winds prevailed around the depression over the Western desert, while south-easterly or variable winds were reported over the Peninsula. Thunder and dust storms had continued to give rain over North-East and North-West India, the southern half of the Peninsula and the east of the Central Provinces. In the North-West Provinces, the central parts of India (except the east) and the northern half of the Peninsula the weather was fine, but elsewhere it was more or less disturbed. The weather was remarkably cool over North-East India and the east and south of the Peninsula, while the heat was excessive over the north-western and central parts of the country.

*Thursday, April 13th.*—Pressure had risen over Northern India and had been nearly steady over Burma and the Peninsula. The storm in the north-west had become shallower and more diffused, but, on the contrary, the high pressure area in the north-east had become more strongly marked. Easterly winds continued from Central Bengal to the Punjab, but the cyclonic circulation in the north-west had died down. South-easterly and variable winds continued over the Peninsula. The weather remained unsettled and disturbed with dust and thunder storms over Northern India and the south of the Peninsula, but was fine in the intervening regions. The rainfall amounts were larger than usual. The mean temperature conditions were similar to those reported on the preceding day, the heat having been greater than usual over North-Western and Central India and less than usual elsewhere.

*Friday, April 14th.*—The barometer had changed irregularly and in some places by considerable amounts. Pressure was highest and largely above the normal along the foot of the Eastern Himalayas; it was lowest and slightly below the normal over the Western desert and relatively low and considerably lower than usual over Ceylon. The depression over the Western desert was somewhat better defined than on the 13th. Westerly and north-westerly winds prevailed in Bombay and southerly to easterly winds in most other places. Fairly general thundershowers had been received over Lower Bengal, Assam and the North-West Provinces and scattered showers over the Peninsula and the east and south of the Central Provinces. The temperature conditions were generally similar to those reported on the preceding day, but both the excess in the north-west and the deficiency in the north-east were smaller.

*Saturday, April 15th.*—Pressure had changed very little. Barometric readings were highest along the foot of the hills, lowest over the Western desert and relatively low near Ceylon. Easterly and south-easterly winds continued over Northern India and variable breezes elsewhere. The rainfall area had contracted somewhat over Northern India, but thundershowers continued to be reported from Assam, North and West Bengal and the North-West Provinces. In the Peninsula, on the contrary, the rainfall area had extended and the showers became heavier. The heat had been greater than usual over the greater part of North-Western and Western India and over Burma, while it had been less than usual in all other places. The following variations from the average explain the distribution relatively to the normal: Jacobabad  $+6.0^{\circ}$ , Madura  $-7.4^{\circ}$ , Gorakhpur  $-12.8^{\circ}$ , Dhubri  $-12.0^{\circ}$  and Tounghoo  $+6.4^{\circ}$ .

**Temperature.**—The heavyish rainfall at the commencement of the week in North-East India and in the south of the Peninsula produced in those two

regions areas of deficient temperature which were comparatively small and comparatively slight on the 9th. The rainfall continuing these areas of relatively low temperature increased both in intensity and size till, during the latter half of the week, they embraced most parts of the country except the north-west and centre. In the two latter regions the mean temperature was steadily excessive during the week, the showers in those areas having been insufficient to seriously affect the temperature conditions.

The following table gives the mean temperature variation data for the week :

Province.	APRIL 1899.							Mean variation of week.
	9th	10th	11th	12th	13th	14th	15th	
Burma	+1.1	-0.3	-3.5	-4.1	-1.9	+0.1	+1.8	-1.0
Assam	-3.4	-5.6	-9.5	-7.9	-7.0	-2.2	-4.1	-5.6
Bengal	-2.3	-4.5	-9.4	-7.5	-5.8	-5.8	-6.5	-6.0
Orissa	-2.7	-5.3	-9.6	-5.1	-2.8	-6.9	-6.0	-5.5
Bihar	-0.8	-2.7	-13.5	-9.2	-5.5	-8.6	-9.5	-7.1
Chota Nagpur	+2.7	-2.1	-12.1	-5.7	-4.0	-8.9	-10.6	-5.8
N.-W. P. and Oudh	+2.7	-1.3	-4.9	-3.1	-1.1	-6.5	-5.3	-2.8
Punjab	+3.0	+1.2	-0.1	+2.5	-1.2	-0.4	-0.4	+0.7
Sind	+7.3	+4.9	+6.9	+5.4	+3.8	+3.2	+3.7	+5.0
Rajputana	+7.1	+3.0	+1.9	+5.5	+5.5	-0.2	+1.4	+3.5
Gujarat	+5.9	+1.0	+2.8	+2.6	+1.4	+0.5	+2.2	+2.3
Central India	+5.3	+3.5	+1.4	+3.0	+4.1	-1.1	-0.9	+2.1
Central Provinces	+3.5	-0.7	-2.5	-0.1	+0.6	-0.9	-2.1	-0.1
Berar	+4.7	+3.8	+2.2	+3.2	+2.9	+0.5	+1.1	+2.6
West Coast	+1.3	-0.1	-1.0	-1.4	-1.0	-0.6	-1.7	-0.6
Bombay Deccan	+1.8	-0.4	-0.9	-0.5	-0.4	-1.3	+0.3	-0.2
Mysore	-0.3	-0.4	+0.4	-2.2	-3.2	-1.7	-2.9	-1.5
Madras Coast	+0.9	+0.8	+1.4	-0.9	-0.9	-1.1	-2.5	-0.3
Madras Deccan	+0.2	+0.6	-0.7	-1.6	-1.8	-1.3	-4.6	-1.3
South India	-2.2	-2.6	-4.4	-6.4	-6.8	-5.0	-5.5	-4.7
Mean for whole of India	+1.8	-0.3	-2.8	-1.6	-1.3	-2.4	-2.6	-1.3

On the first day of the week the heat of the whole country was greater than usual, but between the 9th and the 10th there occurred a fall of over  $2^{\circ}$ , and from that date onward the temperature of the whole of India was below the normal, the deficiency being considerable on the 11th, 14th and 15th. The provincial variations show that the weather during the week was warmer than usual in Sind, Rajputana, Gujarat, Central India and Berar; that the mean temperature was about normal in the Punjab, the Central Provinces, the West Coast, the Bombay Deccan and the Madras Coast; and that it was less than usual in all the remaining provinces. The deficiency was greatest in Behar where from the 11th to the 15th the mean temperature was very largely below the normal.

The following were the highest maxima recorded on each day :

April 9th	109.4°	at Rajkote.
" 10th	108.2°	" Bhavnagar.
" 11th	109.3°	" Jacobabad.
" 12th	107.2°	" Jodhpur.
" 13th	106.7°	" Akola.
" 14th	105.1°	" Hyderabad (Sind).
" 15th	107.4°	" Jacobabad.

**Rain.**—The past week has been one of exceptionally widespread and heavy rainfall considering the time of year. The only practically rainless regions during the week were Lower Burma and North Bombay with the adjoining parts of Rajputana and Central India. In all other parts of the Indian area rain has been received, the rainfall amounts ranging from a few cents over the Punjab, the Gangetic Plain, the central parts of the country and the head of the Peninsula, to several inches in Assam and the south of the Peninsula. The daily rainfall returns for the week show that rain was received principally between the 9th and 12th in Upper Burma; between the 9th and 13th in Assam; on most days of the week in Bengal; on the 9th, 11th and 12th in Bihar; on the 13th and 14th in the east and centre of the North-West Provinces; on different days of the week in the west of the North-West Provinces and in the Punjab, on all days of the week in the south of the Peninsula; and between the 12th and the 15th in the east of the Peninsula.

The rainfall table at the close of the summary shows that the average actual rainfall of the week exceeded 0·10 inch in all the rainfall divisions except Tenasserim, Deltaic Burma, the South Punjab, the West Punjab, the Konkan, Khandesh, Berar, the west of the Central Provinces, Gujarat, Kathiawar, Sind, Baluchistan, Central India and Rajputana where the week's rainfall has been actually or practically *nil*. In all the remaining divisions effective rain has been received, the average actual rainfall ranging from 7·02 inches in the Assam Hills, 4·91 inches in the Surma Valley, 4·33 inches in Malabar and 4·40 inches in South Madras, to 0·13 inch in Upper Burma, 0·14 inch in the South-East Punjab, 0·13 inch in the Central Punjab, 0·16 inch in the centre of the Central Provinces and 0·18 inch in the central division of Madras. The third column of the table shows that in no less than thirty-nine of the rainfall divisions the week's rain has been in excess of the normal. These thirty-nine divisions covered Arakan, Assam, Bengal, Bihar, the North-West Provinces, the South-East Punjab, the Peninsula and the Central Provinces, and the excess amounted to 4·99 inches in the Assam Hills, to 4·12 inches in South Madras, to 3·77 inches in Malabar, to over 2 inches in South-Central Madras, Coorg, Orissa and East Bengal and to over 1 inch in the Assam Valley, Deltaic Bengal, North Bengal, the Bengal Hills, Chota Nagpur, North Bihar, and the north (a) division of the East Coast.

The following were the principal large totals recorded at individual stations during the week:

Burma	Akyab	2·07 inches.
Assam	Cherra Poonjee	20·30 "
	Borkhola (Cachar)	6·44 "
Bengal	Ramchanda (Tippera)	5·60 "
	Goalundo (Faridpur)	4·96 "
	Alipurduar (Jalpaiguri)	3·41 "
Bihar	Sitamarhi (Muzaffarpur)	4·82 "
N.-W. P.	Padrauna (Gurakhpur)	2·95 "
	Ukimath (Garhwal)	3·10 "
Punjab	Chakwal (Jhelum)	0·66 inch.
	Hangu (Kohat)	1·25 inches.
Malabar	Alleppy	11·20 "
Nilgiris	Kilkundah	10·82 "
Mysore	Holalkeri	4·71 "
Madras	Jehapur (Ganjam)	4·80 "
	Pattukattai (Tanjore)	4·71 "
	Uslamperty (Madura)	7·63 "

The three concluding columns of the table show that the heavy rainfall of the past week has brought about a considerable change in the condition of the seasonal rainfall. In Assam, Bengal, the west of the Peninsula and South Madras the actual fall between February 26th and April 15th has been in excess of the average, while in other parts of the country, though the rainfall is still short, the deficiency has been considerably reduced.

PROVINCE.	DIVISION.	RAINFALL DATA FOR WEEK ENDING APRIL 15TH, 1899.			RAINFALL DATA FROM FEBRUARY 20TH TO APRIL 15TH, 1899.		
		Average actual rainfall of division.	Average normal rainfall of division.	Excess or deficit in inches.	Average actual rainfall of season to date.	Average normal rainfall, February 20th to April 15th.	Excess or deficit of (total normal) rain- fall measured as a per- centage.

Secretary to the Government of India.

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

## Weekly Report on the state of the Season and Prospects of the Crops.

**Madras.**—*For week ending 15th April.*—The rainfall was most exceptional during the week; it was heavy on the West Coast and in the Southern districts and in parts of the Carnatic, the Central districts, and the Circars, and light showers were general elsewhere. Since the end of week more heavy rain has fallen on the East Coast and the south of Nellore and light rain in inland districts. The water-supply is generally sufficient, except in parts of the Deccan. Some sowings under irrigation and on the West Coast are going on. Preparations for the new season have begun. The standing crop is in good condition. Harvesting continues in some places and the yield is normal. Pasture is very scanty, but fodder is sufficient. The recent rain will benefit the standing crops, especially under wells, and produce some pasture. Prices continue almost stationary.

**Bombay.**—*For week ending 19th April.*—Slight rain fell in parts of six districts during the week. Reaping of late crops continues in eight and cotton-picking in four districts. Preparations for next season are progressing generally. Fodder is sufficient, except in parts of Sind. Agricultural stock is healthy. Prices have risen in five and fallen in six districts; elsewhere they are stationary.

**Bengal.**—*For week ending 17th April.*—Rain, sufficient for present requirements, fell in all parts of the Province during the week; but in places in Bihar it is said to have injured the spring crops lying on the threshing ground. Ploughing is now general and sowing of autumn rice and jute and planting of sugarcane are in progress. Spring rice is maturing and in some places is being reaped. The *mahua* (*Bassia latifolia*) harvest in the Bhagalpur and Chota Nagpore divisions is almost over, and the outturn has been good. No want of fodder is reported. Prices are generally stationary.

**North-Western Provinces and Oudh.**—*For week ending 19th April.*—Stormy weather prevailed during the week accompanied by rain and hail in several districts. Slight damage from hail is reported in places. Harvesting operations are nearing completion and new grain is coming into the markets in parts. Sugarcane and extra crops are being irrigated where necessary. Indigo is being sown. Markets are well-stocked and fodder is sufficient. Prices have risen in a few districts, but are otherwise stationary to falling.

**Punjab.**—*For week ending 19th April.*—Rain has fallen in all districts, except Ferozepore, Mooltan, Amritsar, and Dera Ismail Khan. Harvesting of standing spring crops and sowings of extra spring and certain autumn crops continue. Sugarcane and cotton crops are being watered. The condition and prospects of the standing irrigated crops are reported average and of unirrigated crops below average or poor. More rain is wanted for autumn sowings in Shahpur. The outturn of spring crops is generally expected to be average or below average. The standing spring crops have been seriously damaged by hail in parts of the

Lahore, Peshawar, and Dera Ismail Khan districts. The condition of cattle is poor in Delhi and in parts of Dera Ismail Khan and good elsewhere. Fodder is reported sufficient in all districts, except in Delhi, Umballa, and parts of Dera Ismail Khan. Prices, especially of wheat, the chief food-staple, are rising in Umballa and Jullundur; falling in Rawalpindi and Dera Ismail Khan; and are unchanged elsewhere. Wheat is selling from 16 to 21, gram 20 to 23, barley 30 to 32, bulrush-millet 19 to 25, maize 28 to 35, great millet 20, and rice 13 to 14 seers per rupee.

**Central Provinces.**—*For week ending 18th April.*—The weather was generally unsettled during the week and rain has fallen in twelve districts, the rainfall in four districts measuring more than half-an-inch. The threshing of spring crops is proceeding. The planting of sugarcane is also in progress in Bhandara and Sambalpur. An abundant crop of *mahua* (*Bassia latifolia*) is being gathered and labourers derive much benefit from forest concessions in consequence. Village relief is being gradually extended in the distressed areas in Saugor and has been started in the Damoh tahsil. Water is getting scanty in parts of Mandla, Betul, Chanda, and Chhindwara. Fodder is insufficient in parts of seven districts and grain stocks are reported to be insufficient in the Hinghanga-ghat tahsil of Wardha. The range of prices is generally below the normal: the cheapest prices are—wheat 21, gram 35, rice 22, and *juar* 30 seers per rupee; the dearest prices are—wheat 12½, gram 18, rice 10, and *juar* 22 seers per rupee.

**Burma.**—*For week ending 15th April.*—In Upper Burma reaping of island crops is approaching completion. Dry weather paddy is being harvested in Mandalay, Sagaing, and Kyaukse. The prospects of the standing crops continue unchanged. Slight rain fell during the week in several districts of Upper and Lower Burma. The price of paddy has risen in Prome, Pakókku, and Minbu; and has fallen in Thaton and Amherst, and has also slightly fallen in Rangoon.

**Assam.**—*For week ending 18th April.*—Rain fell in most districts during the week. Ploughing for and sowing of late broadcast rice are in progress. Transplanted early rice has been slightly damaged by hail in Sunamganj and Habiganj sub-divisions. Plucking of tea continues. Prospects are generally good, except in parts of Cachar, where red spider prevails. Pressing of sugarcane is nearly finished; the outturn is poor in Sylhet, but elsewhere is generally good. Sowing of jute continues in Sylhet and Goalpara. Planting of sugarcane has commenced in Kamrup. Prices—common rice—Silchar, Tezpur, and Nowgong 16; Sylhet and Dhubri 17; and Gauhati 15 seers per rupee.

**Mysore and Coorg.**—*For week ending 19th April.*—**MYSORE:** Rainfall—fifteen cents in the Civil and Military station and general good rain in parts of the Province. The standing crops are in good condition. Prices have fallen in Kolar, Kadur, and Shimoga.

**COORG:** Rainfall—2 inches 87 cents. Prices of food-grains are stationary. Water and fodder for cattle are sufficient.

**Berar and Hyderabad.**—*For week ending 19th April.*—**BERAR:** The weather is hot and cloudy. Breaking up of land for the ensuing monsoon crop

continues. The fodder and water-supply remain insufficient in parts of the Province. Prices are fluctuating.

**HYDERABAD:** Rainfall during the week 21 cents. The spring harvest is almost over. The standing winter-rice crop is in fairly good condition and is being harvested in parts. Prices of grain are almost stationary. Prices—wheat 10, coarse rice 10½, and *jowari* 24½ seers per current sicca rupee.

**Central India.**—*For week ending 19th April.*—There was a slight fall of rain in Bundelkhand during the week. Agricultural operations have been completed in Bundelkhand and are in progress elsewhere. The standing crops are in fairly good condition. Agricultural stock and pasturage are in good condition. The prices are above normal in Bundelkhand and normal elsewhere. The condition of opium is fair in Malwa and good in Gwalior.

**Rajputana.**—*For week ending 19th April.*—Rainfall in cents—Abu 27; Ulwar 16; Kherwara 13½; and slight rain in Haraoti. Agricultural operations are progressing satisfactorily, except in Merwara. The state of the crops is generally good, except in Ajmere-Merwara, where it is fair. Harvesting of crops is approaching completion. The average estimated spring outturn in Kherwara is 3 and 6 annas. Cattle are in poor condition in Marwar, Haraoti, and Ajmere; elsewhere they are in good condition. Fodder scarcity prevails in the States reported last week. Prices are rising in three States and are steady elsewhere. Twenty persons emigrated from Ajmere and 18 from Merwara during the week. The total emigration from Merwara up to date numbers 4,360. The numbers employed on relief works were—422 in Ajmere, 3,257 in Merwara, and 960 in Marwar. Prices—Ajmere 20½, Beawar 22, and Marwar 15 seers per rupee.

**Kashmir.**—*For week ending 18th April.*—Rain fell during the week. The prospects of the spring crops are excellent. Prices continue below normal. Rice—27 seers per rupee.

**JAMMU PROVINCE.**—Report not received.

**Nepal.**—*For week ending 15th April.*—Rainfall 1·50 inches. The weather has been cold and stormy, but the rain has benefited the wheat, and ground is now being prepared for the early rice crops. Price of rice 9½ seers per rupee.

T. W. HOLDERNESS,  
*Secretary to the Government of India.*

SUPPLEMENT TO

# The Gazette of India.

No. 17.]

CALCUTTA, SATURDAY, APRIL 29, 1899.

## OFFICIAL PAPERS.

*A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.*

*Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees 312 per annum if delivered in Calcutta or Rupees 312 if sent by Post.*

*No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.*

 Continuation Sheets of Supplement  
to the Gazette of India published at  
Calcutta.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

**Weather Review of India for the Week ending at 8 a.m. on  
Saturday, April 22nd, 1899.**

Pressure conditions have changed considerably during the week under review. The relatively high pressures which existed over North-Eastern and Northern India last week have given way, and pressure has been steadily high in Southern and low in Northern India. But, though this distribution is more normal and regular, and the winds have been less easterly and more westerly than during the two preceding weeks, the weather has continued very unsettled and the mean temperature much lower than the average. The rainfall was general and moderately heavy over the Peninsula during the early part of the week under review, but after Wednesday, the 19th, the fall became both more scattered and lighter. Occasional showers have been received over the Central Provinces, while daily showers have been received over parts of Assam and Bengal. In North-West India there were some scattered showers at the beginning of the week, but during the latter half the weather was fine. The temperature conditions were very remarkable—more particularly at the close of the week, when in every province of India (excluding Burma) the heat was less than usual, and in some the deficiency of temperature was most exceptional.

**Daily Summary.**—*Sunday, April 16th.*—Pressure was high and above the normal over Burma, North-East India and across the head of the Peninsula; it was low and below the normal over the south of the Peninsula and Ceylon and was lowest and considerably below the normal over North-West India where a well-marked depression was shown. The winds were cyclonic in the north-west, easterly along the foot of the Himalayas and over part of the Peninsula and about normal elsewhere. The weather was very cloudy over the Peninsula where rain had fallen generally and was slightly clouded over the Central Provinces and part of North-East and North West India where scattered light showers were received. The mean temperature was slightly or moderately higher than usual over Burma and slightly to largely higher than usual over the Punjab, Sind, Rajputana, Bombay, Central India and part of the Central Provinces. Elsewhere the weather was cooler than usual—more particularly in Bengal and the south of the Peninsula.

*Monday, April 17th.*—The depression noticed in North-West India on the 16th had moved eastward, at the same time filling up and was apparently central near Agra. Pressure was becoming higher over Tenasserim and the Peninsula, but this was the only important change. There were still some easterly winds along the foot of the hills and in parts of the Peninsula, and the winds were more northerly than usual in the north-west. The weather was cloudy to overcast over the Peninsula where rain had again been fairly general and heavy, and some scattered showers had been received over Assam, some central districts

and parts of North-West India. Temperature had fallen fast over the Punjab and the Madras Deccan and risen fast over North-East India. The mean temperature was very low over the Peninsula and considerably below the normal over parts of Bengal and the Punjab.

*Tuesday, April 18th.*—Pressure was low over the Punjab, Eastern Rajputana and the Gangetic Plain and was high over the Peninsula and Sind. Consequently north-westerly winds prevailed over a large part of North-West India and westerly winds across the head of the Peninsula and the central parts of the country. Easterly breezes, however, continued to be reported along the foot of the Himalayas and south-easterly winds in parts of the Peninsula. Rain had continued to fall over the Peninsula, and scattered showers continued to be received over a considerable part of Northern India. Temperature had, on the whole, risen, but the heat remained largely below the normal over the Peninsula and considerably below over the Punjab and Bengal.

*Wednesday, April 19th.*—Pressure had changed irregularly, the principal change having been a large rise over part of North-West India. Pressure was lowest in the North-West Provinces and was relatively low over the Western desert and over Upper Burma, while it was highest in the extreme south. The wind was more northerly than usual over North-West India, more southerly than usual over the Peninsula, but was about normal elsewhere, though there were still some easterly winds along the foot of the Eastern Himalayas. Rain had continued to fall over the west of the Peninsula, but in the east, as well as over the plains of Northern India, the rainfall had almost ceased. The mean temperature had risen over parts of North-East India and of the south of the Peninsula, but had generally fallen elsewhere—more particularly in North-West India where the heat was much less than usual.

*Thursday, April 20th.*—Pressure had fallen again in the north-west where the change had been rapid. Pressure was low over Northern India and high in the extreme south. The winds were unusually northerly over North-West India; they were fairly normal over the Bay area and were variable in direction elsewhere. The weather was cloudy over parts of the Peninsula, of the central districts and of North-East India, and a few scattered showers had been received over those districts. Temperature had fallen fast over the North-West Provinces and Central India, and the heat was very low for the time of year over North-West India and over the Deccan.

*Friday, April 21st.*—Pressure remained low in the north and high in the south, and shallow depressions were shown—one over the west of the North-West Provinces and a second over Upper Burma. The wind directions were very variable, while the force was strong and gusty over a large part of the country. The weather was generally unchanged, and scattered showers had been received over parts of North-East India, the Central Provinces, North Madras and the west of the Peninsula. The mean temperature had changed irregularly and was very low for the time of year except in Burma and North-East India.

*Saturday, April 22nd.*—The pressure changes were again irregular, but the general conditions were unchanged, pressure remaining low over Northern and

high over Southern India. The wind directions were variable, and calms were reported from the Punjab and the Gangetic Plain. Thunderstorms had given rain to parts of Bengal, Assam, the west of the Central Provinces and the Peninsula. Temperature had risen a little in parts of North-Western and of Central India, but had fallen elsewhere. The heat was less than usual in all provinces or divisions except Burma, the deficiency being extraordinarily large in some central districts.

**Temperature.**—The most marked feature in the weather of the past week has been the very low temperature prevailing over the greater part of the country. This relative coolness has been in part due to the occurrence of snow on the North-West Himalayas, and an outflow of cold air from the mountain regions, in part due to abnormally heavy and extensive rainfall and in part to light thundershowers which have locally depressed the day temperatures—in some cases to an extraordinarily large extent.

The following table gives the mean temperature variation data for the week :

PROVINCE.	APRIL 1899.							Mean variation of week.
	16th	17th	18th	19th	20th	21st	22nd	
Burma	+1.2	+0.7	+1.5	+1.7	+2.1	+2.3	+1.6	+1.6
Assam	-1.8	-1.3	-0.7	-2.4	-1.0	-0.1	-0.3	-1.1
Bengal	-3.0	-0.3	-0.5	+0.7	+1.7	+1.5	-2.9	-0.4
Orissa	-4.8	-1.6	-1.1	+1.4	+0.3	-2.8	-8.1	-2.4
Bihar	-6.0	-1.9	-1.8	+0.4	+1.2	+0.1	-1.8	-1.4
Chota Nagpur	-5.9	-3.5	-3.7	-0.7	-0.1	-5.3	-7.7	-3.8
N.-W. P. and Oudh	-2.2	+1.5	+1.6	+0.8	-5.1	-4.3	-4.2	-1.7
Punjab	+2.1	-2.4	-2.6	-9.7	-10.1	-7.7	-5.8	-5.2
Sind	+3.7	+2.3	+1.0	-6.2	-3.9	-6.4	-3.3	-1.8
Rajputana	+4.3	+4.1	+3.1	-6.8	-7.9	-5.5	-4.6	-1.9
Gujarat	+3.6	+3.5	+4.7	-1.3	-2.1	-5.0	-2.9	+0.5
Central India	+3.8	+3.7	+3.5	+1.2	-6.2	-4.5	-4.4	-0.4
Central Provinces	+0.2	+0.1	+1.8	+1.9	-0.4	-5.1	-8.6	-1.4
Berar	-0.3	0	+0.8	+1.1	+1.9	-5.0	-18.8	-2.9
West Coast	-2.4	-0.7	-0.3	-1.4	-1.8	-1.5	-2.6	-1.5
Bombay Deccan	-0.7	-1.9	-2.6	-2.6	-2.6	-5.3	-9.5	-3.5
Mysore	-6.4	-8.0	-3.6	-3.8	-3.7	-2.6	-2.9	-4.4
Madras Coast	-2.8	-4.2	-3.5	-1.9	+0.7	-1.4	-3.2	-2.3
Madras Deccan	-6.9	-10.5	-8.1	-6.7	-4.5	-4.8	-4.4	-6.6
South India	-10.8	-9.6	-6.4	-5.7	-3.9	-2.7	-2.5	-5.9
Mean for whole of India	-1.7	-1.5	-0.8	-2.0	-2.3	-3.3	-4.8	-2.3

The mean temperature of the whole country was lower than usual on each day of the week, the deficiency ranging from 0.8° on the 18th to as much as 4.8° on the 22nd. The provincial variations show that the heat during the week was greater than usual in Burma, was about normal in Bengal, Gujarat and Central India and was less than usual elsewhere, the deficiency being very large in the case of the Punjab, the Madras Deccan and South India.

The following were the highest maxima reported on each day, the reading, as was natural under the conditions disclosed in the above table, having been in no case very high :

April 16th	107.8°	at Ahmedabad.
" 17th	108.6°	" Deesa.
" 18th	109.8°	" Ahmedabad.
" 19th	108.7°	" Bhavnagar.
" 20th	108.9°	" Gaya.
" 21st	106.6°	" Mandalay.
" 22nd	105.6°	" Minba.

**Rain.**—The rainfall during the week under review has been as general and widespread as during the preceding week, but, on the whole, the amount has been less and the rainfall lighter. Most of the rainfall in the north-west was connected with the depressions which appeared during the week on the frontier and thence passed eastward across North-West India to the Gangetic Plain, while the rainfall over the Peninsula was apparently attributable to the moist easterly winds which blew from the Bay across the southern half of India. In North-East India, Assam and Burma most of the rainfall occurred during thunderstorms. The rainfall returns for the week show that over Burma what rain fell occurred on the 21st and 22nd; in Assam the rainfall was spread out throughout the week; in Bengal the fall occurred mainly on the 18th and on the 21st and 22nd; in Bihar and Upper India the rain occurred principally on the 18th and 19th; in Malabar rain fell on most days of the week, and in Mysore, the Deccan and the Konkan the rainfall was spread out throughout the week; in the central parts of India rain fell generally on the 20th, 21st and 22nd, while over the Madras Presidency the fall occurred chiefly on the 16th, 17th and 18th and on the 22nd.

The rainfall table at the close of the summary shows that rain during the week fell in no less than forty-nine of the rainfall divisions, but of these forty-nine divisions, ten report an average actual rainfall of less than one-tenth of an inch, so that in these divisions—*vis.*, Upper Burma, South Oudh, the west of the North-West Provinces, the two submontane divisions of the North-West Provinces, the South-East Punjab, the South Punjab, the West Punjab, Baluchistan and Central India (East) as well as in Deltaic Burma, Central Burma, the central division of the North-West Provinces, Gujarat, Kathiawar, Sind, the east of Rajputana and the west of Central India and west Rajputana the rainfall of the week has been actually or practically *nil*. In all the remaining divisions more or less effective rain has been received, the average actual amounts varying from 6.67 inches in the Surma Valley of Assam and 4.22 inches in Malabar, to 0.10 inch in South Bihar and 0.11 inch in Tenasserim, the east of the North-West Provinces and the submontane division of the Punjab. The second column of the table shows that during the week under review showers are anticipated in nearly all parts of the Indian region, while the third column shows that, on the whole, but particularly over North-East India and the Peninsula, the actual rainfall has been heavier than the normal. The excess is greatest in the Surma division of Assam (+4.16 inches), but in Malabar (+3.45 inches), the Konkan (+3.16 inches), the central division of the

East Coast (+3.01 inches) and the south division of the East Coast (+2.67 inches) it is large and is more than 1 inch in the case of South-Central Madras, Coorg, Mysore, the Bombay Deccan, the north of the East Coast, Central Madras and South Madras. In Burma, the hill division of Assam and some divisions in North-West India the small average fall for the week was not reached:

The following were the principal large totals recorded at individual stations during the week:

Assam	Karimgunj	11.29 inches.
Bengal	Pirojpur (Barisal)	3.82 "
	Basirhat (24 Parganas)	5.49 "
N.-W. P.	Robertsganj (Mirzapur)	1.01 "
Punjab	Kharian (Gujarat)	0.93 "
	Abbottabad	2.71 "
Malabar	Suddur	10.43 "
Mysore	Holalkere (Chitaldroog)	5.80 "
Konkan	Mandangad (Ratnagiri)	13.48 "
Deccan	Godag (Dharwar)	6.01 "
Berar	Karinja (Amraoti)	4.53 "
Madras	Chodavaram (Godaveri)	5.16 "
	Vinukonda (Kistna)	7.22 "
	Vedaramen (Tanjore)	8.66 "

The three concluding columns of the table exhibit the actual and normal rainfall for the period from the 26th February to the 22nd April, and show that the rainfall has been heavier than usual over Assam, Bengal, Bihar, the east and east submontane divisions of the North-West Provinces, the east of the Central Provinces, Sind and nearly all the Peninsular divisions, while Burma, the Gangetic Plain, the Punjab, the west and centre of the Central Provinces, Gujarat, Kathiawar, Baluchistan, Central India and Rajputana have all received less than the usual amount of rain. The excess over the Peninsula is very large and is mainly attributable to the heavy rainfall of the past two weeks.

PROVINCE.	DIVISION.	RAINFALL DATA FOR WHEAT ENDING APRIL 1899, 1899.			RAINFALL DATA FROM FEBRUARY BOTH TO APRIL 1899, 1899.		
		Average actual rainfall of division.	Average normal rainfall of division.	Excess or deficit in Inches.	Average actual rainfall of season to date.	Average normal rainfall, February both to April 1899.	Excess or de- ficiency of (ex- cess) rain- fall expressed as a per- centage.

W. L. DALLAS,

for Meteorological Reporter to the  
Government of India.

T. W. HOLDERNESS,

Secretary to the Government of India.

SIMLA, 27th April, 1899.

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

## Weekly Report on the state of the Season and Prospects of the Crops.

**Madras.**—*For week ending 22nd April.*—The rainfall of the week was exceptionally heavy throughout the Presidency, except in Tinnevely, where it was normal. The water-supply is sufficient and freshets have occurred in some rivers. Ploughing is in progress in many places. The standing crop is in good condition. The harvest continues with normal yield. Pasture is scarce, but fodder is sufficient. Cattle are in normal condition. Prices have fallen slightly in the northern half of the Presidency and are almost stationary elsewhere.

**Bombay.**—*For week ending 26th April.*—The rainfall was almost general in the Konkan, Deccan, and Karnatic; heavy in parts of Konkan; and moderate or light elsewhere. Cotton in parts of Dharwar has been damaged by rain. Reaping of late crops continues in five and cotton-picking in three districts. Preparations for the next season are progressing generally. The fodder-supply is sufficient, except in parts of Sind. Agricultural stock is healthy. Prices have risen in five and fallen in six districts; elsewhere they are stationary.

**Bengal.**—*For week ending 24th April.*—There was rain in almost every district during the week and agricultural prospects are favourable. Ploughing is general and the sowing of autumn rice and jute is going on in several districts. Sugarcane is still being planted in some districts and *cheena* (*Panicum frumentaceum*) is being sown in Bihar. The harvesting of the spring rice is progressing. There is no want of fodder, and the general condition of cattle is good. The price of common rice is practically stationary.

**North-Western Provinces and Oudh.**—*For week ending 26th April.*—Light showers are reported from some districts and were in a few accompanied by hail. Threshing and winnowing of the spring crops are in progress and nearing completion in parts. Extra crops and sugarcane are being irrigated. Indigo sowings continue. Prospects are favourable; supplies and fodder are sufficient; and prices are stationary to falling.

**Punjab.**—*For week ending 26th April.*—Rain has fallen in Rawalpindi and in parts of Delhi, Ferozepore, Lahore, Amritsar, Sialkot, and Dera Ismail Khan districts. Harvesting of spring crops, sowing of extra spring crops, and irrigation of sugarcane and cotton crops continue. Sowings of rice have commenced in Peshawar. The condition of the standing crops is generally average on irrigated and below average or poor on unirrigated areas. The condition of cattle is said to be poor in Delhi and in parts of Dera Ismail Khan and fair elsewhere. Fodder is reported sufficient in all districts, except in Delhi, Umballa, Shahpur, and in parts of Dera Ismail Khan. Prices, generally of wheat, are rising in Rawalpindi, Peshawar, and Dera Ismail Khan; falling in Umballa, Jullundur, Lahore, Amritsar, and Sialkot; and are unchanged elsewhere. Wheat is selling from 16½

to 21, gram 19½ to 23, barley 30 to 32, bulrush-millet 19 to 23½, maize 28 to 38, great millet 20 to 32, and rice 13 to 14 seers per rupee.

**Central Provinces.**—*For week ending 25th April.*—The weather has been occasionally stormy during the week. In the Nagpur country rain has fallen in nine districts causing a fall in the temperature, but the days are now growing hot again. Threshing of spring crops is reaching completion. The rain is reported to have damaged unthreshed crops in the Simga tahsil of Raipur. Sugarcane planting continues in Sambalpur. In Saugor and Damoh forest concessions afford much relief to labourers in the collection of *mahua* (*Bassia latifolia*) and other forest products. Village relief is in progress in both districts. The water-supply is becoming scarce in parts of Mandla, Betul, Chanda, and Chhindwara. Fodder is scarce in parts of seven districts and grain stocks are also insufficient in the Hinganghat tahsil of Wardha. The price of wheat, gram, rice, and *juar* has fallen in some districts and has risen in others. The cheapest prices are—wheat 20, gram 35, rice 20, and *juar* 30 seers per rupee; the dearest prices are—wheat 12½, gram 18, rice 10, and *juar* 22 seers per rupee.

**Burma.**—*For week ending 22nd April.*—In Upper Burma reaping of dry weather paddy is progressing in Mandalay, Sagaing, and Kyaukse, and the crop is in ear in Thayetmyo and Bhamo. Miscellaneous crops are still being harvested in some districts. Clearing and burning for cultivation of hill paddy are in progress in Bhamo, Myitkyina, the Ruby Mines district, and the Southern Shan States. The standing crops are in fair or good condition except in parts of Mandalay. The price of paddy has fallen slightly in Rangoon, Proma, Bassein, Henzada, and Amherst and has risen in Thongwa; elsewhere it is unchanged.

**Assam.**—*For week ending 25th April.*—The weather is too cold and wet for the growth of tea in Cachar, Sibsagar, and Lakhimpur; elsewhere the prospects of tea are fair. Sowing of early rice, planting of sugarcane, and plucking and manufacture of tea are in progress. Land is being prepared for late rice. Reaping of low land transplanted rice has commenced in Sylhet. Pressing of sugarcane still continues in places and the outturn is generally good. Sowing of jute continues in Sylhet and Goalpara. Prices—common rice—Silchar, Dhubri, Tezpur, and Nowgong 16; Sylhet 18; Gauhati 15; Sibsagar 12; and Dibrugarh 14 seers per rupee.

**Mysore and Coorg.**—*For week ending 26th April.*—**MYSORE:** Rainfall—six cents in the Civil and Military station and general good rain in parts of Bangalore, Tumkur, Hassan, Chitaldrug, Kadur, and Shimoga. Prices have slightly risen in Bangalore, Kolar, Hassan; and have fallen in Mysore and Kadur. *Ragi* (*Eleusine coracana*) has been sown in Kolar and Mysore.

**COORG:** Rainfall—29 cents. Prices of food-grains are stationary. Water and fodder for cattle are sufficient.

**Berar and Hyderabad.**—*For week ending 26th April.*—**BERAR:** The weather is warm and cloudy. Ploughing of fields for the rain crop is in progress. Fodder and water scarcity prevails in parts of the Province. Prices are almost steady.

**HYDERABAD:** Rainfall during the week 25 cents. The spring harvest is nearly over and the winter rice harvest has commenced in parts. Prices of grain are almost steady. Prices—wheat 10, coarse rice 10½, and *jowari* 24½ seers per current sicca rupee.

**Central India.**—*For week ending 26th April.*—No rain fell in Central India during the week. Agricultural operations have been completed in Bundelkhand and are in progress elsewhere. The crops, agricultural stock, and pasturage are in fairly good condition. Prices are about normal in Bundelkhand; normal elsewhere. The condition of opium is good in Gwalior and fair in Malwa.

**Rajputana.**—*For week ending 26th April.*—Agricultural operations are progressing satisfactorily, except in Merwara. Sowings have commenced in Sirohi and ploughing and manuring lands in Jhallawar; and breaking up of the soil for the next crop is in progress in parts of Ajmere-Merwara. The harvesting of crops is approaching completion. Cattle are in poor condition in Marwar, Haraoti, and Ajmere; elsewhere they are in good condition. Fodder scarcity prevails in the States reported last week. Prices are rising in Meywar; falling in Jhallawar; and are steady elsewhere. Nineteen persons emigrated from Ajmere and 11 from Merwara during the week. The total emigration from Ajmere-Merwara up to date numbers 4,371. The numbers employed on relief works were—426 in Ajmere; 3,327 in Merwara; and 965 in Marwar. Prices—Ajmere 20½, Beawar 22, Marwar 15 seers per rupee.

**Kashmir.**—*For week ending 25th April.*—Rain fell during the week. Prospects of the spring crops are excellent. Prices continue below normal. Rice—27 seers per rupee.

**JAMMU PROVINCE.**—*For week ending 26th April.*—No rain. Prices are generally stationary. Prices—wheat 17 and maize 25 seers per rupee. The condition of the standing crops is fair. Fodder is scarce.

**Nepal.**—*For week ending 22nd April.*—Rainfall 0·14 inch. The weather is stormy with high winds. Crop prospects continue good. Price of rice 9½ seers per rupee.

T. W. HOLDERNESS,  
*Secretary to the Government of India.*

GOVERNMENT OF INDIA.  
PUBLIC WORKS DEPARTMENT.  
RAILWAY STATISTICS.

**STATEMENT OF APPROXIMATE GROSS EARNINGS OF INDIAN RAILWAYS FROM 1ST JANUARY TO 15TH APRIL 1899, AND FROM 1ST JANUARY TO 15TH APRIL 1898.**

N.B.—As regards the figures in column Total earnings from 1st January, 1899, audited figures have been used, as far as possible.

SUPPLEMENT TO  
**The Gazette of India.**

---

No. 18.} CALCUTTA, SATURDAY, MAY 6, 1899.

---

**OFFICIAL PAPERS.**

*A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and Information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.*

*Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of Five Rupees per annum, if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post. No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.*

RAILWAY STATISTICS.

**RETURNS OF ACCIDENTS ON INDIAN RAILWAYS FOR THE NINE MONTHS ENDING  
WITH THE 30th SEPTEMBER 1898.**

No. 274 R. Stat., dated Simla, the 26th April 1899.

**RESOLUTION**—By the Government of India, Public Works Department.

**Read again—**

Government of India order No. 350 R. Stat., dated the 2nd September 1896.

Government of India order No. 132 R. Stat., dated the 6th March 1897.

Government of India order No. 153 R. Stat., dated the 22nd March 1898.

**Read also—**

The following note by the Director of Railway Traffic, dated the 17th April 1899, with abstract returns of accidents to trains, etc., on the open lines of railway in India for the nine months ending with the 30th September 1898.

*I.—Accidents to trains, rolling stock, permanent-way, etc.*

Accidents to trains, rolling stock, permanent-way, etc., during the nine months ending with the 30th September 1898, as shown under abstract No. 4 on

pages 910 and 911 of the accompanying returns, caused the death of 30 and injury to 99 persons. The table below shows that, while the number of persons both killed and injured was below the average of the corresponding periods of the three previous years, the total number of accidents was considerably above the average.

	NUMBER.			NUMBER OF PASSENGERS AND OTHERS.		NUMBER OF SERVANTS.		TOTAL ALL CLASSES.	
	Accidents reported to Local Governments under section 83 of the Indian Railways Act (IX of 1890).	Other accidents.	Total.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
<b>Standard gauge.</b>									
Nine months ending with the 30th September 1898 . . . . .	59	4,612	2,671	(a)10	(b)41	11	33	21	74
Average of the corresponding periods of the three previous years . . . . .	78	1,925	2,003	(a)12	(c)58	6	20	18	78
<b>Netre gauge.</b>									
Nine months ending with the 30th September 1898 . . . . .	118	1,452	1,500	(d)1	(e)9	7	14	6	23
Average of the corresponding periods of the three previous years . . . . .	83	1,573	1,656	(f)11	(g)22	4	10	15	32
<b>Special gauge.</b>									
Nine months ending with the 30th September 1898 . . . . .	18	50	68	(d)1	(g)2	...	...	1	2
Average of the corresponding periods of the three previous years . . . . .	14	52	66	...	(d)1	...	2	...	3
Total all gauges for the nine months ending with the 30th September 1898 . . . . .	195	4,144	4,330	(b)12	(h)52	18	47	30	99
Average of the corresponding periods of the three previous years . . . . .	175	3,550	3,725	(b)23	(i)81	10	32	33	113

(a) Out of these, four were not passengers.

(b) Out of these, six were not passengers.

(c) Out of these, five were not passengers.

(d) Not a passenger.

(e) Out of these, one was not a passenger.

(f) Out of these, two were not passengers.

(g) Not passengers.

(h) Out of these, nine were not passengers.

(i) Out of these, ten were not passengers.

2. The following table compares the variations in the mean mileage worked, the train-mileage run and the number of accidents with the average, and shows that, with an increase of 7.85 per cent. in the mean mileage worked and of 8.95 per cent. in the train-mileage run during the nine months ending with the 30th September 1898, the number of accidents increased by 61.4 or 16.48 per

cent., as compared with the average of the corresponding periods of the three previous years :

	INCREASE OR DECREASE AS COMPARED WITH THE AVERAGE OF THE THREE PREVIOUS YEARS.					
	ACCIDENTS.		MEAN MILEAGE.		TRAIN-MILEAGE.	
	Number.	Per cent.	Miles.	Per cent.	Miles.	Per cent.
Standard . . . . .	+668	+33'35	+974	+8'52	+3,758,588	+76'70
Metre . . . . .	—96	—3'38	+498	+6'22	+761,095	+4'88
Special . . . . .	+3	+3'03	+74	+27'72	+55,030	+25'33
<b>TOTAL</b> . . . . .	<b>+614</b>	<b>+16'48</b>	<b>+1,546</b>	<b>+7'85</b>	<b>+4,572,713</b>	<b>+2'95</b>

3. The following table shows the principal increases and decreases in the number of accidents of different classes on the standard and metre-gauge lines, as compared with the average of the corresponding periods of the three previous years. No noticeable variations occurred on the special gauge railways.

GAUGE AND CLASSIFICATION.	INCREASE OR DECREASE.			Percentage of increase or decrease.
	Excess.	Minor.	TOTAL.	
<i>Standard gauge.</i>				
Goods trains or parts of goods trains, engines, etc., leaving the rails . . . . .	—4	+29	+25	+26'60
Trains running over cattle on the line . . . . .	...	+159	+159	+17'49
The bursting of tubes, etc., of engines . . . . .	...	+137	+137	+182'67
The failure of machinery, springs, etc., of engines . . . . .	+1	+115	+116	+43'45
The failure of couplings . . . . .	—1	+64	+63	+116'67
Under the head " Other accidents " . . . . .	—1	+152	+151	+124'80
<i>Metre gauge.</i>				
Goods trains or parts of goods trains, engines, etc., leaving the rails . . . . .	+3	—15	—13	—19'70
Trains or engines travelling in the wrong direction through points . . . . .	...	—16	—16	—36'36
Trains running over cattle on the line . . . . .	—6	—55	—61	—6'67
The failure of machinery, springs, etc., of engines . . . . .	+3	—33	—30	—25'64
The flooding of portions of permanent-way . . . . .	+14	+13	+27	+75'00
Under the head " Other accidents " . . . . .	+2	+17	+19	+29'69

It will be observed from the foregoing that the increases on the standard gauge lines occurred under " Goods trains or parts of goods trains, engines, etc., leaving the rails," 25 accidents or 26'60 per cent.; under " Trains running over cattle on the line," 159 accidents or 17'49 per cent.; under " The bursting of tubes, etc., of engines," 137 accidents or 182'67 per cent.; under " The failure

of machinery, springs, etc., of engines," 116 accidents or 43·45 per cent.; under "The failure of couplings," 63 accidents or 116·67 per cent.; and under the head "Other accidents," 151 accidents or 124·79 per cent. On the metre gauge railways, the noticeable increases occurred under "The flooding of portions of permanent-way," 27 accidents or 75·00 per cent. and under the head "Other accidents," 19 accidents or 29·69 per cent.

4. Under the head "Goods trains or parts of goods trains, engines, etc., leaving the rails," the largest number, *vis.*, 40, occurred on the North Western State railway, next to that line come the Burma railways (metre gauge) with 19 accidents and the East Indian and Great Indian Peninsula railways with 18 and 17 accidents on each, respectively; under the head "The bursting of tubes, etc., of engines," the largest number, *vis.*, 90, occurred on the Madras railway; next to that line comes the North Western State railway with 73 accidents; under the head "The failure of machinery, springs, etc., of engines," the largest number, *vis.*, 114, occurred on the North Western State railway, next to that line come the East Indian with 77, the Madras with 55 and the Great Indian Peninsula railways with 54 accidents; under the head "The failure of couplings," the largest number, *vis.*, 50, occurred on the Bombay, Baroda and Central India railway; and under the head "Other accidents," the largest number, *vis.*, 125, occurred on the East Indian railway, and next to that line come the North Western State and the Great Indian Peninsula railways with 67 and 37 accidents on each, respectively. Of the increase under the head "The flooding of portions of the permanent-way" on the metre gauge railways, the largest number, *vis.*, 16, occurred on the Burma railways, next to that line comes the Eastern Bengal State railway (metre gauge section) with 13 accidents.

5. The number of cattle accidents was largest on the South Indian railway, *vis.*, 215; next comes the Eastern Bengal State railway (standard gauge section) with 189, then the Southern Mahratta railway with 177 accidents, the East Indian railway with 165, the North Western State railway with 157 and the Madras railway with 136.

In relation to the train-mileage run, the highest proportion was on the Bengal-Dooars railway, which gave an average of 1 accident in 5,345 train-miles run; the Assam-Bengal railway coming next with an average of 1 in 5,362; then the Cooch Behar, the Eastern Bengal (standard gauge section), the East Coast State and the Oodeypore-Chitor railways with averages of 1 in 6,543, 1 in 7,482, 1 in 8,537 and 1 in 8,680, respectively. The lowest proportion was on the Great Indian Peninsula railway, *vis.*, 1 in 338,954 train-miles run, the Bombay, Baroda and Central India railway coming next with 1 in 76,349, then the East Indian railway with 1 in 63,230, the North Western State railway with 1 in 51,735, the Rajputana-Malwa railway with 1 in 41,197 and the Indian Midland railway with 1 in 38,719.

6. Taking the total number of accidents to trains, rolling stock, permanent-way, etc., on each railway as given in table No. 3, the proportion of accidents to train-mileage run was highest on the Cooch Behar railway, on which 1 accident occurred on an average in 1,402 train-miles; next comes the Bengal-Dooars railway with 1 accident in 2,672 train-miles; then the Assam-Bengal, the Dibru-Sadiya, the Rohilkhand and Kumaon (including the Lucknow-Bareilly section) and the East Coast State railways with averages of 1 in 3,300, 1 in 3,533, 1 in 3,813, and 1 in 5,196, respectively. The lowest proportion was on the Great Indian Peninsula railway, *vis.*, 1 in 28,644, the East Indian railway coming next with 1 in 20,659, then the Rajputana-Malwa railway with 1 in 17,230, the Oudh and Rohilkhand State railway with 1 in 15,720, and the North Western State railway with 1 in 15,268.

#### *II.—Accidents from other causes not involving accidents to trains, etc.*

7. The casualties to passengers, servants in the employ of railways (or of contractors, and to others, from causes not involving accidents to trains which are detailed in abstract No. 2) are compared separately, for each gauge, with

the average of the corresponding periods of the three previous years in the table below :

GAUGES.	NINE MONTHS ENDING WITH THE 30TH SEPTEMBER 1898.								AVERAGE OF THE CORRESPONDING PERIODS OF THE THREE PREVIOUS YEARS.							
	PASSENGERS.		SERVANTS.		OTHERS.		TOTAL.		PASSENGERS.		SERVANTS.		OTHERS.		TOTAL.	
	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
Standard	38	110	92	190	287	86	417	388	37	103	98	190	305	74	440	367
Metre	15	45	30	50	124	47	169	151	11	42	31	50	118	46	160	147
Special	...	1	1	1	3	...	4	2	...	...	...	4	2	1	2	3
TOTAL	53	156	123	252	414	133	590	541	48	145	129	253	425	121	602	519

It will be seen from the foregoing table that the number of persons killed and injured, excepting under "Passengers—killed and injured" and "Others—killed and injured," compares favourably with the average of the corresponding periods of the three previous years. The increase is attributable, to some extent, to the opening of new lines.

*III.—Accidents in which the movement of vehicles used exclusively upon railways was not concerned.*

8. The following table shows, for the several gauges, the number of persons reported to have been killed or injured by accidents, in which the movement of vehicles used exclusively upon railways was not concerned. Comparative average figures of the corresponding periods of the two previous years are also given :

	NINE MONTHS ENDING WITH THE 30TH SEPTEMBER 1898.		AVERAGE OF THE CORRESPONDING PERIODS OF THE TWO PREVIOUS YEARS.	
	Killed.	Injured.	Killed.	Injured.
Standard	30	132	32	114
Metre	10	29	16	35
Special	1	3	...	1
TOTAL	41	164	48	151

## IV.—Statistical results.

9. The following table gives certain statistical results for the period under review, comparing the number of passengers killed and injured by accidents to trains, and from all causes with the number carried and the number of passenger-units carried one mile. Comparative results, based on the average figures of the corresponding periods of the three previous years, are also given:—

PARTICULARS.	NINE MONTHS ENDING WITH THE 30TH SEPTEMBER 1898.				AVERAGE OF THE CORRESPONDING PERIODS OF THE THREE PREVIOUS YEARS.			
	Standard.	Metre.	Special.	TOTAL.	Standard.	Metre.	Special.	TOTAL.
Mean mileage worked . . Miles	12,402	8,503	341	21,348	11,438	8,007	367	19,702

Number of passengers killed by accidents to trains . . . . .	6	—	—	6	8	0	—	17
Proportion of above to number carried . . . . .	1 in 10,577,500	—	—	1 in 17,459,207	1 in 8,281,266	1 in 4,047,206	—	1 in 6,399,645
Number of passengers injured by accidents to trains . . . . .	35	8	—	43	53	18	—	71
Proportion of above to number carried . . . . .	1 in 1,813,286	1 in 5,067,520	—	1 in 2,436,043	1 in 1,250,304	1 in 2,323,648	—	1 in 1,512,309
Number of passengers killed from all causes . . . . .	44	15	—	59	45	20	—	65
Proportion of above to number carried . . . . .	1 in 1,442,386	1 in 2,702,576	—	1 in 1,775,421	1 in 1,472,381	1 in 2,091,281	—	1 in 1,673,753
Number of passengers injured from all causes . . . . .	145	53	1	199	150	60	—	210
Proportion of above to number carried . . . . .	1 in 437,690	1 in 764,880	1 in 746,206	1 in 526,381	1 in 424,783	1 in 697,094	—	1 in 503,676
Number of passengers killed and injured from all causes . . . . .	189	68	1	258	201	80	—	281
Proportion of above to number carried . . . . .	1 in 335,704	1 in 596,136	1 in 746,206	1 in 406,007	1 in 329,682	1 in 522,821	—	1 in 387,109
Proportion of passengers killed and injured from all causes to number of passenger-units carried one mile . . . . .	1 in 65,063,434	1 in 11,344,708	(a) 13,253,382	(a) 16,771,971	1 in 15,100,914	1 in 19,553,784	—	1 in 16,477,783

(a) Excluding the Tarpur-Balipara and Tarekshwa-Magra railways.

It will be seen that the comparison is generally favourable.

*V.—Number of persons killed and injured by accidents to trains, rolling stock, etc., during the third quarter of 1898.*

10. The following table gives the number of accidents, as classified in abstract No. 4 of the returns, which resulted in loss of life or injury to persons, and shows the railways on which they occurred :

Railway.	Number of accidents reported during the third quarter of 1898.	PASSENGERS AND OTHERS.		SERVANTS.		TOTAL.	
		Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
<i>Standard gauge.</i>							
East Indian	1	...	...	...	1	...	1
North Western State	2	1	1	...	...	1	1
Eastern Bengal State	2	...	...	1	6	1	6
Great Indian Peninsula	2	...	...	1	3	1	3
<i>Metre gauge.</i>							
Bengal and North-Western	1	...	...	3	...	3	...
Rajputana-Malwa	2	...	...	...	2	...	2
Burma	3	...	...	1	3	1	3
Dibru-Sadiya	1	...	2	...	1	...	9
Darjeeling-Himalayan	1	1	2	...	...	1	2
TOTAL	15	2	11	6	21	8	32
Average of the three corresponding quarters of 1895, 1896 and 1897	15	11	22	4	10	15	33

11. A brief description of some of the accidents which resulted in loss of life, or injury to persons, is given below :

*Eastern Bengal State railway (standard gauge).—*On the 29th August 1898, while an up and a down goods train were crossing each other at mile 60—10-12 near Bogoola station on the Eastern section, the engine of the former train, having been derailed owing to the subsidence of the bank, collided with the 6th and 7th vehicles of the latter. One railway servant was killed and three were injured; and the rolling-stock and permanent-way were considerably damaged.

On the 3rd September 1898, a relief train collided with an up goods train standing on the up line at Bogoola station on the Eastern section, owing to the carelessness of the driver of the former train. A crane dummy attached to the relief train was derailed. Three railway servants were injured and the rolling-stock was damaged.

*Great Indian Peninsula railway.*—On the 29th August 1898, an Indian Midland railway ballast train, while backing out of Itarsi station, collided

with a brakevan and a shunting engine standing foul of a crossing. A railway servant was killed and another injured, and a ballast brakevan and a wagon next to it were derailed.

*Bengal and North-Western railway.*—On the 14th September 1898, the engine and a tender of a ballast train, while working tender foremost between Motipur and Turki stations, fell through a breach in the bank at mile 77 at the site of a bridge which had been undermined by floods. The driver and two firemen were drowned.

*Burma railways.*—On the 23rd July 1898, while a down local train was entering Kemmendine station, the points were reversed after the leading engine had passed over them. The two engines and tenders capsized and three coaching vehicles were derailed. The second fireman was killed.

*Dibru-Sadiya railway.*—On the 27th July 1898, a down goods train ran into a down mixed train at mile 51.9, between Digboi and Tingrai stations. Eight passengers and a fireman were injured.

**ORDER.**—Ordered that the above note, with the abstract returns, be

The Governments of Madras, Bombay, Bengal, the North-Western Provinces, and Oudh, the Punjab and Burma.

The Chief Commissioners of the Central Provinces, Assam and Coorg.

The Resident at Hyderabad.

The Resident in Mysore.

The Agents to the Governor General for Rajputana, Central India and Baluchistan.

The Consulting Engineers to the Government of India for Railways, Calcutta, Lucknow and Assam.

The Managers, North Western State, Oudh and Rohilkhand State, Eastern Bengal State and East Coast State Railways.

The Engineers-in-Chief, Indus Bridge Works, Berwada-Madras, Hardwar-Dehra and Ghazabad, Moradabad Railways.

communicated, for information, to the Local Governments, Administrations, and to the officers noted in the margin.

Ordered, also, that copies be forwarded for the information of Her Majesty's Government.

Ordered, further, that the above note, with the abstract returns, be published in the Supplement to the *Gazette of India*.

W. J. McELHINNY, Captain, R.E.,  
Offg. Under Secy. to the Govt. of India.

*Document accompanying.*

1. Abstract returns of accidents for the nine months ending with the 30th September 1898.

Enclosure to Government of India Order No. 274 E. Stat., dated the  
26th April 1899.

ABSTRACT No. 1.

GENERAL TOTAL.

NUMBER of PERSONS reported, during the nine months ending with the 30th September 1898, KILLED OR INJURED ON ALL RAILWAYS open for TRAFFIC in INDIA, distinguishing between PASSENGERS, RAILWAY SERVANTS and OTHER PERSONS; and distinguishing also, in the case of the two former classes, between ACCIDENTS caused by ACCIDENTS TO TRAINS, ROLLING STOCK, PERMANENT-WAY, etc., and ACCIDENTS happening otherwise.

	STANDARD GAUGE LINES.		METRE GAUGE LINES.		SPECIAL GAUGE LINES.		TOTAL ALL GAUGES.

1. Collisions between passenger trains or parts of passenger trains

2. Collisions between passenger trains and goods or mineral trains, engines and vehicles standing foul of the line

3. Collisions between goods trains or parts of goods trains

4. Collisions between light engines

5. Passenger trains or parts of passenger trains leaving the rails

6. Goods trains or parts of goods trains, engines, etc., leaving the rails

7. Trains or engines travelling in the wrong direction through points

8. Trains running into stations or sidings at too high a speed

9. Trains running over cattle on the line.

10. Ditto over obstructions on the line.

11. Ditto through gates at level-crossings

12. The bursting of boilers of engines

13. Ditto of tubes, etc., of engines

14. The failure of machinery, springs, etc., of engines

15. The failure of tyres

16. Ditto of wheels

17. Ditto of axles

18. Ditto of brake apparatus.

19. Ditto of couplings

20. Ditto of tunnels, bridges, viaducts, culverts, etc.

21. Broken rails

22. The feeding of portions of permanent way

23. Slips in cuttings or embankments

24. Fire in trains

25. Fire at stations, or involving injury to bridges or viaducts

26. Other accidents

(a) Not a passenger.

(b) Not a passenger.

(c) Not a passenger.

(d) Out of these, three were not passengers.

(e) Out of these, three were not passengers.

TOTAL ALL CLASSES

(a) Including the Hyderabad division, the Rajputana, the Jammu and Kashmir railways.  
(b) Not a passenger.  
(c) Out of these, three were not passengers.  
(d) Not a passenger.  
(e) Out of these, three were not passengers.

Annex No. 3.—Accidents to trains, rolling stock, passenger-wagons, etc., reported during the nine months ending with the 30th September 1899, as having occurred on the several railways open for traffic in India, distinguishing the different classes of accidents and the number of passengers and others, and of railway servants killed or injured in each class of accident—continued.

	GREAT INDIA PENINSULA. (a)					BOMBAY, BARODA AND GUJARAT RAILWAY. (b)					MADRAS. (c)					THE NORTHERN RAILWAY. (d)					Number of deaths.

**Weather Review of India for the Week ending at 8 a.m. on  
Saturday, April 29th, 1899.**

The pressure conditions have been fairly steady during the week. Pressure has been high over the west of the Peninsula and the south of the Bay and has been low over Northern India. Shallow depressions have appeared at different times within this low pressure area in the north, but these storms have at no time been important. On the other hand, quite at the close of the week, the weather became unsettled, and the winds assumed cyclonic directions around the Andaman Sea, and what promised to be a considerable disturbance was apparently developing. General fairly continuous rain fell in Tenasserim and Lower Burma as this depression was forming, but with this exception all the rainfall of the present week has fallen in the form of local showers generally connected with dust and thunder storms. These showers were almost everywhere light. The temperature conditions have been irregular and the contrasts large, thus Burma, North-East India and the Madras Coast districts have exhibited high temperatures, and towards the close of the week the mean temperature went above the normal in the Punjab also, but elsewhere the cool weather noticed last week was maintained, though the depression of temperature was somewhat less strongly marked.

**Daily Summary.**—*Sunday, April 29th.*—The barometer was falling slightly to briskly over North-West India, and a well-marked depression lay over the Central Punjab. A shallow diffused depression was also shown over the Gangetic Plain and West Bengal. The winds were cyclonic in the north-west, easterly along the foot of the hills and between south and west elsewhere. The mean temperature had generally risen, but the heat was still below the normal in all provinces except Burma. The deficiency was as much as  $15^{\circ}$  over Berar. Scattered showers had been received over parts of Burma, Assam, Bengal, the Central Provinces and the Peninsula. The rainfall had been heavy in the extreme south and light elsewhere.

*Monday, April 30th.*—Pressure had changed slightly except over the Punjab and over Lower Burma. In the former region the depression had filled up and moved eastward and the barometer had risen, while in the latter a slight depression was developing. In North-West India the cyclonic circulation of the winds had died down, and at the same time the easterly breezes along the foot of the hills had disappeared. In other parts of the country the wind exhibited an inclination to veer to west and north-west. The weather was cloudy over the Peninsula and in parts of Burma and North-East India, and scattered showers had again been received over Burma, Assam, Bengal, Kashmir and the south of the Peninsula. Temperature had continued to rise over the greater part of the country. The depression of temperature was hence less in amount than on the preceding day, but the extent of country over which the weather was cooler than usual was much the same.

*Tuesday, April 31st.*—The barometer was rising in most places. Pressure was high over the west of the Peninsula and the south of the Bay and was low in Northern India. Within this low pressure area depressions were shown—one over Upper Sind, a second over the North Gangetic Plain and West Bengal and a third over Central Burma. The winds had continued to veer and were between west and north-west over a large part of the country. The weather was almost everywhere fine, but with some cloud in Lower Burma and the south of the Peninsula. Scattered showers had been received over Tenasserim, South-East Bengal and the east and south of the Peninsula. The rainfall amounts were small. The mean temperature was higher than usual over Burma, Assam and parts of

Bengal, but was lower than usual elsewhere. The depression of temperature, though less than on the two preceding days, was still slight to large.

*Wednesday, April 26th.*—Pressure continued to increase fairly generally. The barometer remained high on the Bombay Coast and low over Northern India. Calms prevailed along the foot of the hills, southerly winds on the Madras and Bengal Coasts and north-westerly winds in most other places. The weather was cloudy to overcast in Tenasserim and Lower Burma, but was clear or nearly so elsewhere. Heavyish rain had fallen at Mergui and scattered light showers in different parts of India. The mean temperature was higher than usual over Burma, Assam, Bengal, Orissa, Bihar and the Madras Coast, but was lower than the average of the time of year elsewhere. The largest variations were  $-8.1^{\circ}$  at Poona and  $+8.4^{\circ}$  at Minbu.

*Thursday, April 27th.*—The barometric changes had been slight, but generally upward. Pressure was highest on the Bombay Coast and low over Northern India and Burma. The winds had veered still more and were north-westerly to north-north-westerly over a large part of Western and Central India. Fine weather prevailed except in Tenasserim. A few scattered thundershowers had been received in different parts of the country. Temperature had changed irregularly. The heat was greater than usual over Burma, Assam, Bengal, Bihar, Chota Nagpur and the Coromandel Coast, but remained less than usual elsewhere.

*Friday, April 28th.*—The barometer had fallen in most places, but the change had been fairly uniform, and the general conditions of pressure were unaltered. Pressure was high on the Bombay Coast, low over the Punjab, the Gangetic Plain, Bengal and the north of the Bay. There were some signs of the commencement of a depression over the east of the Bay near the Andamans, and the winds had shifted to north-north-east in Lower Burma. Elsewhere the winds were practically unchanged and varied between west and north. The weather was unchanged except in Tenasserim and Lower Burma where general moderate rain had set in. Elsewhere a few showers, due to dust or thunder storms, was all the rainfall recorded. The mean temperature was high over Burma, Assam, Bengal, Orissa, Bihar, Chota Nagpur, the North-West Provinces, the Punjab and the Madras Coast and was lower than usual elsewhere. The largest variations from the normal were  $-7.0^{\circ}$  at Poona and  $+7.4^{\circ}$  at Mymensingh.

*Saturday, April 29th.*—The barometer had fallen along the west coast and had risen elsewhere. Pressure remained high on the Bombay Coast and low over the Punjab, the Gangetic Plain and Bengal, but, owing to the changes noticed above, the pressure differences were smaller. The wind had shifted to the eastward in Lower Burma and increased in force pointing to the existence of a storm near the Andamans. Elsewhere the winds were little changed. The weather was cloudy to overcast and showery over Tenasserim and Lower Burma, but elsewhere the sky was fairly clear, and the only rainfall was a few local thundershowers. Temperature continued to change irregularly, but the distribution of the mean temperature relatively to the normal had altered very little. The largest variations from the average were  $-7.1^{\circ}$  at Neemuch,  $+7.1^{\circ}$  at Rawalpindi and  $+8.6^{\circ}$  at Mymensingh.

**Temperature.**—The temperature conditions have changed considerably during the week, the change having been brought about by a very general recovery from the low temperatures existing last week. At the commencement of the week under review the mean temperature was excessively low ( $-15^{\circ}$ ) over Berar and more or less lower than usual over nearly all parts of India, the only province reporting an excess of heat having been Burma. As the temperature gradually rose as the week advanced, the relatively high temperatures from Burma extended westward and northward to Assam, Bengal, the Gangetic Plain and the Madras Coast, while at the same time excessive heat began to make its appearance in the Punjab. The depression of temperature continued over other parts of the country, but under the influence of the increase of heat the amount of the depression steadily diminished, so that the temperature variations from the normal at the close of the week were very different from those at the commencement.

The following table gives the mean temperature variation data for the week :

PROVINCE.	APRIL 1899.							Mean variation of week.
	23rd	24th	25th	26th	27th	28th	29th	
Burma . . . . .	+2.0	+1.6	+2.6	+2.0	+1.4	+1.9	+2.5	+2.0
Assam . . . . .	—0.3	—1.0	+2.8	+2.8	+2.6	+2.7	+3.7	+1.8
Bengal . . . . .	—0.5	+0.1	+0.2	+1.4	+3.1	+3.9	+4.6	+1.8

Punjab . . . . .	—2.9	—3.5	—3.1	—2.3	—0.4	+2.3	+3.4	—0.9
Sind . . . . .	—0.1	+2.0	—2.1	—3.4	—2.3	—2.8	—2.4	—1.6
Rajputana . . . . .	—6.0	—2.6	—2.0	—0.9	+0.4	—2.1	—2.6	—2.3
Gujarat . . . . .	—0.7	—2.4	—2.6	—5.0	—4.9	—5.0	—4.3	—3.6
Central India . . . . .	—5.3	—3.9	—3.8	—1.7	—1.4	—3.3	—4.1	—3.4
Central Provinces . . . . .	—8.3	—5.9	—4.6	—2.2	—0.6	—3.2	—2.6	—3.9
Berar . . . . .	—15.0	—6.6	—3.6	—2.0	—2.3	—4.3	—3.3	—5.3
West Coast . . . . .	—3.5	—2.0	—2.2	—1.8	—1.9	—0.8	—1.0	—1.9
Bombay Deccan . . . . .	—8.1	—7.4	—6.2	—5.7	—6.4	—5.9	—5.4	—6.4
Mysore . . . . .	—3.0	—1.6	—4.1	—3.9	—2.5	—2.6	—0.3	—2.6
Madras Coast . . . . .	—3.1	+1.7	—0.1	+1.1	—0.3	+2.0	+0.6	+0.3
Madras Deccan . . . . .	—7.3	—5.1	—2.4	—1.2	—1.1	—0.9	—0.4	—2.6
South India . . . . .	—2.6	—4.8	—5.2	—3.3	—3.8	—2.0	—0.4	—3.2
Mean for whole of India . . . . .	—3.8	—2.6	—2.0	—1.4	—1.0	—0.7	—0.4	—1.7

The mean temperature of the whole country for the whole week and for each day of the week was less than usual, the amount of the daily variation ranging from  $-3.8^{\circ}$  on the 23rd to only  $-0.4^{\circ}$  on the 29th. The provincial variations show that the heat during the week was greater than usual in Burma, Assam and Bengal, normal in Orissa, Bihar, the Punjab and the Madras Coast and less than usual elsewhere. The greatest average deficiency ( $6.4^{\circ}$ ) was reported from the Bombay Deccan where temperature was steadily very low throughout the week, but the greatest actual deficiency was reported from Berar on the 23rd where the deficiency was  $15^{\circ}$  and when the maxima were  $21^{\circ}$  below the normal.

The following were the highest maxima reported on each day :

April 23rd . . . . .	106.4°	at Jacobabad.
„ 24th . . . . .	108.4°	„ Do.
„ 25th . . . . .	106.1°	„ Thayetmyo.
„ 26th . . . . .	107.1°	„ Minbu.
„ 27th . . . . .	107.4°	„ Gaya.
„ 28th . . . . .	107.8°	„ Lucknow.
„ 29th . . . . .	107.4°	„ Cuttack.

**Rain.**—During the week under review there has been fairly steady rain over Tenasserim and Lower Burma, due to the barometric depressions or storms which appeared in that region. On the other hand, in all other parts of the Indian area, the rain which has fallen has been scattered, generally light and almost always local and has fallen during the occurrence of dust or thunderstorms. In Upper Burma these thundershowers occurred principally on the first two days of the week; in Assam the storms were spread throughout the week; in Bengal they occurred as in Burma mainly on the first two days, and over the Peninsula principally on the first three days.

The rainfall table at the close of the summary shows that rain fell during the week in appreciable quantity (i.e., one-tenth of an inch or more) in twenty-eight of the rainfall divisions. These divisions included all the Burma divisions except Upper Burma, the Surma and Brahmaputra divisions of Assam, the east, deltaic, central and hills divisions of Bengal, Orissa, North Bihar, Malabar, Coorg, Mysore, the Konkan, Khandesh, Berar, the east of the Central Provinces, the east of Rajputana and west of Central India, all the east coast divisions and the south central, central and south divisions of Madras. In all the remaining parts of India the rainfall of the week was either absolutely or practically nil. The average actual rainfall for the week under review exceeded the average normal rainfall in seventeen of the rainfall divisions, *viz.*, Tenasserim, Deltaic and Central Burma, Malabar, South-Central Madras, Mysore, the Konkan, Khandesh, Berar, the west of the Central Provinces, Rajputana (East) and Central India (West), the two divisions of the East Coast (North), the south division of Hyderabad, the central and south division of the East Coast and Central Madras. In most cases the excess of the average actual over the average normal rainfall was small and quite unimportant, but on the east coast of the Peninsula and also in Tenasserim the excess was considerable. In all parts of the country, except the seventeen divisions noticed above, the week's rainfall was short of the normal. Over the greater part of Northern and North-Western India and the central districts the deficiency was small and quite unimportant, but in Assam, Upper Burma and North Bengal the average actual rainfall was small compared with the normal, and the deficiency was important.

The following were the principal large totals recorded at individual stations during the week:

Assam	.	.	.	Dibrugarh	.	.	.	.	2'30 inches.
Bengal	.	.	.	Nalitabari (Mymensingh)	.	.	.	.	3'20 "
				Bagirhat (Khulna)	.	.	.	.	2'34 "
Malabar	.	.	.	Cannanore	.	.	.	.	3'08 "
Mysore	.	.	.	Bowringpet (Kolar)	.	.	.	.	2'29 "

The three concluding columns of the table show the average actual and average normal rainfall for the period February 26th to April 29th. The total rainfall has been normal or heavier than usual over Assam, Bengal, Bihar, the whole of the Peninsula and some of the central districts. On both coasts of the Peninsula the excess has been very large, as, for example, in the Konkan and the central and south divisions of the East Coast. Over Upper and North-West India and over some central districts of India the rainfall has been generally lighter than usual, but on the whole the deficiency has not been very large or important.

PROVINCE.	DIVISION.	RAINFALL DATA FOR WEEK ENDING APRIL 10TH, 1899.			RAINFALL DATA FROM FEBRUARY 25TH TO APRIL 10TH, 1899.		
		Average actual rainfall of division.	Average normal rainfall of division.	Excess or deficit in inches.	Average actual rainfall of season to date.	Average normal rainfall, February 25th to April 10th.	Excess or de- ficit of (sum- mer) rain- fall expressed as a per- centage.

Government of India.  
T. W. HOLDERNESS,  
Secretary to the Government of India.

SIMLA, 4th May, 1899.

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

## Weekly Report on the state of the Season and Prospects of the Crops.

**Madras.**—*For week ending 29th April.*—The rainfall was heavy in the Central districts and in parts of the Southern districts, the West Coast and the Circars, and was lighter and more scattered in the Carnatic and the Deccan. The April rainfall has been unusually heavy throughout the Presidency. The water-supply is adequate for the season. Ploughing is almost everywhere in progress. The standing crop is generally good, but some damage has been caused by heavy rain in parts. Pasture has improved and fodder is sufficient. The condition of cattle is normal. Prices are generally slightly easier.

**Bombay.**—*For week ending 3rd May.*—There was slight rain in parts of twelve districts during the week. Reaping of late crops continues in Khandesh and Hyderabad and cotton-picking in Belgaum. Preparations for next season are progressing generally. Fodder is sufficient except in parts of Sind and Baroda territory. Agricultural stock is healthy. Prices have risen in four and fallen in three districts; elsewhere they are stationary.

**Bengal.**—*For week ending 1st May.*—The weather during the week was generally hot and dry. As usual at this season there were thunderstorms and rain in most places in Bengal Proper and Orissa. The general agricultural prospects continue favourable; ploughing is going on everywhere; and the sowing of autumn rice and jute is in progress. Sugarcane and *cheena* millet (*Panicum frumentaceum*) are doing well. Spring rice is being harvested and the threshing of the spring crops in Bihar is still going on. There is no want of fodder, except in places in Midnapore, Manbhum, and the Sonthal Parganas. There has been a slight rise in the price of common rice in some districts, but on the whole there has been but little change.

**North-Western Provinces and Oudh.**—*For week ending 3rd May.*—Except for slight showers in a few districts the weather has been clear. Threshing and winnowing of the spring crops continue in some districts. Sowing and irrigation of indigo, sugarcane, and extra crops are in progress. Prospects are favourable; markets are well-supplied and fodder is sufficient. Prices show a rising tendency in a few districts, but are otherwise stationary to falling.

**Punjab.**—*For week ending 3rd May.*—Rainfall *nil*. Reaping and threshing of spring crops continue; cotton is being sown in Mooltan and Lahore, and sugarcane and cotton are being irrigated in Amritsar. Autumn sowings are in progress in Sialkot, and rice is being sown in Peshawar. The condition of the extra spring crops is generally average on irrigated and below average on unirrigated lands. The outturn is generally average. Crops have been damaged by hail in parts of Peshawar and Dera Ismail Khan districts. The condition of cattle is said to be poor in Delhi; fair in Sialkot and Dera Ismail Khan; and good elsewhere. Pasturage is poor in Delhi, Shahpur and Dera Ismail Khan; and sufficient elsewhere. Prices, generally of wheat, have risen in Hissar and Umballa; fallen in Delhi, Ferozepore, Mooltan, Amritsar, Shahpur, Rawalpindi, and Dera Ismail Khan; and remained unchanged elsewhere. Wheat is selling from 16½ to 22½, gram 20 to 23, barley 30 to 32, maize 27½ to 35, bulrush-millet 19 to 23, great millet 21 to 32, and rice 13 to 14 seers per rupee.

**Central Provinces.**—*For week ending 2nd May.*—The weather has been generally cloudy and stormy during the week and slight showers of rain fell in eight districts. The temperature fell during the early part of the week but has risen again. The threshing of spring crops has been completed in the Jubbulpore, Seoni, Chanda, and Chhindwara districts, and is in progress in Mandla and Balaghat. In Saugor the labouring classes are out of work and village relief is being extended in the Banda and Kharai tahsils and is in progress in the Damoh district. Water is becoming scarce in parts of Saugor, Mandla, and Chhindwara. Fodder is scarce in parts of six districts and fodder and grain stocks are insufficient in the Hinganghat tahsil of Wardha. The price of wheat, gram, and rice has fallen in some districts and that of wheat, rice, and *juar* has risen

in others. The cheapest prices are—wheat 21, gram 35, rice 22½, and *juar* 30 seers per rupee; the dearest prices are—wheat 12½, gram 18, rice 10, and *juar* 22 seers per rupee.

**Burma.**—*For week ending 29th April.*—In Upper Burma reaping of dry weather paddy has commenced in most districts and island crops are being harvested. Hill cultivation has commenced in the Northern districts. Condition of the standing crops is good, except in parts of Mandalay and the Ruby Mines district. Price of paddy has fallen in Akyab, Rangoon, Tharrawaddy, Bassein, and Amherst; has risen in Mandalay, Shwebo, and Myingyan; elsewhere it is stationary.

**Assam.**—*For week ending 2nd May.*—The weather is hot. Sowing of early rice; planting of sugarcane; and plucking and manufacture of tea are in progress. Prospects of tea are generally good, except in parts of Sylhet and Sibsagar, where red spider prevails. Land is being prepared for late rice; reaping of low-land transplanted rice continues in Sylhet. Prospects are good. Pressing of sugarcane still continues in places and the outturn is generally good. Sowing of jute continues in Sylhet and Goalpara. Prices—common rice—Silchar and Dhubri 16, Gauhati 14½, Tezpur and Nowgong 15, Sylhet 18, Sibsagar 12, and Dibrugarh 14 seers per rupee.

**Mysore and Coorg.**—*For week ending 3rd May.*—**MYSORE:** Rainfall—one inch 42 cents in the Civil and Military station and general and good rain in parts of Bangalore, Kolar, Mysore, and Kadur. The standing crops are in good condition. Prices have slightly risen in Bangalore, Kolar, and Kadur. *Ragi (Eleusine coracana)* has been sown in Mysore.

**COORG:** Ploughing for rice has commenced in parts. Prices of food-grains are stationary. Water and fodder for cattle are sufficient.

**Berar and Hyderabad.**—*For week ending 3rd May.*—**BERAR:** The weather is warm and cloudy. Breaking up of land for monsoon crops continues. The fodder and water-supply is insufficient in parts of the Province. Prices are fluctuating.

**HYDERABAD:** Rainfall during the week 21 cents. The spring harvest is over and harvesting of winter rice crop continues. The crop has suffered in parts by unseasonable rain. Prices of grain continue steady. Prices—wheat 10, coarse rice 10½, and *jowari* 24½ seers per current sicca rupee.

**Central India.**—*For week ending 3rd May.*—Slight rain fell in the Bundelkhand and Bhopawar Agencies during the week. Agricultural operations have been completed in Bundelkhand and Bhopawar and are in progress elsewhere. Agricultural stock and pasturage are in fairly good condition. Prices are above normal in Bundelkhand; normal elsewhere.

**Rajputana.**—*For week ending 3rd May.*—Rainfall—Haraoti average 70 cents; Sirohi 55 cents; Jeysulmere 26 cents; Ajmere 90 cents; Jeypore 13 cents. Agricultural operations are generally satisfactory, except in Merwara. Harvesting of crops is approaching completion. Cattle are in poor condition in Marwar, Meywar, Haraoti, and Ajmere; elsewhere in good to fair condition. Fodder scarcity prevails in States reported last week. Prices are rising in Jhallawar; falling in Meywar; and are steady elsewhere. Twenty-four persons emigrated from Ajmere and 13 from Merwara during the week. The total emigration from Merwara up to date numbers 4,384. The numbers employed on relief works were—398 in Ajmere; 3,955 in Merwara; and 970 in Marwar. Prices—Ajmere 20½, Beawar 22, and Marwar 15 seers per rupee.

**Kashmir.**—*For week ending 2nd May.*—The weather is fine. Prospects of the spring crops are excellent. Prices continue below normal. Rice—27 seers per rupee.

**JAMMU PROVINCE.**—*For week ending 3rd May.*—No rain during the week. Prices have fallen slightly. Prices—wheat from 16 to 19 and maize 25 seers per rupee. The condition of the standing crops is fair. Reaping and threshing of spring crops are in progress. Fodder is scarce.

**Nepal.**—*For week ending 29th April.*—Rainfall 0·04 inch. Land is being prepared for early rice and indian-corn. The wheat crop is doing well. Price of rice is 9½ seers per rupee.

M. FINUCANE,

Offg. Secretary to the Government of India.

**GOVERNMENT OF INDIA.**  
**PUBLIC WORKS DEPARTMENT.**  
**RAILWAY STATISTICS.**

**STATEMENT OF APPROXIMATE GROSS EARNINGS OF INDIAN RAILWAYS FROM 1ST JANUARY TO 22ND APRIL 1900, AND FROM 1ST JANUARY TO 22ND APRIL 1899.**

N.B.—As regards the figures in column Total earnings from 1st January 1899, audited figures have been used, as far as possible.

SUPPLEMENT TO

# The Gazette of India.

No. 19.

SIMLA, SATURDAY, MAY 13, 1899.

## OFFICIAL PAPERS.

*A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Subjects of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.*

*Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered at Simla, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rangoon or sent by Post.*

*No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

### Weather Review of India for the Week ending at 8 a.m. on Saturday, May 6th, 1899.

During the week under review there have been heavy rains and strong winds and gales in Burma, due to the advance northward of the depression which was developing over the Andaman Sea at the close of last week, but over India the weather has been quiet and generally fine. Pressure has been high and above the normal average over Bombay and low and below the normal over Northern and North-Eastern India. As a result, dry westerly and north-westerly winds have prevailed over the greater part of India, and the only rainfall which has been received over India has been light or moderate showers occurring during dust and thunder storms. Very hot weather prevailed during the week over Northern India where the wind was westerly, but over the central parts of India and over the greater part of the Peninsula where the wind was north-westerly or even northerly the mean temperature was steadily lower than usual. In Burma the heat was largely controlled by the rainfall, accompanying the storm mentioned above, and was very largely below the normal on the 4th and 5th May when the rainfall was very heavy.

**Daily Summary.**—*Sunday, April 30th*—Pressure was changing very slightly, and the only important feature in the weather was the storm which was developing over the Andaman Sea and which was drawing the wind into north in Lower Burma and occasioning rain over Lower Burma and Tenasserim. Over India the weather was very quiet, pressure generally higher than usual and the wind between north-west and west except in the Bay area where the directions were southerly. Dust and thunder storms had occasioned showers of rain over parts of Bengal, of the southern half of the Peninsula and of Rajputana,

A

but the rainfall amounts were small. The heat had been greater than usual over Northern India, the greater part of Burma and the Madras coast districts, but had been below the normal elsewhere. The largest opposite variations from the normal were  $-7.0^{\circ}$  at Chanda and  $+8.5^{\circ}$  at Mandalay.

*Monday, May 1st.*—The barometer had fallen almost everywhere. The change had been very rapid at Diamond Island, and the storm which had been developing over the Andaman Sea had approached that station where pressure was over  $0.25$  inch below the normal. The winds were cyclonic around the Andaman Sea and were blowing a gale at Diamond Island. Rain had fallen over Tenasserim and Deltaic Burma, the heaviest amount being  $5.67$  inches at Diamond Island. Over India the pressure and wind conditions were unchanged, and the only rainfall was some light showers accompanying dust and thunder storms. The heat remained excessive over the greater part of Northern India and of Burma and the Madras coast districts, while over Lower Burma, the Peninsula and the central parts of India the weather was cooler than usual.

*Tuesday, May 2nd.*—Pressure had risen briskly over Tenasserim and fallen over Lower Burma. The storm had continued to move northward and lay close to Bassein, in which neighbourhood the barometer was between  $0.30$  inch and  $0.36$  inch below the normal. Cyclonic gales prevailed over Lower Burma where heavy rain had fallen. Over India there was still no important change to record. Pressure was higher than usual generally, but much more so over the Western desert than over Eastern and North-Eastern India. Westerly to north-westerly winds prevailed throughout, and the only rainfall was a few light local thundershowers. The heat over Northern India was increasing, and the mean temperature was slightly to very largely excessive in Northern India and in the Madras coast districts. It still remained low over Lower Burma and the greater part of the Peninsula and of North Bombay.

*Wednesday, May 3rd.*—The barometer had risen with great rapidity over Lower Burma, and the cyclonic storm had filled up. Elsewhere there had been no important change. Pressure was high along the west coast and low over West Bengal and the West Punjab. The wind was still strong in parts of Burma, but the gales had subsided. The direction of the wind was more northerly than usual over the Peninsula. Rain continued to fall over Burma, but over India the weather was fine with a few local thundershowers. The distribution of temperature relatively to the normal was little changed, and the principal variations from the average were  $+9.2^{\circ}$  at Rawalpindi,  $+8.4^{\circ}$  at Silchar,  $-7.6^{\circ}$  at Bassein and  $-5.6^{\circ}$  at Belgaum.

*Thursday, May 4th.*—The barometric changes had been generally unimportant and irregular. Southerly winds were blowing over the Bay area and into Bengal and easterly winds along the foot of the Eastern Himalayas, but elsewhere the directions were between west and north-west with more northing than is usually the case. Dull, rainy weather prevailed over Burma, but the rainfall amounts were not heavy except at Minbu where  $7.90$  inches had been received. Over India the weather remained generally fine, but the local thundershowers were somewhat more widespread and somewhat heavier. The weather was cooler than usual over Burma (Minbu  $-12.7^{\circ}$ ), the west of the Peninsula (Belgaum  $-5.9^{\circ}$ ) and North Bombay and Rajputana (Hyderabad  $-5.1^{\circ}$ ), but elsewhere the heat was excessive, the principal variations from the normal having been  $+10^{\circ}$  at Rawalpindi and  $+9.7^{\circ}$  at Mymensingh.

*Friday, May 5th.*—The barometer had fallen over North Bengal and risen elsewhere. Pressure was considerably above the normal over North-Western and Western India and considerably below in Bengal. Westerly winds prevailed down the Gangetic Plain, southerly winds over the Bay area and north-westerly winds elsewhere. Showers of rain had been received over Burma, Assam and Sikkim, while dust and thunder storms, in some cases accompanied with rain, had been experienced in different parts of North-Western and Central India and the Peninsula. The heat was greater than usual over Northern India—more particularly in Bengal—and less than usual elsewhere. Some of the more important variations from the normal were  $+8.1^{\circ}$  at Rawalpindi,  $+11.2^{\circ}$  at Patna,  $-10.6^{\circ}$  at Yamethin,  $-5.2^{\circ}$  at Belgaum and  $-6.4^{\circ}$  at Bickaneer and Hyderabad (Sind).

*Saturday, May 6th.*—Pressure had increased, but generally by small amounts, and the general conditions of pressure were unchanged. Hot westerly

winds prevailed down the Gangetic Plain into West Bengal, while southerly winds prevailed over the Bay area and north-westerly or variable winds elsewhere. The weather remained showery in Assam, but the rain had ceased in Burma. Local dust and thunder storms continued to give rain to parts of Central India, the Central Provinces, and Southern India. Very hot weather continued to prevail over the Punjab, the North Gangetic Plain, Bengal and Upper Burma, the principal variations having been  $+5.2^{\circ}$  at Rawalpindi,  $+12.1^{\circ}$  at Bogra and  $+5.2^{\circ}$  at Bhamo. Elsewhere the heat was generally less than usual.

**Temperature.**—The weather during the week under review has been generally excessively hot over the Punjab, the Gangetic Plain and Bengal where during the greater part of the week there have been hot westerly winds, but over the Peninsula, North Bombay and the neighbouring regions where the wind has been north-westerly the heat has been slightly to considerably less than usual, while in Burma, as the heavy rain extended, the mean temperature fell to much below the normal.

The following table gives the mean temperature variation data for the week :

PROVINCE.	APRIL 1899.	MAY 1899.							Mean variation of week.
	30th	1st	2nd	3rd	4th	5th	6th		
	°	°	°	°	°	°	°	°	
Burma . . . . .	+2.1	-0.5	-1.9	-3.3	-5.1	-4.0	0	-1.8	
Assam . . . . .	+3.9	+4.7	+3.2	+5.3	+6.9	+6.5	+2.5	+4.7	
Bengal . . . . .	+3.7	+3.8	+4.7	+5.2	+7.4	+8.2	+7.9	+5.8	
Orissa . . . . .	+0.6	-2.3	+1.1	+1.1	+4.0	+4.9	+5.4	+2.2	
Bihar . . . . .	+2.2	+2.8	+3.8	+4.2	+5.4	+8.4	+8.4	+5.0	
Chota Nagpur . . . . .	+1.9	+0.1	+2.3	+1.9	+4.1	+5.8	+5.2	+3.0	
N.-W. P. and Oudh . . . . .	+0.1	+0.5	+4.0	+3.5	+4.0	+3.1	+2.5	+2.5	
Punjab . . . . .	+3.6	+5.7	+6.0	+6.0	+6.2	+2.4	+1.2	+4.6	
Sind . . . . .	-1.1	+0.6	-0.5	-1.1	-2.0	-3.7	-4.9	-1.8	
Rajputana . . . . .	-1.8	+0.7	+1.6	+1.5	-0.8	-3.5	-1.4	-0.5	
Gujarat . . . . .	-4.1	-1.0	-2.5	-2.1	-0.6	-3.3	-3.9	-2.5	
Central India . . . . .	-3.9	-1.6	+1.3	+1.4	-1.1	-3.0	-2.3	-1.3	
Central Provinces . . . . .	-2.6	-1.3	+0.5	+1.9	+0.9	-1.5	-0.2	-0.3	
Berar . . . . .	-2.3	-3.6	-1.0	+1.0	-0.1	-3.2	-0.5	-1.4	
West Coast . . . . .	-0.9	-0.8	-1.1	-1.7	-2.2	-1.7	-1.1	-1.4	
Bombay Deccan . . . . .	-3.3	-2.6	-5.3	-3.5	-2.5	-3.2	-2.0	-3.2	
Mysore . . . . .	-2.0	-5.4	-5.0	-4.0	-4.0	-2.1	-1.9	-3.5	
Madras Coast . . . . .	+1.4	+2.2	+4.2	+2.6	+3.9	+1.4	+1.2	+2.3	
Madras Deccan . . . . .	-3.2	-2.3	-3.3	-1.4	-1.7	-1.9	-0.5	-2.0	
South India . . . . .	-1.4	-1.8	-1.8	-1.5	-1.9	-2.3	-2.3	-1.9	
Mean for whole of India . . . . .	-0.4	-0.1	+0.6	+0.9	+1.0	+0.4	+0.7	+0.4	

The mean temperature of the whole of India for each day of the week and for the whole week was about normal, but on turning to the provincial variations considerable differences are exhibited. Thus Assam, Bengal, Orissa, Bihar, Chota Nagpur, the North-West Provinces, the Punjab and the Madras Coast, all exhibited a moderate to large excess, while all the remaining provinces showed a deficiency. The greatest excess was in Bengal, the greatest deficiency in Mysore.

The following were the highest maxima reported on each day :

April 30th . . . . .	108.5°	at Cuttack.
May 1st . . . . .	111.3°	„ Jacobabad.
„ 2nd . . . . .	110.8°	„ Do.
„ 3rd . . . . .	109.3°	„ Lucknow.
„ 4th . . . . .	108.4°	„ Gaya and Khushab.
„ 5th . . . . .	109.5°	„ Gaya.
„ 6th . . . . .	108.5°	„ Cuttack.

**Rain.**—As was the case last week and as is usual at this time of year, nearly all the rain which has fallen over the Indian area has accompanied dust and thunder storms, and has consequently been scattered, local and generally light. The only exception has been the rainfall in Lower Burma which accompanied the deepish depression which crossed the South-West Burma coast from the Andaman Sea in the early days of the week. This depression occasioned heavy rain in the Rangoon, Bassein and Maubin districts on the 1st and 2nd of May and in the Minbu district on the 3rd of May. In all other places the rainfall, as mentioned above, was connected with dust and thunder storms. These storms occurred principally on the 5th and 6th May in Assam, on the 30th April and the 1st and 2nd May in Bengal, on the 1st and 2nd May over the Peninsula and on the 5th and 6th May over the central districts. In the remaining parts of India where rain fell the fall was scattered throughout the week.

The rainfall table at the close of the summary shows that rain in appreciable amount, i.e., the average actual rainfall of the division, 0·10 inch or more in amount, fell in twenty-eight of the rainfall divisions. These twenty-eight divisions included, all the Burma divisions, the Surma and Brahmaputra divisions of Assam, the deltaic, north and hill divisions of Bengal, Orissa, the hill division of the North-West Provinces, the South Punjab, Malabar, Mysore, the Bombay Deccan, Khandesh, Berar, Kathiawar, Sind, Baluchistan, Rajputana (East) and Central India (West), the north and south divisions of the East Coast, the South-Central, Central and South divisions of Madras and Hyderabad (South). In all the remaining divisions there has been either no rain whatever or the actual average rainfall has been less than 0·10 inch, and hence practically nil. Where rain was received the amount ranged from 4·63 inches in Deltaic Burma, 4·01 inches in the Bengal Hills and 3·57 inches in Tenasserim, to 0·10 inch in North Bengal and Central Madras and 0·11 inch in Orissa, Malabar and Gujarat. The third column of the table shows that the average actual rainfall of the week was greater than the normal average rainfall, in Tenasserim, Deltaic, Central and Upper Burma, the Bengal Hills, the South Punjab, Khandesh, Berar, the west of the Central Provinces, Gujarat, Kathiawar, Sind, Baluchistan, Central India, Rajputana, the East Coast (North) and Hyderabad (South). This excess was as much as 4·15 inches in Deltaic Burma, 2·25 inches in the Bengal Hills, 2·01 inches in Upper Burma, 1·78 inches in Tenasserim and 1·62 inches in Baluchistan, but elsewhere the excess was small and unimportant. On the other hand, in all the rainfall divisions not mentioned above, the week's rainfall was less than usual, the deficiency amounting to over 3 inches in the Surma and hill divisions of Assam and over 1 inch in the Assam Valley, Deltaic Bengal, North Bengal and Coorg.

The following were the principal large totals recorded at individual stations during the week:

Burma	Bilin, Thaton	6·43 inches.
	Bassein	6·05 "
	Maubin	7·29 "
	Minbu	8·87 "
	Magwe	7·02 "
Assam	North Lakhimpur	4·63 "
Bengal	Darjeeling	4·01 "
	Satkira (Khulna)	1·18 "
Punjab	Hansi	0·71 "
Mysore	Chennagiri (Shimoga)	2·80 "
Central Provinces	Meihat (Ellichpur)	2·20 "
Madras	Kēlapātur (Trichinopoly)	2·33 "

The three concluding columns of the rainfall table show that the rainfall for the period February 26th to May 6th has been short of the normal in Arakan, Central Bengal, a large part of the Gangetic Plain and of the Punjab and in some central districts, but that in all other parts of the country the total fall has been normal or in excess of the normal, the excess in some parts of the Peninsula having been particularly large.

PROVINCE.	DIVISION.	RAINFALL DATA FOR YEAR ENDING MAY 31st, 1899.			RAINFALL DATA FROM FEBRUARY 1st TO MAY 31st, 1899.		
		Average actual rainfall of division.	Average normal rainfall of division.	Excess or deficit in Inches.	Average actual rainfall of season to date.	Average normal rainfall February 1st to May 31st.	Excess or de- ficit of (nor- mal) rain- fall expressed as a per- centage.

W. L. DALLAS,

for Meteorological Reporter to the  
Government of India.  
M. FINUCANE,  
Offg. Secretary to the Government of India.

SIMLA, 11th May, 1899.

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

## Weekly Report of the state of the Season and Prospects of the Crops.

**Madras.**—*For week ending 6th May.*—Light showers fell generally during the week, general and some sowings are being made. The standing crops are Ploughed; the harvest is yielding fairly in parts. Pasture is moderate; in g. is sufficient; and cattle are in normal condition. Prices are again slightly lower.

**Bombay.**—*For week ending 10th May.*—There was rain in eighteen districts during the week, but it was generally light. Reaping of late crops continues in Hyderabad and Khandesh and cotton-picking in Baroda territory. Preparations for next season are progressing generally. Sowings have commenced in parts of Kanara and Karachi. Fodder is sufficient, except in parts of Sind and Baroda territory. Agricultural stock is healthy. Prices have risen in seven and fallen in three districts; elsewhere they are stationary.

**Bengal.**—*For week ending 8th May.*—With the exception of some scattered showers in Bengal Proper and Orissa, the weather throughout the week was rainless and very hot. General rain is now needed for ploughing and early sowings and also for the young crops in the ground. Spring rice is still being harvested, and the threshing of the spring crops in Bihar is almost over. The fodder-supply is everywhere sufficient, except as previously reported in places in Midnapore, Manbhum and the Sonthal Parganas. The price of common rice is practically stationary; any variations reported being very slight.

**North-Western Provinces and Oudh.**—*For week ending 10th May.*—There were slight showers in a few districts, otherwise the weather has been seasonable. Operations connected with the spring harvest are practically completed. Extra crops, sugarcane, and indigo are being irrigated. Prospects are favourable; supplies and fodder are sufficient. Prices have risen in a few districts, otherwise they are almost stationary.

**Punjab.**—*For week ending 10th May.*—Slight rain is reported from Hissar, Delhi, Ferozepore, Lahore, and Rawalpindi. Reaping and threshing of spring crops are still going on. Sowing of autumn crops continues in Mooltan, Lahore, Amritsar, Sialkot, and Peshawar. Extra spring sowings have been finished. The outturn of the canal crops is average in Hissar generally, Lahore and Sialkot, and normal in Jullundur. The condition of the extra spring crops is good in Umballa and Peshawar and average in Delhi, Lahore, and Ferozepore. Food-stocks are sufficient in Ferozepore and Peshawar. Crops have been slightly damaged by hail and white-ants in parts of Sialkot and Dera Ismail Khan. The condition of cattle is poor in Hissar, Delhi, Sialkot and Shahpur; fair in parts of Dera Ismail Khan; and good elsewhere. Fodder is scarce in parts of Hissar, Delhi, Shahpur, and Dera Ismail Khan, and sufficient elsewhere. Prices, especially of wheat, have risen in Amritsar and Rawalpindi; fallen in Sialkot; and have remained unchanged elsewhere. Wheat is selling from 16½ to 21½, gram 19½ to 23, maize 27½ to 35, barley 30 to 32, great millet 21, bulrush-millet 18 to 23½, and rice 13 to 14 seers per rupee.

**Central Provinces.**—*For week ending 9th May.*—The weather has been generally cloudy and close; the temperature was unusually low in Saugor during the week. Slight showers of rain fell in fourteen districts. The threshing of spring crops is in progress in the Mandla and Balaghat districts, and has been completed elsewhere. The crop outturn in Jubbulpore is proving rather worse than was expected. Village relief is in progress in Saugor and Damoh; 2,100 persons in the latter district being in receipt of relief. The water-supply is scarce in parts of Saugor, Mandla, Chanda, Chhindwara, and Bhandara. Fodder is scarce in parts of eight districts and fodder and grain-stocks are insufficient in the Hinganghat tahsil of Wardha. The price of wheat, gram, rice, and *juar* has fallen in some districts and has risen in others. The cheapest prices are—wheat 20, gram 32, rice 23, and *juar* 30 seers per rupee; the dearest prices are—wheat 12½, gram 18, rice 10, and *juar* 21 seers per rupee.

**Burma.**—*For week ending 6th May.*—In Upper Burma harvesting of island crops and dry weather paddy continues in most districts. Ploughing for early wet weather crops has commenced in parts of Kyaukse, the Ruby Mines district, Yamethin, and the Shan States. The standing crops are in good condition, except dry weather paddy in parts of Mandalay and the Ruby Mines district. The price of paddy has fallen in Pakòkku and Myingyan; slightly in Thongwa and Rangoon; largely in Bassein; elsewhere it is steady.

**Assam.**—*For week ending 9th May.*—There was rain in all districts, except in the Khasi and Jaintia Hills. More rain is wanted in Nowgong and in parts of Kamrup. Sowing of early rice; planting of sugarcane; and plucking and manufacture of tea are in progress. Prospects of tea are generally good, except in parts of Cachar, Sylhet, and Sibsagar, where red spider prevails. Land is being prepared for late rice. Reaping of low land transplanted rice continues in Sylhet. Prospects are good. Pressing of sugarcane has been finished and the outturn is generally good. Sowing of jute continues in Sylhet and Goalpara. Prices—common rice—Silchar and Dhubri 16, Gauhati 14½, Tezpur 15, Nowgong 14, Sylhet 21, Sibsagar 12, and Dibrugarh 14 seers per rupee.

**Mysore and Coorg.**—*For week ending 10th May.*—**MYSORE:** Rainfall—one inch 22 cents in the Civil and Military station and general rain in the Province. Prospects are favourable. Prices have slightly risen in Bangalore, Tumkur, and Kadur. *Ragi (Eleusine coracana)* has been sown in parts of Hassan.

**COORG:** Rainfall—41 cents. Ploughing for rice continues. Prices of food-grains are stationary. Water and fodder for cattle are sufficient.

**Berar and Hyderabad.**—*For week ending 10th May.*—**BERAR:** The weather is warm and cloudy. Land is being prepared for the next monsoon crop. The fodder and water-supply are inadequate in parts of three districts. The price of *jowar* shows a tendency to fall in two districts; elsewhere it is stationary.

**HYDERABAD:** Rainfall during the week—8 cents. The standing winter rice crop has suffered in parts from unseasonable rain. Preparations for next season's sowing are in progress. Prices of grain continue steady. Prices—wheat 10, coarse rice 10½, and *jowari* 24½ seers per current sicca rupee.

**Central India.**—*For week ending 10th May.*—Some rain fell in the Indore, Bhopal, and Bhopawar Agencies during the week. Agricultural operations have been completed in Gwalior, Bhopal, and Bundelkhand; and are in progress elsewhere. The land is being prepared for the autumn sowings in Bhopawar. Agricultural stock and pasturage are in fairly good condition. Prices continue above normal in Bundelkhand and are normal elsewhere. The condition of opium is fair in Malwa.

**Rajputana.**—*For week ending 10th May.*—Rain ranging from over one inch to 20 cents fell at Bikanir, Kherwara, Abu, Sirohi, Shahpura, the Dewa pargana of Jaisalmer, Meywar, Ajmere, Jeypore, and Kishengurh; there was also slight rain at Tonk. Harvesting and threshing continue in parts. Breaking of soil for the next crop is in progress in most parts of Merwara. Agricultural stock are in fair to good condition, but poor in Meywar and Haraoti. Fodder scarcity prevails in the States reported last week. Prices are rising in Meywar, Jhallawar, and Kishengarh; falling slightly in Jeypore; and are steady elsewhere. Thirty persons emigrated from Merwara during the week. The total emigration from Merwara up to date numbers—4,414. The numbers employed on relief works were—Ajmere 391, Merwara 4,175, and Marwar 965. Prices—Ajmere 20½, Beawar 22, and Marwar 15 seers per rupee.

**Kashmir.**—*For week ending 9th May.*—The weather is fine. Prospects of the spring crops are excellent. Prices continue below normal. Rice—27 seers per rupee.

**JAMMU PROVINCE.**—Report not received.

**Nepal.**—*For week ending 6th May.*—Rainfall 0·81 inch. The weather is warm and hazy. First sowings of indian-corn and upland rice are being made. The wheat crop is doing well. Rice 10 seers per rupee.

M. FINUCANE,

*Offg. Secretary to the Government of India.*

GOVERNMENT OF INDIA.  
PUBLIC WORKS DEPARTMENT.  
RAILWAY STATISTICS.

**STATEMENT OF APPROXIMATE GROSS EARNINGS OF INDIAN RAILWAYS FROM 1ST JANUARY TO 30TH APRIL 1898, AND FROM 1ST JANUARY TO 29TH APRIL 1899.**

N.B.—As regards the figures in column Total earnings from 1st January 1899, audited figures have been used, as far as possible.

RAILWAY.	Average earnings per mile per week during the 1st half of 1898.	WEEK ENDING 30TH APRIL 1898.				WEEK ENDING 29TH APRIL 1899.				Earnings from 1st January to 30th April 1898.	Earnings from 1st January to 29th April 1899.	Increase.	Decrease.

SUPPLEMENT TO

# The Gazette of India.

---

No. 20.

CALCUTTA, SATURDAY, MAY 20, 1899.

---

## OFFICIAL PAPERS.

*A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and Information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.*

*Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

*No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.*

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on  
Saturday, May 13th, 1899.

A very marked change of weather has occurred over India during the week under review. During the first three days of the week strongly marked hot weather conditions prevailed over Northern India with dry westerly winds, a high temperature and no rain beyond one or two local thundershowers. On Wednesday, 10th May, the weather changed. Pressure became lowest in the north-west, and a tongue of relatively low pressure extended south-eastward down the Gangetic Plain. At the same time pressure rose steadily over North-East India and Burma. Hence during the remainder of the week the general conditions were such as ordinarily prevail in June instead of in May; south-easterly and easterly winds were blowing across Bengal and up the North Gangetic Plain, while westerly winds prevailed over Central and Southern India. The easterly wind occasioned a certain amount of rainfall over Burma, Bengal and the North-West Himalayas, while the westerly wind was dry. With the occurrence of rain the temperature fell, and the heat at the close of the week was much less than usual over Bengal and slightly less than usual in Burma.

**Daily Summary.—Sunday, May 7th.**—The barometer was falling everywhere—most in the north. Pressure was lowest in North Bihar, and moderate gradients prevailed over Northern India, while over the Peninsula pressure was high and uniform. The wind was northerly on the west and southerly on the east coast of the Peninsula and generally westerly elsewhere. The weather was slightly cloudy in places, and dust and thunder storms had occasioned some local rainfall. At Sibsagar over 3 inches had been received, but in general the amounts were moderate or small. The weather was slightly cooler than usual over Sind, Rajputana, part of the Central Provinces and the east of the Peninsula, but was hotter than usual elsewhere, the excess being very large in Bengal.

**Monday, May 8th.**—Pressure had increased over Burma and North-East India and decreased elsewhere. The general conditions of pressure were the same as on the preceding day, but the differences were smaller. The winds were practically unchanged. Sibsagar again reported a moderate shower of rain, but the few local falls which were received in other parts of the country were quite unimportant. The temperature conditions were the same as on the 7th. The heat was very excessive in Bengal.

**Tuesday, May 9th.**—The barometer had fallen a little at some north-western stations, but had risen elsewhere, the change having been brisk to large in places. The area of lowest pressure was reported from North-West India, and an arm or trough of relatively low pressure was developing over the Gangetic Plain. Variable winds and calms were reported from North-West India and the Gangetic Plain and south-easterly to easterly winds in Burma and East Bengal, but elsewhere there had been but little change. There was more cloud than of late, and showers, generally, however, of small amount were reported from parts of North-Western, North-Eastern and Central India. The mean temperature had risen over North-West India, and practically the only place

where the heat was less than usual was the east of the Peninsula. In the extreme north-west and extreme north-east of India the excess was large to very large.

*Wednesday, May 10th.*—Pressure had been steady or had risen slightly over Burma, North-East India and the west and centre of the Peninsula, but elsewhere it had fallen—more especially at the foot of the North-West Himalayas. Pressure was lowest near Sialkot, and the south-easterly and easterly winds noticed in Bengal on the 9th had suddenly extended north-westward along the line of the hills as far as the East Punjab. Elsewhere the wind changes were unimportant. The weather was cloudy to overcast over Burma, North-East India and the west of the Peninsula, and fairly general rain had been received over Burma, Assam and Bengal and scattered showers over the Kashmir Himalayas and parts of the west and centre of the Peninsula and of the Central Provinces. The weather relatively to the normal was cool in parts of Burma, Madras, the Central Provinces and Gujarat, but was more or less hotter than usual elsewhere. The excess was large to very large over the Punjab and the North Gangetic Plain.

*Thursday, May 11th.*—The barometer had fallen. There had been no important change in the general conditions of pressure. Readings were lowest over the Punjab whence an arm of low pressure passed south-eastward down the Gangetic Plain as far as Allahabad and Sutna. To the north and east of this arm the wind was south-easterly and easterly, and elsewhere blew from between south-west and north-west. The sky had become more cloudy over Northern India, and rain had been received over Burma, East and West Bengal, Orissa, the North-West Himalayas and parts of the Peninsula. Temperature was lower than usual over Burma, Deltaic and South-West Bengal and the Bombay Deccan, but was more or less excessive elsewhere. In the Punjab the excess was very large.

*Friday, May 12th.*—The barometric changes had been slight. Pressure was lowest over the West Punjab, with the usual arm of low pressure over the Gangetic Plain and was highest in Burma. The winds were practically unaltered and were strongly easterly over Northern India. There was a good deal of cloud. There had been fairly general rain over Burma and light scattered rain over Sikkim, Bihar, the North-West Himalayas, the west and the south of the Peninsula and one or two central districts.

*Saturday, May 13th.*—Pressure had risen almost everywhere. The change had been brisk to rapid in the north, so that the arm of low pressure had been transferred southward, but in other respects there had not been much change. South-easterly to easterly winds continued over the greater part of Northern India and northerly through westerly to southerly winds over the Peninsula, but in parts of Deltaic Bengal and of Orissa there were, owing to a small depression at the head of the Bay, some northerly winds. There was a good deal of cloud over Burma, North-East India and the North-West Himalayas, where also rain had been fairly general and moderately heavy in places. Temperature had decreased except over some central and southern districts. The heat was much more than usual over parts of North-Western and Central India and much less than usual over parts of Bengal and of Burma.

**Temperature.**—The past week has been one of large changes of temperature and of large variations from the normal conditions. At the commencement of the week, when hot, dry, westerly winds were blowing down the Gangetic Plain, the heat was excessive over Bihar and Bengal, while in parts of North-West India the weather was cooler than usual. Later in the week, when rain was falling over North-East India, the mean temperature fell to largely below the average over parts of Bengal, while, on the contrary, over North-West India the heat was very excessive.

The following table gives the mean temperature variation data for the week :

PROVINCE.	May 1899.							Mean variation of week.
	7th	8th	9th	10th	11th	12th	13th	
Burma . . . . .	+0.9	+2.8	+3.6	-0.2	-0.6	-2.2	-1.9	+0.3
Assam . . . . .	+4.6	+4.4	+3.3	+3.7	+3.1	+5.3	+1.8	+3.7
Bengal . . . . .	+8.5	+9.1	+8.4	+3.0	+0.4	+2.7	-0.8	+4.5
Orissa . . . . .	+5.1	+4.3	+4.9	+2.8	-3.1	-0.3	-5.8	+1.1
Bihar . . . . .	+8.8	+9.0	+8.4	+6.2	+3.8	+3.9	-6.3	+4.8
Chota Nagpur . . . . .	+6.7	+7.2	+7.2	+5.6	+0.5	+0.4	-8.3	+2.8
N.-W. P. and Oudh . . . . .	+4.1	+5.1	+4.1	+6.0	+9.2	+4.9	+0.8	+4.9
Punjab . . . . .	+2.8	+3.6	+5.5	+9.3	+11.5	+9.8	+7.6	+7.2
Sind . . . . .	-3.0	-0.1	+2.8	+4.0	+5.1	+6.0	+4.6	+2.8
Rajputana . . . . .	-0.9	-1.2	+1.7	+4.5	+6.5	+7.1	+6.1	+3.4
Gujarat . . . . .	-2.0	-0.7	+1.0	+1.2	+0.1	+1.5	+0.1	+0.2
Central India . . . . .	+0.3	+1.1	+2.0	+3.1	+4.7	+5.3	+3.4	+2.8
Central Provinces . . . . .	+0.7	+1.4	+1.9	-0.1	+2.6	+3.0	+4.3	+2.0
Berar . . . . .	+0.7	+0.4	+1.6	+0.7	+2.3	+3.0	+3.8	+1.8
West Coast . . . . .	+0.1	+0.4	+1.9	+1.5	+1.4	+0.7	+1.0	+1.0
Bombay Deccan . . . . .	+0.2	+1.3	+3.7	+2.4	-0.4	-0.3	+1.0	+1.1
Mysore . . . . .	-0.9	-1.4	+0.1	+1.0	+1.9	+0.4	-0.8	0
Madras Coast . . . . .	-0.7	-1.7	-1.2	+0.9	+2.5	+0.8	-1.2	-0.1
Madras Deccan . . . . .	-0.6	-0.5	+0.7	+1.7	+0.6	+2.3	+3.3	+1.1
South India . . . . .	-2.0	-1.0	-0.9	-0.7	+0.9	+1.3	+1.4	-0.1
Mean for whole of India . . . . .	+1.7	+2.2	+3.0	+2.8	+2.7	+2.8	+0.7	+2.3

The mean temperature of the whole country for each day of the week and for the whole week exceeded the normal. The excess was least (only 0.7°) on the 13th and was greatest (as much as 3°) on the 9th. The provincial variations show that in the case of Burma, Gujarat, Mysore, the Madras Coast and South India the heat for the week was about normal, but that in the case of all the remaining provinces the heat was excessive—more particularly so in the Punjab.

The following were the highest maxima reported on each day :

May 7th . . . . .	110.3°	at	Burdwan.
" 8th . . . . .	112.0°	"	Do.
" 9th . . . . .	113.2°	"	Jacobabad.
" 10th . . . . .	117.1°	"	Do.
" 11th . . . . .	119.5°	"	Do.
" 12th . . . . .	119.5°	"	Do.
" 13th . . . . .	120.0°	"	Do.

**Rain.**—As mentioned above, ordinary hot weather conditions prevailed over the greater part of India during the early part of the week under review, and during the continuance of those conditions the only rainfall received was that which fell during the few scattered dust and thunder storms which were experienced in different parts of the country. Subsequently the weather changed. Pressure became low in North-West India and within a band which stretched east-south-east and west-north-west across Northern India. To the northward and eastward of this band south-easterly and easterly winds set in, and the weather became much damper and more rainy, while to the southward where westerly winds still held the thundershowers became more frequent and heavier. The rainfall returns show that the greater part of the rain fell on the following dates : in Burma between the 11th and 13th; in Assam between the 7th and

10th; in Bengal on the 10th and 11th and again on the 13th; on the North-West Himalayas between the 11th and 13th; in the west of the Peninsula between the 10th and 13th; in the central districts of India between the 7th and 10th; and in North Madras on the 13th.

The rainfall table at the close of the summary shows that, with the exception of twenty-four divisions, *vis.*, North and South Oudh, the east, central, west and west submontane divisions of the North-West Provinces; the south-east, south, submontane, north and west divisions of the Punjab; the three divisions of the Central Provinces; Gujarat; Kathiawar; Sind; the divisions of Central India and of Rajputana; the central and south divisions of Madras and the central and south divisions of the east coast, in all of which the week's rainfall has been actually or practically *nil*, good rain has fallen throughout the country. The average actual falls range from 2'96 inches in Arakan, 2'61 inches in the Bengal Hills, 2'32 inches in the Surma division of Assam, 2'22 inches in Orissa and 2'04 inches in the Brahmaputra division of Assam, to 0'16 inch in the Konkan, 0'18 inch in the south division of Hyderabad and to 0'19 inch in Berar. The third column of the table shows that in the majority of the divisions the week's rainfall has been lighter than usual, but in the Burma divisions, the Bengal Hills, the south-west and west divisions of Bengal, the east submontane division of the North-West Provinces, the central division of the Punjab, Mysore, the Konkan, the Bombay Deccan, Khandesh, Berar, Baluchistan and the north divisions of the east coast the fall has been heavier than usual, the principal cases of excess being about 1 inch in Central Burma, Arakan and Orissa and about  $\frac{1}{2}$  inch in Bihar, Bengal Hills, the Bombay Deccan and Baluchistan. In all the remaining parts of India the rainfall has been short of the normal, the principal cases of deficiency being 3'40 inches in the Assam Hills, 2'01 inches in the Surma division of Assam and 1'23 inch in East Bengal. With a few exceptions, there was no very heavy rainfall during the week in any part of the country.

The following were the principal large totals recorded at individual stations during the week:

Burma	Zalun, Henzada	6'10 inches.
	Magôk	3'96 "
	Kyaukpyu	6'34 "
Assam	Sunamgunj, Sylhet	8'12 "
Bengal	Bhola, Bakergunj	3'86 "
	Alipurduar, Jalpaiguri	4'44 "
Bihar	Muzaffarpur	8'08 "
Mysore	Kolar	2'48 "
Deccan	Khanapur, Belgaum	11'93 "

The three concluding columns of the table show that the total rainfall for the period February 26th to May 13th has been short of the normal over the greater part of Upper India as well as over some central districts, but has been heavier than usual elsewhere—more particularly so over parts of the Peninsula.

PROVINCE.	DIVISION.	RAINFALL DATA FOR WEEK ENDING MAY 13TH, 1899.			RAINFALL DATA FROM FEBRUARY 20TH TO MAY 13TH, 1899.

for Meteorological Reporter to the

Government of India.

M. FINUCANE,

Offg. Secretary to the Government of India.

B

SIMLA, 18th May, 1899.

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

## Weekly Report on the state of the Season and Prospects of the Crops.

**Madras.**—*For week ending 13th May.*—Little or no rain fell during the week, except in the northern part of the Circars. There were some showers on the West Coast and in parts of the Central districts. The water-supply is normal. Ploughing is in progress in many places and some small sowings are being made. The standing crops generally are in good condition. Pasture is insufficient in many places, but fodder is available. Cattle are in normal condition. Prices are rather higher in the Circars and in parts of the Deccan and on the West Coast, but elsewhere the decline continues.

**Bombay.**—*For week ending 17th May.*—Slight rain fell in parts of ten districts during the week. Reaping of late crops continues in Khandesh and Thar and Parkar. Preparations for next season are progressing generally and sowing in Kanara and Karachi. Fodder is sufficient, except in parts of Sind and Baroda territory. Agricultural stock is healthy. Prices have risen in six and fallen in four districts; elsewhere they are stationary.

**Bengal.**—*For week ending 15th May.*—There was rain in all parts of the Province during the week and agricultural prospects have generally improved. Ploughing and early sowings are proceeding rapidly and the autumn rice and jute already sown in several parts are doing well. The state of sugarcane and other young crops in the ground is good. The harvesting of spring rice is still going on. There has been no important change in the price of common rice since last week. Cattle are generally in good condition. The fodder-supply is reported to be everywhere sufficient, except in parts of Manbhum.

**North-Western Provinces and Oudh.**—*For week ending 17th May.*—The weather was generally unsettled during the week with slight showers in parts of the Provinces. Spring harvest operations are practically over. Extra crops and sugarcane are thriving. Irrigation of the standing crops is being resorted to where necessary. Preparations for the autumn crop sowing have begun in parts. Prospects are favourable. Markets are well-stocked. Fodder is abundant. Prices have a rising tendency in some districts, but are otherwise fairly stationary.

**Punjab.**—*For week ending 17th May.*—Rain has fallen in all districts, except Jullundur, Mooltan, Ferozepore, Lahore, and Dera Ismail Khan. Reaping and threshing of spring crops are still going on and sowing of autumn crops continues in Mooltan, Lahore, Amritsar, and Peshawar. The ground is being prepared for sowing in Umballa. Sugarcane and tobacco are being weeded in parts of Sialkot. The crop outturn is reported average in Jullundur and Dera Ismail Khan. The condition of extra spring crops is good in Hissar, Umballa, and parts of Peshawar; and fair in Jullundur, Ferozepore, Lahore, and Dera Ismail Khan. Food-stocks are sufficient in Ferozepore, Amritsar, and Peshawar. Hailstorms did some damage to crops in parts of Shahpur. The condition of cattle is poor in Hissar and Delhi; fair in Dera Ismail Khan; and good elsewhere. Fodder is scarce in Hissar, Delhi, Shahpur, and Dera Ismail Khan, and sufficient elsewhere. Prices, especially of wheat, have fallen in Delhi, Umballa, Jullundur, Mooltan, Lahore, and Amritsar, but remained almost unchanged elsewhere. Wheat is selling from  $16\frac{1}{4}$  to 22, gram  $19\frac{1}{4}$  to  $23\frac{1}{4}$ , maize 30 to 35, barley 30 to 32, bulrush-millet 18 to 27, great millet 24, and rice  $13\frac{1}{4}$  to  $14\frac{1}{4}$  seers per rupee.

**Central Provinces.**—*For week ending 16th May.*—The weather has been generally cloudy and hot. Slight showers of rain fell in thirteen districts during the week. The threshing of spring crops has been completed in all districts, except Balaghat. In Saugor the labouring classes complain of want of work and the forest concessions have proved invaluable in this district, owing to a bumper mahua (*Bassia latifolia*) harvest. About 1,272 persons are in receipt of relief in the Damoh district. Water is scarce in parts of Mandla, Chhindwara, Chanda, and Bhandara. Fodder is scarce in parts of six districts and grain-stocks are insufficient in the Hinganghat tahsil of Wardha. The price of wheat, gram, rice, and *juar* has risen in some districts and has fallen in others. The cheapest prices are—wheat 20, gram 34, rice 23, and *juar* 19 seers per rupee; the dearest prices are—wheat  $12\frac{1}{4}$ , gram 18, rice 10, and *juar* 22 seers per rupee.

**Burma.**—*For week ending 13th May.*—In Lower Burma ploughing for wet weather paddy has commenced in parts of the Amherst district. In Upper Burma harvesting of island crops is completed and reaping of dry weather paddy is still in progress in most districts. Preliminary operations for the early wet weather crops have been extended to six other districts in addition to those last reported. The condition of the standing crops continues unchanged. Price of paddy has risen slightly in Rangoon, Prome, Thongwa, and Pakókku and considerably in Bassein and Amherst, and there is a slight fall in Akyab; elsewhere the price is as before.

**Assam.**—*For week ending 10th May.*—Rain fell in most districts during the week. More rain is wanted in Cachar and in parts of Kamrup. Sowing of early rice, planting of sugarcane, and plucking and manufacture of tea are in progress. Prospects of tea are generally good, but red spider is prevalent in Cachar, Nowgong, and in parts of Darrang. Land is being prepared for late rice. Reaping of low land transplanted rice is nearly finished in Sylhet where the outturn is good. Sowing of jute is finished in Sylhet, but still continues in Goalpara. Prices—common rice—Silchar and Dhubri 16, Gauhati 14½, Tezpur and Sibsagar 12, Nowgong 14, Sylhet 21, and Dibrugarh 14 seers per rupee.

**Mysore and Coorg.**—*For week ending 17th May.*—**MYSORE:** Rainfall—70 cents in the Civil and Military station. Rain general and good in parts of Hassan. The standing crops are in good condition. Prices have fallen slightly in Kolar and Bangalore. *Ragi (Eleusine coracana)* has been sown in Kadur and Hassan.

**COORG:** Rainfall—53 cents. Ploughing for rice continues. Prices of food-grains are stationary. Water and fodder for cattle are sufficient.

**Berar and Hyderabad.**—*For week ending 17th May.*—**BERAR:** The weather is warm with occasional clouds. Preparation of land for the monsoon crops continues. Scarcity of fodder and water prevails in parts of the Province. Prices are fluctuating.

**HYDERABAD:** Rainfall—6 cents. Harvesting of the winter rice crop continues in parts, and fields are being prepared for monsoon sowings. A scarcity of water is felt in certain taluks. Prices of grain show a tendency to fall. Prices—wheat 10, coarse rice 10½, and *juar* 25 seers per current sicca rupee.

**Central India.**—*For week ending 17th May.*—Slight rain with hail fell in Jhabua and light showers in Bhopal and Indore during the week. Agricultural operations are in progress in Malwa and Bhopawar and have been completed elsewhere. Agricultural stock and pasturage are in good condition. Prices are normal throughout Central India. The condition of opium is fair in Malwa.

**Rajputana.**—*For week ending 17th May.*—Rainfall ranging from over half inch to 18 cents fell at Kerowlee, Bhurtpore, the Deva pargana of Jeysulmere, Ulwar, Haraoti, Bikanir, and few cents at Jeypore and Kishengarh. Harvesting and threshing continue. Land is being prepared in Ajmere and elsewhere for the autumn crops. Agricultural stock is in fair to good condition, but poor in Meywar and Haraoti. Fodder scarcity prevails except in three States. Prices are rising in Bhurtpore and Ulwar; falling in Jhallawar; and are steady elsewhere. Two persons emigrated from Merwara during the week. The total emigration from Merwara up to date numbers 4,416. The numbers employed on relief works were—Ajmere 591, Merwara 4,458, and Marwar 940. The number on gratuitous relief in Ajmere-Merwara was 160. Prices—Ajmere 19½, Beawar 22, and Marwar 15 seers per rupee.

**Kashmir.**—*For week ending 16th May.*—The weather is fine. Prospects of the spring crops are excellent. Prices continue below normal. Rice—27 seers per rupee.

**JAMMU PROVINCE.**—*For week ending 17th May.*—There was slight rain during the week. Prices are generally stationary. Prices—wheat from 18 to 25 and maize 29 to 34 seers per rupee. The condition of the standing crops is generally fair, but they are suffering in the Jasrota district for want of rain. Reaping and threshing of spring crops are in progress. Fodder is sufficient.

**Nepal.**—*For week ending 13th May.*—Rainfall—0.71 inch. The weather has been very warm. The wheat crop is doing well. Indian-corn and up-land rice are still being sown. Rice—9½ seers per rupee.

M. FINUCANE,

*Offg. Secretary to the Government of India.*

GOVERNMENT OF INDIA.

SUPPLEMENT TO

# The Gazette of India.

---

No. 21.

CALCUTTA, SATURDAY, MAY 27, 1899.

---

## OFFICIAL PAPERS.

*A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully or usefully be known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.*

*Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees ten per annum if delivered in Calcutta or Rupees nine if sent by Post.*

*No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.*

**Weather Review of India for the Week ending at 8 a.m. on  
Saturday, May 20th, 1899.**

Throughout the whole of the present week the pressure conditions over India have been abnormal. Pressure has been lowest over the Western desert, and from North-West India a trough or tongue of relatively low pressure has extended east-south-eastward and south-eastward across Northern India to the Orissa or Madras Coast. As a consequence of this distribution, there has been a flow of air up the Bay, while over Bengal and the Gangetic Plain the wind has been south-easterly and easterly. Hence the air has been unusually damp, and an exceptional amount of rain has fallen over Burma, Bengal and parts of Northern India, and the mean temperature over these regions has been much below the normal average. Over the central parts of India the winds have been light and variable, while over the Peninsula the direction has been westerly and north-westerly. In these two regions the weather has been less disturbed than within the region of easterly winds, but still dust and thunder storms, accompanied with rain, have been fairly frequent. Quite at the close of the week a small storm, the third recorded this season, developed at the head of the Bay and gave disturbed weather and very heavy rain over Deltaic Bengal. The weather at this time was generally cooler than usual except in parts of North-West India and of the west of the Peninsula.

**Daily Summary.**—*Sunday, May 14th.*—The barometer read lowest over the Western desert, relatively low within a tongue which extended from Rajputana south-eastward to Ganjam and high over the west of the Peninsula, Burma and along the foot of the Himalayas. The winds were westerly and north-westerly over the Peninsula and south-easterly to easterly over Burma and Northern India. The sky was cloudy in places, and rain had been received over parts of Burma, Bengal, Assam, the North-West Himalayas, the Peninsula and some central districts. The amounts were heavyish in parts of Madras and of Deltaic Bengal. The heat was less than usual over a large part of Burma, Bengal, the east of the North-West and Central Provinces and the east of the Peninsula and above the average elsewhere.

*Monday, May 15th.*—The barometer had fallen, but there had not been much change in the conditions of pressure except that gradients had increased over the Bay. The winds were also practically unchanged except that the force was lower. There was a good deal of cloud, and rain had fallen fairly generally over Burma, Assam and Lower Bengal and as scattered showers over the North-West Himalayas, the submontane districts of North-West India and some central and southern districts. The largest amounts (between  $1\frac{1}{2}$  inches and  $2\frac{1}{2}$  inches) were reported from Burma and Bengal. The mean temperature had fallen to below the normal along the foot of the North-West Himalayas and remained low over part of Burma, Bengal and the east of the Peninsula.

*Tuesday, May 16th.*—Pressure had continued to decrease in most places, but there was still no change in the general distribution of pressure. The winds remained westerly and north-westerly over the Peninsula, southerly and south-easterly in Burma and south-easterly to easterly in Bengal and Northern India. The sky was more or less cloudy except over Central and North-West India. Rain had again fallen fairly generally over Burma, Assam, Bengal, the Kashmir Himalayas and the south-west of the Peninsula, while a few local showers had been received in other parts of the country. The rainfall amounts were unusually large over Lower Bengal.

*Wednesday, May 17th.*—The barometer had risen over Burma, North-East India, the Gangetic Plain, the Central Provinces and North Madras and had fallen or been steady elsewhere. As a result, the tongue of relatively low pressure had been moved southward and ran south-south-eastward from North-West India to the Coromandel Coast. Otherwise there had been no important change. The winds were lighter and somewhat more irregular, but remained on the whole westerly and north-westerly over Central and Southern India and south-easterly to easterly in Burma and Northern India. There was a good deal of cloud except in parts of North-West India. Rain had again fallen fairly generally over Burma, Assam and Bengal, while scattered showers had occurred in other parts of the country. The largest amounts continued to be reported from East Bengal. The weather was cool all over North-East India.

*Thursday, May 18th.*—Pressure had increased almost everywhere—briskly to rapidly in the north and slightly in the south. Pressure was lowest in the north-west, and the tongue of relatively low pressure continued to run south-eastward and south-south-eastward to the Madras Coast. The winds were practically unchanged. Rain continued general and moderately heavy over Burma and East Bengal, and a few scattered showers had fallen in other parts of the country. The mean temperature was low except in the Punjab, Rajputana, Sind, Bombay and the south of the Peninsula. The excess was large in the Punjab and the deficiency large in the North-West Provinces, the Central Provinces and West Bengal.

*Friday, May 19th.*—Pressure had changed very little, and the pressure conditions were practically unaltered, but the barometric differences over the Bay were much greater than usual. There had been again no important change in the winds. Rain had been general over Ceylon, the south of the Peninsula, Burma and East Bengal, and scattered falls were reported from other parts of the country. The rainfall had been much heavier than usual and at Colombo had been particularly heavy (5.55 inches). The heat had been greater than usual over the Bombay Presidency, Rajputana, Sind, the west of the Punjab, Assam and Tenasserim and had been below the normal elsewhere.

*Saturday, May 20th.*—There had been practically no change in the barometer or the general conditions of pressure except at the head of the Bay where pressure had given way rapidly and a small storm had developed. The winds were cyclonic and fresh to strong in force in Deltaic Bengal, but were unchanged in other places. There was again a good deal of cloud except in North-West India, and general rain was still reported from Burma, Assam, Bengal (Proper) and the south of the Peninsula, while scattered showers had fallen in other parts of the country. Saugor Island had received 6.86 inches of

rain and other places in North-East India had received considerable to large amounts. The mean temperature was in moderate excess in the Punjab and Rajputana and in slight excess in parts of the west of the Peninsula, Assam and Tenasserim.

**Temperature.**—The rainfall around the Bay area (but particularly in the north) has kept temperature low in this locality, while the south-east winds, which have blown from Bengal into Upper India, have carried these low temperatures north-westward up the Gangetic Plain as far as the east of the Punjab. These winds did not extend beyond the East Punjab, and the West Punjab, Rajputana and Sind have been steadily under the influence of excessive temperatures.

The following table gives the mean temperature variation data for the week :

PROVINCE.	MAY 1899.							Mean variation of week.
	14th	15th	16th	17th	18th	19th	20th	
Burma . . . . .	—1.0	—0.6	—1.8	—1.3	—2.6	—1.0	—1.3	—1.4

South India . . . . .	—0.3	+0.1	+1.5	—0.5	+1.5	+0.4	—2.2	+0.1
Mean for whole of India . . . . .	+0.6	+0.3	—0.1	—0.4	—0.4	—0.9	—1.4	—0.3

Except on the 20th, when it was in some defect, the mean temperature of the whole country was very nearly normal on each day of the week. The provincial variations exhibited, however, large departures from the normal, thus in Rajputana and Sind the excess averaged as much as 4.8°, while in Chota Nagpur the deficiency averaged as much as 6.3°. In the Punjab, Sind and Rajputana the heat was more or less excessive and in Burma, Bengal, Orissa, Bihar and Chota Nagpur more or less deficient on each day of the week, but in most provinces the variations were irregular and varied from day to day.

The following were the highest maxima reported on each day :

May 14th . . . . .	114.7°	at Jacobabad.
" 15th . . . . .	118.5°	" Do.
" 16th . . . . .	115.2°	" Hyderabad (S.).
" 17th . . . . .	120.0°	" Jacobabad.
" 18th . . . . .	115.7°	" Hyderabad (S.).
" 19th . . . . .	117.1°	" Jacobabad.
" 20th . . . . .	117.1°	" Do.

The hottest area was thus Sind throughout the week.

**Rain.**—As mentioned above, unusual conditions of pressure and unusual winds have prevailed over India during the week under review. Large pressure differences have existed over the Bay, and a fresh southerly wind has blown from the Bay into Burma and Bengal, and backing to south-east and east has passed on up the Gangetic Plain as far as the south-east of the Punjab and the Kumaun Himalayas. Over the whole of the area, influenced by these winds, the rainfall of the week has been generally heavier than usual, while over parts of Burma and of Bengal the rainfall was unusually constant for the time of year. In the central parts of the country and over the Peninsula the winds were generally north-westerly and westerly during the week, while the rainfall was generally light and scattered, falling ordinarily during the occurrence of dust and thunder storms. The rainfall returns show that in Burma rain fell almost daily during the week; in Assam also the rainfall was almost daily; in Bengal the fall was scattered throughout the week except in Orissa where rain occurred on the 15th, 16th and 20th, and in Bihar when it occurred on the 16th, 17th and 18th; over the Gangetic Plain rain occurred on different days throughout the week, while in the Punjab there were a few scattered showers mainly on the 14th, 15th and 16th. In the west of the Peninsula the rainfall mainly occurred on the 14th and 16th and in the east on the 14th, 15th and 16th, and again on the 19th, while over the central districts of India the fall was mainly on the 14th and 15th.

The rainfall table at the close of the summary shows, that during the week under review, rain fell in all the rainfall divisions of India except Gujrat, Kathiawar, Sind, Baluchistan, Western Rajputana and the Jaipur division of the East Coast (North), but in the case of South Bihar, the South Punjab, the West Punjab, the Konkan and Khandesh the average actual rainfall of the week was less than one-tenth of an inch, so that the rainfall was either actually or practically *nil* in all the above eleven divisions. In all the other divisions effective rain was received, the amounts varying from 7'34 inches in East Bengal, 3'94 inches in the Surma division of Assam and 3'89 inches in Deltaic Bengal, to 0'14 inch in the North Punjab, 0'19 inch in the Bombay Deccan, 0'10 inch in Berar, 0'13 inch in the central division of the Central Provinces, 0'12 inch in the east of Central India and 0'11 inch in the south division of Hyderabad. The third column of the table shows that the week's rainfall exceeded the average normal rainfall in Central and Upper Burma and Arakan, the Assam Valley, all the Bengal divisions, except Chota Nagpur and South Bihar, all the North-West Provinces divisions, the Punjab Hills, Mysore, Berar, all the Central Provinces divisions, the north and south divisions of the East Coast and the central and south-central divisions of Madras. In all the remaining divisions the week's rainfall was less than usual. The excess was greatest in the north-east and amounted to 5'69 inches in East Bengal, 2'87 inches in Deltaic Bengal and over 1 inch in Upper Burma, Arakan, North Bengal, the Bengal Hills and North Oudh. The principal cases of deficiency were 3'54 inches in Tenasserim and 2'14 inches in the Assam Hills.

The following were the principal large totals recorded at individual stations during the week:

Burma	Kindah	9'17 inches.
	Magók	6'50 "
Assam	Suranganj (Sylhet)	9'48 "
Bengal	Patnakhali (Barisal)	12'23 "
	Diamond Harbour	9'51 "
	Jaipalguri	7'77 "
N.-W. P.	Lakhimpur	3'56 "
Punjab	Hoshiarpur	1'90 "
West Peninsula	Kasargod (Mangalore)	6'40 "
East Peninsula	Salur (Vizagapatam)	4'33 "
	Turaiyur (Trichinopoly)	4'30 "

The three concluding columns of the table show that the rainfall for the period February 26th to May 20th has been less than the normal (by 20 per cent. or more) in Tenasserim, the west submontane and hill districts of the North-West Provinces, all the Punjab divisions, the central division of the Central Provinces, Kathiawar, the east of Central India and Western Rajputana. In all the other places the total rainfall has been normal or in excess of the normal.

PROVINCE.	DIVISION.	RAINFALL DATA FOR WEEK ENDING MAY 20th, 1899.			RAINFALL DATA FROM FEBRUARY 1ST TO MAY 20th, 1899.

SIMLA, 25th May, 1899.

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

## Weekly Report on the state of the Season and Prospects of the Crops.

**Madras.**—*For week ending 20th May.*—Rain fell almost throughout the Presidency during the week; the fall was considerable for the season in parts of the Circars and in the Central districts, but very light in the extreme South. The water-supply is generally sufficient for the season. Cultivation is proceeding, such crops as are standing being generally in good condition. Pasture is scanty, but fodder is sufficient and the condition of cattle is generally good. Prices are almost stationary.

**Bombay.**—*For week ending 24th May.*—There was moderate or light rain in parts of seven districts during the week. Preparations for monsoon cultivation are progressing generally; and sowing is going on in Karachi, Shikarpur, and Kanara. Fodder is sufficient, except in parts of Sind and Baroda territory. Agricultural stock is healthy. Prices have risen in four and fallen in three districts; elsewhere they are stationary.

**Bengal.**—*For week ending 22nd May.*—The weather throughout the week was unsettled and rain varying in amount fell all over the Province. In some parts of Bengal Proper the rain was in excess of present agricultural requirements. Ploughing and early sowings are going on and sugarcane and other crops in the ground are doing well. The harvesting of spring rice is proceeding. The price of common rice shows a slight rise in some districts, but is on the whole stationary. The fodder-supply is generally reported to be sufficient.

**North-Western Provinces and Oudh.**—*For week ending 24th May.*—Rain has been general during the week, the falls being heaviest in the sub-montane and eastern districts. The standing crops are doing well and are being irrigated where necessary. The extra crops are being harvested in parts. Weeding of sugarcane has begun. Preparation of fields for the autumn crops and sowings continue. Prospects are favourable and supplies and fodder are sufficient. Prices have risen in a few districts, but are otherwise stationary to falling.

**Punjab.**—*For week ending 24th May.*—Slight rain is reported from Hissar, Umballa, Delhi, Ferozepore, Sialkot, Shahpur, and Rawalpindi. Spring crops are being threshed and housed. Sowings of autumn crops continue in Multan and Peshawar. Cotton and sugarcane are being weeded in Sialkot and ground for autumn sowings is being prepared in Umballa. The outturn is reported average in Hissar, Jullundur, Lahore, and Dera Ismail Khan. The condition of the extra spring crops is good in Umballa, Sialkot, and Peshawar; fair or average in Delhi, Jullundur, Ferozepore, Lahore, and Dera Ismail Khan; and very fair in Hissar. Some damage has been done to crops by strong winds in Lahore. The condition of cattle is poor in Hissar, Delhi, and parts of Dera Ismail Khan; fair in Sialkot; and good elsewhere. Fodder is scarce in Hissar, Delhi, Shahpur, and parts of Dera Ismail Khan; and is sufficient elsewhere. Prices, especially

of wheat, have risen in Sialkot and Dera Ismail Khan; fallen in Umballa, Julundur, Rawalpindi, and Peshawar; and remained unchanged elsewhere. Wheat is selling from 17½ to 23, barley 32, gram 19½ to 22½, maize 28 to 35, great millet 24, bulrush-millet 18 to 27, and rice 13½ to 14½ seers per rupee.

**Central Provinces.**—*For week ending 23rd May.*—The weather has been generally cloudy and hot with high winds. Rain has fallen in all districts, except Jubbulpore and Chanda. Raipur received nearly 2 inches and Bilaspur over an inch. The threshing of the spring crops has been completed in all the districts. Preparation of land for autumn crops is in progress. In Saugor the labouring classes complain of want of work. About 2,208 persons are in receipt of relief in the Damoh district. Water is scarce in parts of Mandla, Chhindwara, Chanda, and Bhandara. Fodder is insufficient in parts of six districts. The price of wheat, rice, and *juar* has fallen in some districts and has risen in others. The cheapest prices are—wheat 20, gram 35, rice 23, and *juar* 26 seers per rupee; the dearest prices are—wheat 14, gram 18, rice 10, and *juar* 22 seers per rupee.

**Burma.**—*For week ending 20th May.*—In Lower Burma ploughing has commenced in parts of Thongwa and Amherst. In Upper Burma reaping of dry weather paddy continues in Thayetmyo, Bhamo, Katha, Shwebo, the Lower and Upper Chindwin and is completed in Pakokku and in parts of Mandalay. Ploughing for early wet weather crops is going on in most districts. Sowing of early paddy on hill sides in Bhamo, Myitkyina, and the Ruby Mines district and in the Shan States; transplanting in Kyaukse; sowing of cotton in Sagaing; and of upland crops in parts of Meiktila and Yamethin have commenced. The standing crops are doubtful in Katha; fair in the Ruby Mines district; poor in parts of Mandalay; and good elsewhere. The price of paddy has fallen in Amherst, Bassein, Prome, and Myingyan and has risen in the Upper Chindwin and in Thongwa; elsewhere it is stationary.

**Assam.**—*For week ending 19th May.*—The weather is seasonable. Sowing of early rice, planting of sugarcane, and plucking and manufacture of tea are in progress. Prospects of tea are generally good, but red spider is prevalent in parts of Darrang. Land is being prepared for late rice; reaping of low land transplanted rice is nearly finished in Sylhet and the outturn is good. Sowing of jute is finished in Goalpara. Prices—common rice—Sylhet 21, Dhubri 16, Gauhati 15, Tezpur and Sibsagar 12, and Nowgong and Dibrugarh 14 seers per rupee.

**Mysore and Coorg.**—*For week ending 24th May.*—**MYSORE:** Rainfall—2 inches 23 cents in the Civil and Military station and rain general and good in parts of the Province. Prospects are favourable. Prices have slightly fallen in Kolar and Kadur; and risen in Tumkur and Hassan. *Ragi* (*Eleusine coracana*) has been sown in parts of Mysore, Kadur, and Hassan.

**COORG:** Rainfall—18 cents. Ploughing for rice continues. Coffee-berries are forming. Prices of food-grains are stationary. Water and fodder for cattle are sufficient.

**Berar and Hyderabad.**—*For week ending 24th May.*—**BERAR:** The weather is hot and cloudy. Breaking up of land for the ensuing monsoon crop continues. Fodder is insufficient in parts of the Wun district. The water-supply is inadequate in parts of the Province. Prices are almost steady.

**HYDERABAD:** Rainfall during the week 10 cents. The winter rice crop has suffered from unseasonable rain in two districts, but in other parts harvesting continues. Preparation in fields for the monsoon sowings is in progress. Water scarcity continues to be felt. Prices of grain are stationary. Prices—wheat 10, coarse rice 10½, and *jowari* 25 seers per current sicca rupee.

**Central India.**—*For week ending 24th May.*—Slight rain fell during the week in all Agencies, except Bundelkhand. Agricultural operations have been completed. Agricultural stock and pasturage are in good condition. Prices are above normal in Bundelkhand and normal elsewhere.

**Rajputana.**—*For week ending 24th May.*—Rain ranging from about 1½ inches to 11 cents fell at Pertabgarh, Meywar, Kotah, Haraoti, Ajmere, Kerowlee, Dholepore, and Bhurtpore. Agricultural operations are proceeding satisfactorily. Land is being prepared in all parts for the autumn crops. Agricultural stock is in fair to good condition. Fodder scarcity prevails in the States mentioned last week. Prices are rising in Jhallawar and Bhurtpore; and are steady elsewhere. The numbers employed on relief works were—Ajmere 413, Merwara 4,644, and Marwar 935. There are 238 persons on ordinary works and 191 on gratuitous relief in Ajmere-Merwara. Prices—Ajmere 20, Beawar 22, and Marwar 15 seers per rupee. Arrangements are being made to supplement the water-supply in Kherwara, where wells are failing.

**Kashmir.**—*For week ending 23rd May.*—The weather is fine. Prospects of the spring crops are excellent. Prices continue below normal. Rice—27 seers per rupee.

**JAMMU PROVINCE.**—Report not received.

**Nepal.**—*For week ending 20th May.*—Rainfall—1·16 inches. The weather is seasonable. Sowing of indian-corn and upland rice is still in progress. Wheat prospects are good. Rice—9½ seers per rupee.

M. FINUCANE,

*Offg. Secretary to the Government of India.*

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

No. 18—17-2.

*Extract from the Proceedings of the Government of India in the Department of Revenue and Agriculture (Geology and Minerals),—dated Simla, the 20th May, 1899.*

## Read the undermentioned papers—

Department of Revenue and Agriculture Resolution No. 15—27-4, dated the 12th December 1894.

Department of Revenue and Agriculture Circular to Local Governments and Administrations, No. 16—27-5, dated the 13th December 1894.

Department of Revenue and Agriculture Circular to Local Governments and Administrations, No. 17—27-6, dated the 13th December 1894.

Despatch to Her Majesty's Secretary of State for India, No. 74, dated the 21st October 1897.

Despatch from Her Majesty's Secretary of State for India, No. 16 (Revenue), dated the 19th January 1899.

## RESOLUTION.

The Governor General in Council is pleased to prescribe the following revised rules for regulating the grant by Local Governments of licenses to explore and prospect for minerals and the grant of mining leases in British India:

**Rules for the grant of licenses by Local Governments to explore and prospect for Minerals, and of Mining Leases in British India.**

The following rules regulating the grant by Local Governments of licenses to explore and prospect for minerals and the grant of leases of mines and minerals have been made by the Governor General in Council, and sanctioned by the Secretary of State for India in Council.

No such license or lease can be granted by any Local Government otherwise than in accordance with these rules, except with the previous sanction of the Secretary of State for India in Council, or with that of the Governor General in Council under any general or special authority which he may have received in this behalf from the said Secretary of State in Council.

## In these rules—

Collector means the Revenue Officer in charge of the district;

Local Government includes a Chief Commissioner; and

Person includes any persons, syndicate, partnership, or Company.

A license or lease under these rules may be granted to any person; in case of the death of the person or any of the persons to whom it is granted it shall inure for the benefit of his legal representatives.

## Exploring Licenses.

1. A license to explore land for minerals or mineral oil, called hereinafter an exploring license, will authorise the licensee to search the surface of the land specified in the license for minerals of every description and for mineral oil, and, subject to such restrictions as the Local Government may from time to time impose, to remove any specimens or samples found by the licensee in or upon such land.\*

2. Such license shall only be granted with respect to land in which the mines, minerals, or mineral oils are the property of the Government, and (subject to the provisions of any law, or rule having the force of law, for the time being in force with reference to such land) shall not authorise the licensee to enter upon any land in the occupation of any person without the consent of the occupier.

\* *Note.*—The surface of unoccupied and unreserved land which is the property of Government may be freely searched without a license, but the Government does not object to granting a license to explore when one is applied for.

3. Such license cannot be assigned, nor can any right or interest thereunder be transferred without the assent of the Local Government.

4. Such license shall not authorise the licensee to mine or quarry, but he may turn up to such depth as the Collector may sanction, and, subject to such conditions as he may impose, the surface of unoccupied land, or, with the consent of the occupier, that of land which the Government has granted for agricultural purposes, reserving only the right to minerals.

5. Such license may be granted by such person and under such rules as the Local Government may prescribe.

6. Every such license shall run for one year, but may be renewed for a further similar term by the same authority, and there shall be paid for each license or renewal such fee, not exceeding Rs. 10, as the Local Government may prescribe.

7. A royalty shall be payable to Government on the value of all precious stones found and removed by an explorer, whether he has taken out a license or not. In the case of licenses such royalty shall be at such rate, not exceeding 15 per cent., as shall be fixed by the license, and in the case of an unlicensed explorer, shall be 15 per cent. on the value of the stones removed. Neglect to report the discovery of any such stone within a reasonable time shall involve the forfeiture of the license and of all claim to have an application for a mining or prospecting lease favourably considered.

8. Such license shall give no exclusive or preferential rights, but in considering rival claims for a prospecting license or mining lease, due regard will be had to operations conducted under cover of an exploring license.

#### Prospecting Licenses.

9. (1) A license to prospect for minerals or mineral oil, called hereinafter a prospecting license, shall confer on the licensee the sole right, subject to the conditions contained in the license, to mine, quarry, bore, dig and search for, win, work, and carry away any mineral or mineral oil specified in the license, and lying or being within, under, or throughout the land specified in the license.

(2) A prospecting license shall only be granted with respect to land in which the mines, minerals, or mineral oils are the property of the Government, and shall apply only to the area described in the license.

10. No prospecting license shall be granted except to a person approved by the Local Government, and such person shall, before the license is granted, deposit as security in respect of each license such sum, not being less than Rs. 100, as the Collector may determine, or give security to the like amount to the satisfaction of the Collector. Subject to such deduction on account of compensation for surface damage or otherwise as the Collector may order, the amount of any deposit made under this rule, should the depositor afterwards become the lessee of any mining lease, will be carried to his credit as part of the rents and royalties payable under his lease, and should he decline or fail to obtain any such lease as aforesaid, will be returned to him.

11. (1) Every application for a prospecting license shall, unless the Local Government shall in any case otherwise direct, be made to the Collector of the district, in which the land or some part of the land with respect to which the license is required is situate.

(2) Every such application shall contain the following particulars, namely :

- (a) the name, residence, and profession of the applicant ;
- (b) a description, as accurate as possible, and illustrated by a rough sketch, of the situation, boundaries, and area of the land with respect to which the license is required ; and
- (c) a specification of the mineral or minerals for which the applicant desires to prospect.

(3) Every application shall be accompanied by a certificate that the applicant has been approved by the Local Government, under the signature of one of its secretaries.

12. On receipt of any such application the Collector shall, as soon as practicable, inquire whether the grant of the license applied for is inexpedient either on the ground that the land described in the application is required for a public purpose, or otherwise.

13. (1) Should the Collector be of opinion that it is not expedient to grant the license, or should he find that the licensee has not been approved by the Local Government, he shall refuse to grant the license, and shall forthwith report the matter through the proper channel to the Local Government, which may pass such orders as it may think fit.

(2) Subject to the control of the Local Government, the Collector, if he finds that there is no objection to the grant of the license applied for, and if the applicant has been

approved by the Local Government, may grant to the applicant a license in such form as may be prescribed, and shall report the matter to the Local Government or such other authority as the Local Government may direct.

14. A register of applications for prospecting licenses shall be kept in English in the Collector's office, specifying—

- (1) Name of applicant.
- (2) Date.
- (3) Residence of applicant.
- (4) Situation of the land.
- (5) Boundaries.
- (6) Estimated area.
- (7) Date of certificate of approval of applicant by the Local Government.
- (8) Date of license.
- (9) Rent and royalty payable.
- (10) Period for which granted.

15. Every prospecting license shall contain such conditions as may in any particular case seem necessary, and shall in all cases contain the following conditions:

- (i) The term for which the license shall be granted shall be one year or such shorter term as the applicant may desire. The license may be renewed by the Collector for a further term not exceeding two years, whenever he is satisfied that the licensee has been prevented from completing his search of the land by any cause other than his own default.
- (ii) A moderate rent not exceeding one rupee per acre shall be paid for the land covered by the license.
- (iii) The licensee shall pay a royalty at a rate not exceeding 15 per cent. of the value on all precious stones won and carried away, and a royalty at the rates specified in Schedule C on all other minerals won and carried away over and above such quantity as the Collector, subject to the orders of the Local Government, may allow to be taken free for purposes of experiment.
- (iv) No land in the occupation of any person shall be entered upon without the consent of the occupier, and no trees, standing crops, or other private property shall be cut or in any way injured without the consent of the owner thereof.
- (v) The licensee shall make and pay reasonable satisfaction and compensation for all injury which may be done by him in exercise of the powers granted by the license, and shall indemnify the Government against all claims which may be made by third parties in respect of any such damage or injury.
- (vi) The licensee shall not cut or injure any tree on unoccupied and unreserved land without the permission of the Collector in writing.
- (vii) Such license cannot be assigned nor can any right or interest thereunder be transferred without the consent of the Local Government.
- (viii) In case of any breach on the part of the licensee of any of the five last preceding clauses, the Collector may summarily revoke the license, and thereupon all rights conferred thereby or enjoyed thereunder shall cease.
- (ix) The licensee shall, within six months next after the determination of the license or the date of the abandonment of the undertaking, whichever shall first occur, securely plug any bores and fill up or fence any holes or excavations that he may have made in the land to such extent as the Collector may require, and shall to the like extent restore the surface of the land and all buildings thereon which he may have damaged in the course of prospecting: Provided that this clause shall not apply to any land held under a mining lease.
- (x) Should any question of dispute arise regarding the license, or any matter or thing connected therewith, or the powers of the licensee thereunder or the amount or payment of the rent or royalty made payable thereby, the matter in difference shall be decided by the Local Government, whose decision shall be final.

16. On or before the determination of his license the licensee shall have a right, subject to the rules hereinafter contained—

- (a) in the case of mineral oil or minerals other than precious stones, to a mining lease in accordance with the terms contained in rules for mining leases:

- (b) in the case of precious stones, to the first offer of such mining lease as the Governor General in Council may think fit to grant.

Such lease may include so much land, whether comprising the whole or a part only of the area for which the prospecting license was granted, as shall not exceed the area specified with respect to mining leases in Schedule A annexed to these rules.

#### Mining Leases.

17. (1) Every application for the grant of a mining lease, not being a lease of a mine of precious stones, shall be presented to the Collector in whose district the land or some part of the land with respect to which the lease is applied for is situate. The Collector shall forward the application through the proper channel to the Local Government. The Local Government may by general or special order require a deposit of money not exceeding Rs. 500 to be made by the applicant in any case or class of cases before the application is taken into consideration.

(2) No mining lease shall be granted otherwise than with respect to land in which the mines, minerals, or mineral oils are the property of Government.

18. Every application for a mining lease shall contain—

- (a) the name, residence, and profession of the applicant ;
- (b) the name of the mineral for which the applicant intends to mine ;
- (c) a map of the area over which the proposed lease is to extend.

19. On receipt of any such application the Local Government may, if the applicant is entitled to a lease under Rule 16, or if it considers that the applicant should be granted a mining lease, grant the same in accordance with these rules over such one or more blocks, each not exceeding in extent the area specified in Schedule A annexed to these rules, as the Local Government may think fit :

Provided that no mining lease shall be granted by a Local Government under these rules so as to cause the total area held under mining leases by the lessee, or by those joint in interest with him, to exceed ten square miles.

No such lease shall be executed until it has been approved by the Advocate General or other legal adviser, if any, appointed for the Province.

20. Without the previous sanction of the Governor General in Council, the length of a block shall not be allowed to exceed four times its breadth.

21. The term for which a mining lease may be granted shall not exceed thirty years, and no covenant for renewal may be inserted in the lease without the sanction of the Governor General in Council.

22. Every such lease shall contain such conditions and stipulations as the Local Government may in each case consider necessary ; but shall in every case contain the following conditions, namely :

- (i) the lessee shall pay a royalty at the rate specified in the lease, which rate shall be that fixed for the particular mineral in Schedule C ; and if any other mineral shall be discovered by him, then the royalty shall be paid therefor at such rate, not being less than 20 per cent. of the value thereof, as the Local Government may determine, until a mining lease has been obtained in respect of such mineral ; but the lessee shall be entitled to require and obtain such lease for the term then unexpired of his original lease upon the terms hereinbefore mentioned in Rule 16 ;
- (ii) the lessee shall also pay for every year after the first year a fixed yearly dead rent at a rate not less than that laid down in Schedule B ; provided that no lessee shall pay both royalty and dead rent in respect of the same lease, but only such one of them as may be of the greater amount ;
- (iii) the lessee shall also pay for all land which he may take up, use, or occupy for the purpose of the mine a surface rent at the rate specified in Schedule B ;
- (iv) the lessee shall at his own expense erect and at all times maintain and keep in repair boundary marks and pillars according to the demarcation to be shown in a plan annexed to his lease ;
- (v) the lessee shall make and pay reasonable satisfaction and compensation for all injury which may be done by him in exercise of the powers granted by the lease, and shall indemnify the Government against all claims which may be made by third parties in respect of any such injury ;
- (vi) the lessee shall not cut or injure any tree reserved in the lease ;

- (vi) neither the lessee nor any person claiming through or under him shall assign the lease or transfer any right or interest thereunder, or underlet the whole or any portion of the premises comprised in such lease, without the assent of the Local Government first had and obtained ;
- (viii) the lessee shall commence operations within two years from the date of the execution of the lease, and shall thereafter carry them on effectually in a proper, skilful, and mininglike manner unless prevented by unavoidable cause ;
- (ix) the lessee shall keep correct accounts showing the quantity and particulars of all minerals obtained from the mine and the number of persons employed therein, and also complete plans of the mine, and shall allow any officer authorised by the Local Government in that behalf at any time to examine such accounts and plans, and shall furnish the Local Government with such information and returns in respect of the aforesaid matter as it may prescribe ;\*
- (x) the lessee shall allow any officer authorised by the Local Government in that behalf to enter upon the premises comprised in the lease for the purpose of inspecting the same ;
- (xi) the lessee shall without delay send to the Collector a report of any accident which may occur at or in the said premises, and also the finding therein of any mineral not specified in the lease ;
- (xii) should the royalty or rent reserved or made payable by the lease be not paid within two months next after the date fixed in the lease for the payment of the same, the Local Government may enter upon the said premises and detain all or any of the minerals or moveable property therein, and may carry away or detain them until the rent or royalty due and all costs and expenses occasioned by the non-payment thereof shall be fully paid ; and, if any royalty or rent remain at any time unpaid for six calendar months after the date on which it is due, the Local Government may determine the lease and take possession of the premises comprised therein ;
- (xiii) in case of any breach on the part of the lessee of any covenant or condition contained in the lease, the Local Government may determine the lease and take possession of the said premises ;
- (xiv) at the end or sooner determination of the lease, the lessee shall deliver up the said premises and all mines (if any) dug therein in a proper and workmanlike state, save in respect of any working as to which the Local Government may have sanctioned abandonment ;
- (xv) should any question or dispute arise regarding the lease or any matter or thing connected with the mines and minerals leased, or the working or non-working thereof, or the amount or payment of the royalty or rent reserved or made payable by the lease, the matter in difference shall be decided by the Local Government, whose decision thereon shall be final.

23. No lease of a mine of precious stones shall be granted except by the Governor General in Council. The procedure for obtaining and the conditions of such lease shall be those prescribed by Rules 17 to 22, read as if the Governor General in Council were substituted for the Local Government.

#### General Provisions as to Licenses and Leases.

24. (1) All operations conducted under the authority of these rules within a reserved forest shall be subject to such conditions as the Local Government may by general or special order from time to time prescribe.

(2) It shall be a condition of every license granted under these rules that, before the commencement of exploration or prospecting (as the case may be) within a reserved forest, notice shall be given to the District Forest Officer of the intention to commence operations, and that the operation shall be conducted subject to any conditions regarding the use of fire that he may prescribe.

(3) Every mining lease which includes any portion of a reserved forest shall, if it authorises the lessee to fell timber for mining purposes, specify the area within which, or the quantity up to which, and the terms and conditions upon which, he may exercise that authority.

25. Should the applicant for a prospecting license or mining lease desire the Collector to prepare for him the sketch required by Rule 11 (2) (d) or the map required by Rule 18 (c), or should the sketch or map presented by the applicant be insufficient, the Collector may prepare the sketch or map required, and may, if he so order, recover the cost from the applicant at a rate not exceeding 4 annas per acre. If the Local Government has prepared a map of a tract of country specially for the convenience of intending applicants for licenses

\* Note.—All information and returns obtained or furnished under this clause shall be treated as strictly confidential.

and leases under these rules, and if any applicant makes use of such map for the sketch or map aforesaid, it will be open to the Local Government to recover as above such share of the cost of preparing the map as it may consider to be equitably due from such applicant.

26. If a license or lease is not executed within six months after leave has been granted for it, the right of the applicant to such license or lease shall be held to have lapsed, unless the Local Government for special reasons consents to grant the same notwithstanding the delay.

SCHEDULE A.

(Vide No. 19 of Rules.)

Maximum area in square miles for Mining-lease—

Coal	2
Oil	1
Gold or silver	1
Metals	1
Precious stones	1

SCHEDULE B.

(Vide Nos. 15 (ii), 22 (ii), and 22 (iii) of Rules.)

—	Prospecting.	Mining.	
		Surface Rent per Acre.	Dead Rent per Acre (minimum).
Rent charged for—			
Coal	A moderate rent not exceeding one rupee per acre.	The rent rate assessable under the Revenue or Rent law of the Province; or, if no such rent is so assessable, the rate which may be fixed by agreement, subject to a maximum of one rupee.	4 annas.
Oil			1 rupee.
Gold or silver			1 rupee.
Iron			1 anna.
Other metals			1 rupee.

SCHEDULE C.

(Vide Nos. 15 (iii) and 22 (i) of Rules.)

Prospecting and Mining.

Royalty—

Coal, exclusive of dust and coal used on the works.	1 anna per ton.
Oil	8 annas per 40 gallons or 5 per cent. <i>ad-valorem</i> on gross value.
Gold or silver	7½ per cent. on the net profits of each year taken separately.
Iron	½ anna per ton of ironstone.
Copper, tin, lead, or other metals	2½ per cent. on the sale value at the pit's mouth or on the surface, of the dressed ore or metal, convertible at the option of the lessee to an equivalent charge per ton to be fixed annually or for a term.
Precious stones	30 per cent. on the net profits of each year taken separately.

\* Will be decided by the Government of India in each case on its merits.

ORDER.—Ordered that a copy of this Resolution be forwarded to all Local Governments and Administrations for information and guidance, and that a copy be forwarded to all Departments of the Government of India, to the Director, Geological Survey of India, and to the Inspector General of Forests, for information.

Ordered, also, that the Resolution be published in the Supplement to the *Gazette of India* for general information.

[True Extract.]

M. FINUCANE,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

RAILWAY.

EAST INDIAN RAILWAY.

*Synopsis of the financial transactions for, and to end of, the year 1898.*

No. 114-A.R., dated Simla, the 18th May, 1899.

RESOLUTION—By the Government of India, Public Works Department.

Read the following :

Note by A. R. BECHER, Esq., Accountant General, Public Works Department, on the synopsis of the financial transactions of the East Indian Railway for the year 1898.

In continuation of my note No. 267 R. of 17th May 1898, I beg to submit, for the information of the Government of India, a synopsis of the financial transactions of the East Indian Railway from the date of its purchase by the State (1st January 1880) to the close of the year 1898.

2. The Capital Expenditure of the East Indian Railway may be thus stated.

Under the Purchase Act, 42 and 43 Vict., Cap. CCVI, the Capital Stock of the Company was taken over by Government at a commuted value of £125 for every £100 of Capital Stock :

The share capital of the Company, amounting to £26,200,000, was accordingly stated at	£	32,750,000
Under the same Act the debentures and debenture stock were taken over by Government, and amounted to	£	4,450,000
<b>TOTAL</b>		<b>37,200,000</b>

Rs.

The Company had at 31st December 1879 overdrawn from Government on Capital Account ... 26,45,269

The cost of the land taken up for the Railway and paid for by Government had been ... 59,26,183

and the further outlay to close of the year 1898 from grants by Government from borrowed moneys, and from debentures raised by the Company has been :

	Rs.	
On Construction Account ...	6,92,16,697	
" Stores Suspense Account ...	1,10,38,070	
" Capital Advance Account ...	—8,11,685	
	<u>7,94,43,082</u>	
		8,80,14,534

*Deduct*—Assets on the 31st December 1879, received by Government on purchase of the line and made over to the Company—

	Rs.	
Stores in stock ...	76,65,340	
Balance of cash and other Suspense accounts ...	8,22,167	
	<u>84,87,507</u>	

Realization by the sale of surplus and obsolete stores originally valued at Rs. 16,06,079 not taken over by the undertaking, and other miscellaneous receipts ...

6,30,652	
<u>91,18,159</u>	

making the Capital outlay at close of 1898...

Rs. 7,88,96,375 + £37,200,000

	Rs.
3. During the year 1898 the gross traffic earnings were ...	5,97,96,060
the working expenses ...	1,85,76,596
and the net earnings ...	4,12,19,464

4. These results of working the East Indian Railway affected the finances of the Government of India in the manner and to the extent exhibited in the following paragraphs.

5. The liabilities incurred by the Government of India in connection with the purchase of the East Indian Railway are as follows :

	Capital.	Interest.
	£	£
Sterling liabilities—		
(a) Debenture stock ...	1,500,000	67,500
(b) Annuities, terminable in 1953 ...	26,200,000	1,179,000 (inclusive of payment for redemption of Capital).
(c) Deferred annuities ...	6,550,000	262,000
		1,508,500
Less—Annual payment for redemption of Capital ...		65,500
		1,443,000
Net sterling annual liability ...		1,443,000 which at 15.8943 per rupee = Rs. 2,17,88,943.

6. The liabilities incurred by Government since the purchase of the line have been—

	Rs.
Debentures of old Company discharged ...	3,54,66,835
Debentures raised by new Company (£1,550,000)	2,68,80,832
	Rs.
Construction Account ...	6,92,16,697
Stores Suspense Account ...	1,10,38,070
Capital Advance Account ...	—8,11,685
	7,94,43,082
Less—Outlay met from debentures raised by the Company ...	2,68,80,832
	5,25,62,250
Land charges by the State ...	59,26,183
Capital overdrawn at time of purchase ...	26,45,269
	12,34,81,369
Less—Credits to Government for value of stores, etc., made over to the Company	91,18,159
TOTAL ...	11,43,63,210

The debentures raised by the Company form a sterling liability of £1,550,000 bearing interest at  $2\frac{1}{2}$  per cent. per annum, and the difference between the above total and the rupee equivalent of the debentures (11,43,63,210 — 2,68,80,832), viz., Rs. 8,74,82,378 represents the rupee liabilities incurred by Government.

7. The following, therefore, seems to be a fair account of the transactions of the railway, as they affect Government, for 1898 :

	Rs.	Rs.
Traffic earnings ... ..	5,97,96,060	
Less—Working expenses ... ..	1,85,76,596	
Net earnings ... ..		4,12,19,464
Sterling liabilities in connection with the purchase, £1,443,000 at 15'8943d. per rupee...	2,17,88,243	
Interest on debentures, £37,003 ... ..	5,58,683	
Interest on rupee liabilities—		
Interest on outlay to 30th June 1895, including land charges, Rs. 8,13,35,890 at 4 per cent.	32,53,436	
Interest on subsequent outlay, viz.—	Rs.	
From 1st July 1895 to 31st December 1897	27,50,170	
Half outlay during 1898 (33,96,318)	16,98,159	
	44,48,329	
at 3½ per cent. ... ..	1,55,692	
Payment of surplus profits to the Company ...	24,99,244	
Payment to the Company's Provident Fund ...	4,12,195	
Total payments ... ..		2,86,68,193
Net profit to Government ... ..		1,25,51,271

The corresponding net profit was—

	Rs.
in 1897 ... ..	1,24,81,903
" 1896 ... ..	77,89,472
" 1895 ... ..	70,76,494
" 1894 ... ..	56,27,445
" 1893 ... ..	85,23,279
" 1892 ... ..	73,98,751

8. The Capital outlay on the undertaking may be taken as under—

Sterling ( <i>vide</i> paragraph 2) ... ..	£ 37,200,000
	Rs.
Converted into Indian currency at the average rate of 19'961d. per rupee at time of purchase ... ..	44,72,72,180
Rupee debt ... ..	Rs. 11,43,63,210
Less—Rupee value of debentures discharged ( <i>vide</i> paragraph 6, <i>ante</i> ) ... ..	3,54,66,835
	7,88,96,375
TOTAL ... ..	52,61,68,555
The interest at 1 per cent. on this Capital would be ... ..	52,61,686

It follows from this that—

- (i) the net earnings of the railway are  $\frac{4,12,19,464}{52,61,686}$ , or 7·83 per cent. on the Capital invested by the Government in it ;
- (ii) the burden which Government bears in respect of it is  $\frac{2,86,68,193}{52,61,686}$ , or 5·45 per cent. ;
- (iii) the clear profit to Government is 2·38 per cent.

ORDER.—Ordered that a copy of the note and accompaniment now read, be forwarded to the Consulting Engineer to the Government of India for Railways, Calcutta, and to the Department of Finance and Commerce, for information.

F. R. UPCOTT,

Secretary to the Government of India.

SUPPLEMENT TO  
**The Gazette of India.**

---

No. 22.]

CALCUTTA, SATURDAY, JUNE 3, 1899.

---

**OFFICIAL PAPERS.**

*A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.*

*Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of Five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

*No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.*

J. R. FINLAY,  
to the Government of India.

Continuation Sheets of Supple-  
ment to the Gazette of India published at  
Calcutta.

GOVERNMENT OF INDIA,  
HOME DEPARTMENT.

ADDITIONS TO THE RULES FOR THE REGULATION OF APPOINTMENTS IN THE  
SECRETARIAT CLERICAL SERVICE OF THE GOVERNMENT OF INDIA AND  
ATTACHED OFFICES.

NOS. 329—40.

*Extract from the Proceedings of the Government of India, in the Home Department (Examinations), under date Simla, the 2nd June, 1899.*

Read again—

Home Department Resolution No. <sup>Examinations</sup> 184—185, dated the 5th June 1894.

Read also—

Home Department Resolution Nos. 186—187, dated the 30th April 1897.

RESOLUTION.

The Governor General in Council is pleased to direct that the following additions be made to the rules for the regulation of appointments in the Secretariat Clerical Service of the Government of India and attached offices:

After Rule 9 (2) add:

(3) "If the candidate is employed under Government, a certificate by the Head of the Office or Department to the effect that, in his opinion, there is no objection to the candidate appearing at the ensuing Clerkship Examination.

(4) "A statement whether the candidate has appeared at any previous Clerkship Examination, and if so, in what year."

ORDER.—Ordered, that a copy of the above Resolution be forwarded for information to the Departments of the Government of India (except the Foreign Department) and to the Heads of Offices under the Home Department marginally noted; that a copy be forwarded to the Governments of Bengal, the North-Western Provinces and Oudh and the Punjab for information; that a copy be also forwarded to the Secretary to the Board of Examiners, and that the Resolution be published in the *Gazette of India* for general information.

The Director-General, Indian Medical Service.

The Sanitary Commissioner with the Government of India.

[True Extract.]

A. H. L. FRASER,

*Offg. Secretary to the Government of India.*

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

**Weather Review of India for the Week ending at 8 a.m. on  
Saturday, May 27th, 1899.**

Weather conditions have been somewhat unsettled over Northern India during the week under review. The small storm, which developed at the head of the Bay at the close of the previous week, passed into Central Bengal and disappeared during the first two days of the present week. It was succeeded by another but very slight storm over South-West Bengal on the 23rd, which in its turn disappeared on the 24th or 25th. Up to this date the general conditions of the weather were similar to those which had prevailed during the previous week. Pressure was low over the Punjab, relatively low within a trough running from North-West India to the head of the Bay and highest in Ceylon and the south of the Bay. Accompanying this distribution of pressure were westerly and north-westerly winds over the Peninsula, southerly winds in Burma and at the head of the Bay and easterly winds in North Bengal and the North Gangetic Plain. On the 26th these conditions changed somewhat, a rapid barometric fall occurring in Northern India by which the trough of low pressure was transferred northward to the foot of the hills. At the same time the easterly winds ceased in Northern India and the westerly winds from the Peninsula and the Central Provinces extended northward into the Gangetic Plain. The most marked features of the weather during the past week have been the general heavy rain which has been brought up to Burma by the southerly winds and the very high temperatures which have prevailed throughout the week over North-Western India.

**Daily Summary.**—*Sunday, May 21st.*—The barometer had fallen briskly to rapidly over parts of Bengal, and the small storm which was shown near Saugor Island on the 20th was shown near Bogra and Mymensingh. Rain had been heavy and general over East and Lower Bengal. Elsewhere conditions were fairly normal, though pressure differences were somewhat greater than usual. The southerly wind over Burma was giving moderate general rain over that province, while a few light to moderate scattered showers had been received over Upper India, the central districts and the Peninsula. Large contrasts of temperature were shown, for, while the mean temperature was as much as  $9.7^{\circ}$  higher than usual at Mooltan, it was  $10^{\circ}$  lower at Burdwan, Gorakhpur and Chaibassa. Over the Peninsula the temperature variations were much smaller, but the weather was on the whole cooler than usual.

*Monday, May 22nd.*—Pressure had decreased briskly over North-Western and part of Northern India and over Burma, while it had increased slightly over the Peninsula and slightly to briskly over East Bengal. The small storm over East Bengal had filled up, and the pressure differences over India generally had increased, but otherwise there had not been much change. The winds were generally westerly and north-westerly over the Peninsula and the central parts of India, southerly (south-west—south-east) over Burma and Deltaic Bengal and easterly close to the foot of the hills in Northern India. The heavy rain in Bengal had ceased, but showers were reported from parts of Burma, Assam and the west of the Peninsula. The mean temperature had risen fast over Bengal, but the weather remained generally cooler than usual except in the north-west where the heat was excessive.

*Tuesday, May 23rd.*—Pressure had decreased almost everywhere. Barometric readings were lowest in the Punjab, relatively low over the Gangetic Plain and highest in Malabar and Ceylon. Pressure differences were abnormally large.

The winds were practically unchanged, the westerly winds in the west and centre were very strong. General rain continued over Burma, Assam and East Bengal, the amounts at some stations being considerable to large. Elsewhere the weather was fine with a few scattered showers. The mean temperature remained excessive over North-West India and generally slightly to moderately below the normal elsewhere.

*Wednesday, May 24th.*—Pressure had increased over the Punjab, the North-West Provinces and West Bengal and decreased elsewhere. Barometric readings were lowest over the Punjab, whence a trough of relatively low pressure ran south-eastward to Orissa. The pressure differences were nearly as large as on the preceding days. The winds were little altered, and the westerly winds were strong to a gale in different parts of the country. Burma had again received general rain, while scattered showers had been received over Bengal, Assam, the North-West Provinces, the North-West Himalayas and the west of the Peninsula. The mean temperature was high over North-West India as well as over the east and south of the Peninsula, but was generally lower than usual elsewhere.

*Thursday, May 25th.*—The barometer had risen briskly over the west of the North-West Provinces and the east of the Punjab and had fallen briskly over West Bengal, but elsewhere the changes were small. The pressure distribution was hence practically unaltered, and the winds were generally the same as on the preceding days. Rain had fallen generally over Burma, Assam, East Bengal and the south-west of the Peninsula, and a few light scattered showers were reported from other parts of the country, but in general the weather was fine. The heat was greater than usual over North-Western and less than usual over North-Eastern India, while over the Peninsula it was nearly normal.

*Friday, May 26th.*—The barometer had fallen briskly to rapidly along the foot of the hills, and the trough of low pressure had been transferred northward to the Himalayan region. This was the only important change, but under its influence the easterly current of air in the north had contracted and almost disappeared. Elsewhere the pressure conditions and the winds were little changed. Rain had continued to fall generally over Burma and Malabar, but elsewhere the weather was fine or nearly so. The mean temperature was low over Burma, the west of the Central Provinces and North Bombay, but was generally excessive elsewhere.

*Saturday, May 27th.*—Pressure had decreased over Northern India and increased over the Peninsula. Pressure was lowest and much below the normal over the west of the Punjab, while it was relatively low over the North Gangetic Plain and highest in the extreme south of India. Pressure gradients were very steep for the time of year. The winds were variable over the Punjab and along the west coast, easterly close to the foot of the hills in Northern India and about normal elsewhere. The force was fresh to strong over a large part of the country. The rainfall had been heavy and general in Burma, and showers had been received over parts of Assam, Bengal and the west of the Peninsula. The mean temperature was low over Burma and parts of Bombay and the Central Provinces, but elsewhere the heat was excessive.

**Temperature.**—There were very large and marked contrasts of temperature over Northern India during the week. This was specially noticeable on the 21st, 25th and 27th.

The following were the largest opposite variations on each day:

Sunday	May 21st	Multan	+ 9.7°	Gorakhpur	—10.7°
Monday	" 22nd	Multan	+ 9.0°	Thayetmyo	— 6.2°
Tuesday	" 23rd	Rawalpindi	+12.0°	Sholapur	— 6.2°
Wednesday	" 24th	Multan	+ 9.8°	Gorakhpur	— 5.5°
Thursday	" 25th	Jhansi	+ 7.4°	Gaya	— 9.8°
Friday	" 26th	Multan	+ 7.8°	Thayetmyo	— 3.3°
Saturday	" 27th	Sirsa	+10.7°	Bassein	— 5.8°

The following table gives the mean temperature variation data for the week :

Province.	May 1899.							Mean variation of week.
	21st	22nd	23rd	24th	25th	26th	27th	
Burma . . . . .	-0.3	-1.5	-0.5	-0.4	-1.2	-1.0	-2.5	-1.1
Assam . . . . .	-3.1	-4.0	-1.3	+0.5	+0.9	+1.3	+0.4	-0.8
Bengal . . . . .	-5.1	-2.3	-0.7	-1.4	-0.6	+0.6	+0.8	-1.2
Orissa . . . . .	-5.8	-2.9	-1.4	-4.5	-2.3	-0.2	+2.9	-2.0
Bihar . . . . .	-4.4	-2.1	+1.5	-2.9	-4.0	+1.1	+3.0	-1.0
Chota Nagpur . . . . .	-7.2	-3.1	-0.1	+0.7	-3.4	+2.1	+3.6	-0.8
N.-W. P. and Oudh . . . . .	-6.2	-2.4	+2.8	+1.0	-0.8	+1.1	+5.7	+0.2
Punjab . . . . .	+3.5	+5.0	+8.5	+5.3	+3.8	+4.6	+9.1	+5.7
Sind . . . . .	+1.8	+1.8	+2.6	+1.7	+1.4	+1.2	+1.4	+1.7
Rajputana . . . . .	+4.5	+4.2	+3.6	+3.6	+4.1	+4.2	+1.4	+3.7
Gujarat . . . . .	-1.2	-0.7	-2.0	-1.3	-1.5	-1.5	-1.4	-1.4
Central India . . . . .	-4.0	-0.7	+0.8	+1.1	+1.2	+1.1	+2.4	+0.3
Central Provinces . . . . .	-1.5	+0.8	0	+0.1	+0.1	+1.3	+1.6	+0.3
Berar . . . . .	+0.5	+1.3	-0.7	-1.1	-1.6	-1.3	-1.0	-0.4
West Coast . . . . .	+0.2	+0.3	-0.5	+0.4	+0.3	0	+0.2	+0.2
Bombay Deccan . . . . .	-1.5	-1.3	-3.6	-2.1	-1.8	-0.4	-1.1	-1.7
Mysore . . . . .	-2.7	-2.8	-3.7	-1.9	-0.3	+0.2	+0.7	-1.5
Madras Coast . . . . .	-2.3	+0.9	+1.4	+2.6	+2.5	+3.5	+2.9	+1.6
Madras Deccan . . . . .	-3.3	-1.5	-1.8	-2.9	-1.4	+0.5	+1.4	-1.3
South India . . . . .	-1.9	+0.4	+0.3	+1.7	+2.6	+1.1	+0.8	+0.7
Mean for whole of India . . . . .	-2.0	-0.5	+0.3	+0.1	-0.1	+1.0	+1.7	+0.1

The mean temperature of the whole country for the whole week was very nearly normal, and on most days of the week this was likewise the case; but on the 21st there was some deficiency and on the 27th some excess. The provincial variations show that the mean temperature was excessive throughout the week in North-West India and during most of the week in the Madras coast and South India districts, but that in the remaining provinces the heat was generally less than usual.

The following were the highest maxima reported on each day :

May 21st . . . . .	115°1'	at Jacobabad.
" 22nd . . . . .	113°2'	" Do.
" 23rd . . . . .	120°0'	" Do.
" 24th . . . . .	116°1'	" Do.
" 25th . . . . .	120°0'	" Do.
" 26th . . . . .	121°0'	" Do.
" 27th . . . . .	122°0'	" Do.

**Rain.**—The rainfall conditions of the present week are generally similar to those reported last week. The rainfall area has been very extensive, nearly all parts of the country having received some rain during the week; but, except in Burma and North-East India, the fall has been light, scattered and local, occurring usually during dust and thunder storms. As was the case last week, there has been a strong steady flow of air from the Bay into Burma and Bengal, and this moist current has shifted round into south-east and east over Bengal, and with this direction has travelled across West Bengal up the Gangetic Plain. Over the area influenced by this current the week's rainfall has been more or less heavy, but in most other places it has been lighter than ordinary. At the commencement of the week the heaviest rainfall was reported from Lower Bengal where a small cyclonic storm was disturbing the weather; but, after the beginning of the week, the region of heaviest rainfall was transferred to Burma and

Tenasserim, and this continued until the end of the week. The rainfall returns show that in Burma rain fell daily throughout the week; in Assam similar conditions prevailed; in East and Deltaic Bengal also daily rainfall was reported, but in Central, North and West Bengal the rain, though scattered throughout the week, was less frequent than in the two other divisions; over the Gangetic Plain the rain occurred generally on the 21st and 24th and in the Punjab on the 21st; on the Malabar Coast rain occurred daily, while in other parts of the Peninsula the showers were scattered throughout the week; in the Central Provinces also the showers occurred irregularly during the week.

The rainfall table at the close of the summary shows that no rain whatever fell during the week in the West Punjab, Berar, Gujarat, Kathiawar, Sind, Baluchistan, West Rajputana and the Jaipur division of the east coast, and an unimportant quantity in the central division of the North-West Provinces, the South-East, South and North Punjab, the west of the Central Provinces, Central India and the east of Rajputana. With the exception of these fifteen divisions, effective rain was received throughout the whole country, the average actual rainfall ranging from 8.65 inches in Tenasserim, 8.20 inches in Arakan, 7.86 inches in Deltaic Burma, 7.30 inches in the Surma division of Assam and 5.26 inches in the hill division of Assam, to 0.11 inch in the Central Punjab, 0.13 inch in the submontane division of the Punjab, 0.16 inch in Coorg, 0.12 inch in the central division of the Central Provinces and 0.13 inch in South Madras.

The third column of the table shows that the week's rainfall has been heavier than usual in 23 of the rainfall divisions, *viz.*, Tenasserim, Deltaic and Upper Burma, all the Assam divisions, all the Bengal divisions (except North Bengal and South Bihar), all the North-West Provinces divisions (except the central), the Bombay Deccan, the east of the North-West Provinces and the central divisions of Madras. The greatest excess was in the deltaic division of Burma and the Surma division of Assam where it exceeded 3 inches. In all the divisions, except the 23 quoted above, the rainfall has been short of the normal, but except in parts of the south-west of the Peninsula the deficiency has been small.

The following were the principal large totals recorded at individual stations during the week:

Burma	Bassein	16.36 inches.
	Sandoway	18.30 "
Assam	Sylhet	13.04 "
Bengal	Durgapur (Mymensingh)	10.80 "
	Kuriam (Rungpur)	11.37 "
Bihar	Araria (Purnea)	6.50 "
Malabar	Quilon	11.66 "
	Malwan (Ratnagiri)	6.43 "
Madras	Nundyal (Kurnool)	4.28 "

The three concluding columns show that the rainfall for the whole period from February 26th to date has been short of the normal over the hill division of the North-West Provinces, all the Punjab divisions, the central division of the Central Provinces, Gujarat, Kathiawar, Central India, Western Rajputana and the south division of Hyderabad. In all the remaining divisions the total seasonal rainfall has equalled or exceeded the normal.

PROVINCE.	DIVISION.	RAINFALL DATA FOR WEEK ENDING MAY 27TH, 1899.			RAINFALL DATA FROM FEBRUARY 26TH TO MAY 27TH, 1899.		
		Average actual rainfall of division.	Average normal rainfall of division.	Excess or defect in inches.	Average actual rainfall of season to date.	Average normal rainfall, February 26th to May 27th.	Excess or de- fect of (nor- mal) rain- fall ex-pressed as a per- centage.

W. L. DALLAS,

for Meteorological Reporter to the

Government of India.

M. FINUCANE,

Off. Secretary to the Government of India.

SIMLA, 1st June, 1899.

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

## Weekly Report on the state of the Season and Prospects of the Crops.

**Madras.**—*For week ending 27th May.*—There was seasonable rainfall on the West Coast and showers almost throughout the remainder of the Presidency during the week. The water-supply is normal. Ploughing in many parts and sowings on the West Coast have begun. The standing crops are in good condition. Pasture is scanty, but fodder is sufficient. Cattle are in normal condition. Prices are steady or slightly easier.

**Bombay.**—*For week ending 31st May.*—There was rain in twelve districts during the week, but the fall was generally light. Preparations for monsoon cultivation are progressing generally, and sowing in Kanara, Karachi, and Shikarpur. Fodder is sufficient, except in parts of Sind and Baroda territory. Agricultural stock is healthy. Prices have risen in eight and fallen in four districts; elsewhere they are stationary.

**Bengal.**—*For week ending 29th May.*—There was general rain during the week; the fall in some parts of Bengal Proper being heavy. Ploughing and early sowings are in active progress. Jute and autumn rice are already sown in many parts and are coming up well. Reports of sugarcane, indigo, and other crops in the ground are good. The price of common rice was practically stationary, the variations reported being slight and confined to a few districts only. The supply of fodder and water for cattle is everywhere sufficient, except in one thana in Manbhum. There was a tornado at Purnea on the 28th May which uprooted many trees and damaged a few public buildings and several private houses.

**North-Western Provinces and Oudh.**—*For week ending 31st May.*—The weather was generally showery during the week. The standing crops are thriving. Irrigation of extra crops, indigo, and sugarcane and the preparation of fields for the autumn sowings continue. Weeding of sugarcane and the harvesting of extra crops in parts are still in progress. Prospects are favourable; markets are well-stocked; fodder is sufficient. There are slight fluctuations in prices in a few districts, otherwise they are practically stationary.

**Punjab.**—*For week ending 31st May.*—Rain ranging from  $\frac{1}{10}$  of an inch to  $1\frac{1}{2}$  inches has fallen in Hissar, Umballa, Ferozepore, Sialkot, Rawalpindi, and Dera Ismail Khan. The spring crops are still being threshed and housed. The autumn crops are being sown in Mooltan, Umballa, and Peshawar and weeded and watered in Sialkot and Amritsar. Land is being prepared for sowings in Lahore and in parts of Umballa. Extra spring crops have been reaped in Hissar. The condition of extra spring crops is good in Umballa, Peshawar, and Sialkot; and fair in Delhi, Jullundur, Ferozepore, Lahore, and Dera Ismail Khan. The outturn is reported average in Hissar, Jullundur, Lahore, and Dera Ismail Khan. The condition of cattle is good in Umballa, Jullundur, Ferozepore, Amritsar, and Peshawar; fair in Sialkot; and poor in Hissar and in parts of Dera Ismail Khan. Fodder is scarce in Hissar, Delhi, Shahpur, and Dera Ismail Khan; and sufficient elsewhere. Prices—especially of wheat—have risen in Umballa, Amritsar, Rawalpindi, and Dera Ismail Khan; fallen in Jullundur, Lahore, and Sialkot; and remained unchanged elsewhere. Wheat is selling from  $17\frac{1}{2}$  to  $22\frac{1}{2}$ , gram  $19\frac{1}{2}$  to  $22\frac{1}{2}$ , maize 28 to 33, barley 32, bulrush-millet 18 to 27, great millet 24, and rice  $13\frac{1}{2}$  to  $14\frac{1}{2}$  seers per rupee.

**Central Provinces.**—*For week ending 30th May.*—The weather has been generally clouded and hot with strong winds. Slight showers of rain fell in eleven districts. In Saugor the labouring classes complain of want of work. 1,297 and 2,208 persons are in receipt of relief in the Saugor and Damoh districts, respectively. Insects are doing damage to sugarcane in the Multai tahsil of Betul. Preparation of land for the autumn sowings is in progress. Sowing has commenced in parts of Raipur and Sambalpur. Water is scarce in parts of Mandla, Chhindwara, Chanda Bhandara, and Nagpur. Fodder is scarce in parts of six districts and grain stocks are insufficient in the Hinganghat tahsil of Wardha. The price of wheat, gram, rice, and *juar* has fallen in some districts and has risen in others.

**Burma.**—*For week ending 27th May.*—In Lower Burma ploughing continues in Thongwa and Amherst and has commenced in Kyaukpyu, Pegu, Monada, Myaungmya, and Tavoy. In Upper Burma reaping of dry weather

paddy has been completed in Thayetmyo and continues in Pakōkku, Bhamo, Katha, and the Upper Chindwin, and also in parts of Mandalay and Lower Chindwin; while sowing is finished in Minbu. Ploughing and sowing\* for wet weather paddy and miscellaneous crops are fairly general. Transplanting of early paddy progresses in Kyaukse, and the crop is being reaped in portions of Shwebo. Sowing of hill-side paddy continues for districts last reported. Ploughing for cotton, sessamum, and pulses continues in the Lower Chindwin and Meiktila. The condition of the standing crops is generally good in parts of Mandalay, Bhamo, Myitkyina, and Katha. Dry weather paddy has been considerably damaged by floods. The price of paddy has risen slightly in Rangoon, Amherst, Minbu, and Shwebo; and fallen a little in Prome, Thongwa, Myaungmya, and Thayetmyo; and largely in Thaton; elsewhere it is as before.

**Assam.**—*For week ending 30th May.*—The weather is seasonable. Sowing of early rice, planting of sugarcane, and plucking and manufacture of tea are in progress. Prospects of tea are generally good, but more sunshine is wanted in Sylhet. Land is being prepared for late rice. Reaping of low land transplanted rice is finished in Sylhet and the outturn is good. Prices—common rice—Silchar and Dhubri 16, Sylhet 21, Gauhati 17, Tezpur and Sibsagar 12, and Nowgong and Dibrugarh 14 seers per rupee.

**Mysore and Coorg.**—*For week ending 31st May.*—**MYSORE:** Rainfall—16 cents in the Civil and Military station and rain general and good in parts of the Kolar district. Prices have slightly risen in Kolar, Hassan, Chitaldrug, and Kadur and fallen in Tumkur. *Ragi (Eleusine coracana)* has been sown in Mysore, Hassan, and Kadur.

**COORG:** Rainfall—88 cents. Ploughing for rice and *ragi (Eleusine coracana)* continues. Prices of food-grains are stationary. Water and fodder for cattle are sufficient.

**Berar and Hyderabad.**—*For week ending 31st May.*—**BERAR:** The weather is hot and cloudy. Ploughing of fields is in progress. Fodder is insufficient in all districts, except Wun. Scarcity of water prevails in parts of the Province. Prices are stationary.

**HYDERABAD:** Rainfall during the week 11 cents. The autumn sowings have commenced in certain talukas of the Lingsagar and Nalgundah districts. In other parts the ground is being made ready for sowings. The winter rice harvest continues in parts. Water scarcity continues in some talukas. Prices of grain are stationary. Prices—wheat 10, coarse rice 10½, and *jowari* 25½ seers per current sicca rupee.

**Central India.**—*For week ending 31st May.*—Rain fell in parts of the Bhopal Agency during the week. Agricultural operations have been completed in Gwalior and Bundelkhand and are in progress elsewhere. Agricultural stock and pasturage are in good condition. Prices are above normal in Bundelkhand and normal elsewhere.

**Rajputana.**—*For week ending 31st May.*—Rainfall ranging from about half an inch to 6 cents fell at Bikanir, Bhurtpore, Kotah, Pertabgarh, and Haraoti. Agricultural operations are proceeding satisfactorily. Agricultural stock is in fair to good condition. Fodder scarcity prevails in the States reported last week. Prices are rising in two States; slightly rising in Ajmere and Ulwar; falling in Jeysulmere; and are steady elsewhere. Thirty-five persons emigrated from Ajmere and 15 from Merwara during the week. The total emigration from Merwara to date numbers—4,431. The numbers employed on relief works were—Ajmere 448, Merwara 5,081, and Marwar 950. There are also 311 persons on ordinary works and 208 on gratuitous relief in Ajmere-Merwara. Prices—Ajmere 19, Beawar 19, and Marwar 15 seers per rupee.

**Kashmir.**—*For week ending 30th May.*—The weather is cloudy. Rain fell once during the week. Prospects of the spring crops are excellent. Prices continue below normal. Rice—27 seers per rupee.

**JAMMU PROVINCE.**—*For week ending 31st May.*—No rain during the week. Prices are generally stationary. Wheat is selling from 16 to 19 and maize 25 to 29 seers per rupee. The spring crops are being threshed and housed. The condition of the standing crops is fair. Sowings for the autumn crops are still going on. Fodder is sufficient.

**Nepal.**—*For week ending 27th May.*—Rainfall—1·09 inch. The weather is showery. The sowing of upland rice and indian-corn has been completed. The wheat crop is doing well. Rice—9½ seers per rupee.

M. FINUCANE,

Off. Secretary to the Government of India.

GOVERNMENT OF INDIA.  
DEPARTMENT OF REVENUE AND AGRICULTURE.

No. 21.

*Extract from the Proceedings of the Government of India, Department of Revenue and Agriculture (Inventions and Designs),--dated Simla, the 30th May, 1899.*

Read—

The appended Report by the Secretary under the Inventions and Designs Act V of 1888 on the working of his office during the calendar year 1898.

RESOLUTION.

Ordered that the report be published for general information in the supplement to the *Gazette of India*, and forwarded to the Legislative Department, and to all Local Governments and Administrations.

[True Extract.]

M. FINUCANE,

*Offg. Secretary to the Government of India.*

No. 1557 P.

FROM

S. C. HILL, Esq.,

*Offg. Secretary under the Inventions and Designs Act,*

TO

THE SECRETARY TO THE GOVERNMENT OF INDIA,  
DEPARTMENT OF REVENUE AND AGRICULTURE.

*Dept. of Rev. & Agri.  
Inventions & Designs.*

*Calcutta, the 18th May, 1899.*

SIR,

I have the honour to submit, for the information of the Government of India, the following summary of proceedings in 1898 under the Inventions and Designs Act of 1888.

2. During the year under report Mr. A. T. Pringle continued to officiate in the office of Secretary under the Act until the 21st October 1898 when Mr. G. W. Forrest, the permanent incumbent, returned from furlough and resumed charge of his duties.

3. It is satisfactory to note that the applications for exclusive privileges showed a marked increase having numbered four hundred and eighty-one as against four hundred and fifty-one in the previous year and four hundred and sixty in 1896. Of these one hundred and seventy-one related to inventions by persons resident in British India (forty-five being inventions by natives of the country). There was an increase of two in the class last named and a fair increase also in the number of applications received from Europe, Australia and America—three hundred and ten as against two hundred and ninety-four in the previous year. Thirty-one related to bicycles and similar vehicles, twenty-eight to railways, nineteen to linotype machinery, sixteen to the treatment of fibres, as many to lamps and burners, eleven to punkahs, and ten to the tea-trade.

4. Eighty-three applications of 1897 were pending on the first day of the year. Of these five were abandoned, as many rejected, and leave to file specifications was accorded in the case of the remainder.

With regard to the applications of the year under report, leave was granted in three hundred and seventy-four instances, thirteen applications were rejected, twelve were treated as abandoned, and eighty-two—of which twenty-five were in the hands of experts—were pending on the 31st December 1898.

5. The references to paid and departmental experts fell from ninety-four in 1897 to sixty-six in the year under report. Fees were required in ten cases.

6. Four hundred and nine specifications, or seventeen more than in the previous year, were filed.

7. Three hundred and eight exclusive privileges were kept alive by payment of the prescribed fees as against two hundred and fifty-one in 1897, and two hundred and thirty-six in 1896.

8. Two hundred and fifty-eight privileges ceased during the year.
9. The applications for registering copyright in designs declined from nineteen to sixteen. Of these eight were rejected, one was abandoned and one was pending at the end of the year.
10. The gross revenue rose from Rs1,032 to Rs6,303. This sum was principally derived from fees paid for the continuance of privileges and for filing specifications.
11. During the year under report, eleven models were deposited in the Museum.
12. The usual statistics are appended.

I have the honour to be,

SIR,

Your most obedient Servant,

S. C. HILL,

*Offg. Secretary under the Inventions and Designs Act.*

*Statement showing the proceedings under the Inventions and Designs Act of 1888 during the year 1898 as compared with the years 1897 and 1896.*

SUPPLEMENT TO

# The Gazette of India.

No. 23. } CALCUTTA, SATURDAY, JUNE 10, 1899.

## OFFICIAL PAPERS.

*A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.*

*Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

*No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.*

GOVERNMENT OF INDIA.  
PUBLIC WORKS DEPARTMENT.

CIVIL WORKS.  
MISCELLANEOUS.

REVIEW OF THE REVENUE AND EXPENDITURE RECORDED UNDER THE HEADS "CIVIL WORKS", "FAMINE RELIEF" AND "MISCELLANEOUS PUBLIC IMPROVEMENTS" IN THE ACCOUNTS OF THE GOVERNMENT OF INDIA FOR THE OFFICIAL YEAR 1897-98.

No. 506 C. W.—M., dated Simla, the 1st June 1899.

RESOLUTION—By the Government of India, Public Works Department.

READ—

Note by A. R. Becher, Esq., Accountant General, Public Works Department, upon the accounts of Revenue and Expenditure recorded under the heads "Civil Works", "Famine Relief" and "Miscellaneous Public Improvements" in the accounts of the Government of India for 1897-98.

RESOLUTION.—The total revenue derived from these works in 1897-98 amounted to Rx. 615,262 as compared with Rx. 634,946 in 1896-97 and

A

Rx. 664,133 in 1895-96, the average for the five past years being Rx. 633,655. The falling off was mainly under the heads "Ferry receipts" and "Tolls on roads." The former of these heads accounts for half of the total receipts, the amount collected under it being Rx. 306,993 against Rx. 311,709 in the previous year. Road tolls produced a revenue of Rx. 82,711 as compared with Rx. 103,656, in the previous year, the decrease of 20 per cent. being attributed to the effect of the plague in Bombay and the famine in other provinces. The receipts credited under "Rents of buildings" increased, on the other hand, from Rx. 57,507 in 1896-97 to Rx. 64,814 in the year under review.

2. The net return on the capital cost of buildings for which rent is charged was 1.77 per cent. as compared with 1.56 last year. The value of these buildings was higher in Burma than in any other province and the return yielded on them was 3 per cent. A return of over 2½ per cent. was obtained in Madras and Central India, while over 2 per cent. was returned in Bombay, the Punjab and the North-Western Provinces. In Bengal, on the other hand, the cost of repairs exceeded the rents realized by Rx. 1,008, or 16 per cent., while in Assam the cost of repairs was nearly 80 per cent. in excess of the rents.

The accounts furnish no explanation of these unsatisfactory results, but it would appear from paragraph 1 (4) of the Accountant General's note that they were due in no small degree to the disastrous earthquake of June 1897 which destroyed a large number of the buildings in Assam and damaged many of those in Bengal so seriously as to render them uninhabitable until they could be renovated. The consequence was a very large increase in the cost of repairs accompanied by a large loss of revenue, as rents could not be assessed from tenants who were forced to vacate their houses. The introduction of revised rules in connection with these buildings, which are now under consideration, will, it is hoped, remove many unsatisfactory features in the annual returns of Government rentable buildings.

3. The total expenditure on "45—Civil Works" during the year was Rx. 4,482,024 as compared with Rx. 4,858,721 in 1896-97. Excluding expenditure under Excluded Local Funds and Contributions, the actuals, compared with those of last year and with the average of the last five years, were as follows:—

	1897-98.	1896-97.	Average of five years ending 1896-97.
	Rx.	Rx.	Rx.
Imperial . . . . .	428,123	809,383	767,550
Provincial . . . . .	2,258,018	2,131,781	2,093,035
Local . . . . .	1,564,010	1,585,125	1,710,717
TOTAL	4,250,551	4,626,289	4,571,303

These figures show that there was a great reduction in the expenditure under Imperial and a slight reduction under Local, while under Provincial the outlay exceeded that of last year by Rx. 126,237 and the average by Rx. 164,982.

Of the total outlay on new works the expenditure on buildings was Rx. 724,262 against Rx. 961,520 last year and on roads Rx. 473,763 against Rx. 590,330 in 1896-97.

\* The expenditure on famine relief works amounted to Rx. 3,356,290, of which Rx. 407,011 were spent on Railway and Irrigation Works, while the balance was distributed as follows:—

—	Imperial.	Provincial.	Local.	Excluded Local.	TOTAL.
	Rx.	Rx.	Rx.	Rx.	Rx.
Communications . . . . .	2,101,207	3,751	22	...	2,104,980
Miscellaneous Public Improve- ments . . . . .	777,274	48,423	2,738	3,923	832,358
Civil Buildings . . . . .	11,899	42	...	...	11,941
TOTAL . . . . .	2,890,380	52,216	2,760	3,923	2,949,279

5. The percentage of establishment charges on the outlay on works and repairs by Public Works officers rose from 28·18 in 1896-97 to 31·23 in the year under review. While the total expenditure on works and repairs, omitting Excluded Local Funds and contributions, was less than in the previous year by Rx. 219,841, the establishment charges increased by Rx. 5,356. The provinces in which the increase is most noticeable are Madras, Bombay, North-Western Provinces and Oudh and Central Provinces, the percentage in Madras having risen from 27·36 to 47·59. The increase was due to increased expenditure on establishment required for famine relief works and to the restriction of expenditure on Civil Works in order to provide funds for relief works.

The Government of India observe with satisfaction that the income derived from the Royal Indian Engineering College at Cooper's Hill exceeded the cost of upkeep by £2,754.

The Governments of Madras and Bombay (General), Bengal, the North-Western Provinces and Oudh, the Punjab, and Burma.  
The Chief Commissioners of the Central Provinces, Assam, and Coorg.  
The Resident at Hyderabad,  
The Agents to the Governor General for Central India, Rajputana, and Baluchistan.  
The Superintendent of Port Blair and Chief Commissioner, Andaman and Nicobar Islands.  
The Accountant General, Public Works Department.  
The Director General of Military Works.

note be forwarded to the Finance Department, and in the Supplement to the *Gazette of India*.

ORDER.—Ordered that the foregoing, with a copy of the note, be forwarded to the Local Governments, Administrations and officers noted in the margin for information.

Ordered, also, that a copy of the Resolution and that the papers be published

T. HIGHAM,

*Joint Secretary to the Government of India.*

*Documents accompanying.*

\* Note by Accountant General, Public Works Department, with accompaniment.

Accompaniment to P. W. D. No. 200 C. W. M., dated 1st June 1899.

**Note by A. R. Becher, Esq., Accountant General, Public Works Department, upon the accounts of Revenue and Expenditure recorded under the heads "XXXII and 45.—Civil Works," "33.—Famine Relief Works," and "50.—Miscellaneous Public Improvements" in the accounts of the Government of India for 1897-98.**

#### General.

The amount of Revenue and Expenditure exhibited in these accounts and reviewed in the following paragraphs is :—

	33.—Famine Relief Works.	45.—Civil Works.	50.—Miscellaneous Public Improvements.	TOTAL.
	Rx.	Rx.	Rx.	Rx.
Revenue . . .	...	615,262	...	615,262
Expenditure . .	8,556,290 *	4,482,024 †	4,105	7,842,419

There were four main causes that affected the transactions under review : (1) Famine, (2) Restriction of expenditure, (3) Plague, and (4) Earthquake. Famine and the restriction of expenditure affected nearly every province in India. Plague only directly affected Bombay. Earthquake caused damage to buildings and roads in Assam and Bengal only. The effects are stated in some detail in the following paragraphs :—

(1) *Famine.*—The provinces in which the famine was most acutely felt were the Central Provinces, the North-Western Provinces and Oudh, Madras, and Bombay; the expenditure on relief operations during the year in these four provinces amounted to about Rx. 917,000, 727,000, 658,000 and 713,000, respectively, or a total of Rx. 3,015,000 as compared with an expenditure of Rx. 3,352,000 for the whole of India.

(2) *Restriction of expenditure.*—This lasted till the 31st December 1897, and was necessitated by the depletion of Treasury balances consequent on the unusually heavy demands on Government for the relief of distress caused by the famine. After the withdrawal of the restriction, Government re-granted in some instances the funds previously withdrawn or withheld; but it was found impracticable to spend in three months a sum of money which should have spread over nine months.

(3) *Plague.*—This, as has been stated, only directly affected Bombay; but there is little doubt that the dislocation of business caused thereby in so important a seaport town must have told, to some extent, on other provinces, particularly those bordering on Bombay. In Bombay itself, business was almost entirely paralysed; and this led to a great falling-off in revenue under "Tolls on roads" and "Ferry receipts," and to a great scarcity of labour and materials required for use on works.

(4) *Earthquake.*—The only provinces directly affected by this calamity were Assam and Bengal, particularly the former. The greater part of the damage was due to the first and severest shock, which occurred on the 12th June 1897. The expenditure in making good the damages during the year amounted to Rx. 146,300, of which Rx. 107,800 was incurred in Assam; and Rx. 38,400 in Bengal.

#### REVENUE.

1. The *Revenue* credited in the accounts of the Government of India for 1897-98 under the head "XXXII.—Civil Works," which amounted to Rx. 615,262, was brought to account as follows :—

Rx.
166,142 by Public Works Officers in India.
403,929 by Officers of other Departments in India.
45,191 in England.
<b>Total . . . 615,262</b>

\* Includes outlay from Excluded Local Funds, amounting to Rx. 8,923.

† Includes outlay from Excluded Local Funds, Contributions, and Local Loans, amounting to Rx. 201,473.

‡ In Assam the figures are approximate.

## 2. The principal heads are detailed in the table below :—

<b>GRAND TOTAL</b> . . . . .	...	...	...	...	...	...	...	...	615,262
For details by Provinces, see page of accounts . . . . .	V	VII	VII	...	V	VII	VII	...	...

A comparison of the actual revenue realized under "XXXII.—Civil Works" with the Budget and Revised Estimates is given below :—

Year.	Budget Estimate. Rx.	Revised Estimate. Rx.	Actuals. Rx.
1897-98 . . . . .	629,600	609,700	615,262

For the decrease of Rx 14,936 in the actual realisations as compared with the Budget Estimate, Bombay is chiefly responsible, the revenue having been worse than the Estimate by Rx. 33,195; on the other hand the Punjab and Burma were better by Rx. 10,698 and Rx. 5,756 respectively. The decrease in Bombay is entirely due to the great falling-off under "Tolls on roads" and "Ferry receipts," and is one of the effects of famine and plague. The increase in the Punjab is due to the North Western Railway having purchased for Rx. 4,655 the Lunatic Asylum, Lahore, and to certain receipts under "Serai" being budgetted for under "XXXV.—Miscellaneous," but accounted for under "XXXII.—Civil Works." The increase in Burma is due to the recovery of a sum of Rx. 1,350 from the lessee of the Government saw mills at Mandalay, which were destroyed by fire, and to improved realisations under "Ferry receipts" and "Staging bungalows."

The increase of Rx. 5,562 in the actual realisations as compared with the Revised Estimate was contributed chiefly by Bengal (6,511), Burma (2,906), Punjab (3,099), while in Bombay there was a falling off (7,494). The increases in Burma and the Punjab, and the decrease in Bombay, are due to the causes which affected the comparison with the Budget Estimate. The

increase in Bengal is due to the increased profits from the Darjeeling-Himalayan Railway and to larger recoveries of rents of buildings and ferry tolls.

8. *Rents of buildings, Rs. 64,814.*—The receipts from this source compare as follows with the realizations in the four preceding years:—

YEARS.	By Public Works Officers.	By Officers of other Departments.	TOTAL.
	Rs.	Rs.	Rs.
1893-94 . . . . .	42,973	4,405	54,378
1894-95 . . . . .	42,092	4,898	53,990
1895-96 . . . . .	52,720	4,935	58,655
1896-97 . . . . .	53,087	4,420	57,507
1897-98 . . . . .	55,714	8,100	64,814

The net receipts on the capital cost of buildings set apart as residences, in the Buildings and Roads and Irrigation Branches excluding those allotted rent-free, is 1·77 per cent., as shown below, against 1·56 per cent. in the previous year:—

Provinces.		CAPITAL COST OF BUILDINGS FROM EXAMINER'S ACCOUNTS.			Rents realized.	Cost of Repairs.		Net return including repairs to rent-free buildings.	Percentage of net return on capital cost including rent-free buildings.	
		Year of the account.	Amount.			Rent-free buildings.	Other buildings.			
			Rent-free buildings.	Other buildings.						Total.

Note.—The financial results of buildings borne on the returns of the Irrigation Branch have been, for convenience, included in the above statement. The figures for Irrigation Buildings are:—Capital cost Rs. 74,340, Rent realized Rs. 2,804, Repairs Rs. 2,340, Net return Rs. 480, and Percentage of net return 62.

4. *Ferry Receipts, Rx. 306,993.*—This is the principal source of revenue credited under the head "Civil Works;" the major portion of it, amounting to Rx. 300,288, was realized by Civil Officers.

The realizations under this head during the last four years are shown in the following table:—

YEARS.	By Public Works Officers.	By Civil Officers.	TOTAL.
	Rx.	Rx.	Rx.
1894-95 . . . . .	6,468	296,807	303,165
1895-96 . . . . .	7,133	309,214	316,347
1896-97 . . . . .	6,250	305,459	311,709
1897-98 . . . . .	6,705	300,288	306,993

The following Provinces contributed the largest amounts under this head:—

PROVINCES.	Amount.
	Rx.
Assam . . . . .	14,850
Bombay . . . . .	18,392
Punjab . . . . .	24,981
North-Western Provinces and Oudh . . . . .	54,912
Bengal . . . . .	70,509
Madras . . . . .	95,007
Barma . . . . .	16,134

The incidence of the revenue is—

	Rx.
Imperial . . . . .	105,111
Provincial . . . . .	201,882
Local . . . . .	306,993
TOTAL . . . . .	306,993

#### EXPENDITURE.

5. *The Expenditure* recorded in the accounts for 1897-98 under the head "45.—Civil Works", amounts to Rx. 4,482,024. Of this sum—

Rx. 3,152,494 were expended by Officers of the Public Works Department;  
 " 1,208,500 by Officers of other Departments;  
 " 4,360,994  
 " 121,030 in England, including exchange, but exclusive of Rx. 5,873, the value of stores supplied to India, included in the outlay upon the works concerned.

TOTAL. " 4,482,024

6. The following table compares the actuals of the year (exclusive of outlay from Excluded Local Funds, Contributions and Local Loans) with the Budget and Revised Estimates:—

Funds.	Budget Estimate.	Revised Estimate.	Actuals.
	Rx.	Rx.	Rx.
Imperial . . . . .	472,100	482,300	428,523
Provincial . . . . .	2,291,600	2,216,000	2,257,019
Local . . . . .	1,785,300	1,605,200	1,561,010
TOTAL . . . . .	4,548,900	4,297,200	4,250,551

*Imperial outlay, Rs. 428,523.*

The actuals fell short of the Budget Estimate by Rs. 43,577, of which Rs. 19,280 occurred under India and Rs. 24,297 under England and Exchange. The decrease in India was due partly to a write-back of Rs. 10,847 from Imperial to Provincial on account of suspense balances appertaining to Civil Works in Upper Burma and partly to the requirements in Bengal, Madras and Bombay having been over-estimated. The decrease in England and Exchange was chiefly due to the non-receipt of English stores in connection with the Bangalore water-supply. In Assam the Budget Estimate was exceeded by Rs. 9,399 due partly (about Rs. 5,800) to the reconstruction and repairs of Imperial Buildings damaged by earthquake, and partly (about Rs. 3,600) to irregular expenditure towards the close of the year on the Niehugard-Manipur road.

Compared with the Revised Estimate, the actuals show a decrease of Rs. 53,777, chiefly due to an over-estimate by about (Rs. 26,800) of the expenditure chargeable to Civil Works on account of the Bangalore water-supply scheme, and to stores (to the value of about Rs. 9,300) paid for by the Secretary of State not having arrived till after 31st March 1898. The expenditure in Bengal and the Punjab was also over-estimated.

*Provincial outlay, Rs. 2,258,018.*

The actuals fell short of the Budget Estimate by Rs. 32,932, of which Departmental Officers contributed Rs. 24,330, and Civil Officers Rs. 8,652. There was a large excess in Assam (Rs. 87,936) due to additional funds being granted for repairs rendered necessary by the earthquake, but this was more than counterbalanced by the following savings, due generally to the restriction of expenditure:—

	Rs.
Burma . . . . .	16,381
Bengal . . . . .	13,829
North-Western Provinces and Oudh . . . . .	12,412
Punjab . . . . .	24,608
Bombay . . . . .	34,872

The excess outlay over the Revised Estimate was Rs. 39,018 which was the net result of an excess of Rs. 40,170 in the expenditure under Departmental Officers and a lapse of Rs. 1,152 of grant for expenditure under Civil Officers. The excess of Rs. 40,170 was mainly contributed by Assam (7,596), Bengal (14,171), Punjab (15,392) and Madras (10,936), partly counterbalanced by a saving in the North-Western Provinces and Oudh (13,812).

*Incorporated Local Fund outlay, Rs. 1,564,010.*

The decrease of Rs. 221,790 in the actuals as compared with the Budget Estimate was chiefly due to restriction of expenditure. Lapses from the Revised Estimate of Rs. 14,124 under Departmental Officers and of Rs. 17,766 under Civil Officers were due to an over-estimate of the requirements of the year.

7. The total expenditure of the year, including the outlay from Excluded Local Funds, Contributions and Local Loans, has been charged in the accounts under the following heads:—

	Rs.
New works . . . . .	1,622,707
Repairs . . . . .	1,848,496
Tools and plant . . . . .	52,409
Suspense . . . . .	—13,616
Miscellaneous (Contributions to Municipalities, etc.) . . . . .	57,321
Establishment . . . . .	893,678
<b>Add—</b>	<b>4,360,994 (a)</b>
<b>In England—</b>	
Payment . . . . .	Rs. 77,429
Exchange . . . . .	43,601
	<b>121,030</b>
<b>TOTAL</b>	<b>4,482,024</b>

(a) Includes £3,437 on account of English stores, plus Rs. 1,086 exchange thereon.

The services on which this sum was spent and the funds from which it was provided are shown below. The outlay from Excluded Local Funds, Contributions and Local Loans Rs. 231,478, represents money expended mainly on works requiring professional skill, carried out by the Public Works Department for local bodies and institutions:—

(a) Includes Rs. 42,417 on account of English stores, plus Rs. 1,996 exchange thereon.

8. The capital cost of Civil buildings on which expenditure under "Repairs" was incurred during the year was :—

India	Central India	Rx.
	Rajputana	74,106
	Coorg	188,815
	Baluchistan	75,293
	Port Blair	221,878
		43,816
TOTAL INDIA		553,408
Central Provinces		772,600
Burma		1,967,656
Assam		272,849
Bengal		4,148,346
North-Western Provinces and Oudh		4,731,093
Punjab		2,038,216
Madras		1,711,556
Bombay		4,632,755
GRAND TOTAL		20,828,479

9. *Outlay in England.*—The outlay in England, exclusive of the value of stores charged to works, compares as follows with the actuals of the previous four years :—

DETAILS.	1898-94.	1894-95.	1895-96.	1896-97.	1897-98.
	£	£	£	£	£
Salaries of President, Professors, etc., and other Charges of the Royal Indian Civil Engineering College, Cooper's Hill	30,330	26,944	26,489	25,995	26,167
Furlough pay and absentee allowances of Officers of the Public Works Department	48,729	47,091	52,749	55,512	46,360
Salaries, etc., of passed students detained in England	3,683	3,847	3,999	3,709	3,752
Passage to India of Officers on appointment	611	611	656	545	711
Salaries, etc., of Indian Officers of the Public Works Department undergoing training in England	354	87	165	42	449
Remuneration for professional services	379	...	...	...	...
	85,086	78,580	84,056	85,803	77,429
Exchange	55,294	66,377	83,865	56,579	43,801
TOTAL	140,380	143,957	147,921	142,382	121,080

10. The direct charge to the State under the head "Civil Works" on account of the Royal Indian Civil Engineering College at Cooper's Hill was :—

	Charge in sterling.	Income in sterling.	Net charge.
	£	£	£
In 1897-98	26,167	28,911	—2,754
" 1896-97	25,994	26,224	—230
" 1895-96	26,489	24,724	1,765
" 1894-95	26,944	25,342	1,602
" 1893-94	30,330	25,828	4,502
" 1892-93	28,184	27,704	480
" 1891-92	28,017	27,197	820
" 1890-91	24,905	24,878	27

There was a small increase in expenditure over the previous year; but the income was the largest that has been realized during the period of eight years for which figures are given above, and the net result was a credit of £2,754.

11. Omitting the outlay from Excluded Local Funds and Contributions, in regard to which the Public Works Department is merely the executive agency employed to carry out the work, the outlay in India on "Civil Works" during 1897-98 compares as follows with that incurred during the four preceding years :—

HEADS OF SERVICE.	1893-94.	1894-95.	1895-96.	1896-97.	1897-98.
	Rx.	Rx.	Rx.	Rx.	Rx.

(a) Includes £2,217 on account of English stores, plus exchange thereon.

(b) Includes £5,768

(c) Includes £2,437

12. The expenditure on Establishment bears the following ratio to the outlay on works and repairs by Public Works Officers :—

1893-94 . . . . .	27.96
1894-95 . . . . .	31.69
1895-96 . . . . .	29.86
1896-97 . . . . .	28.13
1897-98 . . . . .	31.23

There has been an increase in the percentage as compared with the previous year.

13. The Provinces, in which the percentages are highest, are given below:—

	Percentage on outlay on works and repairs.
Central India . . . . .	81.06
Madras . . . . .	47.59
Central Provinces . . . . .	42.92
Rajputana . . . . .	41.82
North-Western Provinces and Oudh . . . . .	40.22

The high rates in Central India and Rajputana are due to exceptional circumstances. A comparatively large establishment has to be maintained owing to the scattered nature of the works. Those in the Central Provinces and North-Western Provinces and Oudh are due to the increased charges on account of the allowances, etc., of officers transferred to the Province for duty on famine works. While in Madras the high percentage this year is due to the restriction of outlay on works and repairs which was necessary to admit of adequate provision being made for famine relief works.

The rate for work done under the control of the Director-General of Military Works is very low, being only 4.05 per cent., and is stated to be attributable to the non-adjustment of certain charges in connection with the expenditure on the Bangalore Water-supply. The adjustment due to end of 1898-99 will be carried out in the accounts for that year.

14. Of the total outlay under Public Works Officers—

		Against in	
		1896-97.	1895-96.
22 per cent. was expended on new Buildings . . . . .		27 per cent.	26 per cent.

15. In Burma, Bengal, and the North-Western Provinces and Oudh large sums were spent on new buildings; but in all provinces the bulk of the expenditure was devoted to the construction and repairs of roads. From Imperial Funds, a sum of Rs. 56,658 (exclusive of Expenditure in England and Exchange) was expended on the Bangalore water-supply.

The principal figures are given in the table below :—

Provinces.	New Buildings.	New Roads.	Repairs to Roads.	Total expenditure under "45.—Civil Works."
	Rs.	Rs.	Rs.	Rs.
Burma . . . . .	155,144	93,725	137,685	461,117
Bengal . . . . .	173,121	71,184	270,808	634,501
North-Western Provinces and Oudh	82,752	41,468	175,479	372,170
Central Provinces . . . . .	19,327	38,324	46,327	118,111
Assam . . . . .	43,125	75,935	118,450	274,802
Punjab . . . . .	43,168	30,209	125,880	356,127
Madras . . . . .	73,633	59,753	230,895	499,811
Bombay . . . . .	71,533	45,434	177,080	394,008

16. A few of the principal works, on which outlay from Imperial Funds was incurred, and their localities are noted below :—

*In Military Works Department—*

Buildings—New Roman Catholic Church at Quetta.

Miscellaneous Public Improvements—Bangalore Water-supply Project.

*In Port Blair and Nicobars—*

Buildings—Cellular Jail at Aberdeen.

*In Baluchistan—*

Buildings—New Residency, Quetta.

Roads—Converting Kuch-Ziarat road into a tonga road.

*In Assam—*

Roads—Nichuguard-Manipur road.

*In Bengal—*

Buildings—New office for Comptroller of Post Offices, Calcutta.

*In Punjab—*

Buildings—Public Works Department New Secretariat Offices at Simla.

17. The outlay from Provincial Funds by Officers of the Public Works Department was expended in the following proportions:—

			Against in	
			1896-97.	1895-96.
25	per cent.	on new Buildings	30 per cent.	29 per cent
9	"	" Roads	7 "	7 "

11	"	on Repairs to Buildings	10 "	10 "
25	"	" " to Roads	24 "	24 "
1	"	" " to Works of Miscellaneous Public Improvement.	1 "	1 "
37	"	Total on Repairs.	35 "	35 "
26	"	of the total outlay has gone in payments to Establishment	24 "	26 "
2	"	on Tools and Plant and Suspense	2 "	...
28	"	Total on Establishment and Tools and Plant, etc.	26 "	26 per cent.
100		Total.	100	100

18. Burma, Bengal, the North-Western Provinces and Oudh, Madras, and Bombay show considerably larger outlay on new buildings than on new roads. On the other hand, in the Central Provinces, Burma, Assam, Bengal, the North-Western Provinces and Oudh, Punjab, and Bombay, the bulk of the expenditure was incurred on the maintenance of roads; there being, in comparison, but a trifling sum devoted to new roads, in all the provinces, except the Central Provinces, Burma, and Assam. The outlay by officers of other Departments was comparatively small, and it was chiefly incurred on works of Miscellaneous Public Improvement.

19. The principal works under construction on which outlay was incurred were:—

*In Central Provinces—*

Buildings—Special repairs, additions and alterations to Police lines, Nagpur.  
Roads—Betul-Chhindwara road, 2nd, 3rd, and 4th sections.  
Dindori-Birsinghpur road, 1st section, from Dindori to Shahapura.

*In Burma—*

Buildings—Extension of Toungoo Jail.  
Extension of Jail at Bassein.  
Constructing main west entrance, Jail, Bassein.  
Conversion of Paungde Reformatory into a District Jail.  
Military Post at Sadon.  
Barracks and lines for Military Police at Myitkyina.  
District Court-house at Thaton.  
Constructing quarters for Government clerks at Rangoon.  
Roads—Cart-road over Bhamo-Manoi section of Bhamo-Namkhan road.  
Indin-Falam road.  
Roads and drains for Maymyo station.  
Raising and bridging 19 miles of road from Kyaukse to Samon via Kunes.  
Ruby Mines road from Thabeitkyin to Mogok.  
Road from Tavoy to a point on river bank opposite Yebyu.  
Metalling portions of the Myingyan-Port Steadman road.  
Taungyi-Kungtung road, 1st section.

*In Assam—*

Buildings—Reconstructing Sylhet Jail.

Roads—Cart-road from Maulvi Bazar to Manmukh.

Aijal-Lungleh road.

Bridges on Companyganj-Salutikar road.

Bridging Northern Trunk road between Gohpur and Kolabari.

Reconstructing bridges on Gauhati-Shillong cart-road.

Rebuilding 14 major bridges in the Assam Trunk road west of Gauhati.

*In Bengal—*

Buildings—Installation of the electric light at Belyedere and Jail, Alipore.

Out-patient building, Medical College Hospital, Calcutta.

Acquiring a plot of land on the east side of the Presidency General Hospital, Dhahanda.

New Chemical block, Medical College, Calcutta.

Additions and alterations to Soldiers' barrack, Chinsura.

Extension of out-patient department in Campbell Hospital, Sealdah.

Female Ward in Campbell Hospital, Sealdah.

Central ganja godown, Nowgong.

Public office, Darjeeling.

School building for 200 boys, Kurseong.

Reconstructing new Kutcherry building, Darjeeling.

Double-storied barrack, Bhagalpur.

Salt godowns, Chittagong.

*In North-Western Provinces and Oudh—*

Buildings—New Government House, Naini Tal.

Main building of new Diocesan Boys' School, Naini Tal.

*In Punjab—*

Roads—Improving and metalling the feeder road from Ajala to Amritsar.

Miscellaneous Public Improvements—Extending Protection Works, Dera Ghazi Khan, for 1897-98.

*In Madras—*

Buildings—Additions and improvements to Collector's office, Cuddalore.

Public offices, Tanjore.

New Law College, Madras.

Roads—Boyarani-Kallikota roads.

Improvements to Chendalo-Mysore road.

Miscellaneous Public Improvements—Improvements to Ootacamund Lake.

*In Bombay—*

Buildings—Narotamdas Madhavdas Lunatic Asylum, Navapada.

Roads—British portion of Neri-Ajanta road.

20. The money from Incorporated Local Funds, assigned for outlay by Officers of the Public Works Department, was expended in the following proportions:—

		Against	
		1896-97.	1895-96.
8 per cent. on new Buildings . . . . .	5 per cent.		6 per cent.
28 " " Roads . . . . .	28 " "		29 " "
6 " " Miscellaneous Public Improvements . . . . .	6 " "		6 " "
32 " Total on new Works . . . . .	39 " "		40 " "
3 " on Repairs to Buildings . . . . .	3 " "		3 " "
48 " " " Roads . . . . .	40 " "		39 " "
3 " " " Miscellaneous Public Improvements . . . . .	2 " "		2 " "
51 " Total on Repairs . . . . .	45 " "		44 " "
16 " on Establishment . . . . .	15 " "		15 " "
1 " " Tools and Plant and Suspense . . . . .	1 " "		1 " "
17 " Total on Establishment and Tools and Plant . . . . .	16 " "		16 " "
100 Total . . . . .	100		100

21. The principal works in progress under the Public Works Department were:—

*In Burma—*

Roads—Constructing a bridge over the Akyamohang at Akyaw.

*In Assam—*

Roads—Sonamganj-Pagla road.  
Nalwanpur-Jaintiapur road.  
Bridge over Desai at Moriani.

*In North-Western Provinces and Oudh—*

Roads—Converting Mau-Punch road into a 1st class road.

*In Bombay—*

Roads—Kudchi-Terdal road, 2nd and British portion.  
Athni-Kagwad road.  
Miryabar-Shindgi *via* the Amba Ghat section from Bijapur to Shiwanji, 1st and 2nd sections.  
Indi-Shindgi road, 1st section.  
Palla-Badami road, improving portion.  
Gajendragad-Naregal road.  
Nargund-Mallapur road.  
Roni-Gajendragad road.

*In Punjab—*

Roads—Improving the Jhajjar-Bahadurgarh road.

22. The names of the works carried out by Officers of other Departments cannot be given, as accounts are not received in sufficient detail.

23. The principal works on which outlay was incurred from Excluded Local Funds, Contributions and Local Loans during 1897-98 are given below; in some cases a portion of the expenditure is also recorded under Provincial:—

*In Military Works Department—*

Buildings—Sandeman Memorial Hall at Quetta.

*In Central Provinces—*

Miscellaneous Public Improvements—Water-works, Bhandara.  
" Khandwa.  
" Wardha.

*In Punjab—*

Miscellaneous Public Improvements—Drainage work, Delhi.  
Extending River Protective Works, Dehra Ghazi Khan.

*In Madras—*

Miscellaneous Public Improvements—Light house at False Point, Diva.  
" Monapad.

24. 33.—*Famine Relief Works.*—The actual outlay by Funds (exclusive of outlay from Excluded Local Funds) is compared with the Budget and Revised Estimates in the following table:—

	Imperial.	Provincial.	Incorporated Local.	TOTAL.
	Rs.	Rs.	Rs.	Rs.
Budget Estimate . . . . .	1,945,100	164,100	41,000	2,150,200
Revised Estimate . . . . .	3,240,000	158,300	11,500	3,409,800
Actuals . . . . .	3,210,789	158,518	2,760	3,352,367

The increase over the Budget Estimate was due to the fact that no accurate forecast of expenditure on Relief Works could be prepared owing to

uncertainty regarding the extent to which, and the time over which, relief operations would be necessary. The decrease compared with the Revised Estimate was due principally to the transfer at the close of the year of the normal expenditure on revenue-producing works to ordinary heads under Public Works Department Code, Volume I, Chapter IX, paragraph 104 (III and IV).

The detailed account of expenditure by provinces and departmental heads will be found in the abstracts and detailed accounts appended to the review. In the Central Provinces, North-Western Provinces and Oudh, Madras and Bombay the expenditure has been heavy. The greater portion or nearly two-thirds of the whole outlay was incurred on roads. The expenditure on the works recorded under this head would not have been incurred in ordinary years.

25. The outlay from Excluded Local Funds, on Famine Relief works, Punjab, amounted to Rx. 3,923.

26. 50.—*Miscellaneous Public Improvements*.—An expenditure of Rx. 4,105 was incurred during the year on account of constructing a jetty and a shed at Chittagong, against the provision of Rx. 8,400 in the Revised Estimate for the year. The work, which is estimated to cost Rx. 48,800, is being carried out by the Assam-Bengal Railway Company, and the expenditure transferred to the Public Works Department, Bengal, for final adjustment.

27. The suspense balances and objectionable expenditure outstanding at the close of 1897-98 have been reviewed separately.

CALCUTTA;

The 13th March 1899.

A. R. BECHER,

Accountant General, P. W. Dept.

at Calcutta.

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

**Memorandum on the snowfall in the mountain districts bordering Northern India and the abnormal features of the weather in India during the past year, with a forecast of the probable character of the south-west monsoon rains of 1899.**

The present memorandum is drawn up in accordance with the practice of the past fifteen years, and includes, firstly, a brief summary of the information received from various officers relating to the snowfall of the past winter or cold weather in the Afghan mountains and the Himalayan area; secondly, a statement of the chief peculiarities or abnormal features of the meteorology of India during the past year; and, thirdly, a forecast of the probable character of the approaching south-west monsoon rains based on this information.

The forecast is based in part on the snowfall information and on the abnormal features of the weather during the past five months, and in part on a comparison with the meteorology of the previous twenty-two years, so far as it is available. It is necessary to point out that the forecast is a statement of probabilities and not of certainties, and that it is liable to error from the limitation and uncertainty of part of the data on which it is based. It has been drawn up after a consideration of all the available information, but it should, to use the words of the Famine Commission Report, "*be used with due caution.*"

The monsoon forecasts, as at present issued, necessarily leave out of consideration two important points on which the agricultural value of the monsoon rainfall largely depends, *viz.*:

- (1) the probability of the occurrence of a prolonged break in the rains in July or August;
- (2) the probability of the unusually early termination of the rains in North-Western and Central India or in Bengal;

and are hence imperfect every year to that extent.

The chief features or conditions which influence and determine the extension and general strength of the south-west monsoon currents are as follows:

*1st.*—The amount and time of occurrence of the cold weather snowfall in the mountain districts adjacent to Northern India.

*2nd.*—The local peculiarities of the weather in India immediately antecedent to the advance of the monsoon currents across the coasts of Bombay and Bengal into the interior, and which, it is found, are generally initiated during the hot weather, and are frequently more or less persistent in character. These abnormal features are, on the whole, best estimated by means of the variations of pressure from the normal.

*3rd.*—Local peculiarities in the Bay of Bengal and Arabian Sea, over which the monsoon currents pass before they reach India, and probably also the Indian Ocean, which is the source of the massive current of the south-west monsoon in India.

The first of these conditions or factors is mainly influential in determining the northern limits of the monsoon rains, heavy and prolonged snowfall in the Western Himalayan area either preventing or delaying the extension of the monsoon current over Upper India during the rainy season. Heavy and untimely snowfall in April and May especially exercises a very powerful influence in this way.

The second factor determines those large local district or provincial variations of rainfall during the monsoon, which are evidently due to persistent local

conditions or peculiarities, and not to general causes influencing the whole of India more or less.

The third and last factor is at least of equal importance with the preceding two, but it is that on which information is most difficult to obtain and is least in amount and longest in being received. In fact, information respecting the weather conditions in the Arabian Sea, Bay of Bengal or the Indian Ocean has hitherto been rarely received in time to be utilized in drawing up the annual forecasts. Special arrangements have been made to obtain telegraphic information from Zanzibar, Mauritius and the Seychelles in the hope that it might throw some light upon the conditions at present prevailing in the south-east trades region in the Indian Ocean.

### REPORTS OF SNOWFALL ON THE AFGHAN MOUNTAINS AND HIMALAYAS DURING THE WINTER OF 1898-1899.

The whole of the information referring to the snowfall in the mountain districts bordering Northern India for each month of the year is now published as it is received in the India Monthly Weather Reviews.

The following gives a brief summary of the information relating to the snowfall of the past cold weather obtained up to date.

#### I.—AFGHAN MOUNTAIN DISTRICTS.

##### HILLS WEST OF DERA ISMAIL KHAN, INCLUDING WAZIRISTAN.

##### (1) WANA.

The following is a summary of the reports received from the Political Officer, Waziristan:

*November.*—No snow was reported.

*December.*—Light snow fell on the night of the 20th—21st on the highest peaks and heavy snow on the 24th, and during the period, 27th to the 29th, down to about 8,000 feet. Snow was lying to the depth of 3 to 6 inches on the peaks above 8,000 feet high at the end of the month.

*January.*—Light falls of snow occurred on the highest peaks on the 12th and 30th.

*February.*—Snow fell on the 3rd, 5th, 8th, 9th, 10th, 13th and 23rd of this month on the Marwattai hills above 7,500 feet. There was a slight accumulation of snow on the north faces of the hills at the end of the month.

*March.*—Snow fell on the 11th, 12th, 13th, 26th and 27th on the Marwattai hills. The falls were generally light and melted rapidly.

*April.*—No snow fell on the Marwattai hills. The snowfall of the past winter was much lighter than usual throughout the whole winter.

##### (2) DERA ISMAIL KHAN (KULACHI BORDER).

The following is a summary of the reports received through the Deputy Commissioner, Dera Ismail Khan District:

*December.*—Snow fell on the higher peaks of the Suleiman Range from the 28th to the 30th. The total fall varied in depth from  $1\frac{1}{2}$  feet to 3 feet on the higher peaks. It soon melted.

*January.*—Fine weather prevailed throughout the month until the 30th when a snowstorm gave 5 feet of snow to the higher peaks of the Suleiman Range.

*February.*—Frequent storms occurred during the month, and snow fell on the 2nd, 3rd, 4th, 8th, 9th, 10th, 14th and 15th on the Suleiman Range. The

total fall on the higher peaks is stated to have been 30 feet in depth. (This estimate is probably much exaggerated.)

The Deputy Commissioner states that "during the year 1898-99 the depth of the snowfall on the Suleiman Range amounted to 41 feet as against 23 feet in 1897-98."

### (3) KURRAM.

The following is a summary of the reports received from the Superintendent of the Meteorological Observatory, Parachinar, and the Political Officer, Kurram Valley:

*September.*—Snow fell on the highest peaks of the Sufed Koh on the 15th, 17th and 28th.

*November.*—Light snow fell on the highest peaks on the 15th, 17th and 25th.

*December.*—Snow fell on eleven days during the month. The falls descended to heights varying from 16,000 feet at the beginning of the month to 8,000 feet at the end of the month. During the last storm of the month (on the 28th), which was very heavy, snow fell down as low as Kohat (elevation 1,767 feet).

*January.*—The month was much finer than usual. Snowstorms occurred on the 12th, 13th, 29th and 30th, but the falls were very light.

*February.*—Snow fell on the 4th and 5th and again from the 7th to the 10th and also from the 12th to the 14th and the 22nd to the 24th. 2½ feet of snow were reported to be lying on the Peiwar Kotal at the end of the month.

*March.*—There were snowstorms on the 2nd, 3rd, 9th, 11th, 12th, 15th, 16th and the 27th to the 29th. The last storm of the month occurred on the highest peaks of the Sufed Koh above 14,000 feet. About 6 inches of snow were lying on the Peiwar Kotal at the end of the month.

*April.*—Snow fell on six days in April, *viz.*, the 4th and the 14th to the 18th on peaks above 16,000 feet in elevation. There was practically no snow lying on the Sufed Koh on the 15th of May. The snowfall of the past winter was less than that of the preceding winter and below the normal.

### (4) THAL SUB-DIVISION (KOHAT DISTRICT).

The Assistant Commissioner, Thal, writes that "during the past winter there has been no snowfall in any part of the sub-division, except the Samana Range, where the fall is estimated at 3 feet."

### (5) KABUL.

The following is a summary of the information received from the Meteorological Observer, Kabul, through the British Agent:

*December.*—Snow fell on the 18th, 25th and 28th, but the falls were light. The Paghman and adjoining hills were covered with snow at the end of the month.

*January.*—A storm gave light falls of snow on the 29th and 30th.

*February.*—Snow fell on the 2nd, 8th, 9th, 10th, 13th, 14th and 23rd. The falls at Kabul were light, and the total of the month was only 14 inches. The storm of the 13th and 14th was severe and extended as far south as Ghazni, closing the passes for a fortnight. There was no snow accumulation in the valley at the end of the month. The Paghman hills were covered with snow throughout the month.

*March.*—Light snow fell on the 3rd, 9th and 15th. The Paghman mountains were covered with snow at the end of the month, but no information had been received of the depth of the accumulation. The snowfall of the past winter is considered by the inhabitants of Kabul to be considerably below the normal.

## (6) KHYBER PASS DISTRICT.

The following is a summary of a report of the snowfall in this area during the months of January and February forwarded by the Political Officer:

"During the winter the snowfall, compared with former years, has been very slight indeed. At Lundi Kotal, i.e., on the Loargi Plain (3,600 feet elevation), the snow in January melted as it fell, and there was no accumulation. The snowfall on Tor Sappar (5,260 feet) and what is shown on district maps as the Tartara Peak (6,775 feet) must have averaged on each occasion between 6 and 8 inches. There were three falls during the winter—one late in January and two in February. The snowfall in Maidan has also been scanty compared with former years.

"The inhabitants generally state that, compared with former years, they have had no snowfall at all this year."

## (7) CHITRAL.

The following gives comparative data of the precipitation at the recently established observatories of Chitral and Drosh for the period November to April:

*Chitral.*

Year.	RAINFALL.						Total fall, November 1898 to April 1899.
	November 1898.	December 1898.	January 1899.	February 1899.	March 1899.	April 1899.	
	Inch.	Inches.	Inches.	Inches.	Inches.	Inches.	Inches.
1898-97 . . . . .	0	0'02	4'88	2'94	4'65	4'80	18'69
1897-98 . . . . .	0	1'68	0'63	1'65	15'25	6'08	25'49
1898-99 . . . . .	0'05	1'55	0'10	2'28	3'11	2'10	9'14

*Killa Drosh.*

1897-98 . . . . .	0	1'98	1'45	1'26	12'12	5'34	22'15
1898-99 . . . . .	0	1'16	0	2'19	2'27	2'66	8'28

The data establish conclusively that the precipitation of the past winter was much less in amount at these stations than during the previous two winters, and suggest that the snowfall in that mountain district was very considerably below the normal and probably barely 50 per cent. of the normal fall.

The following report has been received from the officer in medical charge, Killa Drosh:—"The post of Drosh is about 4,500 feet high. Snowfall generally occurs in the territories of Drosh during the months of October, November, December, January, February, March and April and is of frequent occurrence on the higher mountain ranges and of occasional occurrence over the valley. There is one mountain to the east of Killa Drosh about 16,000 feet high. It is covered with snow during the whole year. To the west of Killa Drosh is a lower mountain range about 11,000 feet high. The Lawarai Pass, which is about 18 miles to the south of Drosh, is 10,000 feet high. Snow lies there more or less nearly throughout the whole year except the months of August and September. There were 21 falls of snow during the year on the following dates:—23rd October, 13th November, 12th, 16th, 17th and 24th December, 2nd and 14th of January,

14th and 23rd February, 2nd, 4th, 12th, 15th, 16th, 26th and 27th of March and the 10th, 11th, 16th and 17th of April. The falls from the 14th January to the 26th March extended to Drosh and the neighbouring hills. The remaining falls were received on the higher ranges only. The area over which these storms are known to have extended is about 50 miles to the north, east and west and about 30 miles to the south of Drosh.

"The total snowfall during the past winter at Drosh was 4 feet and 11 inches in amount. The depth of snow over the peaks of the highest mountains is not at present known, but is probably about 10 feet on the mountains situated to the east of Killa Drosh. The Lawarai Pass is covered with a considerable amount of snow at present; the depth of snow is estimated from 3 to 10 feet.

"The inhabitants of the country state that the snowfall during the past winter was less than in the corresponding period of the previous year."

## II.—HIMALAYAS.

### (A) THE PUNJAB AND KASHMIR HIMALAYAS.

#### (1) HAZARA.

The following report has been received from the Deputy Commissioner, Hazara District:

"The first fall of snow on the highest peaks occurred in October. It was, however, light and soon melted. The first heavy fall occurred on the 29th December down to 4,500 feet. The depth of the fall at a height of 10,000 feet was probably one foot. Light snow fell again down to 6,000 feet on the 6th and 7th January and more or less heavy snow on the 3rd, 5th, 6th, 7th, 10th, 11th, 14th and 15th February. The total fall at a height of 10,000 feet measured about 6 feet in depth. Snow fell down to 7,000 feet on the 6th, 9th, 12th, 13th, 14th and 16th March and on the higher mountains down to 8,000 feet on the 12th, 16th, 17th, 18th and 19th April. The total fall in April was from 1 to 3 feet.

"The storms extended over the whole of the ranges in this district and between the storms the weather was generally fine.

"There was about 2 feet of snow on the Babusar Pass on the 5th of May and some snow as far down as Narau in the Kagan Valley and on the hills over 10,000 feet high.

"The total fall of the winter was somewhat less than usual."

#### (2) MURREE.

The following tables give statements of the snowfall as measured at Murree and on the hills near Kahuta during the past and preceding winters for comparison:

Station.	TOTAL FALL OF SNOW IN THE MONTH OF					Total of period, 1898-99.
	December 1898.	January 1899.	February 1899.	March 1899.	April 1899.	
	Ft. In.	Ft. In.	Ft. In.	Ft. In.	Ft. In.	Ft. In.
Murree	0 11	0 3	6 4	Nil	Nil	7 6
Kahuta	...	Nil	7 0	Nil	Nil	7 0

Station.	TOTAL FALL OF SNOW FROM JANUARY TO MARCH IN											Average of eleven years.
	1899.	1898.	1897.	1896.	1895.	1894.	1893.	1892.	1891.	1890.	1889.	
	Ft. In.	Ft. In.	Ft. In.	Ft. In.	Ft. In.	Ft. In.	Ft. In.	Ft. In.	Ft. In.	Ft. In.	Ft. In.	Ft. In.
Murree	7 6	6 3½	10 2½	7 5	11 10	15 9	20 4	0 5	29 0	3 6	7 3	11 9
Kahuta	7 0	23 2	4 0	1 0	6 0	5 0	18 0	Nil	5 3	0 9	4 3	5 10

The data show that the snowfall at Murree was considerably below the normal and was comparable in amount with the falls in the cold weathers of 1898, 1896 and 1889. The fall at Kahuta was, on the other hand, slightly above the average of the past eleven years.

### (3) KASHMIR.

The following account of the snowfall in Kashmir during the early part of the winter was received from the Meteorological Reporter to the Kashmir State in February last :

"The Kashmiris say that a severe winter in the valley is usually followed by a mild one and *vice versa*. Last year's winter was unusually dry, and it was therefore anticipated that during this winter heavy snow would fall, and this anticipation is now a realisation. The snowfall in and around the Kashmir Himalayas during this winter has been heavy, though not more than the average.

"Snow began to fall earlier than usual this winter, and a great deal fell in December and in February, whilst in January very little fell.

"In January the weather was generally colder but finer than usual. At the end of the month it was thought that the winter was over, but it suddenly changed on the 2nd February when a snowstorm occurred lasting 8 hours. Another snowstorm, more severe than the first, occurred on the 4th February and lasted for twenty-four hours, bringing down 2 feet of snow. Two other storms occurred on the 9th and 13th February, but were of moderate intensity.

"On the mountains surrounding the valley the snow lies very deep. On the Banihal Pass (9,200 feet) there are, it is said, 15 feet of snow and at Gulmarg 7 feet.

"Most of the snow melted as it fell in the valley in February. This, however, is not the case with snow falling on the hills surrounding the valley."

The following table shows the snowfall measured as rain during this winter and previous five winters for comparison :

Year.	PRECIPITATION.						
	December.	January.	February.	March.	April.	May.	Total of period.
	Inches.	Inches.	Inches.	Inches.	Inches.	Inches.	Inches.
1898-99	2.73	0.68	4.21	3.01	3.44	1.38	14.45
1897-98	0.25	1.91	2.15	0.76	1.28	2.64	9.99
1896-97	0.63	6.18	1.38	5.79	4.93	4.33	23.44
1895-96	0.62	1.09	2.46	0.22	3.48	2.22	10.09
1894-95	1.91	6.11	4.81	5.30	2.63	1.55	22.31
1893-94	0.66	7.16	4.23	4.47	4.09	1.52	21.75

The comparison indicates clearly that the precipitation at Srinagar during the past winter was much less than during the winters of 1893-94, 1894-95 and

1896-97 and also so far as can be judged from the limited data below the normal by at least 20 per cent.

The following additional memorandum, dated the 23rd May, on the character of the snowfall in Kashmir during the past winter has been received from Dr. Mitra, Meteorological Reporter, Kashmir State:

"During the last winter 7'62 feet of snow fell in the valley, a detailed report of which was sent to the Meteorological office on the 20th February. No more snow has fallen in the valley since the submission of that report. On the 24th February, while it rained in the valley, heavy snow fell on the surrounding mountains. On that date over a quarter of a foot of snow was measured at Dras. Nearly 4 feet of snow fell at Dras in the month of March and over 3 feet in April, and on the 4th May a snowstorm occurred there bringing down 1½ feet of snow. On the 11th March and 17th April snow fell heavily on the hills in Kashmir descending as low down as the Takht-i-Suleiman (6,000 feet). There is at present 3 feet of snow on some parts of the Banihal Range. At Gulmarg there was 1 foot of snow so late as 5th May. Over the Zoji-la Pass (11,300 feet) there is about 5 feet of snow, and on the Rajdangan Pass (11,800 feet) there are, it is said, 12 feet. All the mountains around the valley are covered with deep snow. The spring in the valley was unusually wet and cold and prolonged. From all accounts it appears that the snowfall on the higher ranges has been more than usual, and that it is lying on the higher as well as on the lower passes longer than usual. In the valley it is now colder than usual, and unsettled weather is the chief feature we notice this year. The river Jhelum is at present higher than usual. As it is still cold in the valley, the snow does not melt, and while it is raining in Srinagar it is snowing on all the hills. Light showers of rain at intervals in June and July will melt the snow slowly on the mountains, but if there should occur a heavy rainfall by the middle of June, it is apprehended that a severe flood will occur.

"From the 18th May we have had hazy weather. On the 19th a heavy storm of wind occurred which dispelled the mist for a time, but it again came up after the storm was over."

#### (4) LEH.

Very full accounts of the snowfall during the past winter in Ladakh have been received from the Superintendent of the Leh Observatory. The following is a brief summary of these reports:

*October.*—Snow fell on the 23rd on the hills surrounding Leh down to an elevation of 12,500 feet. It also fell during the following night in the Indus Valley near Leh. It melted rapidly during the remainder of the month, and the snow-line was at a height of about 15,000 feet at the end of the month.

*November.*—No snow fell.

*December.*—Light showers of snow fell on the 8th, 10th and 13th. On the 16th there was no snow on the Karzong Pass (elevation 17,500 feet). Heavy snow fell over the whole Indus Valley in Ladakh from the 16th to the 18th. Light falls were received on the 19th, 21st and 22nd, and a second heavy general fall occurred from the 29th to the 31st.

*January.*—Light snow showers fell in Leh and the neighbourhood on the 1st, 13th, 17th, 25th and 31st. The falls on the mountain ranges to the south of Leh were apparently heavy.

*February.*—Snowstorms occurred on the 3rd, 9th, 10th, 18th, 19th and 24th. These storms were all general extending over the whole Upper Indus Valley and side valleys. Heavy snow fell over the neighbouring ranges down to 12,000 feet on the 15th.

*March.*—There was a severe snowstorm on the 6th and again from the 9th to the 12th. The fall melted rapidly in the valley which was free from snow again on the 15th.

*April.*—Snowstorms occurred on the 9th, 10th and 19th over the whole of Ladakh. There were also snowstorms on the higher ranges above 13,000 feet on

- the 18th, 19th, 21st, 22nd, 24th and 25th. The depth of snow on the Karzong Pass at the end of April was about 4 feet.

*May*—During the period from the 1st to the 15th some rain showers fell in Leh. The snow-line never descended lower than 15,000 feet. The accumulation on the Karzong Pass on the 15th of the month was from 3 to 4 feet.

The inhabitants of Leh consider that the snowfall of the past winter was similar in total amount to that of the winter of 1896-97 and considerably greater than that of the winter of 1897-98.

#### (5) LAHOUL.

The following gives a statement of the snowfall registered at the Observatory at Kailang in Lahoul during the past winter and also during the corresponding periods of the past five years for comparison :

Month.	Normal monthly precipitation measured as rainfall.	Rainfall, 1898-99.	Snowfall, 1897-98.	Snowfall, 1896-97.	Snowfall, 1895-96.	Snowfall, 1894-95.	Snowfall, 1893-94.
		Total precipitation of month measured as rainfall.	Total snowfall of month.	Total snowfall of month.	Total snowfall of month.	Total snowfall of month.	Total snowfall of month.
		Inches.	Ft. In.	Ft. In.	Ft. In.	Ft. In.	Ft. In.
December	1.61	3.57	0 6½	1 9	NU	4 0	0 3
January	3.07	0.48	0 6½	5 8	1 2	3 6	3 6
February	3.20	3.12	0 5½	1 2	3 1	2 0	4 3
March	3.39	2.13	0 3	6 10	0 10	3 6	5 4
April	2.80	4.26	NU	?	NU	1 6	2 1
Total	13.47	14.55	3 9½	15 5	5 2	14 6	15 3

The precipitation at Kailang during the period, December to April, was hence slightly above the normal (8 per cent.). It was equivalent to about 12 or 13 feet of snow, and hence was similar in amount to that of the corresponding periods in 1896-97, 1893-94 and 1894-95.

The Superintendent of the Observatory describes the winter as follows :

" We enjoyed very fine weather from October up to the beginning of December, but the weather broke up rather suddenly, and in the second-half of December we had very heavy snowfalls which entirely blocked up the Rotang Pass. January was bright and fine, the sky being almost always blue. February and March brought us a good amount of snow again, and so did April. Taking everything into consideration, we had a favourable winter. Since the 25th of April we have had no snowfall whatever, but from the 10th to the 14th of May it rained pretty heavily, and on the night from the 13th to the 14th May we had a regular thunderstorm. This occurs very seldom at this height. "

#### (6) SIMLA HILL DISTRICTS.

The following is a summary of the data for these districts received from the Deputy Conservator of Forests, Bushahr Division :

*September*.—Snow fell on the 26th down to 10,000 feet and again on the 29th.

*October*.—Light snow fell above 10,000 feet on the 14th.

*November*.—Snow fell down to 6,500 feet on the 5th. The depth of snow on the Kanawar Range at 8,000 feet was about one foot at the end of the month, and the passes across these ranges were closed.

*December.*—Slight snow fell on the 12th, 13th, 16th and 17th above 7,000 feet. Moderate snow fell on the 20th and light snow on the 21st, 24th, 25th and 26th above 5,750 feet. There was a heavy fall on the 30th and 31st over the whole district down to 5,750 feet. All passes over 10,000 feet were closed throughout the month.

*January.*—Heavy snowfalls were received over the whole area above 5,750 feet on the 2nd, 3rd and 4th. Fine dry weather prevailed during the remainder of the month.

*February.*—Heavy falls of snow occurred on the 5th and 6th and again on the 26th above 5,750 feet. Slight falls were also received on the 4th, 9th, 13th, 14th, 15th and 24th above 9,000 feet. The weather was unusually cold in the Sutlej Valley after the storm of the 13th to the 15th.

*March.*—There were light falls on the 7th, 9th, 10th, 11th, 12th and 13th above 10,000 feet. All the passes over 12,000 feet in elevation were closed throughout the month.

*April.*—Light to moderate falls of snow occurred on the 1st, 6th, 8th, 9th, 10th, 12th, 13th, 14th and 15th above 9,000 feet and again from the 16th to the 23rd above 10,000 feet.

These snowstorms were accompanied by much thunder and lightning and were general over the whole of Bushahr. All the passes higher than 12,000 feet were closed up to the 15th of the month. The depth of snow at 10,000 feet on open slopes of the northern aspects of the ranges was 18 inches on that date.

*May.*—Light snow fell down to about 10,000 feet on the 12th and 15th and some sleet on the higher ranges from the 16th to the 18th. During the period from the 16th April to 18th May storms were of almost daily occurrence in Bushahr west of Kilba, and gave more or less snow on slopes above 10,000 feet. From the beginning of May the snow on the southern aspect of the hills melted rapidly, and the snow-line retired to 12,000 feet. In the intervals between the storms the weather was fine and the sky free from cloud. The chief character of the storms was that they were almost daily brought up by south to south-east winds, and as far as observed extended over the whole of the Simla hill tracts west of Kilba.

On the 5th of May there was an accumulation of about 5 feet on the Rupin Pass, of about 6 feet on the Borenda Pass, of 8 feet on the Bulder Pass, of 6 feet on the Shatul Pass from the Pabor Valley to Nachar in the Sutlej Valley and 1 to 3 feet on the Harung Pass.

The snowfall of the season was, in the opinion of the natives of the district, considered to be about twice as much as in years of ordinary snowfall.

#### (7) CHAMBA.

The Deputy Conservator of Forests, Chamba State, has sent complete snowfall reports for the past winter, of which the following is an abstract:

*December.*—Snow fell on the 8th, the 12th, the 19th to the 21st and the 29th to the 31st. The snow-line descended to 7,000 feet on the 12th, to 6,000 feet on the 21st and to 3,000 feet during the last snowstorm of the month. The snowfall was reported to be very heavy on the interior ranges, more especially during the last storm of the month. There was 3 feet of snow on the Padri Pass between Chamba and Badrawar Pass on the 15th of the month.

*January.*—Snowstorms visited these hill districts on the 2nd, 3rd, 5th, 6th, 26th and 29th. The weather was unusually bright and clear during the month.

*February.*—Light snow fell on the 2nd and moderate to heavy snow from the 5th to the 7th, the 9th and 10th, the 15th and 16th and the 24th to the 26th.

The snowfall on the 15th and 16th occurred down to 5,000 feet and on the 24th to the 26th down to 7,000 feet.

The snowfall of the month occurred chiefly on the higher and interior ranges above 7,000 feet. On the 15th February there was a depth of 2 feet of snow lying at Kalatop (8,000 feet) and 7 feet at Barmaur (elevation 8,000 feet).

*March.*—Snowstorms occurred on the 6th and 7th and the 16th on the high ranges. The snowfall did not descend below 9,000 feet on the 16th, and it melted quickly again up to 11,000 feet.

*April.*—Light snow fell on the 9th, 12th and 13th. A general storm occurred on the 18th when snow fell as low as 6,500 feet in the main Ravi Valley. Thunderstorms were of frequent occurrence and were accompanied by snow on the higher ranges.

*May.*—Snow fell on the 13th down to about 10,000 feet, but soon melted, and the snow-line on the 15th was about 12,000 feet high.

The Deputy Conservator, writing on the 15th May, says:—"The depth of snow is not known on any of the high passes or ranges. The accumulation of snow down to 10,000 feet on the main ranges and in ravines appears to be rather more than normal, and of course is much greater than at the same time last year. This I attribute to cloudy weather in April and the frequent storms in May.

"The snowfall on the interior ranges is considered to have been somewhat greater than usual and similar in total amount to that of 1895-96. The winter began earlier than usual, but a peculiar feature was the long fine breaks between the storms in the middle of the winter. The total fall was probably below the normal on the lower ranges."

The following statement gives the snowfall as measured at certain forest stations during the past winter in the Chamba State:

Month.	DALHOUSIE KALATOP HILL.				WEST OF STATE.		TINA RANGE, NORTH OF STATE.								VALLEY OF RAVI.																																					
	Kalaion, 8,000 feet.		Sutik, 8,200 feet.		Udhawal, 8,000 feet.		Tina, 5,000 feet.		Klangon, 7,000 feet.		Kundl.		Thunela, 7,000 feet.		Channa, 6,500 feet.		Kilar, 6,000 feet.		Chitrari, 6,000 feet.		Uluhan, 5,000 feet.		Barmaur, 8,000 feet.																													
	Ft.	In.	Ft.	In.	Ft.	In.	Ft.	In.	Ft.	In.	Ft.	In.	Ft.	In.	Ft.	In.	Ft.	In.	Ft.	In.	Ft.	In.	Ft.	In.

#### (8) DALHOUSIE.

The Treasury Officer, Dalhousie, has sent the following report of the snow-fall at that station and on the neighbouring hills:

"On the whole the fall of snow this year has been characterised by early commencement and early stoppage. Snow usually falls heavily or moderately in January and February, whereas this year the fall was confined chiefly to December. Out of a total fall of 5 feet, nearly 2 feet fell in the first week of January,

and there has been none since to record. The weather was mild and temperate in the months of January and February, which are usually the coldest months of the year. There is every sign of an early spring, and the prospects of crops around the station seem satisfactory.

"The total fall during past winter was about 5 feet in amount and hence approximately normal.

"No snow has fallen since the 8th January."

#### (9) KULU.

The following is a summary of reports received from the Assistant Commissioner, Kulu:

*January.*—Snow fell on the 2nd, 3rd, 5th, 6th and 30th in the Kulu Tahsil and on the 1st, the 3rd to the 7th and 30th in the Plach Tahsil. The falls of the 6th and 7th descended to 4,000 feet where the total amount was 4 inches.

*February.*—Snowstorms occurred on the 2nd, 5th, 6th, 14th, 15th, 24th and 25th in the Kulu Tahsil and on the 3rd, 5th, 6th, 7th, 11th, 15th, 16th, 24th and 25th in the Plach Tahsil. The falls on the 6th and 7th were unusually heavy and descended to an elevation of 3,000 feet where the total fall during the storm was 1 foot.

*March.*—Light snow fell on the higher ranges of Kulu on the 6th, 7th and from the 9th to the 18th. Some Lahoulis crossed the Rotang Pass in the middle of the month and nearly all passes in this district were open before the end of the month. The snow melted very rapidly during the last fortnight of the month.

*April.*—Snow fell on four days during the month on the higher ranges above 10,000 feet. The Rotang Pass was closed for three or four days, due to this snowfall.

*May.*—Rain fell slightly on the 1st, 11th, 12th and 13th in the Kulu Tahsil and on the 11th, 12th, 14th and 15th in the Plach Tahsil. During this period there was slight snowfall on the higher passes and peaks.

The Rotang Pass was not open for laden animals at the end of the month.

The snowfall of the past winter is generally considered to be heavier than usual.

The following table gives the depth of snow at the end of each month from January to May 1899 and also on the 25th May of the past eight years on seven of the passes in this district for comparison:

Tahsil.	Name of pass.	Elevations.	DEPTH OF SNOW IN					DEPTH OF SNOW ON THE 25TH MAY							
			Jan- uary 1899.	Feb- ruary 1899.	March 1899.	April 1899.	May 1899.	1898.	1897.	1896.	1895.	1894.	1893.	1892.	1891.
		Feet.	Feet.	Feet.	Feet.	Feet.	Feet.	Feet.	Feet.	Feet.	Feet.	Feet.	Feet.	Feet.	Feet.
Kulu	Hamta	14,500	9	10	8	3	4	4	6	1	3	6	7	4	18
	Rotang	13,000	11	12	11	7	5	3	7	8	6	9	9	7	9
	Shobhe	10,000	4	7	5	2	NIL	NIL	1	NIL	NIL	1	1	?	NIL
Plach	Garguassan	17,000	8	9	6	3	2	1	4	3	3	3	4	1	4
	Srikand	15,000	13	14	9	6	5	5	8	7	10	12	15	4	32
	Baleo	11,000	6	6	3	1	NIL	NIL	NIL	NIL	NIL	NIL	NIL	NIL	1
	Jalori	10,500	6	6	3	1	NIL	NIL	NIL	NIL	NIL	NIL	NIL	NIL	6

The preceding statement showing the depth of snow on the higher passes on the 25th of May 1899 indicates that it was less than on the corresponding date in the years 1897, 1894, 1893 and 1891, and suggests that it was less than usual at the end of May. This is confirmed by the appearance of the snows on the higher Kulu ranges as seen from Simla.

## (B) NORTH-WESTERN PROVINCES HIMALAYAS.

## KUMAON.

The following is a statement of the estimated snowfall in this district measured in the same manner as in former years in accordance with arrangements made in the year 1890:

Month.	Fall on Pindar and Panku Peaks.	Fall on Relum- dhura and Utam- dhura Passes.	Fall on Malla, Byans, Chandan and Darma.
	Ft. In.	Ft. In.	Ft. In.
16th September to 15th October 1898 . . .	3 3	12 0	10 4
16th October to 15th November 1898 . . .	2 4	9 0	1 4
16th November to 15th December 1898 . . .	Nil	18 0	2 4
16th December 1898 to 15th January 1899 . . .	11 0	34 6	8 0
16th January to 15th February 1899 . . .	No	return received.	
16th February to 15th March 1899 . . .	0 9	13 0	3 0
16th March to 15th April 1899 . . .	1 6	18 0	Nil
Total fall in winter of 1899 . . .	?	?	?
Total fall in winter of 1898 . . .	18 8	66 6	9 6
Total fall in winter of 1897 . . .	29 9	79 0	17 6
Total fall in winter of 1896 . . .	14 0	32 0	9 6
Total fall in winter of 1895 . . .	29 8	71 3	18 3
Total fall in winter of 1894 . . .	33 3	57 3	33 6

The snowfall of the past winter in Kumaon was considered by the natives of the district to be greater than in the winter of 1897-98.

This is confirmed by the preceding data which also show that the fall was similar in amount to that of the winters of 1896-97 and 1894-95.

## (C) ASSAM HIMALAYAS.

The following brief reports have been received through the Government of Assam:

*Hills north of Lakhimpur.*—The snowfall in the interior of the hills is reported to have been heavier than in the preceding winter.

*Hills north of Sadiya.*—The snow in these hills began to fall unusually early in the season and was very heavy. There was a very heavy fall late in March over the whole of the neighbouring Himalayas.

*Hills north of Darrang District.*—Almost all the hill people, who have come down this year, state that the snowfall of the past winter was heavy and the winter exceptionally severe.

*Hills north of Kamrup.*—Snowstorms occurred at frequent intervals during the winter, and the falls were unusually heavy in the months of November, December and the early part of January. The amount of snowfall during the year under report was greater than that of the preceding year.

## (D) PERSIA.

The data for this area are very scanty. Weather was much finer and drier than usual throughout the whole season, but more especially in December, January and March, and the rainfall was scanty and in large defect over the whole Persian area. So far as can be judged from the imperfect data, it is almost certain that the snowfall on the higher elevations was as largely below the normal as the precipitation at the stations in the plains.

The following table gives comparative data of the precipitation at several stations in the Persian area and also at Quetta and Kashgar:

Station.	RAINFALL.												RAINFALL OF PERIOD, NOVEMBER 1898 TO APRIL 1899.		
	November 1898.		December 1898.		January 1899.		February 1899.		March 1899.		April 1899.		Actual.	Variation from normal.	Percentage variation from normal.

Kashgar . . .	0	-0'04	0	-0'27	0	-0'42	0	-0'13	0	-2'25	0	-0'12	0	-1'73	-100

\* Rainfall of period, November 1898 to March 1899.

The data establish conclusively that the rainfall at the stations typical of the large area including Mesopotamia, Persia and Baluchistan was much smaller in amount than usual. The winter was unusually dry throughout, and the total precipitation of the period, November 1898 to April 1899, probably barely half the normal fall of the period. No special information has been received of the snowfall on the higher ranges in Persia. It is, however, almost certain that the scanty rainfall was due to special meteorological conditions common to the whole of the Persian area, hills and plains, and hence that the deficiency in the precipitation was as marked on the mountain ranges (which are the chief sources of the water-supply of the rivers and canals upon which cultivation so largely depends in Persia) as in the plains.

#### PRECIPITATION ON THE OUTER RANGES OF THE HIMALAYAS.

The distribution of the precipitation of the period on the outer ranges of the whole Himalayan area is indicated very clearly by the data of the following table:

Station.	PRECIPITATION.										PRECIPITATION OF PERIOD, NOVEMBER 1898 TO APRIL 1899.				
	November 1898.		December 1898.		January 1899.		February 1899.		March 1899.		April 1899.		Actual.	Variation from normal.	Percentage variation from normal.
	Actual.	from normal.	Actual.	from normal.	Actual.	from normal.	Actual.	from normal.	Actual.	from normal.	Actual.	from normal.

Guntak	1'98	+0'55	1'44	+0'00	2'53	+1'84	4'08	+1'70	0'37	+4'32	8'47	-2'06	17'07	+7'24	+36
Valung	0'02	-0'05	0'08	+0'03	2'05	+1'75	2'21	+0'83	1'91	-1'61	4'06	-0'00	3'94	-0'13	-3

The precipitation of the period was in considerable to large defect at the hill stations on the outer and middle ranges of the Punjab Himalayas. The deficiency probably averaged about 40 per cent. and was larger, both in actual amount and relatively to the normal, at Kilba than at Simla. The precipitation was in moderate excess, on the average of the three stations, on the outer ranges of the North-Western Provinces Himalayas and in large excess in Sikkim. The distribution of the rainfall, as indicated by these stations, is in full accordance, it will be seen, with the snowfall reports.

### SUMMARY OF THE SNOWFALL DATA.

The whole of the available data bearing on the character and amount of the snowfall in the mountain regions to the north and north-west of India have been given above. They have been given in fuller detail than usual, as the conclusions are opposed to statements that have appeared in various quarters with respect to the snowfall of the past winter. The data are very consistent and show clearly a gradual transition in the amount and character of the distribution from west to east. The winter snowfall and precipitation was very largely below the normal in Persia, Afghanistan, Chitral and Baluchistan, in slight defect in the Kashmir and Punjab Himalayas (due almost entirely to less precipitation than usual on the lower ranges combined with normal or slightly heavier fall on the interior ranges), in slight to moderate excess in Kumaon and Garhwal (or the Himalayas of the North-Western Provinces) and in large excess in the Eastern Himalayas of Sikkim and Assam.

The chief features of the snowfall of the cold weather were:

- (1) The winter commenced somewhat earlier than usual in Afghanistan and Kashmir. Weather was unusually fine and free from winter storms in Afghanistan and Baluchistan from November to February.
- (2) The number of cold-weather disturbances from November to January was considerably less than usual. Most of the storms in this period originated either in Baluchistan or India and not in Persia, and were hence of slight intensity. One storm, that of the 29th December to the 1st January, was severe and gave heavy and general snowfall in the Western Himalayas. The snowfall up to the end of February in that area was considerably below the normal on the whole and was nowhere excessive.
- (3) The number of depressions in February, March and April was much larger than usual. Baluchistan, Afghanistan, Chitral and North Kashmir had frequent light to moderate precipitation during the period. A disturbance of moderate intensity extending from the 4th to the 6th February gave moderate to heavy snow in Kashmir and the Punjab Himalayas. The snowfall during this period was in slight to moderate excess in the Western Himalayas, chiefly due to the frequent falls in March and April, the excess being probably most marked on the interior and higher ranges.
- (4) The chief feature of the season was the frequent moderate falls in April over the whole of the Western Himalayas west of Kumaon. The fall was moderately heavy in the Simla hill districts and Lahoul. Snow fell down occasionally to 9,000 to 10,000 feet and caused extensions of the snow-clad surface in the hills for brief periods which affected the meteorological conditions in Upper India. The snow melted very rapidly during the hot weather of the last fortnight of May, and the snow-line on the 31st of May was at a mean elevation of from 13,000 feet to 14,000 feet in the Punjab Himalayas and 15,000 feet in Ladakh.
- (5) The snowfall of the past season up to the end of May was, so far as can be judged from the data, much below the normal in Persia and Baluchistan and in moderate to considerable defect

- in Afghanistan as represented by Kabul, Wana, the Kurram Valley, the Khyber Pass and the neighbouring mountain ranges.
- (6) The total fall of the period up to the end of May was probably about normal in amount or in slight excess on the higher and interior ranges of the Kashmir and Punjab Himalayas. This appears to be fully established by the information received from Kashmir, Chamba and the Simla hill districts. The precipitation of the period was, on the other hand, in considerable to large defect on the outer and middle ranges. There were only two periods of heavy snowfall in the Upper India Himalayas, *viz.*, from the 29th December to the 1st January and the 4th to the 6th February. During the early part of the season the intervals of fine, dry, clear weather between the storms were much more prolonged than usual. On the other hand, weather was more frequently disturbed in March and April than usual, and numerous light falls of snow were received on the interior ranges. So far as can be judged from the actual data received, the accumulation on the higher elevations in Kashmir, Lahoul, Chamba and the Simla hill districts was probably about normal in amount, and in Kulu and probably Ladakh was somewhat less than the normal. There is, hence, no abnormal extension of the snow-clad surface, the snow-line at the end of the period being at about 13,500 feet.
- (7) The data for Garhwal and Kumaon (including those of the hill stations of Mussooree and Ranikhet) establish that the snowfall of the period was above the normal and probably to a moderate extent.
- (8) No information has been received for Sikkim and Nepal.
- (9) The information relative to the snowfall in the Assam Himalayas is as usual, scanty, but appears to indicate that the fall was considerably heavier than usual over the whole of the Assam Himalayas.

The snowfall accumulation in May 1898 was unusually small, due to the abnormally dry weather of the preceding winter. Little or no snow fell during the south-west monsoon period from June to August 1898, and the accumulation on the higher ranges in the Western Himalayas at the end of August was probably less than at the corresponding period of the previous 10 or 15 years. A very early and heavy fall occurred in the fourth week of September which brought down the snow-line in Kashmir to about 8,000 feet. No further snow fell until the end of December. The falls were much less frequent than usual and with long intervals of bright clear weather in January and February. Frequent light snow was received in March, April and the first fortnight of May, chiefly on the higher ranges. The whole of the available data indicate that the extent of the snow-clad surface and the depth of the accumulation are abnormally small on the higher ranges in Afghanistan and Chitral, and that they are probably somewhat less than usual in the Kashmir and Punjab Himalayas. The height of the snow-line is also probably somewhat higher than usual in the Upper India Himalayas. The snowfall conditions in Upper India and the Persian area are hence favourable to an early and strong monsoon and to its extension to its utmost limits in the Punjab. The snowfall in the Eastern Himalayas has, on the other hand, been much heavier than the normal. It is, however, uncertain how far heavy snowfall in the Eastern Himalayas affects the strength and extension of the monsoon currents, as sufficient data of a trustworthy nature are not yet available for discussing this question for that area. Theory appears to indicate that it would tend, under the conditions of the present year, to diminish the rainfall in North-Eastern India and give increased rain to North-Western India.

#### ABNORMAL FEATURES OF THE METEOROLOGY OF INDIA DURING THE PREVIOUS EIGHTEEN MONTHS.

The meteorology of the dry monsoon (January to May) 1898 was very similar in several respects to that of the corresponding period of the present

year. The most important features of the meteorology of India during the first five months of 1898 were as follows:

- (1) The snowfall of the winter of 1897-98 was much less than usual over the whole of the Western Himalayas and probably also in Afghanistan, Chitral and in Baluchistan. There was a heavy and somewhat abnormal fall in the second week of May over the whole of the Western Himalayas.
- (2) The pressure conditions in India during the first five months of 1898 were such as accompany higher temperature in Northern India and less snowfall than usual in the Western Himalayas and probably also the Eastern Himalayas. The chief features, which were remarkably persistent, were (a) general deficiency of pressure, (b) local deficiency in Northern India and Burma, most marked in Bengal and Burma, and (c) local excess in Western India, greatest in Sind, Kathiawar and the Konkan.
- (3) The temperature conditions during these five months were such as usually accompany a more open and drier winter than usual and scanty snowfall in the Himalayan area. Temperature was largely in excess in April and in moderate excess in May. The excess in these months was, on the whole, most pronounced in North-Western India and the North Deccan.
- (4) The air was throughout nearly the whole season much drier than usual and skies remarkably free from cloud.
- (5) The air movement was more vigorous than usual in March and April, due to the intensified thermal conditions of the period in the interior of India.
- (6) Some of the abnormal features of the meteorology of India during the period were related to abnormal conditions prevailing in Persia and South Eastern Europe. Anti-cyclonic conditions obtained to a most unusual degree in Southern Europe in November, December and February, and, as a consequence, cool dry north-west winds prevailed in Persia with remarkable persistence from November to February. This abnormal air movement extended across Baluchistan and the north of the Arabian Sea and undoubtedly contributed to the unusual dryness of the air and freedom from severe cold-weather storms of the period in Northern and Central India.

It was stated in the south-west monsoon forecast published in the *Gazette of India* for 3rd June 1898 that the meteorological conditions in India immediately antecedent to the monsoon were, on the whole, favourable over the greater part of India; and hence that if, as was anticipated from information received from South Africa, Zanzibar and Mauritius, the conditions over the sea area to the south were favourable, normal or favourable rain might be expected over the greater part of the area. This anticipation was fortunately verified.

The general conclusions in the forecast were "that the rainfall may be deficient to a slight or moderate extent, depending chiefly upon the strength of the monsoon, in Sind, Cutch, the North and West Punjab and West Rajputana; that it will very probably be at least normal in amount in Central India and the northern half of the Peninsula, except perhaps Berar, Khandesh and the West Deccan, and may be in moderate excess in the eastern half of the North-Western Provinces, Bihar, the Central Provinces and the eastern states of Central India. It will probably be normal or in excess in Burma, Assam and perhaps in East and North Bengal, and may be in slight defect in West Bengal."

The south-west monsoon currents in 1898 were, on the whole, favourable as rain-distributing winds.

The south-west monsoon rains commenced somewhat later than usual on the Malabar and Konkan Coasts and almost simultaneously on the 9th and 10th

along the whole west coast. They began on the 16th, and hence about the normal date on the Bengal Coast.

The humid currents extended rapidly into the interior and gave general rain in Northern and Central India between the 11th and 18th. The first burst of monsoon winds in the Arabian Sea was very feeble and the current fell off rapidly on the 17th and 18th. It withdrew temporarily from Upper India on the 19th, and the break in the rains gradually extended over practically the whole of India during the next four days. North and East Bengal received a heavy downpour on the 1st, 22nd and 23rd. The break was general from the 25th to the 28th on which day rain recommenced in North-Eastern India and extended over the greater part of the country by the end of the month.

The rainfall of the month was less than usual in Burma, Assam, Arakan, Berar, Khandesh and the greater part of Madras and was practically normal over the remainder of India.

The Bombay current was steady throughout July and was above its normal strength from the 13th to the 13rd and again from the 21st to the end of the month. The Bengal current was strong but somewhat unsteady, and three storms formed during the month in the north of the Bay of Bengal.

The first storm (lasting from the 2nd to the 8th) advanced from the head of the Bay along a west by north track to Lower Sind. The second lasting from the 16th to the 21st formed in Central Bihar and advanced almost due westwards to Sind. Both these storms gave moderate to heavy rain in the districts over which they passed. The third storm formed off the coast of North Madras on the 22nd and broke up in the North Deccan on the 26th. The rainfall of the month was above the normal over the greater part of India, including Chota Nagpur, South Bihar, the North-Western Provinces, Punjab, the Bombay Coast, the Deccan, the Central Provinces and North Madras. There was a moderate deficiency in Upper Burma, the Assam Valley, Central and North Bengal and Bihar. The rainfall of the month was hence abundant and favourably distributed.

The Bombay current was considerably weaker than usual in August, and the rainfall of the month was more or less below the normal over the whole area chiefly or entirely dependent on that branch of the monsoon current. The rainfall of the month in that area was, relatively to the normal, most deficient in the Punjab, Rajputana, Berar, the Bombay Deccan and Mysore. The Bay current was of normal strength, but was determined more largely to North-Eastern India than usual, and the rainfall of the month was in general excess in Burma (except perhaps Upper Burma), Assam, Bengal, the North-Western Provinces and the Central Provinces. The excess was, on the whole, most pronounced in Tenasserim (67 per cent.), Arakan (70 per cent.), the North-Western Provinces (53 per cent.), East Bengal (63 per cent.) and Assam (24 per cent.).

The Bombay current was slightly stronger than usual in September, but was, as in August, diverted from Upper India and determined more largely than usual to the Peninsula. The rainfall of the month was, hence, very deficient in North-Western India, almost as largely as in August. It was, on the other hand, in moderate to large excess over the centre and south of the Peninsula and in slight to moderate defect in the north of the Peninsula. The Bay current was of normal strength, but was, as in August, more largely directed to North-Eastern India than usual. The distribution of the rainfall was partly determined by the two cyclonic storms of the month which advanced along a more northerly track than usual from the Bay into Bihar and the North-Western Provinces. The rainfall of the month was excessive in Bihar and more or less above the normal in Bengal, Chota Nagpur and the eastern and central districts of the North-Western Provinces.

The Peninsula (chiefly the southern districts) received moderate rain during the first nine days of October. A storm formed in the Bay on the 9th and 10th which proceeded along a northerly track and gave very heavy rain in North Madras and Bengal from the 10th to the 15th. This was the conclusion of the

monsoon rains of 1898 in North-Eastern India. Fine dry weather prevailed over the whole of India until the 23rd when rain recommenced in Southern India and continued during the remainder of the month. A cyclonic storm formed in the south-west of the Bay on the 4th and 5th of November. It advanced westwards across the South Coromandel Coast on the 6th. Its advance gave moderate to heavy rain over the southern and central districts of the Peninsula from the 6th to the 14th. Dry weather set in on the 16th and continued until the 25th when showery weather recommenced. A disturbance formed in the extreme south-west of the Bay on the 28th and 29th. Its advance westwards was followed by heavy and general rain over Southern India from the 30th of November to the 2nd of December when dry weather was re-established.

The rainfall during the retreating south-west monsoon period was hence abundant and favourable over the greater part of the Madras Presidency and the Deccan, and the excess was large in the coast districts from Nellore southwards.

The following statement gives rainfall data of the south-west monsoon and retreating south-west monsoon periods in thirteen larger provinces:

Provinces or Division.	South-west monsoon period, June to October 1898.				Retreating south-west monsoon period, November and December 1898.			
	Average actual.	Average normal.	Variation from normal.	Percentage variation from normal.	Average actual.	Average normal.	Variation from normal.	Percentage variation from normal.
	Inches.	Inches.	Inches.		Inches.	Inches.	Inches.

Rajputana . . . . .	12.16	18.66	-6.50	-35	0.45	0.37	+0.08	+22
Berar . . . . .	26.31	37.48	-11.17	-30	0.12	1.18	-1.06	-90
Bombay . . . . .	41.50	41.27	+0.23	+1	0.76	0.89	-0.13	-15
Madras . . . . .	34.84	34.20	+0.64	+2	11.87	7.55	+4.32	+57

Although the rainfall was in considerable defect in Berar and North Bombay, it was favourably distributed in every respect. The same was the case over a large part of the Punjab, and the only areas in which the rainfall was insufficient for the crops were parts of Rajputana (chiefly the western and central districts) and of the South and South-East Punjab.

The preceding data indicate generally the favourable character of the rainfall of the monsoon period from the end of May to the middle of October over the whole of India.

They also show that Madras received favourable and satisfactory rain during the period of the retreating monsoon. The rainfall during that period was, on the other hand, very scanty over the whole of North-Eastern and Central India and the North Deccan. Over the greater part of that area the total rainfall of the period was less than 20 per cent. of the normal.

The later or retreating south-west monsoon rains terminated in Southern India slightly earlier than usual in the beginning of December. The cold weather rains began in the last week of December in the Punjab and the adjacent mountain districts to the north and east.

*November* 1898 was even finer and more settled than usual in North-Western and Central India and the Deccan and the mountains to the north-west and north of the Punjab, and little or no snow fell in the Himalayan area during the month. Temperature was in considerable excess in the Central Provinces, Berar, North Bombay and Central India.

*December* was also finer than usual over the greater part of Northern India. Fine weather held steadily until the last week of the month when a disturbance gave moderately heavy snow in the Punjab hill districts. The chief feature of the month was the abnormally high temperature in the large central area including Khandesh, the Deccan, Berar, Hyderabad and the Central Provinces in which it ranged between  $4^{\circ}$  and  $8^{\circ}$  above the normal. The month was practically rainless except in South Madras which had moderate to heavy rain and in the greater part of North-Western India which had light to moderate rain.

The following is a brief summary of the chief features of the meteorology of India during the past five months:

*January* was remarkably free from cold-weather storms. Weather was disturbed at the commencement of the month, and snow fell from the 2nd to the 6th in the Punjab hills. The fall was heavy in the Simla hills and in Almora. Fine clear weather prevailed generally during the remainder of the month, and the chief features of the meteorology of the month were abnormal dryness of the air, deficient cloud and scanty rainfall. A strongly marked cool wave affected Northern India after the snowfall of the first week of the month. A second cool wave advanced across Northern India between the 15th and 18th. The mean temperature of the month, both by day and night, was more or less below the normal over nearly the whole of India. The deficiency was considerable over the whole of Northern and Central India, ranging between  $2^{\circ}$  and  $5^{\circ}$  for the month.

*February* was somewhat more disturbed than usual, due to a succession of five depressions and cold-weather storms which advanced across Northern India during the period. With one exception, they were very feeble and gave very little rain in the plains except in Upper India, Bengal and Assam. The rainfall of the month was hence very scanty and below the normal—more especially in Upper India. Pressure was in considerable defect over the whole of India by amounts averaging  $\cdot 04$  inch. Temperature was above the normal except in parts of Burma. The excess was considerable in North-Western India, ranging between  $2^{\circ}$  and  $5^{\circ}$ , and was small in North-Eastern India and the Peninsula. The air was much drier than usual—more especially in the interior, including Rajputana, Central India, Berar, the Central Provinces and North Deccan.

*March*.—A series of shallow depressions similar to those of the preceding month advanced across Northern India. They gave little or no rain except in Baluchistan, the North Punjab, the Punjab hills, Bengal and Assam. The month was much drier than usual—more especially in Berar, the Central Provinces and Deccan. Temperature was in general excess, the variations from the normal being small in the Peninsula, Burma and Bengal and moderate to considerable in amount ( $2^{\circ}$  to  $5^{\circ}$ ) in North-Western and Central India. The mean pressure of the Indian area was  $\cdot 01$  inch below the normal. Pressure was, as in January, relatively in slight defect in North-Eastern and Southern India and in slight excess in North-Western and Central India. The abnormal temperature features of the month were similar to those of the preceding month.

*April*.—The mean pressure of the Indian area only differed by  $\cdot 001$  inch from the normal. The abnormal features of the month were practically opposite to those of the preceding month. Pressure was locally in defect over the greater part of North-Western India and also in Burma and in excess in North Eastern India. The chief feature of the weather of the month was the occurrence of

unusually heavy rainfall over the south and centre of the Peninsula, accompanying series of thunderstorms of unusual frequency and intensity. The rainfall of the month was hence very largely above the normal over the whole of Madras, the Deccan and West Coast and to a less extent in North-Eastern India. Temperature was hence considerably below the normal over the whole of the interior of the Peninsula by amounts ranging between  $1^{\circ}$  and  $5^{\circ}$ . It was in slight excess in Upper India and in moderate excess in Burma.

**May**—The mean pressure of the Indian area was slightly below the normal ( $30.18$  inch). Pressure was, relatively to the general condition, more or less in defect in North-Eastern India and Burma and in Upper India and was in excess in the remainder of India. This contrast of conditions between Upper and North-Eastern India and Western India, it may be noted, almost invariably obtains in years of strongly marked hot-weather conditions—more especially after milder winters than usual in the Western Himalayas. The local deficiency was most marked in Bengal and the West Punjab, and the local excess greatest in the western half of the Peninsula. The following gives data for stations in the areas of greatest excess and deficiency of pressure:

Station.	PRESSURE ANOMALY IN MAY.			Station.	PRESSURE ANOMALY IN MAY.		
	1899.	1893.	1897.		1899.	1893.	1897.
	Inch.	Inch.	Inch.		Inch.	Inch.	Inch.
Saugor Island . . .	— $0.41$	— $0.13$	— $0.10$	Khandwa . . .	+ $0.32$	+ $0.23$	+ $0.21$
Chittagong . . .	— $0.32$	— $0.08$	+ $0.01$	Ratnagiri . . .	+ $0.33$	+ $0.27$	+ $0.33$
Narayanganj . . .	— $0.30$	— $0.09$	— $0.05$	Goa . . .	+ $0.30$	+ $0.34$	+ $0.34$
Mymensingh . . .	— $0.31$	— $0.12$	— $0.08$	Mangalore . . .	+ $0.32$	+ $0.13$	+ $0.18$
Dhubri . . .	— $0.35$	— $0.17$	— $0.04$	Coimbatore . . .	+ $0.30$	+ $0.05$	+ $0.07$
Peshawar . . .	— $0.46$	— $0.02$	+ $0.11$				
Dera Ismail Khan . . .	— $0.42$		— $0.17$				
Mooltan . . .	— $0.43$	+ $0.08$	— $0.27$				

The pressure variations in May 1887, May 1894, May 1895, May 1896, May 1897 and 1898 were similar in general character to those of the corresponding month of the present year, the chief difference being that they were slightly more marked in the present year than in those preceding years. The large local deficiency in the West Punjab is a special feature of the present year.

The position of the trough of low pressure varied very considerably during the month. At the end of the month its axis was defined by the stations of Calcutta, Hazaribagh, Allahabad, Sirsa and Dera Ismail Khan, and was hence further north than usual.

The mean temperature of the month was in excess over the whole of Northern and Central India. The excess was large in the Punjab, North Bengal and Cachar. The excess averaged  $5.3^{\circ}$  in the Punjab,  $3^{\circ}$  in North Bengal and  $2\frac{1}{2}^{\circ}$  in Cachar. It was in very slight defect in the Peninsula and in slight to moderate defect in Burma, due to the frequent general rain during the month in that province.

Frequent rain was received in Burma and occasional rain (much below the normal) in Assam and parts of Bengal.

The rainfall of the month was in excess in Burma and in considerable to large general defect in parts of Bengal and in Assam.

The meteorology of India during the past five months has been characterized by strongly marked abnormal features.

The following states the most important:

- (1) Pressure was from January to May below the normal over the Indian area, as is shown by the following statement:

Month.	MEAN 8 A.M. PRESSURE ANOMALY OF INDIAN AREA.					
	1899.	1898.	1897.	1896.	1895.	1894.
	Inch.	Inch.	Inch.	Inch.	Inch.	Inch.
January . . .	—'003	+ '017	—'003	—'003	—'009	—'020
February . . .	—'040	—'077	—'036	—'012	+ '009	+ '010
March . . .	—'010	—'013	—'020	—'022	—'018	—'017
April . . .	—'001	—'017	+ '028	—'032	+ '013	—'019
May . . .	—'018	—'008	—'005	+ '013	—'007	—'023

- (2) Pressure has been, during the greater part of the period, in slight defect in Northern India and Burma. The following table gives data in illustration of this feature:

Division.	MEAN 8 A.M. PRESSURE ANOMALY IN								
	October 1898.	November 1898.	December 1898.	January 1899.	February 1899.	March 1899.	April 1899.	May 1899.	Mean of period.
	Inch.	Inch.	Inch.	Inch.	Inch.	Inch.	Inch.	Inch.	Inch.
Burma . . .	—'004	+ '003	+ '007	—'003	+ '012	—'006	—'011	—'009	—'001
Assam . . .	+ '015	+ '003	—'019	—'007	+ '003	—'002	+ '010	—'026	—'003
Bengal . . .	+ '004	+ '008	+ '002	—'005	—'007	—'014	+ '008	—'023	—'003
Bihar . . .	+ '005	0	—'016	—'002	—'007	—'016	+ '013	—'016	—'005
Chota Nagpur . . .	+ '006	+ '001	—'008	—'020	—'003	—'010	+ '013	+ '001	—'003
North-Western Provinces and Oudh . . .	+ '004	—'008	—'010	—'003	—'012	+ '009	+ '007	—'003	—'004
Punjab . . .	—'006	—'003	—'008	+ '010	—'009	+ '003	—'003	—'020	—'005
Rajputana . . .	—'005	—'016	—'017	+ '009	—'007	+ '017	—'020	+ '008	—'004

- (3) Pressure has been generally in local excess in the Peninsula, Kathiawar, Berar, the Central Provinces and Central India, and there was a marked tendency to the establishment of an area of locally high pressure in Berar and the western districts of the Central Provinces in February, March and May. The area of greatest excess has varied slightly from month to month. The following gives data:

Division.	MEAN 8 A.M. PRESSURE ANOMALY.								
	October 1898.	November 1898.	December 1898.	January 1899.	February 1899.	March 1899.	April 1899.	May 1899.	Mean of period.
	Inch.	Inch.	Inch.	Inch.	Inch.	Inch.	Inch.	Inch.	Inch.
Kathiawar (Rajkot) . . .	—'013	—'023	+ '004	+ '012	+ '003	+ '022	—'018	+ '024	+ '002
South-West Rajputana (Deesa) . . .	—'004	—'016	—'006	+ '013	—'005	+ '014	—'029	+ '022	—'004
Central India . . .	+ '006	—'007	—'006	+ '005	—'007	+ '016	—'004	+ '016	+ '004
Central Provinces . . .	+ '014	+ '009	+ '002	+ '003	+ '005	+ '013	+ '005	+ '009	+ '008
Berar . . .	—'008	+ '007	+ '009	+ '012	+ '021	+ '025	+ '021	+ '026	+ '016
West Coast . . .	—'018	—'004	+ '012	—'003	+ '011	+ '003	—'001	+ '029	+ '002
Bombay Deccan . . .	—'002	+ '002	+ '003	—'004	+ '006	+ '009	+ '001	+ '028	+ '005
South India . . .	—'012	—'002	+ '015	—'011	+ '007	—'002	—'008	+ '020	0
Ceylon . . .	—'028	—'020	—'006	—'018	+ '014	0	—'011	+ '021	—'005

These conditions were established at the end of the rains in December and have been fairly persistent up to the present time.

- (4) Pressure was generally in relative excess at the hill stations, or the vertical pressure anomalies were positive in February, March and May and in relative defect in January and April. On the mean of the period—January to May—pressure has been in moderate to considerable relative excess. The following gives data for seven pairs of stations:

Pair of stations.	MEAN 8 A.M. VERTICAL PRESSURE ANOMALY IN					
	January 1899.	February 1899.	March 1899.	April 1899.	May 1899.	Mean of period—January to May 1899.
	Inch.	Inch.	Inch.	Inch.	Inch.	Inch.
Leh and Lahore . . . . .	+019	+118	+053	—013	+075	+052
Simla and Ludhiana . . . . .	—043	+046	+042	—001	+047	+018
Murree and Peshawar . . . . .	—040	+020	+007	—007	+058	+008

Darjeeling and Dhubri . . . . .	—032	+021	—012	—033	+039	—003
Quetta and Jacobabad . . . . .	+010	+057	+035	+032	+043	+035

- (5) Temperature is, on the mean of the whole period, in excess over North-Western India. It was in general excess in February, March and May. The excess was moderate to considerable in North-Western India and large in Upper India in May. The disturbed weather of January and April reduced it below the normal. The following gives comparative data of the variations of the mean daily temperature for the whole of Burma, Northern and Central India and the Peninsula, month by month, from January to May 1898.

Province or Division.	VARIATION FROM NORMAL OF MEAN DAILY TEMPERATURE.					
	January 1899.	February 1899.	March 1899.	April 1899.	May 1899.	Mean of period.

South India . . . . .	—0'8	+0'1	—0'9	—3'8	—0'4	—1'2

(6) The air has been much drier than usual during the greater part of the period over nearly the whole of the interior and more especially in Rajputana, Central India, Berar, the Central Provinces and Deccan. The decreased humidity was in part due to increased temperature and in part to the presence of a smaller amount of aqueous vapour than usual in the air.

The following gives comparative data for fourteen representative stations :

Station.	VARIATION FROM NORMAL OF MEAN RELATIVE HUMIDITY (i.e., PERCENTAGE OF SATURATION).						Mean of period.
	November 1898.	December 1898.	January 1899.	February 1899.	March 1899.	April 1899.

Belary . . . . .	—5	—2	—12	+3	—5	+3	—3

- (7) The distribution of cold and hot weather rainfall has been unusual. The rainfall of both seasons was slightly above the normal in Bengal and Bihar. The cold weather rainfall was in considerable to large defect in the Punjab, Sind, Rajputana, Gujarat, Central India, the Central Provinces and Berar. Over the greater part of that area practically no rain fell. The rainfall was in excess in the hot weather season over nearly the whole of Northern India and Burma. The excess was considerable (over 30 per cent.) in Bihar, Chota Nagpur, Orissa, Sind and Berar.

The following gives comparative data showing its distribution in both seasons:

Province or Division.	Cold weather rainfall (January and February 1899).				Hot weather rainfall (from 10th February to 30th May 1899).			
	Average actual.	Average normal.	Variation from normal.	Percentage variation from normal.	Average actual.	Average normal.	Variation from normal.	Percentage variation from normal.

**Summary.**—The following is a summary of the chief features of the meteorology of India during the past five months, which are most likely to influence the advance of the monsoon currents and the distribution of the monsoon rainfall:

- (1) The snowfall of the past winter has undoubtedly been much less than usual over the whole of the Western Himalayas and also in Afghanistan, Baluchistan and Persia. It was probably in local excess in Kashmir and also in Kumaon and Garhwal. The snowfall was distributed fairly throughout the season, and there is no abnormal accumulation at the end of May except perhaps on the higher ranges in Kashmir.
- (2) The snowfall of the past winter has been heavier than usual in the Sikkim and Assam Himalayas.
- (3) The pressure conditions in India during the past five months were such as accompany higher temperature in Northern India and less snowfall than usual in the Western Himalayas. The chief features, which have been fairly persistent, are (a) general

deficiency of pressure, (b) local deficiency in Northern India and Burma, most marked in Bengal and the Punjab, and (c) local excess in the Peninsula and Central India, greatest in Berar, the Konkan, Malabar and West Deccan.

- (4) The temperature conditions during the past five months were such as usually accompany a drier winter than usual in the Himalayan area—more especially in the lower and middle ranges. Temperature was in moderate excess in February and March in Northern and Central India and in large excess in Upper India in May.
- (5) The air has been throughout nearly the whole season much drier than usual and skies remarkably free from cloud.
- (6) The air movement was more vigorous than usual in March and May, due to the intensified thermal conditions of the period in the interior of India.
- (7) The snowfall in the Western Himalayan area has been of such a character as not to impress any conditions upon the pressure distribution, temperature and air movement in Northern and Central India unfavourable to the early or full extension of the monsoon currents in their progress northwards from the Equator.
- (8) The influence of heavy snowfall in the Assam Himalayas has not yet, in the absence of sufficient reliable data, been investigated.

It may be noted that some of the abnormal features of the meteorology of India during the past seven months have been related to abnormal conditions prevailing in Persia and South-Eastern Europe. Anti-cyclonic conditions obtained to a most unusual degree in Southern Europe from November onward, and, as a consequence, cool dry north-west winds prevailed in Persia with remarkable persistence from November to February. This abnormal air movement extended across Baluchistan and the north of the Arabian Sea into North-Western India, and undoubtedly contributed to the unusual dryness of the air and freedom from severe cold-weather storms of the period in Northern and Central India.

#### COMPARISON WITH PREVIOUS YEARS.

During the past twenty-one years the snowfall in the Himalayas was below the average in the years 1879, 1880, 1881, 1882, 1890, 1892, 1896 and 1898. The deficiency in 1890 and 1892 was very large, and these years are not strictly comparable with the present year.

The conditions of the years 1881 and 1896 also differed largely from those of the present year and are not comparable.

The following gives a very brief statement of the chief features of the meteorology of the years 1879, 1880, 1882, 1887, 1890, 1892, 1894 and 1895 :

1879.—The snowfall was very light and considerably below the normal in the North-Western Himalayas. Very heavy snow had fallen during the preceding winters of 1876-77 and 1877-78. Pressure was generally in defect, the deficiency being greatest in April and May, when it averaged '03 inch for the whole of India. The local variations of pressure were not strongly marked or persistent.

In the month of May pressure was locally in defect in the west of the Peninsula, more especially in the Gulf of Cambay, and was in excess in Upper India. Temperature was in excess in January, February, April and May. The excess was large in amount in April and May, and averaged  $4^{\circ}$  in the Punjab, where it was greatest. The rains set in over Bengal fully on the 14th June and commenced at Bombay on the 1st, but were not strong before the 24th. The rainfall of the south-west monsoon period was more or less in excess over the whole of India, except the Punjab, where it was in moderate defect, and in parts of Bengal and Madras, where it was slightly below the normal. The rains ceased in Upper India on the 29th September.

1880.—The winter snowfall was in moderate defect in the Western Himalayas and the cold-weather rainfall below the normal to a moderate extent in Northern India. Pressure was in general defect from January to May. The deficiency was largest in January ( $0.33''$ ) and averaged  $0.23''$  for the whole period. Pressure was locally in excess in the Peninsula, the excess being most marked at the west coast stations from Bombay to Calicut. It was locally deficient in Northern India, the deficiency being most marked in the Punjab, where it averaged  $0.5''$ . These large local pressure variations were fairly persistent from March to May. The excess was most marked in the Punjab during the whole period. It averaged  $7\frac{1}{2}^{\circ}$  in March,  $6^{\circ}$  in April and  $3\frac{1}{2}^{\circ}$  in May. The rains commenced on the 2nd of June in Bengal and on the 6th at Bombay, but both currents were at first feeble. Very heavy rain fell in the Punjab in July, and the weather was stormy with much snow in the hill districts. This was followed by a prolonged break in the rains, lasting throughout nearly the whole of August. The rains ceased in Upper India on the 24th September. The rainfall of the south-west monsoon period was largely in defect in the Punjab, North-Western Provinces, Rajputana and Central India and in moderate defect in the Central Provinces and Berar. It was in excess in North-Eastern India, Burma and Madras.

1882.—The snowfall of the winter of 1881-82 in the Western Himalayas was below the normal (probably to a slight extent) and the winter rains in Northern India in moderate defect. The variations of pressure and temperature from the normal during the pre-monsoon period—January to May—were small and apparently of little importance. They, however, indicated the prevalence of approximately normal conditions. The rains commenced on the 2nd June at Bombay and on the 11th June in Bengal. The Bombay current was strong and gave very heavy rain in June and July. The Bengal current was feeble in these two months, but was vigorous in August. The rains ceased on the 15th September in Upper India. The rainfall in the districts and provinces dependent on the Bombay current was abundant, whilst North-Eastern India (i.e., Assam, Bengal, Bihar and the North-Western Provinces) obtained smaller amounts than usual. The deficiency was small, except in some parts of Bengal.

1887.—The cold weather was unusually free from cold-weather storms. Although little rain fell in the plains of Northern India, moderately heavy snow is stated to have fallen in January and March in the Western Himalayas. March and April were warmer than usual in North-Western India and the Central Provinces, and May was an excessively hot month in Upper and Central India. Pressure was in slight to moderate defect on the average of the whole of India during the period—January to May. It was, relatively to the general condition, in considerable defect in Northern India in May, the deficiency being large in Upper India ( $-0.5''$ ) and moderate in North-Eastern India. It was in considerable excess in the west of the Peninsula, the excess averaging  $0.6$  inch in the Konkan and Malabar coast districts. The mean temperature of the month of May was  $6^{\circ}$  above the normal in the Punjab and  $3^{\circ}$  in the North-Western Provinces. The Bengal current set in earlier than usual at the end of May and the Bombay current about the normal time in the first week of June. Both currents gave fairly steady rain during the months of June, July and August. They retreated from Upper and Central India at the end of the third week of September. The monsoon rainfall was in slight defect in Arakan, Bengal, Assam and Orissa, normal in Burma and the Deccan and in excess over nearly the whole of North-Western and Central India and the Central Provinces.

1890.—The cold weather of 1889-90 was unusually dry in Northern India, and the snowfall in the Western Himalayas and Afghan mountains much below the normal amount. The snowfall in the Eastern Himalayas was also in slight to moderate defect. No rain fell in Rajputana in January and February 1890, and the North-Western Provinces and the Punjab received total average amounts of one-fifth and one-third of the normal amounts respectively. Temperature was considerably above the normal in January and February, the excess being greatest in Upper India, where it averaged  $2\frac{1}{2}^{\circ}$ . The hot weather was also drier than usual, and temperature was in moderate excess, averaging in the

Punjab, where it was greatest,  $1\frac{1}{2}^{\circ}$ . Pressure was generally in defect over India during this period by moderate amounts. Pressure was locally in defect in Northern India, the deficiency being most marked in the north of the Bay. It was locally in excess in the Peninsula and North-West India, the excess being largest in Kathiawar, Gujarat, Berar and the North Bombay Deccan, where it ranged from '03 inch to '044 inch. The rains commenced on the Bombay Coast on the 1st June and in Bengal feebly on the 7th and fully on the 19th. The rainfall of the south-west monsoon period (June to October) was more or less in excess in Northern India, the Konkan, the Central Provinces and Hyderabad, the excess being greatest in Bihar and the North-Western Provinces. It was in moderate defect in Burma, Southern India and Ceylon and in large defect in Gujarat, Sind and Cutch and to a less extent in Western Rajputana. The rains ceased in Upper India on the 27th of September.

1892.—The cold-weather rainfall of 1891-92 was abnormally small in amount and in large defect in Upper India. Pressure was in general defect at the level of the plains and was in considerable relative excess at the hill stations. Temperature was above the normal over the whole of India during the cold-weather by amounts averaging  $2^{\circ}$ . The excess was greatest in the Central Provinces, Berar and Central India. The air was much drier than usual and cloud in general defect.

The hot-weather conditions were very strongly marked. Temperature was in general excess and was most largely above the normal in Upper India, where the maximum temperature of the whole period—March to May—averaged about  $6^{\circ}$  above the normal and the minimum temperature  $3\frac{1}{4}^{\circ}$ . Burma and Assam received much heavier rain than usual and Bengal its normal amount. Over the remainder of India with the exception of the west coast districts the season was unusually dry and the rainfall very small in amount and much below the normal of the period.

The chief features of the pre-monsoon distribution of pressure were a considerable local deficiency in Northern India, greatest in amount in Upper India and a moderate to considerable local excess in the west of the Peninsula and North Bombay.

The rains commenced in the first week of June on the west coast and advanced very rapidly to Upper India. The advance was not permanent and the current withdrew from North-Western and Central India on the 17th and 18th. A first advance of the monsoon winds occurred in Bengal in the second week of the month. This was followed by their withdrawal in the third week of the month, and dry westerly winds prevailed over the Gangetic Plain until the end of the month. The permanent advance of the monsoon currents took place in the first week of July on the west coast and in the second week in Bengal. The currents extended rapidly over the whole of India and prevailed with unusual steadiness during the remainder of July and in August and September. The rainfall of the monsoon period—June to September—was more or less considerably in excess in the whole of India, with the exception of East, South and Central Bengal and Burma.

1894.—Moderate to heavy snow fell in the Western Himalayas in January and February. The snowfall in Baluchistan and Afghanistan was less than the normal. The snowfall did not come down to so low an elevation as in the preceding winter. Little or no rain fell in April and May. Temperature which was below the normal to a slight extent in Northern India during the cold weather increased rapidly in April and May and was largely in excess in the latter month, the area of greatest excess including Bihar, Chota Nagpur and the eastern districts of the Central Provinces. Pressure was in May locally in considerable defect in Northern India and in considerable excess in the western half of the Peninsula. The south-west monsoon rains set in somewhat later than usual during the first four days of June on the Malabar Coast. The monsoon currents advanced with unusual rapidity into the interior of Northern India and monsoon conditions were established over the whole of India before the end of the third week of the month. The rainfall was in general excess. It was very unequally distributed in June and July, due to the occurrence of a series of cyclonic storms of unusual

intensity. Those districts which received deficient rain in June and July, as a rule, obtained abundant and well-distributed rain in August and September, and the rainfall for the complete period—June to September—was on the whole favourable and well-distributed. The rains were, however, prolonged to the first week of November in the North-Western Provinces, and that area received a succession of downpours such as had not been experienced in those months during the previous fifty years.

1895.—The winter began earlier than usual in Baluchistan and Upper India. Numerous feeble disturbances in December and January gave heavy snow in the Punjab and Kashmir Himalayas. February was dry and temperature from 2° to 5° above the normal in Upper India. Weather was disturbed and showery over the hills in Upper India in March, but was abnormally dry in Cachar and East Bengal. It was disturbed with frequent series of thunderstorms in April in the Deccan and Southern India, and the rainfall of the month was in very large excess in these two areas. Burma received heavy rain in the last week of April (from a cyclonic storm) and in May. Pressure in May was in relative defect in Northern India and in excess in the Peninsula. The deficiency was greatest in the Punjab and the excess greatest in the Konkan and Malabar. Temperature was generally in excess—more especially in the Punjab (+6°) and Rajputana (+4°). The rains commenced nearly a fortnight later than usual on the Bombay Coast, and the monsoon currents were unusually feeble and unsteady.

The rainfall was in general defect in July. The currents withdrew from Upper India in the first week of September and from Bengal and Burma in the second week of October, and hence considerably earlier than usual over the whole of Northern and Central India. The monsoon rainfall was in defect over nearly the whole of India, and the deficiency was considerable in Upper and Central India.

#### GENERAL CONDITIONS IN THE INDIA MONSOON AREA AND INDIAN OCEAN.

The rainfall of the past year averaged 0·43 inch or one per cent. above the normal for the whole Indian area. It was pointed out in last year's forecast that the six years—1892-97—had been characterized by a cyclical variation of rainfall more prolonged in its period and of larger amount than has probably occurred in India during the present century. It was also stated in the forecast that the cycle was probably completed in 1897, and that a period of fairly normal conditions might be expected for some years in the Indian monsoon and the south-east trades region. This inference was in accordance with fact last year.

The experience of the cyclical period—1892-97—in India emphasized the necessity of considering the variations in the strength of the south-east trades circulation.

Theory indicates that any large and persistent variation in the strength of the south-east trades would be reproduced in the strength of the south-west monsoon. The variations in the strength of the south-east trades have been probably the chief or primary factor in determining the variations in the south-west monsoon in India during the past seven years. It is hence desirable to ascertain the chief meteorological features of the areas dominated by the south-east trades during the past three or four months, in the hope that this information may give a valuable indication, at the present time, of the probable strength of the approaching monsoon. The following is a summary of the information received, partly by telegrams from the Seychelles, Zanzibar, Mauritius and Cape Town and partly from the logs of ships regarding this important factor:

*Seychelles.*—The weather telegrams received during May from this station indicate that pressure was slightly higher than usual during the month, but normal at the end of the month. Winds were unsteady at the beginning of the month, but steady from south-east and stronger than usual during the last fortnight of the month. The weather at the end of the month was squally and showery. Vessels arriving from Madagascar reported stronger south-east trades than usual.

*Zanzibar.*—Pressure was above the normal to a slight extent throughout the month. Winds were normal in direction and somewhat stronger than the normal.

**Mauritius.**—Pressure was normal during the month, and gradients were normal or very slightly stronger than usual in the south-east trades region at the end of the month. Winds averaged about 20 per cent. above their normal velocity. The rainfall of the month was below the normal.

**Logs of ships.**—The information received up to the end of May from ships crossing the Equatorial belt of the Indian Ocean is very scanty. At the beginning of April south-east trade winds extended as far north as Lat.  $8^{\circ}$  S., and hence considerably further north than at the same date in the previous year. They advanced to Lat.  $3^{\circ}$  S. in the first week of May and to the Equator in the third week of the month. Light variable winds as usual obtained over a wide belt to the north of the south-east trades region and light to gentle north-west to west-south-west winds over the south and centre of the Arabian Sea up to the 15th May.

The mail steamer *Clyde* had moderate to strong monsoon winds in the last week of the month between Long.  $54^{\circ}$  and  $59^{\circ}$  E. The S.S. *Devonshire* on her passage from Mombassa to Bombay had squally weather with unsteady winds and much rain, thunder and lightning as far north as Lat.  $5^{\circ}$  N. in the south-west of the Arabian Sea. The China mail steamer *Coromandel* in her passage from Penang to Colombo (from the 20th to the 24th May) had moderate to strong south-west winds and frequent heavy rain squalls.

The information indicates that the south-east trades were probably slightly stronger than usual at the end of the month, and that conditions were favourable for their early extension as south-west monsoon winds into the Arabian Sea.

#### FORECAST OF THE SOUTH WEST MONSOON OF 1899 IN INDIA.

In the preceding pages have been given, for future reference, the whole of the available data utilized in the preparation of the forecast.

Brief summaries of the more important features of the snowfall in the Himalayan area during the past winter, of the meteorology of India and the adjacent countries to the north-west and of the Indian Seas and the south-east trades region are given in pages 14, 15, 16, 24, 25, and 29.

Ordinary readers are referred to these summaries as containing the more important facts upon which the forecast is based.

As was pointed out in last year's forecast, the remarkable period (chiefly shown by cyclical variation of rainfall) through which India has recently passed terminated in 1897, and a period of fairly normal conditions appears to be now probable for two or three years, at least.

The information from the Seychelles, Zanzibar and Mauritius, although very limited, indicates that the strength of the south-east trades, which is an important factor is above the normal, but to what extent cannot be judged.

The summary of the snowfall information indicates that in the Eastern Himalayas the snowfall has been greater than usual. Similar heavy snowfall was reported to have been received in the Assam Himalayas in the years 1887 and 1893. The monsoon rains were heavier than usual in both years, generally in India and also locally in Assam in 1893. In the absence of more definite and accurate information, it can only be accepted as probable that heavy snowfall in the Assam Himalayas exercises little influence on the distribution of the monsoon rainfall.

The snowfall in the Western Himalayas has undoubtedly been, on the whole, more or less below the normal. The deficiency was marked in the lower and middle ranges, and the extent of snow-clad surface is at the present time hence almost certainly not above and is probably below the normal. This is strongly confirmed by the pressure and temperature conditions in Upper India. The only unfavourable feature has been the frequent occurrence of light snow in March and April. Untimely snow in April and May chiefly affects the Bombay current. It usually retards the advent of that current more or less, and affects its strength unfavourably during the early stages (chiefly in the month of June). It is, however, very probable that any influence this late snowfall in April may have is very slight.

The most noteworthy feature of the past cold weather has been the scanty rain and snow in Baluchistan and Afghanistan and also in Persia. The precipitation in the Persian area (which occurs chiefly in the winter) has, so far as can be judged from the data of the four stations which supply the Meteorological Department with observations and weather telegrams, been more or less below the normal continuously during the past five years. The deficiency has been large and marked during the past two years. The conditions in Persia apparently exercise little direct influence on the distribution of the monsoon rainfall. They have, however, an important bearing, as they indicate that the deficient snowfall in the Western Himalayas, Afghanistan and Baluchistan during the past winter has not been due to local conditions in North-Western India, but to conditions extending over a very much larger area and hence probably of great persistence and importance.

Taking the above facts into consideration, it is very probable the monsoon currents will be at least of normal strength.

Judging only from the conditions in India itself and the known conditions in the Indian Seas, it is on the whole very probable that the monsoon currents will be of normal strength, and probably they will be somewhat stronger than usual. The Bombay current is more likely to be above its normal strength than the Bay current, but the probabilities for this are small, not exceeding 2 to 1.

Assuming that the currents will be of normal strength, the comparison with previous years of similar conditions (more especially 1880, 1887, 1892 and 1894) indicates that it is probable they will set in about the normal dates on both the Bengal and Bombay Coasts.

The rains will probably commence not later than the end of the first week of June on the Bombay Coast and in the latter part of the second week or the beginning of the third week of June on the Bengal Coast.

The chief features or local conditions in India which have to be taken into account in estimating the probable distribution of rainfall during the approaching monsoon due to normal or slightly stronger monsoon currents than usual are :

- (1) The distribution of the winter snowfall in the mountain areas to the north and north-west of India (*vide* page 14).
- (2) The abnormal features of the pressure, temperature and humidity conditions of the past five months and more especially in May (*vide* pages 21-25).
- (3) Heavy local rainfall in Burma and Bengal in April and May 1899 and in the Peninsula in April. The former generally accompanies drier seasons than usual in Upper India, and although of unusual amount in the present year, it is not exceptional in character and is hence of no especial importance. Heavy rainfall in the Peninsula occurred in April 1878, May 1886 and April 1895. The rainfall of the monsoon of 1895 was chiefly determined by the causes producing the cyclical variation of 1892-97 and was considerably below the normal. The rains in 1878 and 1886 were generally favourable and in excess.

The following inferences respecting the distribution of the south-west monsoon rains of 1899 are deduced from the comparison of the antecedent conditions of the present year with those of previous years and are based chiefly on the facts and data stated above :

- (1) The conditions in the Indian Seas and the Indian Ocean are, so far as can be ascertained, satisfactory and favourable, and indicate that the conditions in the south-east trades region are at least normal, and that the air movement in that area is somewhat stronger than usual.
- (2) Conditions are favourable to the prevalence of monsoon currents of at least normal strength in the Bay of Bengal. The rains will probably commence slightly before or about the normal date in Bengal (*i.e.*, the 15th of June).

- (3) Conditions are favourable to the prevalence of monsoon currents of at least normal strength in the Arabian Sea. They are also slightly more favourable in that sea than in the Bay. The influence of the late snowfall in April will very probably be very slight, and, so far as can be judged, the monsoon ought to set in on the Bombay Coast before the 8th of June.
- (4) Conditions are favourable in Burma, and it will probably receive at least normal rain. The rainfall is more likely to be in excess in Lower Burma than in Upper Burma.
- (5) Conditions are slightly unfavourable in North Bengal and Assam. The rainfall on the mean of the whole area will very probably not be above the normal and probably be in slight to moderate defect.
- (6) Conditions are favourable in West, South and East Bengal—more especially in the two latter areas, and the rainfall of the south-west monsoon period will be very probably normal and probably in excess in South and East Bengal, and normal or in slight defect in West Bengal and Orissa.
- (7) Conditions are slightly unfavourable in Bihar and Chota Nagpur, due to the deficiency of pressure in Bengal and Assam, and the rainfall on the average of the whole area will very probably not be above the normal and probably be in defect to a slight extent. Conditions are slightly more favourable in Chota Nagpur than Bihar.
- (8) Conditions are, on the whole, favourable for normal rain in the North-Western Provinces. There is a slight probability, based chiefly on the pressure conditions in the Punjab, that the rainfall of the whole area may be in slight to moderate excess. It is more probable the rainfall will be in excess in the western than the eastern districts.
- (9) Conditions are favourable in the Punjab. The pressure conditions of May (more especially the deficiency in the West Punjab) strongly resemble those of May 1880, 1892 and 1894. Comparison with these years indicates that the monsoon rainfall of the present year will probably be above the normal. The character of the rainfall in this area, however, depends chiefly on the general strength of the monsoon and not on the local conditions, and these conclusions should be suitably modified if the monsoon turns out to be much weaker than is anticipated in the forecast, in which case the rainfall may be below the normal to a moderate extent in the West and Central Punjab and normal or in slight defect in the East Punjab.
- (10) Conditions are, on the whole, favourable in Rajputana—more especially in the eastern and central districts, due to the same conditions as in the Punjab. The monsoon rainfall will hence very probably be at least normal in the eastern and central districts and probably in moderate excess. It will probably be about normal in the western states. The rainfall in these areas, as in the Punjab, depends chiefly on the general strength of the monsoon and hence, if the Bombay monsoon current be weak, the rainfall will be normal or in slight defect.
- (11) Conditions are about as favourable in Central India as in the North-Western Provinces, and it is probable that it will receive at least normal rainfall. The rainfall is more likely to be in excess in the eastern than the western states.
- (12) Conditions are, on the whole, favourable in the Central Provinces and to a slightly less extent in Hyderabad. It is hence probable that they will receive at least normal rainfall. The conditions are more

favourable in the eastern than the western districts of the Central Provinces, and it is hence probable that the eastern districts may receive rainfall in slight to moderate excess of the normal.

- (13) Conditions are not quite so favourable in Berar and Khandesh, and the rainfall in these areas will probably not be above the normal and may be in slight defect. They are also slightly unfavourable in the West Deccan, and that area will very probably not receive more than its normal fall and probably less.
- (14) The conditions in the west coast districts are such as are in normal monsoons associated with at least normal rainfall. It is hence very probable that the rainfall of the present year's south-west monsoon will be at least normal in those districts, and probably it may be in slight to moderate excess.
- (15) The variations of the rainfall in the North Madras coast districts are in at least five years out of six similar to those of Orissa and the Central Provinces. Conditions appear to be on the whole favourable, and it is probable those districts will receive about normal rain.
- (16) A comparison of the conditions in the Madras Deccan, Mysore and the Carnatic with those of similar years indicates that the rainfall during the period—June to August—will probably be in slight defect—more especially in Mysore. It is, however, very difficult to forecast for this part of India, as rain in the southern half of the Peninsula during the monsoon proper occurs chiefly during the intervals of breaks in the rains of Northern India, and is hence essentially of irregular occurrence.

It should be carefully noted that the preceding probabilities are obtained on the assumption that the currents will be slightly stronger than usual, and that they will require to be suitably modified, if the monsoon currents should be weaker than usual. It should also be noted that the chances for an inference stated to be very probable are at least 5 to 1 and for an inference stated to be probable are at least 5 to 2.

The general conclusions are, 1st, that the rainfall over the Indian area during the approaching monsoon will on the average of the whole area, probably be slightly above the normal, and, that it may be in slight to moderate local defect in Assam, North Bengal, Bihar, Berar, the Bombay Deccan and Mysore, 3rd, about normal in Chota Nagpur, Orissa, West Bengal, the North-Western Provinces, the Central Provinces, and Hyderabad, and 4th, in slight to moderate excess in Lower Burma, South Bengal, the Punjab, Rajputana and Central India.

As already pointed out, these conclusions should be suitably modified if the monsoon currents should turn out to be considerably stronger or weaker than was anticipated in the forecast from the very imperfect and scanty data available on this point.

It is too early to estimate the probability of a longish break in the rains in July or August, but there are no indications at present of such an event.

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

**Weather Review of India for the Week ending at 8 a.m. on  
Saturday, June 3rd, 1899.**

Throughout the present week pressure has been low over Northern India and high in the extreme south-east, south and south-west. At first gradients were steep and the winds strong, but as the week advanced, pressure increased in the north and decreased in the south, and barometric readings became more uniform. The most marked and the most important feature in the weather during the week under review has been the abnormally high pressure which has held steadily over a large part of North-Western and Western India during the greater part of the week. This area of abnormally high pressure apparently interrupted the flow of monsoon winds towards India, and the week was noticeable for a marked absence of rain along the west coasts of India and of Ceylon. On the opposite side of India conditions were less abnormal. Southerly winds from the Bay blew steadily over Burma and into Assam and North Bengal, and all over the area affected by these winds rain fell daily and in some cases heavily. With the exception of this region, the weather was fine, and consequently the heat was very generally greater than usual, as at this season a good deal of cooling rainfall is anticipated as the monsoon current advances northward along the west coast.

**Daily Summary — Sunday, May 28th.**—A small depression, in which the barometer read about 0.30 inch below the normal, lay over the Central Punjab, while pressure was high and about the normal in Malabar and Ceylon. Pressure differences were consequently large, and the winds, which blew from cyclonic directions in the Punjab, from west across India, from south-east in Burma and from east along the foot of the hills, were strong to a gale in force in some places. The weather was disturbed and showery over Burma, Assam, North Bengal and the south-west of the Peninsula. The amounts were large in Deltaic Burma. The heat was less than usual over North Bombay, the west of the Central Provinces and a large part of the Peninsula as well as over Lower Burma. Elsewhere the heat was excessive.

**Monday, May 29th.**—Pressure had increased fast in the North and West Punjab, and the depression noticed over that province had been pushed southward, but elsewhere there had been no important change, and pressure differences were still large. Northerly winds had appeared over the West Punjab, but in other parts of the country there had been no important change. The force remained high. The weather remained showery over Burma, East and North Bengal, Assam and the south-west of the Peninsula. The heaviest rainfall was reported from Tenasserim. The heat was greater than usual over West and South-West Bengal, North-West India, the Central Provinces and the Madras Coast, but was less than the normal elsewhere.

**Tuesday, May 30th.**—Pressure had increased everywhere. The change had been brisk to rapid in the north and centre and slight in the south, so that, though the general conditions of pressure were unchanged, the pressure differences had diminished. The winds were lighter than on the two preceding days, but an important change was in progress along the west coast where the wind direction was shifting toward north, and pressure had risen to above the normal. Cloudy, showery, weather had continued over Burma and North-East India and the south-west of the Peninsula, and unsettled weather with light thundershowers was reported from the North-West Himalayas. The mean temperature was low over the Indus Valley, North Bombay, Central India and part of the west of the Peninsula as well as over Lower Burma and Tenasserim. Elsewhere the heat was excessive.

*Wednesday, May 31st.*—Pressure had again increased. The rise had been greatest at some western stations, and the barometer read higher than usual over a large part of Western and North-Western India. There had been further northing in the winds over the Peninsula, etc., where the direction was nearly due north along the coast and north-west over the Central Provinces and the centre and east of the Peninsula. In most other places the winds were little changed, but over the Gangetic Plain calms and variable airs prevailed. Showers continued to be reported from Burma, Assam, parts of Bengal and the North-West Himalayas and the south-west of the Peninsula. The rainfall amounts were again heavy over Deltaic Burma. Elsewhere the weather was fine. The temperature distribution was little changed; the heat was generally less than usual over a large part of North-Western and Western India and Lower Burma and generally greater than usual elsewhere.

*Thursday, June 1st.*—Pressure had increased over North-West India and over Burma, but had decreased in the intervening region. Pressure remained abnormally high over a large part of Western India. North-westerly winds continued over the Peninsula, westerly winds in North Bombay and the South Gangetic Plain, south-westerly to south-easterly winds over Burma and Lower Bengal and easterly winds close to the hills. The westerly and north-westerly winds were fresh to strong. The weather had become finer, and the rain ceased along the west coast and over the North-West Himalayas, but showers continued to be reported from Burma and North-East India. The mean temperature remained low over North Bombay, part of the west of the Peninsula and over Lower Burma. Elsewhere the heat was excessive.

*Friday, June 2nd.*—Pressure had changed irregularly, but had on the whole fallen. Pressure remained lowest over Northern India and highest in the extreme south, but there was apparently at the same time an area of relatively low pressure and of unsettled weather over the Bay in about Lat.  $14^{\circ}$ N. The winds were practically unchanged, the most marked features of the wind circulation being the north-westerly winds over the Central Provinces and the Peninsula and the southerly winds in Burma. The force had fallen, and along the west coast the wind was unusually light. Showery weather continued in the north-east, but elsewhere the weather was fine, and along the west coast there was none of the usual heavy rain. Temperature conditions were little changed and, except in Burma, the West Punjab and a large part of Bombay, where the weather was cool, the heat was greater than usual.

*Saturday, June 3rd.*—The barometer had fallen over the Indus Valley, but had changed slightly and irregularly elsewhere. Pressure had become more uniform over the west of the Peninsula, but elsewhere there had been no important change. The northerly winds along the west coast had died down and been succeeded by variable south-westerly to south-easterly winds. In the Central Provinces and the centre and west of the Peninsula north-westerly winds continued, while in Burma and Bengal southerly and south-easterly winds were again reported. There had been no general rain except in Burma and Assam, but one or two showers were reported from the Peninsula. The air had become very dry in Upper India. Temperature had changed irregularly, and the variations from the normal were large in some parts of the country. The principal were  $-10.3^{\circ}$  at Quetta,  $-6.6^{\circ}$  at Jacobabad,  $+8.5^{\circ}$  at Chanda,  $-5.6^{\circ}$  at Coconada and  $-3.3^{\circ}$  at Silohar.

**Temperature.**—There has, as mentioned above, been very little rain over India except in the north-east, and the mean temperature of the whole country has been very generally excessive. It was, however, remarkable that an area of very low temperature appeared during the week over Baluchistan, and these low temperatures, carried by the north-north-westerly wind which prevailed over Western India, extended southward over the greater part of Bombay, so that notwithstanding the absence of the usual rainfall along this coast, the heat remained less than usual. In Burma the temperature was lower than usual, particularly at the commencement of the week, but in the remaining provinces the heat was excessive, the greatest excess being reported from Chota Nagpur.

The following table gives the mean temperature variation data for the week:

PROVINCE.	28th MAY TO 3RD JUNE 1899.							Mean variation of week.
	28th	29th	30th	31st	1st June	2nd	3rd	
	°	°	°	°	°	°	°	°
Burma . . . . .	-4.0	-0.3	-1.0	-0.2	-0.2	-0.5	+0.1	-0.9
Assam . . . . .	-0.1	-0.3	+1.6	+3.0	+3.8	+2.4	-0.9	+1.4
Bengal . . . . .	+1.1	-0.4	+1.1	+2.1	+3.4	+2.8	+1.8	+1.7
Orissa . . . . .	+4.7	+3.6	+5.1	+4.6	+2.0	+0.2	+1.4	+3.2
Bihar . . . . .	+0.6	+0.9	+0.7	+4.4	+4.9	+4.3	+4.6	+2.9
Chota Nagpur . . . . .	+7.9	+7.0	+5.8	+6.5	+6.9	+5.7	+6.6	+5.8
N.-W. P. and Oudh . . . . .	+5.6	+3.8	+3.1	+2.1	+2.4	+2.9	+1.9	+3.1
Punjab . . . . .	+10.3	+5.6	+2.5	+1.9	+0.4	+0.4	+0.1	+3.0
Sind . . . . .	+1.7	+2.2	+0.6	+0.7	-0.1	-1.1	-0.7	+0.5
Rajputana . . . . .	+2.5	+1.4	+0.1	-0.7	+0.9	+1.4	+1.1	+1.0
Gujarat . . . . .	-1.5	-1.7	-1.4	-1.9	-2.5	-0.6	-0.8	-1.5
Central India . . . . .	+0.2	-0.2	+0.8	+0.7	+0.3	+1.9	+0.4	+0.6
Central Provinces . . . . .	+1.1	+1.3	+2.2	+2.1	+4.4	+5.2	+5.8	+3.2
Berar . . . . .	-0.3	0	+1.4	+0.5	+2.1	+3.5	+4.5	+1.7
West Coast . . . . .	-0.9	-1.1	-0.9	0	+0.7	+1.0	+1.0	0
Bombay Deccan . . . . .	-1.4	-1.4	-0.4	-0.2	0	+1.0	+1.0	-0.2
Mysore . . . . .	-1.6	-1.6	-1.8	-0.8	+1.4	+2.8	+0.5	-0.2
Madras Coast . . . . .	+2.0	+4.2	+3.3	+1.7	+2.0	+1.4	-0.8	+2.0
Madras Deccan . . . . .	-2.0	-1.2	-0.3	-0.7	+1.8	+4.0	+1.2	+0.3
South India . . . . .	-3.1	-0.8	-0.2	-0.6	+1.5	+3.4	+1.0	+0.2
Mean for whole of India . . . . .	+1.1	+1.1	+1.2	+1.3	+1.8	+2.1	+1.5	+1.4

The mean temperature of the whole country on each day of the week was above the normal, the excess having been greatest on June 1st and 2nd.

The following were the highest maxima reported on each day:

May 28th . . . . .	118.0°	at Jacobabad.
" 29th . . . . .	114.2°	" Do.
" 30th . . . . .	112.7°	" Do.
" 31st . . . . .	112.2°	" Do.
June 1st . . . . .	113.2°	" Mainpuri.
" 2nd . . . . .	113.6°	" Cawnpore.
" 3rd . . . . .	114.0°	" Chanda.

**Rain.**—The rainfall of the week under review has been less general and less heavy than during the preceding week. Practically no rain fell over West Bengal, the North-West Provinces, the Punjab (except on and near the Hills), the central parts of India, North Bombay and some east coast districts. Rain was hence confined to Burma, Assam and Bengal proper, all of which districts were under the influence of the southerly and south-easterly winds, which blew up from the Bay bringing much moisture with them and to the west and south-west of the Peninsula which districts were under the influence of slight intermittent advances of moist wind from the Arabian Sea. In addition to the above, there were occasional showers during the week over the Punjab Hills and at some places in Madras, but these showers, which ordinarily accompanied dust or thunder storms, were local and generally light, so that they were only of slight importance. The rainfall returns show that during the week rain fell in Burma on each day; in Assam on each day; in East Bengal principally on the 2nd and in other parts of Bengal principally on the 29th, 30th and 31st; in the Punjab Hills on the 29th and 30th; in the west of the Peninsula on the 28th, 29th, 30th and 31st and in the Madras districts on the 28th. The rainfall table at the

close of the summary shows that effective rain fell during the week in twenty-nine of the rainfall divisions, while in the other twenty-eight divisions the rainfall was either actually or practically nil. Within the region of effective rainfall the average actual falls ranged from 10.04 inches in Tenasserim, 9.00 inches in Arakan, 7.76 inches in the Surma division of Assam, 7.57 inches in the Hill division of Assam, 6.34 inches in Deltaic Burma and 5.27 inches in the Bengal Hills, 10.012 inch in Orissa, 0.13 inch in the North Punjab and Khandesh, 0.15 inch in the Bombay Deccan and 0.12 inch in Central Madras. Except in Tenasserim and parts of Assam and Bengal, where the rainfall as shown above was heavy, the average actual rainfall was lighter than usual, the principal cases of deficiency having been between one inch and one inch and a half in Central Burma, Upper Burma, Arakan, the Assam Valley, Deltaic Bengal, Central Bengal, Malabar and Coorg. On the other hand, there was an excess of over two inches in the Surma Valley and of over one inch in Tenasserim, Deltaic Burma and the Bengal Hills.

The following were the principal large totals recorded at individual stations during the week:

Burma	Moulmein	10.04 inches.
	Kyaukpyu	12.43 "
Assam	Cherra Poonjee	20.87 "
	Sunamgunj	15.56 "
Bengal	Netrokona (Mymensingh)	8.35 "
	Matabhaza (Cooch Behar)	12.82 "
Malabar	Cannanore	6.12 "
Konkan	Bhatkal (Karwar)	8.09 "
Madras	Tirupathur (Madura)	2.22 "

The three concluding columns of the table show the average actual and average normal rainfall for the whole period from February 26th to June 3rd. The total actual fall has been short of the total normal fall by 20 per cent. or more in South Bihar, the west submontane division of the North-West Provinces, the hill division of the North-West Provinces, all the Punjab divisions, the west and central divisions of the Central Provinces, Gujarat, Kathiawar, Central India, Rajputana and Hyderabad (South). In all the other divisions the rainfall was about normal or more or less in excess. In Western Rajputana no rain whatever has fallen throughout the whole period, and in Gujarat, Kathiawar and the West and South Punjab the total amount for the whole period has been insignificant. March was a dry month almost everywhere, the only exceptions being Sind on the one side and Assam and North Bengal on the other, and on the 1st of April only six divisions exhibited any excess of rain, while many divisions had received either no rain whatever or only insignificant amounts. April was a much more disturbed month—more especially over the Peninsula, and at the end of the month the rainfall showed an excess except in Burma, the North-West Provinces, the Punjab, the central districts and North Bombay. May was wetter than usual in the north-east, but elsewhere the rainfall was about normal, though quite at the close of the month the burst of rain which occasionally occurs along the Malabar Coast was wanting on this occasion.

W. L. DALLAS,  
for Meteorological Reporter to the  
Government of India.

SIMLA, 8th June, 1899.

M. FINUCANE,  
Offg. Secretary to the Government of India.

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

## Weekly Report on the state of the Season and Prospects of the Crops.

**Madras.**—*For week ending 3rd June.*—There was moderate rainfall on the West Coast and on the hills and scattered showers elsewhere. The rainfall to date has generally exceeded the average. The water-supply is normal for the season and is improving in parts. Ploughing is general and sowing has begun on the West Coast. The standing crops are in good condition. Pasture is scanty, but fodder is available. Cattle are in normal condition. Prices are almost stationary.

**Bombay.**—*For week ending 8th June.*—There was rain in ten districts during the week, but the fall was generally light. Preparations for monsoon cultivation are progressing generally, and sowing is going on in seven districts. Fodder is sufficient, except in parts of Sind and Baroda territory. Agricultural stock is healthy. Prices have risen in seven and fallen in six districts; elsewhere they are stationary.

**Bengal.**—*For week ending 5th June.*—There was good general rain in the north and east of the Province; in other parts hot weather prevailed throughout the week and only scattered showers are reported. The general agricultural prospects continue satisfactory, but want of rain is felt in some districts. Ploughing and early sowings are proceeding and autumn rice and jute already sown are doing well. Sugarcane and other crops in the ground are in good condition. In the Sadar sub-division of Dacca the young paddy plants are being destroyed by locusts and insects, and insects have also appeared in places in Backergunge. Prices continue almost stationary. There is no want of fodder, except in one thana in Manbhurn, as previously reported.

**North-Western Provinces and Oudh.**—*For week ending 7th June.*—Except for slight showers in a few districts, the weather during the week has been clear. Harvesting of extra crops continues in parts. Irrigation of indigo and sugarcane and weeding of the latter continue. Preparations for the autumn crop sowings are still in progress. Supplies and fodder are sufficient. Prices have slightly risen in a few districts, but otherwise they are stationary to falling.

**Punjab.**—*For week ending 8th June.*—Slight rain has fallen in parts of the Sialkot and Rawalpindi districts. Harvesting of the spring crops is nearly finished, and watering of extra spring crops and weeding of sugarcane, tobacco, and cotton are in progress. Rain is badly wanted for autumn sowings. The outcome of the spring crops is reported average or below average. Prospects of the extra spring crops are fair. The standing autumn crops are generally in fair condition. Cattle are getting lean, owing to the scarcity of fodder in Delhi, Shahpur, and parts of Hissar and Dera Ismail Khan; their condition is reported good from other districts. Fodder is scarce in Delhi, Shahpur, and parts of Hissar, Peshawar, and Dera Ismail Khan; but is sufficient elsewhere. Prices—especially of wheat—are rising in Umballa, Amritsar, and Rawalpindi; falling in Peshawar and Dera Ismail Khan; and are unchanged elsewhere. Wheat is selling from 16½ to 22½; gram 20 to 21; maize 28 to 33; barley 32; bulrush-millet 18 to 26; great millet 24; and rice 13½ to 14½ seers per rupee.

**Central Provinces.**—*For week ending 6th June.*—The weather has been very hot and occasionally cloudy. 3,522 and 2,237 persons are in receipt of relief in the Saugor and Damoh districts, respectively. Preparation of land for autumn sowings is in progress, and sowing of rice has commenced in parts of Bhandara and Sambalpur. Scarcity of water continues to be felt in parts of Saugor, Mandla, Chhindwara, Chanda, Bhandara, Nagpur, and Raipur. Fodder is scarce in parts of seven districts. The price of wheat, gram, rice, and *juar* has fallen in some districts and has risen in others. The cheapest prices are—wheat 21, gram 37, rice 21, and *juar* 29 seers per rupee; the dearest prices are—wheat 13, gram 18, rice 10, and *juar* 21 seers per rupee.

**Burma.**—*For week ending 3rd June.*—In Lower Burma ploughing for wet weather paddy has commenced in most districts. In Upper Burma reaping of dry weather paddy continues in parts of Pakòkku, Minbu, the Singu township of Mandalay, Katha, and Lower Chindwin, and is completed in the Yesagyo township of Pakòkku, Bhamo, and the Upper Chindwin. Sowing of paddy on the hill-sides of the Northern districts continues. Ploughing and sowing of early sesamum, cotton, and peas; and ploughing for early paddy crops continue in most districts. The early crop is being transplanted in Kyaukse. The condition of standing crops is generally good, but dry weather paddy has been injured by excessive rain in Minbu, the Bhamo sub-division of Bhamo, in three townships of Katha, and in the Legayaing sub-division of the Upper Chindwin. Price of paddy has fallen largely in Akyab; slightly in Myingyan; and has risen in Thaton and Thayetmyo; elsewhere it is stationary and generally below normal, except in Amherst and the Upper Chindwin.

**Assam.**—*For week ending 6th June.*—The weather is wet. Ploughing for late rice; sowing of early rice; planting of sugarcane; and plucking and manufacture of tea are in progress. Prospects of tea are fair, but blight is prevalent in parts of Darrang and Sibsagar. Early rice is partly damaged by insects and rain in Nowgong. Prices—common rice—Silchar and Dhubri 16, Sylhet 21, Gauhati 17, Tezpur, Sibsagar, and Dibrugarh 12, and Nowgong 15 seers per rupee.

**Mysore and Coorg.**—*For week ending 7th June.*—**MYSOORE:** Rainfall—48 cents in the Civil and Military station and rain general in the Province. Prices have slightly risen in Kolar and Shimoga and fallen in Bangalore, Hassan, and Kadur. Paddy has been sown in Kolar, Tumkur, and Chitaldrug.

**COORG:** Rainfall—66 cents. Ploughing for rice and *ragi* (*Eleusine coratana*) continues. Prices of food-grains are stationary. Water and fodder for cattle are sufficient.

**Berar and Hyderabad.**—*For week ending 7th June.*—**BERAR:** The weather is warm and cloudy. Preparation of land for the monsoon crop continues. Fodder is scarce in the Wun district. The water-supply is insufficient in parts of five districts. Prices are steady.

**HYDERABAD:** Rainfall during the week—3 cents. The winter rice harvest is over. Preparations for the autumn sowings are going on. Prices of grain are steady. Prices—wheat 10, coarse rice 10½, and *jowari* 25½ seers per current sicca rupee.

**Central India.**—*For week ending 7th June.*—Partial rain fell during the week in the Bhopal Agency. Agricultural operations have been completed in Gwalior, Bundelkhand, and Bhopawar. Agricultural stock and pasturage are in good condition. Prices are above normal in Bundelkhand and normal elsewhere.

**Rajputana.**—*For week ending 7th June.*—Rainfall—11 cents in Bikanir. Agricultural operations are proceeding satisfactorily. Agricultural stock is in fair to good condition, but is getting lean and emaciated in Kherwara. Fodder is scarce throughout the greater part of Rajputana. Prices are rising in two States, and there is a slight rise in Ajmere; they are fluctuating in Jhallawar and are steady elsewhere. Seven persons emigrated from Ajmere during the week. The total emigration from Merwara to date numbers—4,431. The numbers employed on relief works were—Ajmere 617, Merwara 5,292, and Marwar 950. There are also 311 on ordinary works and 237 on gratuitous relief in Ajmere-Merwara. Prices—Ajmere 18½, Beawar 18½, and Marwar 15 seers per rupee.

**Kashmir.**—*For week ending 6th June.*—The weather is fine. Prospects of spring crops are excellent. Prices continue below normal. Rice—27 seers per rupee.

**JAMMU PROVINCE.**—*For week ending 7th June.*—No rain. Prices are generally stationary. Prices—wheat from 16 to 19 and maize 25 to 29 seers per rupee. The condition of the standing crops is fair. The spring crops are still being threshed and housed in some places. Sowings of autumn crops are still going on. Fodder is sufficient.

**Nepal.**—*For week ending 3rd June.*—Rainfall—0·95 inch. The weather is very warm. Wheat is being harvested. Rice—9½ seers per rupee.

M. FINUCANE,

Offg. Secretary to the Government of India.

SUPPLEMENT TO

# The Gazette of India.

No. 24.

CALCUTTA, SATURDAY, JUNE 17, 1899.

## OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the only of the GAZETTE must be looked to.

PUBLIC WORKS DEPARTMENT.  
ACCOUNT  
RAILWAY.

REVIEW OF THE REVENUE AND EXPENDITURE OF THE RAILWAY BRANCH OF  
THE PUBLIC WORKS DEPARTMENT for 1897-98.

No. 140-A.—R., dated Simla, the 1st June 1899.

READ—

Note by A. R. Becher, Esq., Accountant General, Public Works Department, on the Capital and Revenue Accounts of Railways in India for 1897-98, No. 136 R., dated 6th April 1899.

**RESOLUTION.**—The note by the Accountant General, copy of which is appended, exhibits the transactions of the Public Works Department with regard to Railways during the year 1897-98, and shows the financial results to the State of the working of State and Guaranteed railways.

2. During the year under review, 183½ additional miles of railway were opened for traffic, and the further capital outlay incurred was as under:—

	Miles.	Capital outlay.	
		Rx.	£
<i>State Railways—</i>			
Productive . . . . .	46½	4,364,000	...
Defensive . . . . .	...	252,481	...
Total State railways . . . . .	46½	4,616,481	...
Guaranteed railways . . . . .	...	...	399,558
State lines leased to Companies . . . . .	137½	...	2,146,373
Branch line companies . . . . .	...	687,937	...
	183½	5,304,418	2,545,931

The mileage open at the end of the year aggregated 18,170½ miles exclusive of 2,994 miles of lines belonging to Native States and other bodies, with which the Government of India have no financial concern.

The capital outlay incurred on construction of State and Guaranteed railways to the end of 1897-98 stood as under :—

	Rx.	£
(i) On State lines—		
Direct capital outlay including outlay incurred from debentures raised by the East Indian Railway Company . . . . .	99,749,483	...
Redemption of liabilities . . . . .	...	33,553,451
(ii) On State lines leased to Companies . . . . .	...	29,484,713
(iii) On Guaranteed railways . . . . .	...	46,573,637
(iv) Branch line companies . . . . .	1,050,082	...
	<u>100,799,565</u>	<u>109,611,801</u>

3. The gross revenue for the year showed an increase of Rx. 1,125,254 over that of the previous year, bringing the total up to Rx. 24,474,090 derived as under :—

1896-97. Rx.		1897-98. Rx.
17,639,604	State railways . . . . .	19,044,525
5,685,180	Guaranteed railways . . . . .	5,414,596
24,052	Subsidised railways (repayment of advances of interest) . . . . .	14,969
<u>23,348,836</u>	GRAND TOTAL . . . . .	<u>24,474,090</u>

The gross charges for the year showed a decrease of Rx. 102,111, bringing the total expended down to Rx. 25,906,706 as under :—

1896-97. Rx.		1897-98. Rx.
11,487,615	Working expenses . . . . .	11,926,607
830,256	Surplus profits, share of net earnings, etc. . . . .	598,101
5,217,085	Interest on sterling outlay, including interest paid to Guaranteed Companies . . . . .	5,050,245
5,452,514	Interest on debt incurred for Capital . . . . .	5,009,138
2,844,343	Terminable annuities issued for purchase of railways . . . . .	2,676,715
177,004	Other charges . . . . .	145,900
<u>26,008,817</u>	GRAND TOTAL . . . . .	<u>25,906,706</u>

The transactions thus recorded result in a net charge to the State of Rx. 1,432,616, as compared with a net charge of Rx. 2,659,981 in the preceding year. In paragraph 7 of the Accountant General's note, the charge for the year will be seen to have been distributed as follows :—

1896-97. Rx.		1897-1898. Rx.
—1,096,659	State railways . . . . .	—15,691
—1,438,453	Guaranteed railways . . . . .	—1,301,905
—60,968	Subsidised Companies . . . . .	—98,791
—63,901	Miscellaneous . . . . .	—16,229
<u>—2,659,981</u>	Net charge . . . . .	<u>—1,432,616</u>

The transactions of the principal lines working up to the above result were as follows:—

Railway.	Gross Traffic earnings.	CHARGES.				
		Working expenses including Comptroller's share of surplus profits, etc.	Interest and annuities.	Charges of land and cost of controlling establishments, etc.	Total charges.	Gain + or loss —
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
<i>State Railways.</i>						
East Indian	5,881,491	1,953,204	2,641,776	...	4,594,980	+ 1,286,511

Total State railways	19,044,575	9,201,202	9,859,812	...	19,060,216	— 15,641
<i>Guaranteed Railways.</i>						
Great Indian Peninsula	2,873,077	1,873,721	1,862,299	7,480	3,743,500	— 870,423
Bombay, Baroda and Central India.	1,401,739	839,578	681,608	3,761	1,524,947	— 123,208
Madras	1,139,730	580,202	833,180	4,670	1,398,052	— 258,322
Total Guaranteed railways	5,414,546	3,293,501	3,377,087	15,911	6,771,500	— 1,356,954
Subsidised railways	14,069	...	...	113,760	113,760	— 99,791
Miscellaneous Railway Expenditure.	...	...	...	16,229	16,229	— 16,229
GRAND TOTAL	24,474,090	12,524,703	13,236,999	145,900	25,966,706	— 1,492,616

The traffic during the year improved considerably owing to the movement of troops in connection with the expeditions on the North-West Frontier and to the revival of traffic after the famine. The charge for interest and annuities was smaller owing to the rate of exchange that obtained during the year being more favourable. In return for the charge of Rs. 1,432,616 the State receives all the indirect benefits arising from a railway system of 18,170½ miles open to traffic.

4. The net receipts accruing to Government from all State lines, after deducting the payments made to working Companies in respect of surplus profits or share of net earnings, amounted to Rs. 9,843,323 (paragraph 12 of Accountant General's note), which gives a return of 5·67 per cent. on the total capital outlay actually incurred by the State as entered in rupees in the Government Accounts. This capital outlay does not, however, include that portion of the purchase price of the East Indian, the Sind, Punjab and Delhi and the Eastern Bengal Railways, which is being redeemed by the payment, from current revenues, of terminable annuities. If, however, in the case of the Guaranteed railways that have been

purchased by Government the amounts of capital expended by the several companies prior to their purchase by the State *plus* the capital outlay since incurred by the State be taken in lieu of the figures now appearing in the Government Accounts, which, as explained above, do not include certain transactions, the return given by the net receipts (Rx. 9,843,323) is 4·83 per cent., as shown in paragraph 16 of the Accountant General's note. These percentages indicate a satisfactory return on the capital expended, and the fact that there was a net charge to the State of Rx. 15,591 in respect of the State railways, as shown in paragraph 3 above, is due partly to the loss by exchange on the payments in England of the annuities and interest on the sterling portion of the capital, and partly to the fact that the annuities that are charged against the net revenues cover the enhanced value at which the capital of the several companies was taken over by Government and include also sinking fund charges for the redemption of the capital.

5. In paragraph 17 of the note the Accountant General gives yet another way in which the return from State railways may be stated. Remittances have to be made yearly from India to pay the interest in England on a sterling capital of £98,486,517. The equivalent of this sum in rupees, at the rate of exchange applicable for the year, added to the sum of Rx. 104,277,346, representing the rupee capital on which interest is paid in India, gives the total capital as Rx. 258,223,567, and the net receipts of Rx. 10,152,033 give a return of 3·93 per cent. thereon.

In the case of the East Indian Railway the net return on the capital stated in this way is 6·93 per cent., and this is practically what the East Indian Railway deferred annuity holder, as partner with Government, receives.

6. The working of the three Guaranteed railways during the year is reviewed in paragraphs 57 to 60 of the note. Including charges for land and supervision, the result has been a loss to the State of Rx. 1,301,905. Each of these railways was worked at a loss during the year under review, the loss entailed on individual lines being as under:—

	Rx.
Great Indian Peninsula Railway . . . . .	870,425
Bombay, Baroda and Central India Railway . . . . .	173,158
Madras Railway . . . . .	258,322
<b>TOTAL . . . . .</b>	<b>1,301,905</b>

On the other hand, however, although the result of working the Guaranteed railways has been a net loss to the State of Rx. 1,301,905, the Companies received during the year from Government a total sum of Rx. 109,280 as their share of surplus profits, which are, under the terms of the contracts, declared half-yearly, the sterling interest being converted for the purpose of this division at the fixed contract rate of 1s. 10d. against 1s. 3·35391005d., the rate adopted in the Government Accounts of the year under review. The unfavourable effects of this provision in the contracts with regard to each line are brought out in paragraph 58 of the Accountant General's note.

The Governments of Madras and Bombay (Railway), Bengal, the North-Western Provinces and Oudh, the Punjab and Burma.

The Chief Commissioners of the Central Provinces and Assam.

The Resident at Hyderabad.

The Agents to the Governor-General for Central India, Rajputana and Baluchistan.

The Accountant General, Public Works Department.

The Consulting Engineers to the Government of India for Railways, Calcutta, Lucknow and Assam.

The Managers, North Western, Eastern Bengal, Oudh and Rohilkhand, and East Coast Railways.

The Engineers-in-Chief, Mari-Attock Railway, Indus bridge, Godavari Bridge, Hardwar-Delhra Railway and Ghaziabad-Moradabad Railway.

ORDER.—Ordered, that the foregoing, with a copy of the note referred to, be forwarded to the Local Governments, Administrations and Officers noted on the margin, for information.

Ordered also, that a copy of the resolution and note be forwarded to the Department of Finance and Commerce, and that the papers be published in the *Gazette of India*.

F. R. UPCOTT,

Secretary to the Government of India.

*Documents accompanying.*

Note by the Accountant General, Public Works Department, No. 136 R., dated 6th April 1899.

Accompaniment to Public Works Department Resolution No. 140 A. R., dated 1st June 1899.

**Note by A. B. Becher, Esq., Accountant General, Public Works Department, upon the Capital and Revenue Finance Accounts of Railways in India for 1897-98.**

The revenue and expenditure of the Railway Branch of the Public Works Department is recorded under the following major heads:—

**Revenue—**

XXVI.—State Railways (Gross Traffic Receipts).

XXVII.—Guaranteed Companies (Net Traffic Receipts).

XXVIII.—Subsidized Companies (Repayment of advances of interest).

**Expenditure—**

34.—Construction of protective Railways (charged against Famine Insurance).

37.—Construction of Railways (charged against Revenue in addition to that under Famine Insurance).

38.—State Railways—Working Expenses, Interest charges, etc.

39.—Guaranteed Companies—Surplus Profits, Land, Supervision and Interest.

40.—Subsidized Companies—Land, Subsidies and Advances of Interest.

41.—Miscellaneous Railway Expenditure (Surveys, etc.).

48.—State Railways—Construction.

51.—State Railways—Capital charge involved in Redemption of Liabilities.

2. In addition to the foregoing, this note and the accounts attached to it include the transactions recorded in the Finance and Revenue Accounts under the head "Capital Account of Indian Railway Companies," as well as the transactions of the following Native States Railways, the accounts of which are dealt with in this Department:—

Bhopal State Railway (Bhopal Section).

Amraoti Railway.

Khamgaon Railway.

3. The Warora and Umaria Collieries, both as regards capital and revenue transactions, are classed under State Railways.

4. For convenience, this note is divided into the following sections:—

Section A.—State Railways—Revenue transactions (Major heads XXVI and 38).

" B.—Guaranteed Railways—

(i) Revenue transactions (Major head XXVII).

(ii) Surplus Profits, Land, etc. (Major head 39).

" C.—Subsidized Companies (Major heads XXVIII and 40).

" D.—Miscellaneous Railway Expenditure (Major head 41).

" E.—Construction Expenditure (Major heads 34, 37, 48 and 51).

" F.—Capital Account of Guaranteed Companies.

" G.—Capital Account of Indian Railway Companies (exclusive of the three old Guaranteed Companies).

" H.—Railways belonging to Native States.

**General results of the year.**

5. An account is submitted with this review exhibiting in abstract, by Fund and Finance heads, the Revenue and Expenditure on account of State and Guaranteed Railways during the year, and a comparison is made therein of the results of the year, with the Budget and Revised Estimates and with the actuals of 1896-97.

6. The outlay on construction was as follows:—

	Rx.
34.—Construction of protective Railways (Famine Insurance) . . .	...
37.—Construction of Railways (charged against Revenue in addition to the above) . . .	3,792
48.—Construction of Railways (not charged to Revenue) . . .	3,682,005
Capital outlay by the old Guaranteed Companies . . .	437,919
State lines constructed by the agency of Companies . . .	3,526,515
Assisted Companies . . .	687,937
Capital outlay met from debentures raised by the East Indian Railway Company . . .	980,034
<b>Total</b> . . .	<b>9,268,762</b>

## 7. The results shown by the Railway Revenue Account are as follows:—

	State Railways.	Guaranteed Railways.	Subsidiary Companies.	Miscellane- ous.	TOTAL.
	Rx.	Rx.	Rx.	Rx.	Rx.
Gross Receipts . . . .	10,044,525	5,414,506	14,969	...	24,474,000

8. From the foregoing statement it will be seen that after meeting all charges for annuities and interest (including interest on capital expended on lines not opened for traffic), charges for land for Companies' lines and miscellaneous expenditure on surveys, etc., the result of the year is a net charge to the State of Rx. 1,432,616. The traffic during the year improved considerably owing to the movements of troops in connection with the expeditions on the North-West Frontier and to the revival of traffic after the famine; the rate of exchange which obtained for the year was also somewhat more favourable, with the result that the net charge is lower than in the previous year by Rx. 1,227,365 when it amounted to Rx. 2,659,981. The loss in this as in previous years may, however, be directly attributed to the low exchange prevailing. The interest and annuities paid in England amounted to £5,841,911, which, at the exchange of 15·85391005*d.* the rupee, aggregated Rx. 9,131,600, the difference between this and the old par of exchange being no less than Rx. 3,289,695.

9. In Schedule J will be found the charges upon the general tax-payer in respect of the construction of railways in India from 1858-59.

\* These annuities are terminable between the years 1968 and 1968.

## SECTION A.

## (i) STATE RAILWAYS.

*Gross Receipts and Working Expenses.*

10. At the beginning of the year under review 15,378 miles of State Railway were open for traffic,\* *etc.* :—

State lines worked by the State—						Miles.
Standard gauge	.	.	.	.	.	4,459½
Metre gauge	.	.	.	.	.	599
Special gauge	.	.	.	.	.	20
						<hr/> 5,094½
State lines worked by Companies—						
Standard gauge	.	.	.	.	.	8,740½†
Metre gauge.	.	.	.	.	.	6,548 ‡
						<hr/> 10,288½
TOTAL						<hr/> 15,378

11. During the year 1897-98, the following lengths of line were opened for traffic :—

		Miles.	Miles.
East Indian—			
Salanpur branch extension	.	.	1½
Indian Midland—			
Saugor to Damoh	.	.	47½
Bengal and North-Western (Company's section)—			
Salimpur to Barhaj	.	12½	
Mehinpurwa to Katarnian Ghat	.	27	
		<hr/>	80½
Burma—			
Mogaung to Myithyina	.	37	
Myithyina to Sedaw	.	13	
		<hr/>	50
Cawnpore-Burhwal (metre-gauge link)—			
Aishbagh to Cawnpore	.	.	45
TOTAL			<hr/> 193½

These figures give a total open mileage of 15,561½ miles at the end of the year, and allowing for corrections in mileages, including miles 13½ for the Rindli branch of the North Western Railway which was previously omitted, the mileage open on 31st March 1898 was 15,582½ § miles. The mileage of railways classed respectively as Imperial and Provincial was as under :—

						Miles.
Imperial	.	.	.	.	.	15,433½
Provincial	.	.	.	.	.	149
TOTAL						<hr/> 15,582½

\* Administration Report on the Railways in India for 1897-98—Part I, Appendix A.

† Includes Bengal Central Railway.

‡ Includes Bengal and North-Western Railway.

} Both these railways are the property of Companies, but for convenience are classed as State Railways.

§ As per Administration Report on the Railways in India for 1897-98—Part I, Appendix A.

Add—Cherra-Companygunj Railway now treated as a tramway for administrative purposes

Deduct—Calcutta Port Commissioners' Railway now treated as a railway for administrative purposes

15,591

8½

15,599½

|| Includes Bengal Central and Bengal and North-Western Railways.

12. The gross receipts of the year amounted to Rx. 19,041,525, the working expenses to Rx. 8,713,403; the share of net earnings, surplus profits, and contributions to Provident Funds paid to Companies to Rx. 487,799, raising the total charges to Rx. 9,201,202 and leaving Rx. 9,843,323 as the net receipts accruing to Government from all the State lines during 1897-98. This result is better than that of 1896-97 by Rx. 1,023,272.

13. The Capital expenditure incurred by, or on the direct responsibility of, the State, including the Capital charge involved by incurring a specific amount of debt in purchase or redemption of liabilities in connection with lines formerly belonging to Guaranteed Companies and acquired by the State, is as under:—

	Rx.	£
(i) On State lines ( <i>vide</i> Schedule G)—		
(a) Direct Capital outlay . . . . .	97,061,400	...
(b) Expenditure incurred from debentures raised by the East Indian Railway Company . . . . .	2,656,088	...
(c) Redemption of liabilities . . . . .	...	33,553,451
(ii) On State lines leased to Companies (Capital raised wholly or in part by Companies under guarantee), <i>vide</i> para. 127 . . . . .	40,899,530*	...
<b>TOTAL</b> . . . . .	<b>140,140,013</b>	<b>33,553,451</b>

14. This sum, however, includes expenditure on lines not opened for traffic at the close of the year under review; on materials held in reserve on the North-West Frontier and with Store-keepers at ports; on projects abandoned or in abeyance as well as inefficient expenditure incurred in connection with lines transferred to Companies, the total amount involved being Rx. 12,341,069 (*vide* Schedule H). Excluding such expenditure, the open line Capital outlay at the close of 1897-98 may be stated at Rx. 161,861,395.

15. The net receipts accruing to Government for the year, Rx. 9,843,323, give a return on the total Capital outlay at the close of the year as thus stated at the rate of 5.67 per cent., and on the *open line* Capital outlay at the rate of 6.10 per cent.

16. The above results, although representing correctly the return on the Capital outlay actually incurred by the State, cannot be taken as giving the true returns from the State Railways on the actual money expended upon the various undertakings. Those of the old Guaranteed Railways, which have been purchased by the State, were for the most part acquired by the payment of annuities, including the establishment of sinking funds which will redeem the capital at the expiry of the periods for which the annuities are to run. These charges are met from current revenues, and in respect of the capital thus to be redeemed, no charge appears in the Government account of Capital outlay. On the other hand, in the case of the Oudh and Rohilkhand Railway, which was purchased outright, the outlay, as shown in the Government books, includes the premium paid on the Company's share Capital. The actual outlay incurred on the State Railways—taking, in the case of the Guaranteed Railways purchased by Government, the amounts expended by the several Companies *plus* the expenditure since incurred on construction—may† be stated at Rx. 203,622,044,† and on open lines at Rx. 191,280,975, *vide*

\* Excludes the outlay on the Bengal and North-Western Railway not guaranteed by the State.

† Sterling figures in the old Companies' accounts were converted at fixed contract rates. The difference between contract and actual average rates cannot be stated.

Outlay as recorded in Finance and Revenue Accounts ( <i>vide</i> para. 13)	Rx.
Add—Difference between outlay included above and actual rupee expenditure on lines purchased from Companies ( <i>vide</i> Schedule A)—	Rx.
East Indian . . . . .	21,049,601
Eastern Bengal . . . . .	1,954,777
Sind, Punjab and Delhi . . . . .	7,172,393
South Indian . . . . .	391,254
	21,093,665
Deduct—Premium on Oudh and Rohilkhand Railway . . . . .	1,174,260
	29,910,560
<b>Total</b> . . . . .	<b>203,622,044</b>

Schedule A, on which amounts the net receipts for 1897-98 give a return at the rate of 4·83 and 5·14 per cent., respectively.

17. Dealing with the matter in yet another way, the return from State Railways including the lines taken over from Companies might be stated as follows. The capital involved in the purchase of the East Indian Railway, the Eastern Bengal Railway, the Sind, Punjab and Delhi Railway, the Oudh and Rohilkhand Railway, and the South Indian Railway is stated partly in sterling and partly in rupees.

From the rupee earnings on these Railways, on other State Railways whose entire capital is stated in rupees, and on the State lines leased to Companies, remittances have to be made yearly to pay the sterling interest upon a sum of £98,486,517, which is the amount of the sterling capital; while rupee interest is paid in India upon Rx. 104,277,346, which is the amount of the rupee capital involved.

The effect as regards dividend to a shareholder is the same as if the sterling sum of £98,486,517 were converted into rupee capital at the rate of exchange for the year and the resulting rupees added to the rupee capital of Rx. 104,277,346 to form the total upon which the shareholder's return is based. Stated in this way the Capital outlay on these lines is equivalent to Rx. 258,223,567, and the net receipts of Rx. 10,152,083 give a return of 3·93 per cent. thereon.

18. The net receipts from the following Railways exceeded the interest charges for the year:—

RAILWAYS.	Net Receipts (less surplus profits and net earnings paid to Companies).	Interest and annuities, etc.	Surplus to State.
IMPERIAL.	Rx.	Rx.	Rx.
East Indian . . . . .	3,931,277	2,641,776	1,290,501
Rajputana-Malwa System . . . . .	981,425	606,981	374,445
Tirhoot . . . . .	181,680	103,980	77,700
Eastern Bengal . . . . .	863,791	691,637	272,154
Palanpur-Deesa . . . . .	1,227	933	294
Warora Colliery . . . . .	15,638	7,579	8,054
Lucknow-Bardilly . . . . .	36,404	36,188	216
South Indian . . . . .	396,543	352,079	44,464
Guntakul-Mysore Frontier . . . . .	26,516	23,808	2,908
PROVINCIAL.			
Mayavaram-Mutapet . . . . .	10,854	9,933	921

19. The net receipts of the North Western Railway fell short of the interest and annuity charges by Rx. 609,562, and were sufficient to give a return of only 3·57 per cent. on the actual Capital outlay. This is due to the unfavourable results on the Frontier section and to the heavy charge for exchange on the sterling payments of interest and annuities.

20. The financial results to the State of the working of the Companies' lines, classed as State Railways, are shown more fully in Schedule I. See paragraph 9.

*Comparison with Actuals during 1896-97 and Budget and Revised Estimates.*

21. The actual gross receipts and working expenses of State Railways for the year 1897-98 compare with the actuals of 1896-97, and with the Budget and Revised Estimates as under:—

	Actuals, 1897-98.	REVISED ESTIMATE.		BUDGET ESTIMATE.		Actuals, 1896-97.
		Estimate.	Actuals, more or less.	Estimate.	Actuals, more or less.	
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Gross receipts	19,044,525	18,995,000	+49,525	18,028,700	+1,020,825	17,639,604
Working expenses (including sur- plus profits, etc.).	9,201,202	9,249,100	—47,898	9,027,300	+173,002	8,819,553
Net receipts	9,843,323	9,695,900	+147,423	8,996,400	+846,923	8,820,051

*Receipts.*

22. *With Actuals of 1896-97.*—The receipts are more than the actuals of the previous year by Rx. 1,404,921, the improvement being due to an increase in traffic chiefly on the East Indian and North Western Railways to the extent of Rx. 433,565 and Rx. 594,911, respectively. The following lines also show increases:—Burma Railways (Rx. 65,014), Assam-Bengal (Rx. 40,106), Bengal and North-Western and Tirhoot (Rx. 60,033), Oudh and Rohilkhand (Rx. 63,185), Indian Midland (Rx. 82,888), and East Coast (Rx. 40,236). There were decreases on the Rajputana-Malwa and Southern Mahratta Railways which went to reduce the total increase in the traffic.

The increase of Rx. 433,565 on the East Indian Railway occurred partly under coaching and partly under goods traffic. Under the former the increases were principally in the pilgrim and Government traffic. The pilgrim traffic developed chiefly during the months, October to December 1897, which were considered auspicious for religious ceremonies, and there were large gatherings of pilgrims at Buxar, Allahabad, Thanagar and the several riverside stations during January 1898 in connection with the solar eclipse and the *Magh mela*. The largest increase, however, occurred in the receipts from Government traffic, due to large despatches of Ordnance and Commissariat stores, and to the running of troop extra and mule trains in connection with the mobilization of troops for the expeditions on the North-West Frontier. The rise in the goods traffic was contributed largely by the traffic in rice, wheat, coal, railway materials carried for foreign lines, and piece-goods. The increase in the rice traffic is explained as due to the upward movements of Burma rice for the famine-stricken districts; the increase in wheat traffic to an improvement in the traffic for local consumption; the increase in the coal traffic to a great demand for export to the coast ports and for use in mills and factories; the increase in the receipts for carriage of railway materials, to the carriage of plant, sleepers and rolling-stock for the Bengal and North-Western, Oudh and Rohilkhand and Eastern Bengal Railways; and that in cotton piece-goods to a large traffic in this commodity to the North-Western Provinces and Oudh and to the Punjab.

The increase on the Burma Railways is attributed to the continued prosperity of Lower Burma—the result of good crops, to the high price of paddy and consequent good trade and to the general development of traffic.

The increase on the Assam-Bengal Railway was due to the development of traffic.

- The increase on the Eastern Bengal State Railway occurred entirely under goods traffic, the receipts from which were Rx. 61,148 more than in the previous year, and was due to a good jute crop in the last quarter of the year, and to the carriage of construction stores for the Hajipur Extension of the Tirhoot State Railway and for the Branch lines connected with the Eastern Bengal State Railway. There was, however, a falling off in receipts from coaching traffic to the extent of Rx. 30,732, which was due in a great measure to the stoppage of traffic owing to damages caused to the line by the earthquake of 1897 and by the famine of the previous year.
- The increase on the Bengal Central Railway is attributed to the development of traffic under all heads of account.
- The increase on the Bengal and North-Western and Tirhoot Railways is attributed to the earnings of the previous year having been affected by the famine, to additional mileage having been opened during the year, and to the development of traffic *via* Burhwal.
- The increase on the Oudh and Rohilkhand Railway occurred chiefly under Sundries, and was due almost entirely to enhanced receipts for hire of stock lent to the East Indian and Eastern Bengal Railways. Some portion of the increase was also due to the military operations on the North-West Frontier.
- The increase on the Indian Midland Railway was due chiefly to the movement of troops in connection with the frontier expeditions; to the traffic in wheat having proved favourable; to an increase in the traffic in rape-seed for export owing to the failure of the crop in Europe; to a large traffic in sugar and jaggaree, and to an increase in the receipts on account of mileage and demurrage of stock and the adjustment of arrears of shunting charges at joint stations.
- The increase on the Lucknow-Bareilly Railway occurred chiefly under goods traffic and was due to a large export traffic in cereals, in oil-seeds and in jaggaree, the result of the favourable rains of 1897 and a good winter harvest. Coaching traffic also improved as the agricultural population made more use of the railway than in 1896.
- The increase of Rx. 594,914 on the North Western Railway was due mainly to the Frontier expedition, and to the revival of the wheat trade after the famine. The increases under coaching and goods were Rx. 226,191 and Rx. 434,064 respectively.
- The increase on the Guntakul-Mysore Frontier Railway occurred chiefly under goods traffic, and was due to the large exports of food-grains from the Mysore State passing over this line.
- The increase on the Mysore State Railway occurred chiefly under goods traffic and was due to large exports of food-grains to the Poona and Bijapur branches and to foreign railways *via* Guntakul and Poona. There was, however, a falling off in the earnings from passenger traffic owing partly to the failure of the Mailur Bridge and the temporary stoppage of communication in consequence, and partly to the plague restrictions.
- The increase on the East Coast Railway is attributed to additional mileage having been opened during the year; to the carriage of materials for the Bengal-Nagpur and Bezwada-Madras Railways, and to increased traffic in Manganese ore from the mines at Garividi exported *via* Vizagapatam.
- The decrease on the Rajputana-Malwa Railway System occurred chiefly under coaching traffic due partly to the stringent measures introduced to restrict the movement of passengers from areas affected by plague, and partly to the period, April to September 1897, having been considered unpropitious for marriages. The goods earnings shewed an increase owing to an improvement in cotton, sugar, and other traffic.

The decrease on the Southern Mahratta Railway occurred chiefly under coaching traffic, and was due to the measures adopted by Government to prevent the spread of the bubonic plague. The goods traffic shewed an increase, the result of a larger movement of food-grains owing to famine and of better traffic in salt, chillies, and other articles of merchandise.

The decrease on the Dhond and Manmad State Railway occurred chiefly under coaching traffic, and is attributed to the prevalence of the plague in the Bombay Presidency which restricted the movement of passengers.

**23. With Budget Estimate.**—The actuals were more than the Budget Estimate by Rx. 1,020,823, the principal increases being on the East Indian and North Western Railways to the extent of Rx. 584,181 and Rx. 482,821, respectively. The more important variations from the Budget Estimate on individual lines are as under:—

The increase of Rx. 584,181 on the East Indian Railway is attributed to the Budget Estimate having been placed at a moderate figure owing to uncertainty as to the prospects of the year in consequence of the plague and the scarcity that prevailed at the time. The famine, however, contributed to an increase of the goods traffic by the movement of imported food-grains to the famine-stricken districts.

The increase on the Burma Railways is attributed to the receipts having been under-estimated in the Budget Estimate as it was anticipated that the receipts were not likely to exceed those of the previous year which was a bumper one. A second year, however, of even greater general prosperity ensued with the result that the railway earnings for the year are the highest on record.

The increase on the Eastern Bengal State Railway was due to the traffic in jute having been very favourable, and to an increase in the receipts from sundry traffic, the causes for which are explained in paragraph 22 above.

The increase on the Bengal Central Railway was due to the causes mentioned in paragraph 22 above.

The increase on the Bengal and North-Western and Tirhoot Railways was due chiefly to an improvement in the receipts from steam-boat traffic. There was a decrease in the goods traffic owing to the estimate having been fixed at too high a figure.

The increase on the Indian Midland Railway is attributed chiefly to the exceptional troop traffic which passed over the line to and from the North-West Frontier, and to large imports of grain into the tract of country affected by famine and scarcity not having been anticipated at the time the Budget Estimate was prepared.

The increase on the Lucknow-Bareilly Railway was due to the development of passenger traffic, to larger exports of grain seeds and jaggaree, the winter harvest having been very good in consequence of the favourable rains of 1897.

The large increase of Rx. 482,821 on the North Western Railway is attributed to the causes mentioned in paragraph 22 above.

The increases on the Mysore State and East Coast Railways were due to the causes mentioned in paragraph 22 above.

The decrease of Rx. 275,530 on the Rajputana-Malwa Railway is made up of decreases under coaching traffic, Rx. 69,586, and goods traffic, Rx. 213,887. When the Budget Estimate was under preparation, it was anticipated that the line would do as well if not better than in the previous year, but owing to famine and plague these expectations were not realised.

The decrease on the Bengal-Nagpur Railway is attributed to there not having been much grain in stock for export during the year, owing to the failure of the rains of 1898, the new crops not having been

available for despatch. The plague also interfered with the development of traffic.

The decrease on the Assam-Bengal Railway was due to traffic on certain portions of the line having had to be suspended owing to damages caused by the earthquake of June 1897. The railway also suffered very considerably as regards its earning power from the effects of the very severe cyclone which visited the Chittagong end of the line at the close of October 1897. Owing to the earthquake and the cyclone, the southern section of the line from Akhaura to Bardapur had to be temporarily closed; the Gauhati section was closed for the remainder of the year, and the Chittagong section was only re-opened throughout for all kinds of traffic from 1st December 1897.

The decrease on the South Indian Railway occurred in both coaching and goods traffic, and is attributed to the prevalence of plague in the Bombay Presidency; to a marked falling off in the pilgrim traffic; to the failure of the paddy crops in the Tanjore District, and of oil-seeds in the Northern Districts having affected local traffic considerably, and to the opening of the Periyar Project having decreased the demand for grain in the Madura District.

The decrease on the Dhond and Manmad State Railway is due to the continuance of plague throughout the year.

The decrease on the Southern Mahratta Railway was due to the causes mentioned in paragraph 22 above.

24. *With Revised Estimate.*—The actual receipts approximate very closely to the Revised Estimate, the result being an increase of only Rx. 49,525. The more important variations on individual lines are explained below:—

The increase on the Rajputana-Malwa Railway was due to an improvement in coaching and goods traffic during the last quarter of the year.

The increase on the Bengal-Nagpur Railway occurred chiefly under goods traffic, and was due to an improvement in that traffic during the closing months of the year.

The increase on the Burma Railways occurred chiefly under goods, and was due to the paddy traffic during the last four months of the year having been very favourable.

The increase on the Eastern Bengal State Railway was due to the passenger traffic having improved towards the close of the year and to a heavy jute traffic during the last quarter of the year.

The increase on the Bengal and North-Western and Tirhoot Railways occurred chiefly under goods traffic, and is attributed to the development of traffic.

The decrease in receipts on the East Indian Railway is attributed to earnings remaining unrealised at the close of the year.

The decrease on the Oudh and Rohilkhand Railway is attributed to the additional precautions which were found necessary in connection with the plague having led to the stoppage for a time of bookings of passengers to Hardwar and adjacent stations; to the agricultural produce, although the harvests were good, not having come on to the line until quite at the close of the year.

The decrease on the North Western Railway is attributed to large outstandings against the Commissariat Department on account of the Frontier expedition.

#### *Working Expenses.*

25. *With Actuals of 1896-97.*—The increase of Rx. 381,649 in working expenses as compared with the actuals of the previous year was due generally to the larger traffic worked. The increase in working expenses is equivalent to about 27 per cent. of the increased earnings—

The large increase of Rx. 104,183 on the East Indian Railway is attributed chiefly to a larger payment on account of the

Company's share of surplus profits due to the improvement in earnings. There were, however, increases under locomotive expenses due to the extra train mileage worked; under traffic expenses due partly to the increased cost of handling goods and of train staff due to the rise in traffic, and partly to the expenditure on the extended system of lighting carriages with Pintsch's gas; and under special and miscellaneous expenditure due principally to large payments to Foreign Railways on account of hire of vehicles, mileage and demurrage of stock and running powers to meet the demands of the abnormal traffic. There were decreases under maintenance due to the work of ballasting and relaying having been retarded by the extra train service, and to the re-ballasting of the Jubbulpore line having been completed in the previous year, and under carriage and wagon expenses due chiefly to credits for wagons transferred to the Moghal Sarai-Gya Extension and the South Behar Railway.

The increase on the Burma Railways was due to heavy repairs to damages caused by floods and to the station buildings at Katha which were burned down having had to be rebuilt; to heavy repairs to locomotive engines and to larger running expenses owing to the increased mileage worked; to increases in the station and train staff owing to the opening of new stations and the extra train mileage worked; to adjustments in connection with the police force employed on the Railway from 1st September 1898 having been carried out in the year under review, and to the payment to the Company for the first time of their share of surplus profits.

The increase on the Assam-Bengal Railway was due to the larger traffic worked.

The increase on the Eastern Bengal State Railway was due to repairs to damages caused by the earthquake; to the replacement of 8 broad-gauge locomotive engines; to the construction of 5 third class carriages and 16 low-sided wagons; to the heavier traffic worked, and to the hire of locomotives from the Oudh and Rohilkhand Railway, and to mileage and demurrage of foreign vehicles owing to the increase in traffic.

The increase on the Bengal and North-Western and Tirhoot Railways was due to the additional train mileage run and the opening of new extensions; to an increase under steam-boat service owing to heavy repairs, and to a larger payment to the Bengal and North-Western Railway Company on account of their share of net earnings.

The increase on the Oudh and Rohilkhand Railway is attributed to the cost of working the Cawnpore-Burhwal metre-gauge connection, a section only of which was opened in the second-half of the previous year, and to the payment during the year under review of heavy liabilities incurred in the previous year.

The increase on the Indian Midland Railway was due to the renewals of rails on the Scindia section and to the payment of grain compensation allowance to gangmen; to the running expenses, having been heavier owing to the increased train mileage worked; to heavier repairs to locomotives, and to an increase in traffic expenses consequent on the grant of grain compensation allowance to the menial staff.

The increase of Rs. 119,549 on the North Western Railway was due chiefly to the additional train mileage run.

The increase on the Mysore State Railway was due to the increased traffic and to a larger payment to the Southern Mahratta Railway on account of the Company's share of net earnings.

The increase on the East Coast Railway was due to the cost of administration, which was in the previous year apportioned between Capital and Revenue, having been charged wholly to Revenue in the year under review and to heavy repairs to engines and vehicles

and the employment of additional establishment consequent on the extra traffic and mileage worked.

The decrease on the Rajputana-Malwa Railway was due chiefly to a smaller payment on account of the Bombay, Baroda and Central India Railway Company's share of surplus profits owing to the result of the year's working having proved less favourable than that of the previous year. There were also decreases under locomotive expenses due to less consumption of fuel and carriage of less coal, and increases under maintenance of way, works and stations due to heavy outlay on relaying, under carriage and wagon expenses due to heavy expenditure on repairs and renewals of vehicles, and under traffic expenses due to the retention of the full strength of staff owing to the uncertain state of traffic and to a rise in the price of castor oil.

The decrease on the Bengal-Nagpur Railway was due to special expenditure in connection with relaying permanent-way on the Katni-Unaia section and with the payment of arrears to the Great Indian Peninsula Railway having been incurred during the previous year.

The decrease on the South Indian Railway was due to  $7\frac{1}{2}$  miles of line only having been renewed during 1897-98 against  $11\frac{1}{2}$  miles during the previous year and to the cheaper rate at which coal was obtained.

The decrease on the Southern Mahratta Railway was due generally to the lines worked by the Company having to bear increased charges proportionate to the increase in their earnings. There was an increase under "Special and Miscellaneous" expenditure owing to the inclusion for the first time of 50 per cent. of the deposits in the Provident Fund during the half-year ended 31st December 1897 as a bonus to the fund as part of the working expenses. The special outlay incurred in the suppression and prevention of the plague at Hubli and other stations on the line, which was debited to the working expenses of the line, also accounts partly for the increase in expenditure under this head.

26. *With Budget Estimate.*—The actual working expenses exceeded the Budget Estimate by Rs. 173,902. The more important variations in line estimates are as under:—

The excess of Rs. 153,204 on the East Indian Railway was due to a larger payment on account of the Company's share of surplus profits and to heavier payments to foreign lines on account of hire of vehicles, &c.

The excess on the Burma Railways was due chiefly to the causes mentioned in paragraph 25 above.

The excess on the Eastern Bengal State Railway was due to repairs to damages caused by the earthquake; to hire of locomotives from other railways, and to mileage and demurrage on wagons.

The excess on the Bengal Central Railway was due to charges for the renewal of sleepers having been higher than was anticipated; to heavier repairs to stock and to the traffic worked having been heavier than was anticipated.

The excess on the Indian Midland Railway is attributed to the increased traffic and to insufficient provision having been made in the Budget Estimate for expenditure on extraordinary renewals.

The excess on the North Western Railway occurred mainly under locomotive expenses, and is attributed to the larger traffic worked. The outlay on maintenance was restricted under the orders of Government during the first part of the year.

The excesses on the Mysore State and East Coast Railways were due to the causes mentioned in paragraph 25 above.

The lapse on the Rajputana-Malwa Railway was due chiefly to the provision made for running expenses, fuel, and unclassified

expenditure under locomotive expenses having been in excess of requirements, and to a smaller payment on account of the Bombay, Baroda and Central India Railway Company's share of surplus profits owing to the net result of the year's working having proved much less satisfactory than was expected at the time the Budget Estimate was prepared.

The lapse on the Bengal-Nagpur Railway is attributed to delay in the receipt of rails from England and to credits for old materials for relaying done late in the preceding year having been accounted for in the year under review.

The lapse on the Assam-Bengal Railway was due to the stoppage of traffic on certain portions of the line as explained in paragraph 23 above.

The lapse on the Bengal and North-Western and Tirhoot Railways was due principally to a smaller payment to the Company on account of their share of net earnings owing to the Company's shares of net earnings for January and February 1898 having been over-estimated, and to the balance of their share for the half-year ended 31st December 1897 not having been paid to the Company until the following year.

The lapse on the Oudh and Rohilkhand Railway was due to short renewals of pot sleepers owing to the failure of the Barrakar Iron Works to supply them, and to the late arrival of girders; to the lighter traffic worked, and to savings on estimates for repairs and renewals of engines.

The lapse on the South Indian Railway was due to the requirements for cross sleepering girders having been over-estimated; to coal having been obtained at a cheaper rate; to engines ordered from England in replacement of condemned ones not having been received owing to the engineers' strike; to a smaller number of Jones' buffers having been fitted to stock, and to the restriction of expenditure ordered by the Government of India.

The lapse on the Southern Mahratta Railway is attributed chiefly to the fall in the traffic and the smaller train mileage worked in consequence.

27. *With Revised Estimate.*—The actual working expenses fell short of the Revised Estimate by Rs. 97,898. The more important variations on individual lines are explained below:—

The lapse on the East Indian Railway occurred chiefly under maintenance and carriage and wagon expenses, and was due to the causes mentioned in paragraph 25 above.

The lapse on the Rajputana-Malwa Railway was due to the requirements under renewals of permanent-way having been over-estimated, to a saving in the provision for running expenses, to reduced consumption of fuel, and to smaller renewals of locomotive engines. There was an excess in the payment made to the Bombay, Baroda and Central India Railway on account of the Company's share of surplus profits, owing to the net result of the year's working having proved better than was anticipated.

The lapse on the Bengal and North-Western and Tirhoot Railways was due chiefly to a smaller payment to the Company on account of their share of net earnings.

The lapse on the Oudh and Rohilkhand Railway is attributed to the lighter traffic worked during the last few weeks of the year, to short renewals of pot sleepers, and to short outlay on renewals of bridges.

The lapse on the North Western Railway was due chiefly to the requirements under maintenance of way, works and stations having been over-estimated.

The excess on the Bengal-Nagpur Railway was due entirely to fluctuations in the suspense accounts.

(ii) *Interest and Annuities.*

28. The charges for interest and annuities on account of State Railways for 1897-98 amounted to Rx. 9,859,014 as under :—

	ENGLAND.		India.	TOTAL.
	Sterling.	Rupees equivalent.		
	£	Rx.	Rx.	Rx.
Interest charged in India on debt incurred for direct outlay by the State . . .	...	...	3,816,784	3,816,784
Interest on debt taken over or incurred in connection with lines transferred from Companies to the State :—				
On debentures since discharged . . .	...	...	174,494	174,494
On debentures, debenture stock, and on India stock issued in redemption of annuities, debentures, and debenture stock and for purchase of undertakings . . . . .	971,045	1,517,880	...	1,517,880
Annuities in purchase of Companies' lines .	1,712,419	2,676,715	...	2,676,715
Interest chargeable against Companies on advances by Secretary of State . . .	218,884	342,142	87,721	429,875
Interest on Capital deposited by Companies . . .	784,779	1,225,704	16,584	1,245,288
<b>TOTAL .</b>	<b>3,687,127</b>	<b>5,763,421</b>	<b>4,095,593</b>	<b>9,859,014</b>

29. Interest is charged in India at 4 per cent. per annum on debt incurred for direct outlay by the State, except on a loan of Rx. 1,000,000 from His Highness the Maharaja Holkar for the Holkar State Railway, which bears interest at 4½ per cent. per annum.

30. The debt taken over or incurred in connection with lines acquired by the State from Companies is on account of the East Indian, Eastern Bengal, Sind, Punjab and Delhi (incorporated in the North Western Railway), Oudh and Rohilkhand and South Indian Railways, and consists of debentures and debenture stocks of the Companies, for which the State assumed the direct liability on the transfer of the lines to Government; of India stock issued in purchase of the Oudh and Rohilkhand and South Indian Railways; and of stock issued from time to time in redemption of portions of annuities or of debentures and debenture stock, which are bought up as opportunity offers.

The debentures discharged up to date are as under :—

	Rx.
East Indian Railway, £2,950,000 or expressed in Rx., converted at the official rates applicable under the contract . . .	3,540,684
Eastern Bengal Railway, £612,350 or expressed in Rx., converted at the average rates for the years in which discharged . .	615,670

and interest is calculated at the rate of 4 per cent. per annum on these sums as in the case of direct outlay by the State.

31. The details of the interest charges and the charge on account of each line are as follows:—

	East Indian.	Eastern Bengal.	Sind, Punjab and Delhi (North Western).	Oudh and Rohilkhand.	South Indian.	TOTAL.
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
On debentures discharged . . . . .	141,867	32,627	...	...	...	174,494
On debentures and debenture stock . . . . .	100,986	21,799	...	24,063	29,895	176,743
On India 3½ per cent. stock issued in redemption of portion of annuity and debenture stock . . . . .	382,442	30,881	249,672	—921	...	642,054
On India 3 per cent. stock issued in redemption of portion of annuity, debenture stock and debentures, and for purchase of undertakings from Railway Companies . . . . .	11,622	33	...	484,501	187,398	683,554
On India 2½ per cent. stock issued in redemption of debentures . . . . .	...	...	...	...	11,915	11,915
On India 4 per cent. rupee debt issued in redemption of portion of annuity . . . . .	...	...	...	...	...	...
Discount Sinking Fund in redemption of debt incurred in excess of money raised . . . . .	...	...	...	3,544	...	3,544
<b>TOTAL</b> . . . . .	<b>616,917</b>	<b>83,320</b>	<b>249,672</b>	<b>511,237</b>	<b>229,208</b>	<b>1,692,954</b>

32. The East Indian, the Eastern Bengal, and the Sind, Punjab and Delhi Railways were purchased by annuities: the East Indian Railway annuity, terminating in 1958, at the rate of £5-12-6 for every £100 stock of the Company; the Eastern Bengal, terminating in 1957, at £6-8-4-79 per £100 stock, and the Sind, Punjab and Delhi, terminating in 1958, at the rate of £5-3-3-141 per £100 stock. In the case of the East Indian Railway a portion of the annuity equivalent to one-fifth of the commuted value of the capital stock, or £6,550,000 has been deferred, and on this sum interest at 4 per cent. is guaranteed. The holders of this portion of the stock participate in the surplus profits.

33. The charges in respect of each line were as follows:—

	East Indian.	Eastern Bengal.	Sind, Punjab and Delhi (North Western).	TOTAL.
	Rx.	Rx.	Rx.	Rx.
Annuity . . . . .	1,327,350	182,621	530,242	2,090,213
Interest in lieu of deferred annuity . . . . .	409,537	...	...	409,537
Sinking Fund . . . . .	103,236	7,697	68,278	174,211
Contribution towards management of Sinking Funds, etc. . . . .	2,148	201	405	2,754
<b>TOTAL</b> . . . . .	<b>1,842,271</b>	<b>190,519</b>	<b>648,925</b>	<b>2,676,715</b>

34. The charges under "Interest on capital deposited by Companies" and "Interest chargeable against Companies on advances" relate to the newer Companies, the lines undertaken by which are classed as State Railways. During later years, the funds required for additional capital works have been provided by advances made to the Companies from funds raised by the Secretary of State under the provisions of Act 51 Vict., Cap. 5. The charges for interest on these advances appear under the heading "Interest chargeable against Companies on advances." It has further been arranged that money

required for *Indian* expenditure on the construction of the extensions of the Bengal-Nagpur Railway and the Saugor-Katni Extension of the Indian Midland Railway shall be advanced in India, the expenditure in England on account of these Railways being met by sterling borrowing. The interest chargeable against the Companies on the rupee advances appears under India under the same heading. The East Indian Railway Company have also been allowed to raise sterling debentures to meet the capital expenditure on the main line and the extensions. The interest on these debentures is accounted for under the head "Interest on capital deposited by Companies."

35. The charges incurred in connection with each line are given in the following table:—

RAILWAYS.	INTEREST CHARGEABLE AGAINST COMPANIES ON ADVANCES.			INTEREST ON CAPITAL DEPOSITED BY COMPANIES.			GRAND TOTAL
	India.	England and Exchange.	TOTAL.	India.	England and Exchange.	TOTAL.	
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.

South Indian	...	...	...	...	46,594	46,594	46,594
Southern Mahratta*	...	108,202	108,202	...	315,246	315,246	423,448
TOTAL	87,781	342,142	429,873	16,584	1,326,704	1,343,288	1,673,161

\* Including Mysore.

36. The charge in India against the Bengal-Nagpur Railway under "Interest chargeable against Companies on advances" includes Rx. 19,415 representing interest on capital expended by Government on the Katni-Umaria State Railway, which was subsequently taken over by the Bengal-Nagpur Railway Company as a part of its undertaking; this expenditure has not been refunded by the Company, but the State ranks as a shareholder to the extent of the capital contributed by it. The amount entered against the Lucknow-Bareilly Railway represents interest on money raised by the Rohilkhand and Kumaon Railway Company for capital expenditure on the Lucknow-Bareilly Railway, and interest on advances made to the Company in excess of the money raised.

## SECTION B.

## GUARANTEED RAILWAYS.

37. This section deals with the transactions of the Great Indian Peninsula, the Bombay, Baroda and Central India, and the Madras Railways. These transactions are (i) Revenue and (ii) the charges incurred by the State (a) in the payment of surplus profits and contributions to Provident Funds; (b) on Land, which, under the several contracts, is supplied free of charge to the Companies; (c) on Government controlling establishments and (d) on interest on capital. The Government controlling establishments also, in some instances, exercise supervision over State lines leased to Companies, and perform certain duties in connection with State Railways, but the entire cost is recorded under this head. Recoveries are made from State lines leased to Companies on account of Government supervision, and the amount of these recoveries is credited to this head.

## I.—REVENUE TRANSACTIONS.

XXVII.—*Net Traffic Receipts.*

38. At the close of the year under review, the open mileage of the Guaranteed Railways was as follows\* :—

	Total length open.	Length laid with two or more tracks.
	Miles.	Miles.
Great Indian Peninsula . . . . .	1,288.00	461.92
Bombay, Baroda and Central India . . . . .	460.00	118.86
Madras . . . . .	839.23	42.41
TOTAL . . . . .	2,587.23	623.19

\* Administration Report on the Railways in India for 1897-98, Part I, Appendix A.

39. The net receipts of the Guaranteed Railways during 1897-98 amounted to Rx. 2,201,392. The transactions of each Railway for the year were as follows :—

	Great Indian Peninsula.	Bombay, Baroda and Central India.	Madras.
	Rx.	Rx.	Rx.
Receipts—			
Administrative . . . . .	2,956,485	1,405,551	1,138,830
Suspense . . . . .	187,441	413,025	179,533
TOTAL . . . . .	3,143,926	1,818,576	1,318,363
Payments—			
Administrative . . . . .	1,378,688	788,833	560,583
Suspense . . . . .	270,849	416,787	178,683
TOTAL . . . . .	2,144,537	1,205,720	729,216
Net Receipts—			
Administrative . . . . .	1,082,797	616,618	588,247
Suspense . . . . .	—83,408	—3,762	906
TOTAL . . . . .	999,389	612,856	589,147
Percentage of working expenses to earnings . . . . .	63.88	56.13	48.34
Average earnings per mile per week . . . . .	44.02	58.49	26.03

40. Taking the Capital expenditure as stated in rupees\* in the Indian Accounts (in which sterling figures have been converted at the fixed contract rate of 1s. 10d. the rupee), the return per cent. on Capital outlay incurred to the end of the year was as under:—

	Capital outlay to 31st March 1898.	Net Receipts, 1897-98.	Percentage on Capital outlay.
	Rx.	Rx.	
Great Indian Peninsula . . . . .	27,997,041	999,389	3.57
Bombay, Baroda and Central India . . . . .	10,644,847	612,856	5.76
Madras . . . . .	12,161,376	589,147	4.84
Ditto Extension . . . . .	6,277		

41. The earnings on the Great Indian Peninsula Railway during the year under review were considerably below those of the previous year due to the fall in 3rd class passenger traffic consequent on the medical examinations and quarantine restrictions necessitated by the prevalence of plague. The decrease would have been greater but for the improvement in Goods traffic owing to the crops being much above the average, the result of a good and seasonable rainfall. Notwithstanding the reduction in earnings the working expenses exceeded those of 1896-97 by Rs. 8,96,577, due to heavy outlay principally in the Carriage and Wagon Department in connection with the replacement of condemned Cammel's axles and repairs and renewals of a larger number of vehicles. This increase was to some extent compensated for by reduced outlay in the Engineering Department.

42. On the Bombay, Baroda and Central India Railway the results were also more unfavourable than in the preceding year. The earnings fell off by Rs. 10,42,273, while the expenses increased by Rs. 7,26,976. Under Coaching traffic there was a decrease of Rs. 13,96,661 which was partially counter-balanced by the improvement under goods earnings during the latter part of the year. The increase in working expenses was due principally to heavy outlay in connection with the renewal of carriage and wagon stock and the replacement of Warren girders.

43. On the Madras Railway the earnings were more than those of 1896-97 by Rs. 3,62,474, due almost entirely to the improvement in Goods traffic in connection with grain and pulse. There was also a slight improvement in the carriage of coal for the public. The working expenses were practically the same as in the preceding year.

*Comparison with Actuals of 1896-97 and the Budget and Revised Estimates.*

44. A statement, attached to this review as Schedule B, compares in detail the transactions of the year with the Revised and Budget Estimates and the Actuals of 1896-97. The following is a summary of the net results:—

RAILWAYS.	NET RECEIPTS.	REVISED ESTIMATE.		BUDGET ESTIMATE.		NET RECEIPTS.
	Actuals, 1897-98.	Estimate.	Actuals, more + or less —.	Estimate.	Actuals, more + or less —.	Actuals, 1896-97.
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Great Indian Peninsula . . . . .	999,389	970,000	+29,389	1,300,000	—306,611	1,279,801
Bombay, Baroda and Central India . . . . .	612,856	620,000	—7,144	800,000	—187,144	805,295
Madras . . . . .	589,147	570,000	+19,147	580,000	+9,147	549,069
TOTAL . . . . .	2,201,392	2,160,000	+41,392	2,680,000	—478,609	2,634,165

45. The decrease in the actuals, as compared with those of 1896-97, has already been explained—*vide* paragraphs 41—43, *ante*. The decrease, as compared with the Budget Estimate, was due mainly to the same causes which led to the difference between the actuals. The difference between the actuals and the Revised Estimate is comparatively small.

## II.—SURPLUS PROFITS, ETC., LAND, SUPERVISION AND INTEREST.

### *Surplus Profits and Contributions to Provident Funds.*

46. Under the contracts with the Guaranteed Railway Companies, a moiety of the excess of net earnings over interest charges for each half-year ending 30th June and 31st December, taken separately, is paid to the Companies; but in calculating the total surplus for division, the Secretary of State is able to place against the net earnings stated in rupees, one rupee only for every 1s. 10d. of guaranteed interest which he has paid. The share falling to the Companies is, therefore, much in excess of a moiety of the real surplus after meeting the sum which the Secretary of State actually pays as interest charges. In any half-year during which the net earnings fall short of the interest charges, the deficiency is borne wholly by Government.

47. A contribution from net earnings is made in aid of the Provident Funds established on the Great Indian Peninsula and Bombay, Baroda and Central India Railways, for the benefit of the Companies' employes, when the net earnings on capital give a return of more than 6 per cent. per annum on the Bombay, Baroda and Central India, and of 3 per cent. half-yearly on the Great Indian Peninsula Railway. A Provident Fund was established during 1891-92 on the Madras Railway, but on a different basis, a contribution equal to one-half of the obligatory subscriptions of the members during the half-year being given as a charge to Working Expenses, and a further contribution being made in half-years in which there are surplus profits, out of such surplus profits, and within certain prescribed limits.

48. The payments to the Companies during the year 1897-98 on account of surplus profits and contributions to Provident Funds were as follows:—

	Surplus profits.	Contributions to Provident Funds.	TOTAL.
	Rx.	Rx.	Rx.
Great Indian Peninsula . . . . .	38	...	38
Bombay, Baroda and Central India . . . . .	100,645	...	100,645
Madras . . . . .	8,597	1,022	9,619
TOTAL . . . . .	109,280	1,022	110,302

### *Land.*

49. The charges for land for Guaranteed Railways during the year were comparatively small. They were as follows:—

	Rx.
Great Indian Peninsula . . . . .	1,154
Bombay, Baroda and Central India . . . . .	1,197
Madras . . . . .	548
TOTAL . . . . .	3,199

### *Supervision.*

50. The charges falling under this head represent the cost of the establishments of the Consulting Engineers and Government Examiners employed on the supervision, audit and control of the transactions of Companies' lines, and

a moiety of the cost of the office of the Director General of Railways. The charges during the year under review were as follows:—

	Control. Rx.	Audit. Rx.
Bombay . . . . .	11,542	11,169
Madras . . . . .	8,890	4,870
Calcutta . . . . .	8,448	4,782
North-Western Provinces and Oudh . . . . .	10,663	5,461
Assam . . . . .	3,671	2,501
Burma . . . . .	4,271	1,529
Director General of Railways, etc. (share of office of—)	15,332	...
	60,712	32,812
<b>TOTAL</b> . . . . .	98,024	
<i>Less—Recoveries from Companies</i> . . . . .	80,312	
<b>NET CHARGE</b> . . . . .	12,712	

51. The contributions for Government supervision, audit and control, recovered from the several Railway Companies which are credited to this head, were as follows:—

	Rx.
East Indian . . . . .	10,000
Rajputana-Malwa . . . . .	14,519
Bengal and North-Western and Tirhoot . . . . .	4,886
Bengal Nagpur . . . . .	9,659
Bengal Central . . . . .	1,000
Indian Midland . . . . .	6,305
Southern Mahratta (including Mysore) . . . . .	10,704
Rohilkhand-Kumaon (including Lucknow-Bareilly) . . . . .	1,140
South Indian . . . . .	8,545
Assam-Bengal . . . . .	6,467
Burma . . . . .	2,957
<b>Total</b> . . . . .	80,312

52. The contribution payable from the East Indian Railway revenues has been fixed under the contract at Rs. 50,000 half-yearly. The contributions by the Bengal and North-Western and Rohilkhand-Kumaon Railway Companies are calculated at the rate of Rs. 20 per mile half-yearly, while those of other Railway Companies are calculated at the rate of Rs. 40 per half-year per mile of line constructed or under construction.

53. No contribution is made by the old Guaranteed Railways towards the cost of Government audit and control.

#### Interest.

54. The charges for Interest during the year 1897-98 were as under:—

	On Capital held in England.		On Capital held in India.	On overdrawals on Capital Account.	TOTAL
	Amount. £	Equivalent. Rx.	Rx.	Rx.	Rx.
Great Indian Peninsula . . . . .	1,190,101	1,860,270	1,431	596	1,862,296
Bombay, Baroda and Central India . . . . .	433,271	677,254	114	4,240	681,608
Madras . . . . .	531,462	830,661	...	4,519	833,180
<b>Total</b> . . . . .	2,154,784	3,368,185	1,545	7,354	3,377,084

55. The foregoing figures represent the interest paid during the year, and not the liability for interest for the year 1897-98. Additional capital to the extent of £200,000 was raised by the Madras Railway Company during the year under review, viz., £100,000 in September and £100,000 in November 1897, and consequently the liability for interest for the year 1897-98 would be higher than the actual payments. The interest on overdrawn capital represents interest charged by Government on advances to the three lines on Capital account. The rate which was formerly  $4\frac{1}{2}$  per cent. per annum has been reduced to  $3\frac{1}{2}$  per cent. from May 1897.

*Comparison with Actuals of 1896-97 and The Budget and Revised Estimates.*

56. In the statement attached to this review as Schedule O, a comparison in detail will be found of the actual charges for Surplus Profits, etc., Land and Supervision, and Interest, with the Revised and Budget Estimates and with the Actuals of 1896-97, of which the following is a summary :—

	Actuals, 1897-98.	REVISED ESTIMATE.		BUDGET ESTIMATE.		Actuals, 1896-97.
		Estimate.	Actuals, more + or less —.	Estimate.	Actuals, more + or less —.	
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Surplus profits, etc.	110,808	117,200	—6,898	157,600	—47,298	447,802
Land and Supervi- sion . . .	15,911	28,600	—12,689	145,400	—129,489	28,083
Interest . . .	3,377,084	3,370,800	+ 6,784	3,608,400	—231,316	3,597,232
TOTAL . . .	3,503,297	3,516,100	—12,803	3,911,400	—408,103	4,072,617

The decrease in payments on account of surplus profits, etc., as compared with the actuals of the previous year, is due chiefly to no surplus having been earned by the Great Indian Peninsula Railway during the half-year ended 30th June 1897, and to the share of profits paid to the Bombay, Baroda and Central India Railway Company being less owing to the fall in traffic. Contrasted with the Budget Estimate the decrease is due to the Bombay, Baroda and Central India Railway having earned no surplus in the second-half of 1897. The decrease, as compared with the Revised Estimate, is due to no payments having been made to the Bombay, Baroda and Central India Railway for contribution to the Provident Fund, owing to the accounts for the second-half of 1897 having been closed late in the year.

The decrease in Land and Supervision, as compared with the actuals of the previous year, occurred chiefly in Bengal, North-Western Provinces and Madras. The reduction in Bengal is due to the formation of a separate Consulting Engineer's Office in Rangoon, that in the North-Western Provinces is due to changes in the *personnel* of the staff, and that in the Madras Presidency is attributed principally to the greater part of the land required for the "Salt Cottaur Junction arrangements" having been paid for in 1896-97. The lapse on the Budget and Revised Estimates is due principally to the provision made for the land required for the Calicut-Cannanore Branch of the Madras Railway, not being utilized in full owing to the commencement of construction operations having been delayed by the question of gauge being still unsettled.

The decrease in the interest charges as compared with the Actuals of 1896-97 and the Budget Estimate was due to the more favourable rate of exchange.

*Effect on State Revenue.*

57. The following table shows the direct results to the State of the working of the Guaranteed Railways for the year :—

	Net Traffic Receipts.	CHARGES.				Gain or loss (+ or —).
		Interest.	Surplus Profits.	Contribution to Provident Funds.	Total.	
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Great Indian Peninsula . . .	999,889	1,862,298	88	...	1,862,386	—862,945
Bombay, Baroda and Central India . . .	612,356	681,606	100,645	...	782,253	—169,397
Madras . . .	589,147	633,180	8,597	1,022	842,799	—253,652
TOTAL . . .	2,201,392	3,377,084	109,230	1,022	3,487,386	—1,285,994

58. In addition to the above, the cost of land provided at the expense of the State and a proportionate share of the cost of the Government controlling establishments have to be taken into consideration, in order to arrive at the real financial results to the State of its connection with Guaranteed Railways. The above table, however, shows prominently the effects of the provision in the contracts under which surplus profits are declared half-yearly, and the sterling interest is converted for the purpose of this division at the fixed contract rate of 1s. 10d. (*vide* paragraph 46). Thus the Bombay, Baroda and Central India Railway Company received as surplus profits during the year the sum of Rx. 100,645 as surplus profits, while Government, although nominally entitled to share equally with the Company, sustained a loss of Rx. 169,397. The Madras Railway received surplus profits of Rx. 2,527, while the loss to Government amounted to Rx. 253,652.

59. In the following statement the results to the State of the working of these railways for the last five years are exhibited :—

GAIN OR LOSS (+ OR -).

RAILWAYS.	1893-94.	1894-95.	1895-96.	1896-97.	1897-98.
	Rx.	Rx.	Rx.	Rx.	Rx.
Great Indian Peninsula . . . . .	-413,409	-1,022,715	-732,933	-937,757	-862,945
Bombay, Baroda and Central India . . . . .	+22,986	-12,010	+57,038	-135,975	-169,397
Madras . . . . .	-349,513	-462,413	-257,099	-336,638	-253,652
<b>TOTAL</b> . . . . .	<b>-744,934</b>	<b>-1,504,138</b>	<b>-1,082,944</b>	<b>-1,410,370</b>	<b>-1,285,994</b>

Notwithstanding the serious falling off in Earnings, the loss to the State was less than in 1896-97 owing to reduced charges for surplus profits and interest.

60. The following statement shows the total amount paid on account of guaranteed interest to each of the Guaranteed Railway Companies still in existence on 31st March 1898, the net Revenue of the several lines to the 31st of December 1897, appropriated towards the repayment of that amount and the balance. For the purposes of this statement, the net revenue and the guaranteed interest paid in India are converted at the contract rates of exchange. The amounts shown as guaranteed interest paid in England represent true sterling :—

RAILWAYS.	GUARANTEED INTEREST ADVANCED TO 31st MARCH 1898.			Aggregate of net revenue balances for the several half-years to 31st December 1897, inclusive—less moiety of surplus profits repaid to Companies.	Net amount advanced.
	In England.	In India.	TOTAL.		
	£	£	£	£	£
Great Indian Peninsula . . . . .	39,456,231	481,030	39,937,261	26,192,305	3,735,006
Bombay, Baroda and Central India . . . . .	13,825,795	101,837	13,927,632	13,082,159	845,478
Madras . . . . .	18,678,816	5,295	18,679,413	10,374,219	8,305,194
<b>TOTAL</b> . . . . .	<b>71,955,894</b>	<b>588,462</b>	<b>72,544,356</b>	<b>59,655,683</b>	<b>12,885,673</b>

## SECTION C.

## SUBSIDIZED COMPANIES.

(Major heads XXVIII and 40.)

61. The transactions in connection with subsidized railways which appear in the Government accounts under the heading Subsidized Companies represent—

Under *Revenue*, Head XXVIII.—Repayments of advances of interest.

Under *Expenditure*, Head 40.—Cost of land supplied free, subsidies paid and advances of interest.

(i) *Repayments of Advances of Interest.*

62. The amounts credited as Revenue under this head comprise repayments of advances of interest by the Rohilkhund-Kumaon Railway Company and by the Mysore Durbar on account of the Mysore Railway.

63. In the case of the Rohilkhund-Kumaon Railway, the State advanced interest at the rate of 4 per cent. per annum on the Company's share capital while the line was under construction. In consideration of this payment the State is entitled, under the terms of the contract, to a moiety of any surplus earnings, after meeting working expenses, interest on borrowed capital, if any, and a sum sufficient to pay a dividend at the rate of 5 per cent. per annum on the Company's share capital, until such time as the interest advanced by the Secretary of State, together with interest thereon at the rate of 4 per cent. per annum, shall have been repaid. The following is a summary of the advances and repayments of interest:—

YEAR.	Advances.	REPAYMENTS.	
		England.	India.
	Rs.	Rs.	Rs.
1882-83	438	...	...
1883-84	4,667	...	...
1884-85	7,980*	...	...
1885-86	...	...	119
1886-87	...	...	82
1888-89	...	91	...
1890-91	...	975	...
1891-92	...	1,427	...
1897-98	...	1,978	...
TOTAL	13,085	4,472	151

64. The payment by the Mysore Durbar on account of the Mysore State Railway represents the net charge for interest paid by Government to the Southern Mahratta Railway Company in connection with the Mysore Railway. The Secretary of State, acting on behalf of the Mysore State, has guaranteed the interest on the capital raised by the Southern Mahratta Railway Company for the construction of the Mysore Railway, and the Durbar makes good the excess of interest over net revenue, and will receive any excess of net revenue over interest charges. The receipts and working expenses and interest charges of the Mysore Railway are recorded in the Government accounts under their respective Railway heads, and the recovery from the Mysore Durbar of the net

\* Interest (2295) realised from investment of funds deposited by the Company for a fixed period has been taken in reduction of advances.

amount of interest only (i.e., interest on capital expended minus net receipts) is credited under this head.

65. The amount recovered from the Mysore Durbar during 1897-98 was Rs. 12,990 arrived at as under :—

	Rx.
Interest on capital . . . . .	75,080
Less—Charge borne by Government for interest on the unexpended balance of the capital retained in their hands . . . . .	5,405
Net receipts . . . . .	69,675
Remainder . . . . .	69,675
Net charges for interest recovered from the Mysore Durbar . . . . .	12,990
Compared with, for 1896-97 . . . . .	24,052
"    "    1895-96 . . . . .	25,252
"    "    1894-95 . . . . .	41,694
"    "    1893-94 . . . . .	34,054
"    "    1892-93 . . . . .	17,883

(ii) *Land, Subsidies and Advances of Interest.*

66. The charges for land, subsidies and advances of interest are borne partly by Imperial and partly by Provincial revenues. The items falling on the Imperial Government are charges for land, provided free of cost under the terms of the contracts, in connection with the railways mentioned in the following paragraph.

67. The charges debited to Imperial Funds during 1897-98 were :—

	(Land charges)	Rx.
Brahmaputra-Sultanpur Railway . . . . .		2,482
Mymensing-Jamalpur Railway . . . . .		5,815
South Behar Railway . . . . .		27,362
Segowlie-Bakaul Railway . . . . .		4,158
Bengal and North-Western Railway . . . . .		58,730
Southern Punjab Railway . . . . .		1,956
Nilgiri Railway . . . . .		1,037
Ahmedabad-Parantij Railway . . . . .		10
Barsi-Pandharpur-Sangola Railway . . . . .		752
Tapti Valley Railway . . . . .		1,275
TOTAL . . . . .		103,577

68. The charges borne by the Provincial Governments are :—

*Assam.*—An annual subsidy, payable to the Assam Railways and Trading Company, Limited, on account of the Dibru-Sadiya Railway, of such amount—subject to a maximum of Rs. 1,00,000—as, together with net earnings of the Railway, shall be sufficient to yield a return of 5 per cent. per annum on Capital outlay; and a share of the pay and allowances of the Examiner of Public Works Accounts, Assam. This subsidy will cease to be payable after 30th June 1905.

*Bengal.*—Charges for land which has, under the terms of the contracts, to be provided free of cost to the Tarkessur, Dooars, and Deoghur Railways.

69. The amount debited against Provincial revenues during 1897-98 was—

	Rx.
Dibru-Sadiya Railway (Subsidy and audit) . . . . .	10,183

70. The total charges in connection with each line to the close of 1897-98 will be found in the statement attached to this note as Schedule D.

*Comparison with Actuals of 1896-97 and the Budget and Revised Estimates.*

71. The actual receipts during the year under head XXVIII compare with the actuals of 1896-97 and the Budget and Revised Estimates as under:—

	Actuals, 1897-98.	REVISED ESTIMATE.		BUDGET ESTIMATE.		Actuals, 1896-97.
		Estimate.	Actuals, more or less.	Estimate.	Actuals, more or less.	
XXVIII.—SUBSIDIZED COMPANIES.	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Rohilkhand-Kumaon . . . . .	1,979	2,000	—21	...	+1,919	..
Mysore . . . . .	12,990	10,800	+2,690	28,700	—15,710	24,052
<b>TOTAL</b> . . . . .	<b>14,969</b>	<b>12,800</b>	<b>+2,669</b>	<b>28,700</b>	<b>—13,731</b>	<b>24,052</b>

72. No provision was made in the Budget Estimate on account of the Government share of surplus earnings of the Rohilkhand-Kumaon Railway for the year 1896 owing to there having been unsettled questions which affected the amount of that share. In the Revised Estimate, however, provision was made for the amount payable by the Rohilkhand-Kumaon Railway Company in settlement of the Government share of the surplus profits of that railway to end of the year 1895 in reduction of the Company's debt for advances of interest.

The difference between the actuals and the Budget Estimate of the repayment by the Mysore Durbar was due chiefly to the net receipts of the Mysore Railway being more favourable than was anticipated.

73. The actual expenditure during the year under head "40" compares with the actuals of 1896-97 and the Budget and Revised Estimates as under:—

	Actuals, 1897-98.	REVISED ESTIMATE.		BUDGET ESTIMATE.		Actuals, 1896-97.
		Estimate.	Actuals, more or less.	Estimate.	Actuals, more or less.	
40.—SUBSIDIZED COMPANIES—	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Imperial . . . . .	102,577	100,600	+2,977	226,100	—123,523	74,957
Provincial . . . . .	10,183	10,200	—17	10,100	+83	10,063
<b>TOTAL</b> . . . . .	<b>112,760</b>	<b>110,800</b>	<b>+2,960</b>	<b>236,200</b>	<b>—122,440</b>	<b>85,020</b>

74. The increase as compared with the actuals of the previous year was due chiefly to larger payments on account of land acquired for the extensions of the Bengal and North-Western Railway and for new branch lines which were undertaken towards the close of the previous year or during the course of the year 1897-98.

75. The principal variations under *Imperial* as compared with the actuals of the previous year and with the Budget and Revised Estimates occurred on the following lines:—

*Mymensing-Jamalpur and Brahmaputra-Saltanpur Railways.*—The *excess* as compared with the Budget Estimate was due to delay in settling claims for compensation and other difficulties experienced by the land acquisition officers.

*South Behar Railway.*—The increase as compared with actuals of previous year was due to compensation for land actually taken up during 1896-97 having been paid during 1897-98, owing to disputes. The *excess* as compared with the Budget Estimate was due to higher rates than were anticipated having been awarded as compensation for land acquired.

*Sepoah-Ratsaul Railway.*—The *excess* as compared with the Budget Estimate was due to land which it was expected would be taken up in the previous year having been acquired and paid for during the year under review.

*Bengal and North-Western Railway.*—The increase as compared with the actuals of the previous year was due to large payments having been made during 1897-98 on account of land acquired for the Ganges-Gogra-Doab lines. The lapse as compared with the Budget Estimate was due to no outlay having been incurred in the Azamgarh district and to smaller outlay in the Benares district. The excess as compared with the Revised Estimate was due to larger outlay than anticipated in the Azamgarh, Ballia and Ghazipur districts.

*Hardwar-Dehra Railway.*—The funds provided to meet the cost of land to be taken up for this Railway were not utilised during the year.

*Barri-Pandharpur-Sangola Railway.*—A sum of Rs. 13,000 was allotted during the course of the year under the head "41.—Miscellaneous Railway Expenditure" to meet outlay on land to be acquired for this Railway. Towards the close of the year, however, the construction of the line was taken up by the Barri Light Railway Company when the grant under head 41 was withdrawn and an allotment of Rs. 10,000 made under this head. The expenditure incurred amounted to Rs. 252.

*Tapi Valley Railway.*—The lapse as compared with the Budget Estimate is attributed to the alignment for the line having been changed. The lapse as compared with the Revised Estimate is said to be the result of famine and plague, which had a depressing influence on operations of all kinds in the Bombay Presidency.

## SECTION D.

## 41.—MISCELLANEOUS RAILWAY EXPENDITURE.

## 76. Expenditure recorded under this head covers:—

- (a) Outlay on surveys.
- (b) Surplus establishment and miscellaneous charges.
- (c) Establishment of the Director of Railway Construction (share of).
- (d) Port Store-keepers' establishment.
- (e) Abt material and engine suspense account.
- (f) Land charges in connection with Native States Railways.
- (g) Watch and ward charges in connection with the Frontier Railway Reserve material.

During the year under review the expenditure incurred in taking up land for the Moiktila-Myingyan, Sakri-Jainagar and Bettiah-Bagaha Railways undertaken for famine relief purposes was also charged to this head.

77. At the commencement of the year 1897-98 the following surveys were in hand:—

*Imperial.*

Ranaghat-Bhagwanpola-Raiganj.  
Singha-Madaripur-Chandpur.  
Sakri-Jainagar and Bairagnia-Bagaha.  
Sukkur-Shikarpur.  
Ludhiana-Dhuri-Jakhali.

*Provincial.*

Barai-Pandharpur-Sangola.

78. During the year the following amounts were recovered from the Companies, etc., noted below, and were credited to this head:—

	Rs.
From the Kashmir Darbar on account of expenditure incurred on the Kashmir Railway Survey	1,674
From the Bengal-Nagpur Railway Company on account of expenditure incurred on the Mahanadi Bridge	2,890
From the Bengal-Nagpur Railway Company on account of expenditure incurred on the Cuttack-Midnapur-Calcutta Railway Survey	18,208
From the East Indian Railway Company on account of expenditure incurred on the Benares-Puri Survey	8,295
From the East Indian and Bengal-Nagpur Railway Companies on account of expenditure incurred on the Moghal Serai-Howrah Railway Survey	7,808
From the sale of engines, etc., from the Abt material and engine suspense account	11,782
From the Madras Railway Company on account of expenditure incurred on the Cannanore-Calicut Survey	3,090
<b>TOTAL</b>	<b>55,248</b>

The recoveries from Companies, detailed above, were on account of outlay incurred by Government on surveys which, on construction being undertaken by a Company, is brought on to the capital account of the line concerned. The credit against the Abt material and engine suspense account represents the gross value of engines, etc., sold to the North Western Railway. The depreciation in cost has, under the orders of Government, been debited to miscellaneous charges.

79. During the year the undermentioned surveys were undertaken by the Imperial Government:—

**Satpara Railway Survey.**—A survey for a line on a 2-foot gauge from Gondia, on the Bengal-Nagpur Railway, to Jabulpore, with branches to Mandla on the east, and to Seoni and Chindwara on the west, a total length of about 220 miles at an estimated cost of Rs. 65,751.

**Kaunia-Dhubri-Gauhati Survey.**—A survey for a line of railway on the metre gauge from Dhubri to Gauhati in extension of a proposed branch from Mogalhat on the Kaunia-Dharidra branch to Dhubri on the Brahmaputra. This would form part of the main route from the North-Western Provinces and Behar to Assam. Estimated cost Rs. 58,050.

*Midnapur-Jherriah and Ranchi Plateau Surveys.*—A location survey for a standard gauge railway from near Midnapur, through Bankura, Khorbuna and Adra to the Jherriah coal-fields and from Khorbuna to Chatatand, a distance in all of 167 miles; and a detailed survey for a standard gauge line from Chatatand on the Adra-Jherriah alignment, to some point on the proposed Palamow-Sini line, a length of 115 miles, and a reconnaissance for a 2-foot gauge line from Sori to Arangi *via* Lohardagga with a branch to Manchi, a distance of 80 miles. Estimated cost Rs. 1,24,750.

*Baran-Daltonganj Survey.*—A survey for a line, 82½ miles in length, from Baran on the Moghal Sarai-Gya extension of the East Indian Railway which is now under construction, *via* the east bank of the Soane River to Daltonganj at an estimated cost of Rs. 40,900.

*Kissenganj-Kotchandpur-Magura Survey.*—A survey for a branch on a 2' 6" gauge from Shainibash (Kissenganj Bazar), *via* Kotchandpur to Magura, a distance of 61½ miles, at an estimated cost of Rs. 6,342.

*Nowshera-Dargui Survey.*—A survey of a 2-foot gauge railway from Nowshera to Dargui, a distance of about 42 miles, at an estimated cost of Rs. 17,402.

*Rewari-Kuchaman Survey.*—A survey of a chord line to the Rajputana-Malwa Railway from Rewari to Phulera with a branch to Kuchaman Road, which is the junction between the Jodhpore Railway and the Sambhar branch of the Rajputana-Malwa Railway. Estimated cost Rs. 38,259.

*Shoranur-Cochin Survey.*—A survey for the final location of a railway from Shoranur to Cochin, a distance of about 73 miles, at an estimated cost of Rs. 20,206.

*Vizianagram-Raipur Survey.*—An investigation of the country between Raipur, on the Bengal-Nagpur Railway, and Vizianagram, on the East Coast State Railway, had been carried out to a certain extent during the years 1883–85, but the project remained in abeyance until this year, when arrangements were made for a further examination of the alignment. The distance from Raipur to Vizianagram is 30½ miles, the estimated cost of the further survey being Rs. 1,20,745.

*Bombay-Sind Connection Survey.*—A survey of a line of railway on the standard gauge between Moghal Bhin in Sind and Bhuj in Cutch, crossing the Khori creek at Lakhpur in Cutch, a distance approximately of 130 miles, at an estimated cost of Rs. 60,639.

80. A sum of Rs. 249 was expended during the year on the Barsi-Fandharpur-Sangola Survey by the Bombay Government from Provincial funds towards the close of the previous year. The work undertaken during the year under review comprised the extension of the projected line from Barsi to Latur. Expenditure to the extent of Rs. 505 was incurred from Provincial funds, Burma, on surveying a line of railway from Meiktila to Myingyan.

81. The net total expenditure incurred during the year 1897-98 amounted to Rs. 16,229 as under:—

	Rx.
Imperial . . . . .	15,475
Provincial . . . . .	754
	<hr/>
	16,229

The Imperial outlay includes the following:—

	Rx.
Outlay on surveys . . . . .	35,932
Surplus establishment and miscellaneous charges . . . . .	8,504
Establishment of the Director General of Railways (share of) . . . . .	15,832
Port Store-keepers' Establishment . . . . .	2,080
Land charges in connection with Native States Railways . . . . .	497
Watch and ward charges in connection with the Frontier Railway Reserve material . . . . .	619
Land for railways undertaken for famine relief purposes . . . . .	7,495
Alt material and engine suspense account . . . . .	—11,782
Recoveries from Companies, etc., on account of outlay incurred by Government on Surveys . . . . .	—43,461
<b>Total</b> . . . . .	<hr/> 15,475 <hr/>

82. Details of the outlay on surveys will be found in the statement attached to this review as Schedule E.

83. The items debited during 1897-98 under "Surplus Establishment and Miscellaneous charges" were—

	Rx.
<b>Surplus Establishment—</b>	
Leave allowances (other than privilege leave) of pensionable employees of the Rajputana-Malwa Railway . . . . .	829
Other Leave Allowances . . . . .	2,421
Salaries and travelling allowances . . . . .	1,167
<b>Miscellaneous Charges—</b>	
Bonus to Provident Institution for officers and clerks in Railway offices, 50 per cent. bonus on deposits . . . . .	288
Rent of land at Howrah . . . . .	73
Cost of addition of another compartment to His Excellency the Commander-in-Chief's Saloon No. 50 . . . . .	806
Difference in value of 2 Abt engines of the North Western Railway . . . . .	3,582
Other items . . . . .	185
<b>TOTAL</b>	<b>8,804</b>

84. The amount debited to this head on account of the establishment of the Director General of Railways represents half the fixed monthly charge of Rs. 21,000 debited by the Civil Department, under the authority of Public Works Department Resolution No. 6125, dated 9th November 1888, and half the actual salary and travelling allowances of the Consulting Engineer to the Government of India for State Railways. The other moiety of these charges is debited to the Major head "39.—Guaranteed Companies—Land and Supervision."

85. The amount shown under Port Store-keeper's Establishment represents—

	Rx.
(1) The cost of the Port Store-keeper's Office at Calcutta . . . . .	1,908
(2) Establishment entertained by the Marine Store-keeper, Bombay, in connection with the local purchase of stores for State Railways . . . . .	131
<b>TOTAL</b>	<b>2,039</b>

*Comparison with Actuals of 1896-97 and the Budget and Revised Estimates.*

86. The actual outlay during the year under "41.—Miscellaneous Railway Expenditure" compares with the actuals of 1896-97 and with the Budget and Revised Estimates as under :—

HEAD OF ACCOUNT.	Actuals, 1897-98.	REVISED ESTIMATE.		BUDGET ESTIMATE.		Actuals, 1896-97.
		Estimate.	Actuals, more or less.	Estimate.	Actuals, more or less.	
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
41.—Imperial	15,475	22,800	—7,325	60,000	—44,525	68,890
41.—Provincial	754	800	—46	...	+754	211
<b>TOTAL</b>	<b>16,229</b>	<b>23,600</b>	<b>—7,371</b>	<b>60,000</b>	<b>—43,771</b>	<b>68,901</b>

87. The lapse under *Imperial* as compared with the Budget Estimate was due to the recoveries from Companies detailed in paragraph 78 above; these were not fully allowed for in the Budget Estimate.

## SECTION E.

## STATE RAILWAYS—CONSTRUCTION EXPENDITURE.

Major heads 34, 37, 48 and 51.

88. At the beginning of the year under review the following railways or sections were under construction :—

	Miles.	Miles.
<i>By State Agency—</i>		
<b>North Western Railway—</b>		
Lyallpur to Khanewal . . . . .	103	
Roumia to Basal (new Pind-Sultan) . . . . .	35	
Laugar to Mari . . . . .	55	
Kotri to Hyderabad (Sind) . . . . .	54	
	—	190½
Rae Bareilly to Benares Cantonment . . . . .		138½
<b>Eastern Bengal Railway—</b>		
Belgaolia to the Ganges . . . . .	2½	
Panchooria to the Ganges . . . . .	5½	
Panchooria to Faridpur . . . . .	14½	
Bhyda Junction to Borat . . . . .	9½	
	—	25½
<b>Bezwada-Madras Railway (Ennur-Bezwada section)—</b>		
Ennur to Gudur . . . . .	74½	
Nellore to Tadepalli . . . . .	155½	
	—	230½
Cawnpore-Burhwal (metre-gauge link) . . . . .		45
<i>By the Agency of Companies—</i>		
<b>East Indian Railway extension (Moghal Sarai-Gya) . . . . .</b>		126½
<b>Tirhoot Railway extensions—</b>		
Hajepore to Begamearai . . . . .	41½	
Garhara to Katihar . . . . .	110½	
	—	161
<b>Bengal and North-Western Railway extensions . . . . .</b>		270½*

89. During the course of the year, construction was commenced on the following new lines and extensions :—

	Miles.	Miles.
<b>East Indian Railway—</b>		
Hathras Road to Hathras City . . . . .		5½
<b>East Coast Railway—</b>		
Rajmundry to Kovur . . . . .	4½	
Temporary Puri Station to new Puri Station . . . . .	1½	
	—	6½
<b>Bengal and North-Western Railway, Company's Section—</b>		
<b>Ganges-Gogra-Doab lines—</b>		
Azamgarh to Shahganj . . . . .		33*
<b>Eastern Bengal Railway—</b>		
Teesta Bridge at Kaunia and approaches . . . . .	4½	
Alipur to Jhainti (Cooch Behar-Santrabari extension— British section) . . . . .	20	
	—	24½
<b>Shadipalli-Balotra Railway (British section)—</b>		
Hyderabad (Sind) to Jodhpore frontier . . . . .		71½

90. In the Budget Estimate a sum of Rs 5,845,900 was provided for Capital expenditure on State Railways as under :—

	Rs.
34.—Construction of Protective Railways . . . . .	...
37.—Construction of Railways (charged against Revenue in addition to that under Famine Insurance) . . . . .	7,500
48.—State Railways—Construction . . . . .	5,838,500
<b>Total . . . . .</b>	<b>5,845,900</b>

\* The expenditure on these extensions is met from Company's Capital.

and this sum was distributed for expenditure as follows :—

	Rx.
For outlay in England (treated as final charges in the Home accounts) . . . . .	1,373,000
For outlay in India . . . . .	4,056,400
„ Exchange . . . . .	711,600
<b>TOTAL</b> . . . . .	<b>5,845,900</b>

91. The allotments to lines were as below :—

	Rx.
<i>By State Agency—</i>	
* Shadipalli-Balotra . . . . .	90,000
* Agra-Muttra-Delhi Chord . . . . .	275,200
Godavari Bridge . . . . .	185,000
East Coast, including Bezwada extension . . . . .	65,000

	<b>861,400</b>
<b>GRAND TOTAL</b> . . . . .	<b>5,845,900</b>

92. During the course of the year, however, it was found necessary to restrict expenditure on the construction of railways to the extent of Rx. 1,000,000 owing to the depletion of the cash balances, which was consequent on the prevalence of famine. Owing to the disturbance of working arrangements while the engineering strikes in England affected very materially the expenditure in that country on stores, the consequence was that a large lapse had to be

\* These amounts were held in reserve with the Government of India against the provision in the forecast pending sanction to the construction of the lines.

provided for, and the Revised Estimate was therefore prepared for Rx. 3,908,100 or Rx. 1,937,800 less than the provision made in the Budget Estimate.

The raising of debentures to the extent of £297,750 by the Assam-Bengal Railway Company during the course of the year under review instead of in the previous year as originally anticipated caused a further disturbance in the programme of expenditure.

93. The amount of the Revised Estimate, viz., Rx. 3,908,100, was provided as follows:—

	Rx.
34.—Construction of Protective Railways . . . . .	...
37.—Construction of Railways (charged against Revenue in addition to that under Famine Insurance) . . . . .	4,700
43.—State Railways—Construction . . . . .	3,903,400
<b>TOTAL</b>	<b>3,908,100</b>

and was distributed for expenditure as under:—

	Rx.
For outlay in England . . . . .	827,700
" " India . . . . .	2,616,900
" Exchange . . . . .	403,500
<b>TOTAL</b>	<b>3,908,100</b>

94. The actual outlay amounted to Rx. 3,635,797 as under:—

	Rx.
In England . . . . .	809,010
" India . . . . .	2,371,217
Exchange . . . . .	455,570
<b>TOTAL</b>	<b>3,635,797</b>

resulting in a lapse of Rx. 2,210,103 on the Budget Estimate, and a lapse of Rx. 272,303 on the Revised Estimate of the year. Compared with the Revised Estimate, the Actuals in India and in England are as follows:—

	Revised Estimate.	Actuals.	ACTUALS.	
			Mora.	Less.
	Rx.	Rx.	Rx.	Rx.
England . . . . .	827,700	809,010	...	18,690
India . . . . .	2,616,900	2,371,217	...	245,683
Exchange . . . . .	403,500	455,570	...	7,930
<b>TOTAL</b>	<b>3,908,100</b>	<b>3,635,797</b>	<b>...</b>	<b>272,303</b>

95. The distribution of the outlay of the year by finance heads is as under:—

	Rx.
34.—Construction of Protective Railways . . . . .	...
37.—Construction of Railways (charged against Revenue in addition to that under Famine Insurance) . . . . .	3,792
43.—State Railways—Construction . . . . .	3,632,005
<b>TOTAL</b>	<b>3,635,797</b>

96. No expenditure was incurred during the year in connection with the redemption of liabilities.

*Comparison with the Budget and Revised Estimates.\**

97. In the statement attached to this review as Schedule F will be found full details of the expenditure of the year compared with the Budget and Revised Estimates, and showing the details of classification by Fund heads. The following is a general abstract:—

\* Includes Frontier Railway Reserve material.  
(a) Includes provision for Indus Bridge.

## BUDGET ESTIMATE.

98. The more important variations from the Budget Estimate are explained below :—

*State Agency.*

*Open lines.*—The actuals fell short of the Budget Estimate by Rx. 152,299, the principal variations being as follows :—

- A lapse on the Warora Colliery due chiefly to the value of machinery sold to the East Indian Railway during 1896-97 having been realised during the year under review.
- A lapse on the Oudh and Rohilkhand Railway attributed chiefly to the restriction of expenditure; to delay in the supply of material from England, and to sales of surplus stores.
- A lapse on the North Western Railway due to the restriction of expenditure; to fluctuations in the suspense balances, and to short outlay on English stores.
- An excess on the Eastern Bengal State Railway due to increased expenditure for doubling the line from Ranaghat to Poradaha; to expenditure incurred on works at Pachooria, Lalgola, Chitpore and Naihati, and to an increase in the English cost of additional rolling stock obtained for the open line.

*Lines under construction.*—The actuals fell short of the Budget Estimate by Rx. 815,668. The principal variations on individual lines were :—

- A lapse on the Rungpur-Dhubri Railway (Teesta Bridge) due to the construction of the bridge not having been commenced as early as was originally intended.
- A lapse on the Rajbari-Faridpur Railway due to construction operations not having been pushed on to the extent anticipated in the Budget Estimate.
- A lapse on the Mari-Attock Railway due mainly to the restriction of expenditure.
- A lapse on the Bezwada-Madras Railway due to short outlay under Ballast and Permanent-way; to the postponement of some of the works under Stations and Buildings; to the non-arrival of engines, and to delay in the erection of carriage and wagon stock by the Madras Railway.
- The Budget Estimate of the Kotri-Rohri Railway provided for expenditure both on that railway and on the Indus Bridge. The Kotri-Rohri Railway was, however, transferred to the management of the North Western Railway during the year and the necessary separation of the grant was effected. Compared with the provision made in the Budget Estimate for expenditure on the Indus Bridge, the actuals shew a lapse which is attributed chiefly to the non-arrival of girders from England.
- A lapse on the Godavari Bridge due chiefly to short expenditure on English stores.
- A lapse under Stores transactions due to a reduction in the balances; stores paid for during 1896-97 having been invoiced and passed on to lines during the year under review.
- An excess on the Rai Bareli-Benares Railway attributable partly to a too sanguine estimate of probable savings, partly to short outlay under certain heads in the previous year, and to some extent to additional works having been found necessary. The excess would have been larger but for a large saving under Rolling-Stock due to delay in the supply of engines from England.
- Construction operations were started during the course of the year on the British sections of the Shadipalli-Jodhpore Frontier and Cooch Behar-Santrabari Railways. No provision for these lines was made in the Budget Estimate.

An excess on the Lyallpur Khanawal Railway due to the purchase of sleepers and permanent-way materials from the North Western Railway, provision for which was not made in the Budget Estimate.

*Companies' Agency.*

*Open lines.*—The actuals fell short of the Budget Estimate by Rx. 168,683. The principal variations on individual lines were as under :—

A lapse on the Rajputana-Malwa Railway due to short expenditure on new works at Cawnpore and to the transfer of expenditure on works at Ujjain to the Nagda-Ujjain and Ujjain-Bhopal Railways; to the provision made for certain works under Stations and Buildings not having been utilised owing to some of the works having been deferred, and to the want of Government sanction for others, and to short outlay on menials' quarters at Mhow and junction arrangements at Ujjain Station owing mainly to restriction of expenditure; to credits for locomotive and carriage and wagon stock sold to the Mombassa-Uganda and Hyderabad-Godavari Valley Railways, and to fluctuations in the suspense accounts.

The balances in the suspense accounts of the Burma Railways on the 31st August 1896 (the date from which the lines were transferred to a Company) which were at first treated as Government capital outlay were under the orders of Government transferred during the year to the Company's capital account, the result being a credit of Rx. 175,714 under head 48.—State Railways—Construction. This credit was not provided for in the Budget Estimate.

A lapse on the Tirhoot State Railway attributed chiefly to the over-estimates and to English stores for the erection of 13 F class engines not having been received.

A lapse of Rx. 80,127 on the South Indian Railway due chiefly to the postponement of several large works, and to short outlay on English stores.

A lapse on the Dhond and Manmad Railway chiefly under Bridge-work, Fencing, and Stations and Buildings due to the provision made for building return walls to bridges from Ahmednagar to Kopergaon not having been put in hand as the work was not sanctioned; to the provision made for fencing 25½ miles not having been utilised as the work is kept in abeyance till completion of the connection with the Godavari Valley Railway at Manmad, and to the provision made for unforeseen works under Stations and Buildings having been surrendered.

No outlay was incurred on the Wardha Coal State Railway during the year, the provision made for strengthening bridges and staff quarters having been surrendered owing to the works not having been sanctioned.

An excess of Rx. 289,420 on the East Indian Railway due chiefly to large purchases of sleepers towards the close of the year; to smaller issues to Revenue of permanent-way materials for renewals, and to an increase in the stock of pig iron for manufacturing operations. The excess is also partly accounted for by increased outlay on the Moghal Sarai-Gya extension and by the charge for commission on debentures which was not provided for in the Budget Estimate.

*Lines under construction.*—The actuals fell short of the Budget Estimate by Rx. 599,569. The causes which led to the deviation from the Budget Estimate are explained below :—

In the Budget Estimate of the Assam-Bengal Railway a sum of Rx. 1,260,000 was provided to meet the estimated expenditure on the line during the year. Of this sum Rx. 1,080,700 was provided from Government funds and the balance Rx. 199,300 against Company's capital and debentures. The debentures, amounting to £300,000 (actual amount received £297,750), which the Company

was expected to raise in March 1897, were not paid to the Secretary of State until 1897-98. The total outlay on the Railway during the year amounted to Rx. 1,160,831, of which Rx. 498,153, representing for the equivalent of the debentures referred to above was accounted under the head, "Capital account of Indian Railway Companies", and only the difference, Rx. 662,678, charged against Government funds in accordance with the terms of clause 43 of the contract. Compared with the total provision made in the Budget Estimate, there was a lapse of Rx. 119,169 which is attributed partly to the restriction of expenditure during a portion of the year, and partly to over-estimates.

The lapse on the provision made for land for the Assam-Bengal Railway was due to the Land Acquisition Officer having over-estimated his requirements.

The lapse on the Hajipur-Katihar extensions is attributed to the alignment of the line from Kosi to Katihar not having been finally settled.

#### REVISED ESTIMATE.

99. Compared with the Revised Estimate, the principal variations and the reasons assigned for them are briefly as follows :—

#### *State Agency.*

*Open lines.*—The actuals fell short of the Revised Estimate by Rx. 71,699. The more important variations on individual lines are as under :—

A lapse on the North Western Railway due to larger issues of stores to Revenue.

A lapse on the East Coast Railway due to shorter expenditure on English stores.

An excess on the Eastern Bengal State Railway due entirely to larger expenditure on English stores than was anticipated.

An excess on the Oudh and Rohilkhand Railway due to smaller issues of stores to Revenue, and to adjustments in connection with stock-taking.

*Lines under construction.*—The actuals were less than the Revised Estimate by Rx. 119,468.

The principal lapses were—

On the Kotri-Rohri Railway attributed to short outlay on works and on English stores.

On the Mari-Attock Railway due to smaller outlay on works than was anticipated.

On the Indus Bridge due principally to the non-arrival of girders from England.

Under Stores transactions due to the cause referred to in paragraph 98 above.

The principal excess was :—

On the Rajbari-Faridpur Railway due to the issue of a larger quantity of materials from the Eastern Bengal State Railway and to more work having been done.

#### *Companies' Agency.*

*Open lines.*—The actuals approximate closely to the Revised Estimate, the result being a small lapse of Rx. 1,088. The more important variations were as under :—

A lapse on the Tirhoot State Railway due chiefly to larger issues of stores to Revenue.

An excess on the East Indian Railway due chiefly to fluctuations in the suspense accounts owing to the causes mentioned in paragraph 98 above.

*Lines under construction.*—The actuals fell short of the Revised Estimate by Rs. 80,069, the principal variations being as under:—

A lapse on the provision made for land for the Assam-Bengal Railway, due to the Land Acquisition Officer not having been able to make awards before the close of the year up to the extent of the money placed at his disposal.

A lapse on the Hajipur-Katihar extensions due to the requirements for outlay on land having been over-estimated and to work in connection with bridges and ballast and permanent-way not having been carried out to the extent anticipated.

The Revised Estimate of the Assam-Bengal Railway was passed for a total estimated expenditure of Rs. 1,147,900, of which Rs. 649,700 was provided against Government funds, and the balance Rs. 498,200 against debentures to be raised by the Company. The actual expenditure amounted to Rs. 1,160,891 or Rs. 12,991 in excess of the Revised Estimate. This excess occurred almost entirely under Formation.

100. *Total Capital Outlay.*—The total outlay incurred on State Railways up to the end of the year has amounted to Rs. 133,302,934 as under:—

	Rs.
Indian outlay	75,958,328
Debits to the Indian books by credits to "Expenditure in England" for value of English stores received, and other items charged off in England	57,344,606
<b>TOTAL</b>	<b>133,302,934</b>

the distribution being as follows:—

	Rs.
34.—Construction of Protective Railways	6,550,981
37.—Construction of Railways (charged against Revenue in addition to that under Famine Insurance)	6,509,881
Other expenditure on construction charged against Revenue, including exchange prior to 1884-85	2,858,794
48.—Capital expenditure on State Railways not charged against Revenue	81,641,842
51.—Capital charges involved in redemption of liabilities	33,553,451
Outlay met from debentures raised through Companies	2,688,083
<b>TOTAL</b>	<b>133,302,934</b>

101. Full details of the above will be found in the statement attached to this review as Schedule G.

## SECTION F.

## CAPITAL ACCOUNT OF GUARANTEED COMPANIES.

102. Each of the Guaranteed Railway Companies has a sterling Capital. Under the respective contracts entered upon many years ago, funds required to meet expenditure in India are advanced at the fixed rate of exchange of 1s. 10d. the rupee, and advances in England when stated in Indian currency are converted at the same rate of 1s. 10d. the rupee. The figures relating to Capital expenditure in this section, where stated in sterling, represent as regards withdrawals by the Companies in England true sterling, and as regards withdrawals in India the equivalent of the rupees at the rate of 1s. 10d.; where stated in Rs., sterling has been converted into rupees at the same rate. This does not, however, apply to the capital for the Extensions of the Madras Railway to which it has been arranged that the "prescribed" rate of exchange shall be applied.

103. The following table shows the amount of Capital raised to the 31st March 1898 :—

	SHARE CAPITAL.		DEBENTURES.		DEBENTURE STOCK.		CAPITAL NOT RAISED IN INDIA.		TOTAL.
	India.	England.	Nominal amount.	Cash received.	Stock repaid.	Cash received.	India.	England.	
	£	£	£	£	£	£	£	£	
Great Indian Peninsula	496,897	19,503,103	2,970,900	2,363,507	2,701,450	2,475,559	74,929	213,620	25,732,515
Bombay, Baroda and Central India	21,672	7,528,628	1,937,900	1,984,580	...	...	...	22,168	2,516,448
Madras { Open line	...	10,357,080	898,000	893,219	...	...	...	12,039	11,162,888
{ Extensions	...	...	100,000	92,000	...	...	...	...	90,000
TOTAL	518,569	37,289,361	5,906,800	5,800,806	2,701,450	2,475,559	74,929	250,127	48,508,661

104. Interest on the Share Capital, Debentures, and Debenture Stock is guaranteed by the Secretary of State, the rates of interest being as under :—

		Great Indian Peninsula.	Bombay, Baroda and Central India.	MADRAS.		TOTAL.
				Open line.	Extensions.	
		£	£	£	£	£
Share Capital at 5 per cent.		20,000,000	7,550,800	8,757,670	...	36,807,870
" " 4½ "		...	...	999,960	...	999,960
" " 4½ "		...	...	500,000	...	500,000
Debenture Stock at 4 "		2,701,450	...	...	...	2,701,450
Debentures at 3½ "		...	788,500	100,000	...	888,500
" " 3 "		1,068,800	300,000	332,700	...	1,701,500
" " 2½ "		800,000	...	80,000	...	880,000
" " 2½ "		1,802,100	849,400	405,800	100,000	2,956,800
TOTAL		25,872,350	9,488,200	11,155,680	100,000	46,416,180

105. The average rate of interest payable in gold on the Capital of these Guaranteed Companies is a little below 4·65 per cent. Under the contracts, the State must continue to pay interest on the Share Capital at the rates guaranteed until the contracts terminate, and is consequently unable to obtain any advantage from the increasingly easy condition of the money market. The State can now raise money at about 2½ per cent., but has to continue to pay 5 per cent. on the bulk of the Share Capital which, with the low average rate of exchange for 1897-98, is equivalent to a payment of interest at a rate of about 7·26 per cent. on the sterling Capital converted at par.

106. The following table shows the amounts withdrawn by the several Companies on Capital account up to the 31st March 1898, and the balances of Capital at their credit or overdrawals at their debit on that date :—

	Paid up Capital.	CAPITAL WITHDRAWN.			BALANCE AT	
		India.	England.	Total.	Credit.	Debit.
	£	£	£	£	£	£

108. The large refunds in India represent chiefly the value of stores issued to Revenue for working and maintenance which, in the first instance, are paid for from Capital funds.

*Comparison with Budget and Revised Estimates.*

109. The following table compares the actual net withdrawals during the year, with the Actuals of 1896-97, and with the Budget and Revised Estimates of 1897-98:—

	Actuals, 1897-98.	REVISED ESTIMATE.		BUDGET ESTIMATE.		Actuals, 1896-97.

110. The increase in the actuals as compared with those of the previous year occurred on the Great Indian Peninsula Railway in connection with the outlay in England on stores, etc., which was nearly 25 lakhs more than in the preceding year. This increase has to a certain extent been counterbalanced by larger refunds for stores issued to revenue for repairs and renewals of carriages and wagons. The decrease as compared with the Budget Estimate in the case of all three lines was due principally to shorter outlay on stores, etc., in England. Larger receipts in India in connection with heavier consumption of stores by revenue, sales of stores to outsiders, and deposits for work to be done for outsiders contributed to the decrease to a certain extent. The difference between the Revised Estimate and the actuals is small.

## SECTION G.

## (CAPITAL OF INDIAN RAILWAY COMPANIES.)

## (Exclusive of the old Guaranteed Companies.)

111. The accounts reviewed in this section deal with the capital transactions of the following Railway Companies:—

- Bengal Central.
- Bengal-Nagpur.
- Indian Midland.
- Southern Mahratta.
- Mysore.
- Robilkhund-Kumaon (Lucknow-Bareilly Section).
- Assam-Bengal.
- Burma Railways.
- \* Ahmedabad-Parantij.
- \* South Behar.
- \* Mymensingh-Jamalpur.
- \* Brahmaputra-Sultanpur.
- \* Tapti Valley.
- \* Hurdwar-Dehra.

112. The capital of these Companies (excepting those marked with an asterisk) consists partly of share capital and debentures raised by the Companies direct on guarantees by the Secretary of State, and partly of advances made by the Secretary of State from funds raised by him under the provisions of Act 51 Vict., Cap. 5. The sums thus raised and advanced to the Companies are considered as part of the Companies' capital. Interest on such advances is charged against the Railway Revenue Account and has to be met before surplus profits can be declared.

113. The financial terms of the contracts, the rates of interest guaranteed and the rates of exchange at which the capital is converted into Indian currency vary in each case. These points are briefly noted below.

114. *Bengal Central Railway.*—This line is the property of the Bengal Central Railway Company and is, merely as a matter of convenience, classed among State Railways. This Railway was originally constructed under a limited guarantee of interest at the rate of 4 per cent. per annum, while the line was under construction, such interest, together with interest thereon, being repayable out of surplus profits. A revised contract was, however, entered into, with effect from the 1st July 1885, under which the Company receives a guarantee of  $3\frac{1}{2}$  per cent. on share capital and a quarter of net earnings paid half-yearly, the claim to the repayment of interest advanced under the original contract being at the same time waived. The capital of the Company on the 1st July 1885 amounted to £750,000. The whole of this amount was practically spent by the Company before Government took over the line, and its equivalent in Indian currency is held to be Rs. 90,82,843, the expenditure in rupees as exhibited by the Company's books. The balance of the Company's capital (including advances), viz., £250,000 when stated in Indian currency, is converted at the rate of 1s. 5.262d. the rupee.

115. *Bengal-Nagpur Railway.*—This Company receives a guarantee at the rate of 4 per cent. per annum on share capital, and is entitled to a quarter share of surplus profits,—i. e., of the excess of net earnings over interest—calculated annually. The rate of exchange for the conversion of sterling capital into Indian currency as regards the main line capital raised up to the 31st March 1896 was £1 = Rs. 13, but it has been arranged that all further sterling capital raised for the Bengal-Nagpur Railway both for the main line and the extensions (including the sum of £500,000 raised by debentures in 1896) should be converted at the average rate obtained by the Secretary of State for

bills payable on demand drawn on India during the calendar half-year next preceding that in which the capital is received, i.e., at what is known as, and referred to hereafter as, the "prescribed" rate.

116. *Indian Midland Railway*.—This Company also receives a guarantee of 4 per cent. per annum on its share capital, and is entitled to a quarter share of surplus profits calculated annually. The rate of exchange for the conversion of sterling capital into Indian currency as regards the main line is £1 = Rs. 12½, and as regards the Saugor-Katni extension, which is being constructed by the Company, £1 = Rs. 16½.

117. *Southern Mahratta Railway*.—This Company now receives a guarantee of 3½ per cent. (4 per cent. up to 31st December 1890) and a quarter of net earnings. The rates of exchange for the conversion of sterling capital into rupees are, as regards the capital (£530,957), specially raised for the completion of the Bellary-Kistna Railway, which was taken over by the Company £1 = Rs. 14, and for the remainder of the capital, £1 = Rs. 12. The Company also gets the advantage of outlay by the State on the construction of the Bellary-Kistna Railway to the extent of Rs. 1,657,841 without any charge for interest.

118. *Mysore Railway*.—This line was completed and is worked by the Southern Mahratta Railway Company. That Company raised sufficient funds by the issue of debenture stock to repay to the Mysore Durbar the outlay previously incurred by that State and to complete the extension linking up with the Southern Mahratta system. Acting on behalf of the Mysore Durbar, the Secretary of State has guaranteed interest at 4 per cent. on the nominal amount of the debenture stock issued. The Southern Mahratta Railway Company receives a quarter of the net earnings. The rate of exchange for conversion of the sterling capital into Indian currency is 1s. 5.931d. the rupee.

119. *Rohilkhand-Kumaon Railway (Lucknow-Bareilly Section)*.—The Rohilkhand-Kumaon Railway Company took over, with effect from the 1st January 1891, the Bareilly-Pilibhit and the Lucknow-Sitapur State Railways, undertaking to complete the link between these lines and to work the whole with their own Railway. The Company agreed to raise capital to the extent of £160,000 by the issue of debentures, with the power to discharge any portion of this obligation by the payment of rupees in India, the amount so paid being deemed the equivalent of sterling money at the average rate of exchange during the half-year immediately preceding the date of such payment. The Company subsequently issued sterling debentures for £147,000, which sold for Rs. 20,34,196. This sum was paid into the Calcutta Treasury, and, at the rate fixed by the contract, is deemed to be equivalent to a sterling payment of £160,837. The debentures were issued under a guarantee of the Secretary of State at the rate of 3½\* per cent. per annum. The previous outlay incurred by the State has not been refunded to Government, and it has been further agreed that any additional capital required shall be provided by the Secretary of State. Any surplus profits after paying the debenture interest and interest at 4 per cent. on the outlay and advances by the State are divided between Government and the Company in the ratio of their respective capital.

120. *Assam-Bengal Railway*.—This Company took over, in November 1892, the construction of the Gauhati-Lumding Section of the Railway which had been commenced by the State. The capital authorised to be raised by the Company is £1,500,000, and the rate of interest guaranteed is 3½ per cent. per annum up to the 1st July 1898, and after that date 3 per cent. The rate for the conversion of sterling capital into Indian currency is the "prescribed" rate.

121. *Burma Railway*.—This Company was formed for the purpose of completing and working the system of Railways in Burma which was being constructed and worked by the State, carrying out extensions thereof. The lines were handed over with effect from the 1st September 1893; the capital authorised to be raised by the Company for the purposes of the contract is

\* These debentures, which matured on the 1st July 1898, have been renewed for three years at 3 per cent. per annum.

£2,000,000. The rate of interest guaranteed is  $2\frac{1}{2}$  per cent. per annum up to the 1st July 1901, and after that date  $2\frac{1}{2}$  per cent. For the purposes of the division of surplus profits, the capital expended by the Secretary of State on the Railways in Burma up to the 31st August 1896, as shown in rupees in the books of the Government of India, is converted into sterling at the rate of Re. 1 = 1s.  $2\frac{5}{16}$ d., and interest is calculated on the sterling equivalent of this sum at the rate of  $2\frac{1}{2}$  per cent. per annum. Any surplus profits after paying the interest in rupees on the Company's capital and the interest on the sterling equivalent of the Secretary of State's capital are divided between Government and the Company in the ratio of 4 to 1. The Company are also required to repay to the Secretary of State from their share of the surplus profits the equivalent in rupees of the additional  $\frac{1}{2}$  per cent. interest guaranteed up to the 1st July 1901. The rate for the conversion of the sterling capital of the Company into Indian currency and for all the purposes of the contract requiring the conversion of sterling money into rupees is the "prescribed" rate.

122. *Ahmedabad-Parantij, South Behar, Mymensingh-Jamalpur, Brahmaputra-Sultanpur, Tapti Valley and Hurdwar-Dehra Branch Railways.*—The Ahmedabad-Parantij and Tapti Valley Railways are being constructed by the Bombay, Baroda and Central India Railway Company, the South Behar Railway by the East Indian Railway Company, and the Mymensingh-Jamalpur, Brahmaputra-Sultanpur and Hurdwar-Dehra Railways by State Agency, from funds paid into Indian Treasuries, and the element of exchange does not, therefore, enter into the accounts of these Railways. With the exception of the South Behar Railway Company, these Companies have an Indian domicile and a rupee capital. The South Behar Railway Company has an English domicile and a sterling capital. The transactions of this Railway, which pass through the Government accounts, are confined to the withdrawals against the amounts deposited in the Treasury for expenditure in India. In the case of the Brahmaputra-Sultanpur and Hurdwar-Dehra Railway Companies, the Secretary of State has guaranteed interest at the rate of 3 per cent. per annum out of the revenues of India on the actual capital expenditure charged in the accounts, whereas in the case of the other Companies there is no guarantee, but a "rebate" is allowed from traffic earnings on the main line under certain fixed limitations.

123. The following table shows the amount of capital raised to the 31st March 1898:—

	PLATE LINES RAISED BY COMPANIES.										ADMITTED COMPANIES.

<b>TOTAL</b>	<b>39,746,459</b>	<b>40,869,530</b>	<b>2,399,286</b>	<b>2,952,857</b>

128. The overdraft shown against the Bengal-Nagpur Railway is due to the inclusion in the Capital account of the sum of Rx. 485,383 \* expended by the State on the Katni-Umaria State Railway, which was subsequently taken over by the Company (*vide* para. 36 above), and to outlay in India on the extensions being met from rupee advances. The overdraft shown against the Indian Midland Railway is due to this latter cause. A sum of Rx. 1,667,841 expended by Government on the Bellary-Kistna State Railway, now incorporated in the Southern Mahratta Railway system, has not been included in the foregoing tables of expenditure. Similarly, a sum of Rx. 512,114 expended by Government on the Bareilly-Pilibhit and Lucknow-Sitapur Railways, prior to their transfer to the Rohilkhand-Kumaon Railway Company, has not been included in these statements. These items are classed, as originally charged, under 37.—*Construction of Railways* and 48.—*State Railways—Construction*, and are included in the expenditure dealt with in Section E.

*Comparison with Actuals during 1896-97 and the Budget and Revised Estimates.*

129. In the following table the actual expenditure during the year is compared with the Revised and Budget Estimates, and with the Actuals of 1896-97:—

RAILWAYS.	Actuals, 1897-98.	REVISED ESTIMATE.		BUDGET ESTIMATE.		Actuals, 1896-97.
		Estimate.	Actuals, more or less.	Estimate.	Actuals, more or less.	
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Bengal Central . . . . .	65,707	67,900	—2,193	70,000	—4,293	95,658
Bengal-Nagpur . . . . .	1,846,813	1,940,000	—93,187	2,138,400	—281,587	1,579,240
Indian Midland . . . . .	299,218	291,100	+8,118	258,100	+41,118	699,064

<b>TOTAL</b>	<b>4,214,452</b>	<b>4,231,600</b>	<b>—7,148</b>	<b>5,239,100</b>	<b>—1,024,648</b>	<b>3,302,103</b>

\* Equivalent at contract rate to £373,372.

*Compared with Actuals of the previous year.*

130. The increase of Rs. 912,850 in the expenditure during 1897-98 as compared with the outlay during 1896-97 occurred chiefly on the Bengal-Nagpur, Assam-Bengal and Burma Railways. The increase on the Bengal-Nagpur Railway was due to greater progress having been made on the construction of the Sini-Midnapore-Cuttack-Calcutta Extensions; the increase on the Assam-Bengal Railway to a large portion of the outlay on the line during the year having been charged to this head against the debentures raised, and that on the Burma Railways to the expenditure in the previous year from Company's funds being only that incurred from the 1st September 1896, when the line was handed over to the Company to the end of the official year. There were increases also on the South Behar, Mymensingh-Jamalpur, Brahmaputra-Sultanpur and Tapti Valley Railways due to the progress of construction on these lines, the last three were only started during the course of the previous year. The expenditure on the Hurdwar-Dehra Railway, which was commenced during the year, also helped to swell the increase. The principal decreases were on the Indian Midland Railway due to fluctuations in the stores accounts and on the Ahmedabad-Parantij Railway due to the construction of the line having been practically completed in the previous year.

*Compared with Budget Estimate.*

131. As compared with the Budget Estimate there was a lapse of Rs. 1,024,648. The principal variations are explained below:—

The lapse of Rs. 281,585 on the Bengal-Nagpur Railway was due entirely to short outlay to the extent of Rs. 441,853 on English stores owing to the Engineers' strike in England and to the delay in sending forward indents and in letting contracts for girders. There was, however, an excess of Rs. 160,268 over the provision made for expenditure in India due chiefly to the refund to Government of the cost of surveys undertaken in previous years in connection with the Sini-Midnapore-Cuttack-Calcutta Extensions and to greater progress of work on the extensions.

The lapse of Rs. 85,501 on the Southern Mahratta Railway occurred chiefly from the provision made for expenditure in England, and was due partly to indents not having been complied with in full, and to the annual indent for miscellaneous stores being less than the provision was made in the Budget Estimate. There was also a lapse on the provision made for expenditure in India due chiefly to the restriction of expenditure; to several new works not having been sanctioned, and to the postponement of the construction of a part of the additional rolling-stock owing to the late arrival of material from England.

The lapse on the Mysore State Railway is attributed to the orders of Government restricting expenditure in consequence of which several new works for which provision was made in the Budget Estimate were postponed, and several sanctioned works were held in abeyance.

The lapse on the Burma Railways was due chiefly to the construction of the Mandalay-Kunlon Railway not having been pushed on as rapidly as was anticipated owing to a large number of Engineering questions not having been finally settled.

The lapse of Rs. 81,275 on the South Behar Railway was due to the construction of station arrangements having been deferred as it was found necessary to employ all labour on the more important work of bridging; to the East Indian Railway having failed to return within the year a large quantity of permanent way material which it borrowed; to earthwork not having been executed to the extent anticipated and to a stoppage of ballast-breaking operations at Kadjura in October 1897.

The lapses on the Mymensingh-Jamalpur and Brahmaputra-Sultanpur Branch Railways were due to the work of construction not having been pushed on to the extent anticipated.

The lapse of Rx. 615,635 on the Tapti Valley Railway was due partly to delay in making over land to the Railway authorities and partly to the progress of work having been retarded owing to the difficulty in obtaining labour in consequence of the plague restrictions.

The excess of Rx. 41,116 on the Indian Midland Railway was due to greater progress having been made with work on the Saugor-Kaini Extension than was anticipated; to a portion of the cost of 14 new engines which it was expected would be accounted for in the previous year, having been brought to account in the year under review owing to their late arrival; and to smaller issues of stores to Revenue than were provided for.

The excess on the Lucknow-Bareilly Railway was due chiefly to larger expenditure on English stores and to smaller issues of stores to Revenue.

The excess on the Assam-Bengal Railway was due to a larger portion of the expenditure incurred on this Railway during the year having been charged to this head for the reasons stated in para. 98 above.

*Compared with Revised Estimate.*

132. The actuals work up very closely to the Revised Estimate in total, there being a lapse of only Rx. 7,148. The more important variations on individual lines are explained as under:—

The lapse of Rx. 93,185 on the Bengal-Nagpur Railway is attributed to girders and rails not having been received or paid for before the close of the year.

The lapse of Rx. 30,775 on the South Behar Railway was almost wholly due to the East Indian Railway having failed to return to the South Behar Railway within the official year a quantity of permanent way material borrowed, the debit for which remained on the books of the East Indian Railway.

The lapse of Rx. 12,274 on the Brahmaputra-Sultanpur Branch Railway was due to short deliveries of sleepers.

The excess of Rx. 147,647 on the Burma Railways was due to the transfer from the Government to the Company's Capital Account of Rx. 175,714 representing the balances in the suspense accounts on the 31st August 1896 which is referred to under Section E.

## SECTION H.

## NATIVE STATES RAILWAYS.

*Capital and Revenue Transactions.*

133. The accounts reviewed in this section are those which are dealt with in this Department in connection with the following Railways belonging to Native States:—

Bhopal State Railway (Bhopal Section).  
Khamgaon Railway.  
Amraoti Railway.

134. It may be mentioned that this Department is not directly concerned with the transactions of the following Railways, and consequently they are not alluded to in this review:—

- The Gaekwar's.
- Jodhpore-Bickaneer.
- Nagda-Ujjain.
- Nizam's Guaranteed.
- Hyderabad-Godavari Valley.
- Morvi.
- Gwalior-Sipri.
- Rajpura-Bhatinda.
- Bhavnagar-Gondal-Junagad-Porbandar.
- Jammu-Kashmir (Native State Section).
- Kolhapur.
- Cooch Behar.
- Bina-Goon.
- Oodeypore-Chitore.
- Bhopal-Ujjain.
- West of India Portuguese.
- Jamnagar.
- Jeypore.
- Dhrangadra.
- Rajpipla.
- Jetalsar-Rajkot.
- Rewah.
- Pondicherry.
- Karikal-Peralam.
- Mysore {
  - Birur-Shimoga.
  - Mysore-Nanjangud Section.
  - Yesvantpur-Mysore Frontier.
  - Kolar Gold-fields.

135. An officer of the Public Works Accounts Department is lent to the Native States for the purpose of keeping the accounts of the Bhavnagar-Gondal-Junagad-Portbandar, Jamnagar, Dhrangadra and Jetalsar-Rajkot Railways, and the accounts of the lines marked with an asterisk are either kept by or supervised by Public Works Accounts officers.

## BHOPAL STATE RAILWAY.

136. *Capital.*—The Bhopal State Railway is the joint property of the Imperial Government and the Bhopal State. The line connects Itarsi, on the

Great Indian Peninsula Railway, with Bhopal. The line runs for 13 miles through British territory and for 44 miles through the Native State of Bhopal.

137. Funds for the construction of this line were at first provided as follows:—

	Rx.
By the British Government . . . . .	125,000
„ Bhopal State . . . . .	500,000

But as further moneys were required to meet the cost of additional works and of alterations necessary to bring the line up to the standard necessary for dealing with the traffic anticipated on the opening of the Indian Midland Railway, and as Her Highness the Begum of Bhopal was not prepared to advance more than the 50 lakhs, it was decided to provide the necessary money from Imperial resources. The contribution made by the Durbar had all been utilised before the end of 1890-91, so that the expenditure incurred subsequently was met from grants under the head “48.—State Railways—Construction,” and as such is reviewed in Section E.

138. The capital expended on the line to the close of 1897-98 amounted to Rx. 786,713 and has been found as follows:—

	Rx.
By the British Government . . . . .	236,713
„ Bhopal State . . . . .	500,000

139. *Revenue.*—The line is worked by the Indian Midland Railway on the following terms: on payment of such a sum as shall bear the same rate per cent. to the gross receipts of the Bhopal State Railway for any half-year as the aggregate working expenses of the amalgamated undertaking bear to the aggregate gross receipts of the amalgamated undertaking for the same half-year, plus 5 per cent. of the gross earnings for supply of rolling-stock. The earnings and expenses are adjusted by the calendar half-year, and the amounts included in the accounts for the official year 1897-98 represent the results of working during the calendar year 1897.

140. The revenue receipts and charges of the year are, under the terms of the agreement with the Durbar, divided between the British Government and the Bhopal State in the proportion of the capital contributed by each, and on this basis the division of the transactions of the year 1897 was as shown in the following table:—

	Government.	Bhopal State.	TOTAL.
	Rx.	Rx.	Rx.
Receipts . . . . .	15,221	33,138	48,359
Expenditure . . . . .	9,103	19,328	28,936
Net receipts . . . . .	6,118	13,810	19,423

141. The Durbar's share of the net earnings for the year is equivalent to a return of 2·66 per cent. per annum on the capital provided by the Durbar.

#### KHAMGAON AND AMRAOTI RAILWAYS.

142. *Capital.*—These railways have been constructed from funds provided from the surplus revenues of Berar. The Khamgaon Railway, 7½ miles in length, runs from Jalamb Station, on the Great Indian Peninsula Railway, to Khamgaon; and the Amraoti Railway, 5½ miles in length, connects Budnera on the same railway, with Amraoti.

143. The capital expended on these lines to the end of 1897-98 is as under:—

	To end of 1896-97.	During 1897-98.	Total to date.
	Rx.	Rx.	Rx.
Khamgaon Railway . . . . .	52,280	—45	52,215
Amraoti " . . . . .	45,112	133	45,245

144. *Revenue.*—Both these lines are worked by the Great Indian Peninsula Railway Company on the following terms: the payment to the Company of the same percentage of the gross receipts of the State line that the working expenses of the Great Indian Peninsula Railway and branch lines, taken together, bear to the earnings of the Great Indian Peninsula Railway and branch lines, plus 5 per cent. of the gross receipts of the State lines for the use of rolling-stock. The transactions are adjusted by the calendar half-year, and the results incorporated in the accounts of the year 1897-98 represent the transactions of the calendar year 1897.

145. The receipts and charges of the year 1897 are shown in the following table:—

	Receipts.	Expenditure.	Net Receipts.
	Rx.	Rx.	Rx.
Khamgaon Railway . . . . .	4,650	3,280	1,390
Amraoti " . . . . .	10,319	7,823	2,086

146. The net receipts represent returns of 2·66 and 6·60 per cent. per annum on the total capital expended on the Khamgaon and Amraoti Railways, respectively.

*Comparison with Budget and Revised Estimates.*

147. The actual capital outlay of the year compares with the Budget and Revised Estimates as under:—

RAILWAY.	Actuals, 1897-98.	REVISED ESTIMATE.		BUDGET ESTIMATE.	
		Estimate.	Actuals, more or less.	Estimate.	Actuals, more or less.
		Rx.	Rx.	Rx.	Rx.
Khamgaon Railway . . . . .	—45	...	—45	500	—545
Amraoti " . . . . .	133	100	+33	400	—267
TOTAL . . . . .	88	100	—12	900	—812

The differences are small and do not call for any detailed explanation.

148. The actual revenue transactions compare with the actuals of 1896-97 and the Budget and Revised Estimates as under :—

	Actuals, 1897-98.	REVISED ESTIMATE.		BUDGET ESTIMATE.		Actuals, 1896-97.
		Estimate.	Actuals, more or less.	Estimate.	Actuals, more or less.	
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
<b>Bhopal—</b>						
Receipts .	33,138	33,000	+138	36,700	—3,562	36,136
Expenditure .	19,828	19,800	+28	19,200	+628	22,283
<b>Net Receipts</b>	<b>13,310</b>	<b>13,200</b>	<b>+110</b>	<b>17,500</b>	<b>—4,190</b>	<b>13,853</b>
<b>Khamgaon—</b>						
Receipts .	4,850	4,400	+250	6,000	—1,350	5,836
Expenditure .	3,980	3,100	+180	3,500	—240	3,891
<b>Net Receipts</b>	<b>1,870</b>	<b>1,300</b>	<b>+90</b>	<b>2,500</b>	<b>—1,110</b>	<b>2,445</b>
<b>Amraoti—</b>						
Receipts .	10,312	10,500	—181	10,000	+312	10,411
Expenditure .	7,838	7,600	—267	6,090	+1,833	6,124
<b>Net Receipts</b>	<b>2,988</b>	<b>2,900</b>	<b>+86</b>	<b>4,000</b>	<b>—1,014</b>	<b>4,287</b>

149. The variations are too small to call for any detailed explanations. The decreases were generally due to smaller traffic and the increase on the Khamgaon Railway to higher charges by the working railway.

SIMLA;  
The 1st June 1899.

A. R. BECHER,  
Accountant General, P. W. Dept.

Acct. Genl., P. W. Dept., memorandum No. 136 R., dated 6th April 1899.

Submitted to the Secretary to the Government of India, Public Works Department.

*Document accompanying.*

Abstract and detailed Accounts of Revenue and Expenditure on Railways in India during and to the end of 1897-98.

Accompaniment to Accountant General's, P. W. Dept., Note No. 136 R., dated 6th April 1899.

*Abstract by Fund and Finance Heads of the Revenue and Expenditure on Railways in India during 1897-98 compared with the Budget and Revised Estimates of the year and the accounts of 1896-97.*

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

**Weather Review of India for the Week ending at 8 a.m. on  
Saturday, June 10th, 1899.**

The most important meteorological event of the week under review has been the setting in of the rains both in Burma and North-East India and along the west coast. In the former region the setting in of the rains has been accomplished quietly, and it is difficult to say exactly when monsoon rainfall commenced. The southerly winds blowing from the Bay into Burma and thence into Assam and North Bengal, noticed in the last review, have continued steadily during the present week, while the rainfall has got heavier and more general, but the change was carried out by a gradual transition, and there was nothing to mark the actual setting in of the monsoon. On the opposite side of India the winds have been unsteady and the weather changeable, but in this area also there has been an extension of rain which during the week penetrated from the coast into North Bombay and the central parts of India, so that the western or Arabian sea branch of the monsoon, though commencing in a somewhat unsteady manner, was yet fairly well established by the close of the week. In Upper India the winds have been light, the weather fine and the temperature very high, while along the east side of the Peninsula the winds have been fresh from north-west and south-west, and the weather hotter than usual. In Deltaic Bengal there have been very strong southerly winds during the week and some thundershowers, but monsoon rainfall has not up to the present extended to that area.

**Daily Summary.**—*Sunday, June 4th.*—The barometer was changing only slightly. Pressure was highest over the south-east of the Bay and lowest in the West Punjab, and the barometer read higher than usual over both North-Western and North-Eastern India. The winds were variable over the Punjab and on both coasts of the Peninsula, while they were north-westerly over the central parts of the country and southerly in Burma, at the head of the Bay and in Deltaic Bengal. The weather was slightly cloudy with light showers on the west coast and cloudy to overcast with light to moderate general rain over Burma and Assam. The weather was cool over Sind, North Bombay and North Bengal, but was generally hotter than usual elsewhere.

*Monday, June 5th.*—The barometric changes were again wholly unimportant, and the general conditions of pressure were unchanged. There was still a considerable excess of pressure around the north of the Bay and over North-West India. South-westerly winds were reported from Colombo and the Malabar Coast. In other places the winds were generally similar to those reported on the 4th. The sky had become more clouded, and the showers had extended over the west of the Peninsula, while overcast weather and general rain continued over Burma and Assam. The weather was cooler than usual over North-West India and Upper Burma, but was hotter than the average elsewhere—particularly so over the central districts of India.

*Tuesday, June 6th.*—The barometer had fallen over Northern India and risen over the Peninsula. Pressure was lowest over the West Punjab, relatively low over West Bengal and highest in the south of Bay. There was a considerable excess of pressure over the centre of the Bay and a moderate excess over North Bombay. South-westerly winds had extended along the west coast as far north as Goa and very strong southerly winds were reported at the Sandheads, but elsewhere the wind directions were unchanged. The skies were clear and the air very dry over Upper and Central India, but in the west of the Peninsula the weather was overcast and showery, while over Burma, Assam and North Bengal the rainfall had increased. The mean temperature was low for the time of year over the Western desert and parts of Madras, of Burma and of North Bengal, but was excessive in other places, the variation from the normal being as much as  $+10^{\circ}$  at Amraoti.

*Wednesday, June 7th.*—Pressure had been steady and the distribution was unaltered. The winds had become more irregular and unsteady again on the west coast, but the directions were practically unaltered in other parts of the country. Rain continued to fall over the west of the Peninsula and over Burma and North-East India. The amounts were generally lighter than on the 6th, but there were some heavyish amounts, as, for example, 4.70 inches at Akyab, 4.50 inches at Silchar and 3.42 inches at Mangalore. The mean temperature was low for the time of year in North Bombay, Malabar, Burma, Assam and North Bengal, and remained excessive elsewhere. At Seoni and Nagpur the excess was over  $9^{\circ}$ .

*Thursday, June 8th.*—There was again no change to record in the pressure conditions. The winds were very irregular and unsteady along the west coast and much lighter than usual. Some easterly winds were appearing in North Bengal and Bihar. Scattered showers were reported from Western India and light to heavy rain from Burma, Assam and North Bengal. At Silchar 7.54 inches of rain had fallen. The temperature conditions, relatively to the normal, were the same as on the 7th.

*Friday, June 9th.*—Showers of rain had extended to the central districts of India, and these had been followed by a rapid fall of temperature and a brisk to rapid rise of pressure. At the same time the wind had shifted to the southward along the west coast, but these were the only changes of importance. Light to moderately heavy rain continued to be reported from the same districts as on the preceding day. The temperature remained low over Upper Burma, Assam and North Bengal, but the large excess of temperature over the central parts of India had, under the influence of the showers noticed above, disappeared.

*Saturday, June 10th.*—The barometer had risen over Northern and fallen slightly over Southern and Central India. Pressure was lower than usual in the Punjab, about normal over the west of the Peninsula and above the normal elsewhere. Abnormal southerly and south-easterly winds continued along the west coast, but in other places the wind blew from about the average directions. Showery weather had extended and some rain was reported from Khandesh, the central districts of India and West Bengal as well as from the regions from which it was previously reported. The mean temperature had now fallen to below the

normal over the central parts of India and remained low for the time of year in Burma, Assam and East and North Bengal.

**Temperature.**—The mean temperature has, from some unexplained reasons, been low for the time of year over North Bombay, but in all other parts of the country the variation of the mean temperature from the normal has agreed closely with the distribution of rainfall. On most days of the week the rainfall was confined to Burma, Assam and North Bengal on the one hand and to the west coast districts on the other, and in these two regions the heat has been less than usual, while all over Northern and Central India, where the weather has been dry, the heat has been excessive. Towards the close of the week, however, showers extended to the central districts, and the excess of heat at the central stations was turned into a slight deficiency.

The following table gives the mean temperature variation data for the week :

PROVINCE.	June 1899.							Mean variation of week.
	4th	5th	6th	7th	8th	9th	10th	
	°	°	°	°	°	°	°	°
Burma . . . . .	+0.4	-0.8	-0.7	-0.2	-0.3	-1.0	-1.0	-0.4

Sind . . . . .	-1.7	-1.9	-1.1	-0.9	-0.4	-1.1	-0.8	-1.1
Rajputana . . . . .	+1.1	+0.2	+0.8	+2.5	+3.2	+4.0	+2.5	+2.0
Gujarat . . . . .	-2.1	-1.9	+0.1	-0.4	-0.1	+1.4	-0.5	-0.5
Central India . . . . .	+1.3	+2.2	+4.4	+4.4	+5.3	+5.6	+1.5	+3.5
Central Provinces . . . . .	+5.7	+5.9	+7.3	+7.2	+8.1	+3.7	-0.8	+5.3
Berar . . . . .	+5.0	+7.2	+10.0	+4.4	+7.3	+1.8	-3.8	+4.6
West Coast . . . . .	+1.1	+1.3	+1.0	-0.4	+0.5	+1.4	-0.2	+0.7
Bombay Deccan . . . . .	+2.3	+3.7	+3.3	+1.6	+2.4	+3.0	0	+2.3
Mysore . . . . .	+1.7	+2.7	-2.3	+0.2	+0.9	+1.3	+0.2	+0.7
Madras Coast . . . . .	+2.2	+0.7	-0.7	+1.3	+1.7	+2.3	+1.9	+1.3
Madras Deccan . . . . .	+2.3	+3.2	+1.6	+1.0	+1.6	+1.4	-2.6	+1.2
South India . . . . .	+1.2	+1.0	+1.8	+0.6	+1.2	+2.8	+1.1	+1.4
Mean for whole of India . . . . .	+1.8	+2.0	+2.1	+1.7	+2.4	+2.2	+0.6	+1.8

The mean temperature of the whole country for the whole week was 1.8° above the normal. The hottest day was the 8th when the mean temperature was 2.4° above the average. On each day of the week the heat was greater than usual for the whole country, but the provincial variations show that the mean temperature was, almost throughout the week, lower than usual in Assam and Sind and about normal in Burma and Gujarat.

The following were the highest maxima reported on each day :

June 4th	.	.	.	.	.	113°3'	at Lucknow.
" 5th	.	.	.	.	.	114°7'	" Jacobabad.
" 6th	.	.	.	.	.	116°6'	" Do.
" 7th	.	.	.	.	.	119°0'	" Do.
" 8th	.	.	.	.	.	120°0'	" Do.
" 9th	.	.	.	.	.	119°0'	" Do.
" 10th	.	.	.	.	.	121°0'	" Do.

**Rain.**—The rainfall of the week under review occurred under much the same general conditions as last week. Southerly winds from the Bay passed into Burma and then curving round into south-east and east passed into Assam and East and North Bengal. The whole of the region affected by this current received general rain which, though somewhat lighter than usual in Burma, was very heavy in parts of Assam. These south-easterly and easterly winds did not extend much beyond the regions quoted above, and West Bengal, the Gangetic Plain and the greater part of North-West India were under the influence of dry westerly winds, so that, beyond a few light showers in West Bengal, the North-West Provinces and the submontane and hill districts of the Punjab, the weather was fine over the whole of the Gangetic Plain and a large part of North-West India. Along the west coast there has occurred a marked extension in the amount and area of rainfall. On Sunday, the 4th, the only fall was in the extreme south-west, the heaviest fall being 2·31 inches at Cophin, but by the 5th rain had extended northward to Goa and by the close of the week, had spread all along the west coast as well as inland over the Deccan, Central India, Berar, the Central Provinces, Khandesh and Gujarat. But though these returns show that the monsoon set in during the week under review, the change was carried out very quietly and gradually, and the rainfall was at no time very heavy, nor was the setting in of the rains accompanied with the burst of unsettled, stormy, weather which ordinarily accompanies this change along the west coast of India and in Ceylon. The rainfall returns show that daily rain occurred throughout the week in Burma and Assam; that in East and North Bengal rain set in steadily and heavily on the 7th, and that in other parts of Bengal there were scattered showers throughout the week; that in Chota Nagpur and Bihar there were showers on the 9th and 10th; that in Malabar rain fell during the whole week and in other parts of the west of the Peninsula rain commenced on the 6th or 7th, and that in the central districts of India rain fell on the 8th, 9th and 10th. Elsewhere the rainfall was unimportant. The table at the close of the summary shows that effective rain was received in thirty-five of the rainfall divisions which included all the Burma divisions, all the Assam divisions, all the Bengal divisions (except South Bihâr), the submontane division of the Punjab, all the West Peninsula divisions, all the central divisions (except the central division of the Central Provinces, the west division of Central India and both the Rajputana divisions) and all the East Peninsula divisions (except the central division of the east coast and South Madras). The average actual rainfall in these 35 divisions

ranged from 16·64 inches in the hill division of Assam, 15·03 inches in the Surma division of Assam, 9·77 inches in the North of Bengal and 7·82 inches in Tenasserim, to 0·10 inch in the submontane division of the Punjab. The third column of the table shows that the rainfall during the week has been lighter than usual over the greater part of the country, but particularly so over Malabar, where the setting in of the rains has been so quiet. There have, however, been some exceptions to this general lightness, thus in Upper Burma there has been an excess of 0·58 inch, in the Surma division of Assam of 9·80 inches, in the hill division of Assam of 10·41 inches, in the Brahmaputra division of 2·75 inches, in North Bengal of 5·13 inches, in South-Central Madras of 0·29 inch, in Berar of 0·10 inch, in Kathiawar of 0·39 inch and in Central Madras of 0·15 inch. The deficiency has been greatest in Arakan, Malabar, Coorg and the Konkan, where it ranges between  $3\frac{1}{2}$  inches and 6 inches.

As the present is the first week of a fresh rainfall period, the information given in the three concluding columns of the rainfall table is the same as that given in the first three.

The following were the principal large totals recorded at individual stations during the week:

Burma	Kyaikto (Thaton)	9·05 inches.
	Rathedaung (Akyab)	10·92 "
Assam	Sylhet	22·18 "
	Cheera Poonjee	73·78 "
Bengal	Netrokona (Mymensingh)	11·30 "
	Jalpaiguri (Alipurduara)	29·52 "
	Cooch Behar	24·27 "
West Peninsula	Mangalore	10·65 "
	Karwar	14·24 "

W. L. DALLAS,

for Meteorological Reporter to the  
Government of India.

SIMLA, 15th June, 1899.

M. FINUCANE,

Offg. Secretary to the Government of India.

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

## Weekly Report on the state of the Season and Prospects of the Crops.

**Madras.**—*For week ending 10th June.*—The rainfall was good on the West Coast and on the Nilgiris; elsewhere there were seasonable scattered showers. The water-supply is generally adequate for the season. Ploughing is general and some sowings are being made. Crops are still standing on a limited area, and are generally in good condition. Pasture is scanty, but fodder is sufficient. Cattle are in normal condition. Prices are generally slightly easier, except in parts of the Circars and the Deccan.

**Bombay.**—*For week ending 15th June.*—Moderate or light rain fell in all districts of the Presidency Proper during the week. The spring crops in one taluqa of Thar and Parkar have been slightly damaged by cyclonic winds. Ploughing and sowing operations are generally progressing. Fodder is sufficient, except in parts of Sind and Baroda territory. Agricultural stock is healthy. Prices have risen in ten and fallen in two districts; elsewhere they are stationary.

**Bengal.**—*For week ending 12th June.*—There was rain in every district of Bengal Proper during the week, but, except in the Eastern and Northern districts, it was generally light. In Bihar, Orissa, and Chota Nagpur only scattered showers are reported. Early rice and jute are nearly all sown and weeding is now going on. Lands are being prepared for the sowing of the autumn and winter rice crops, but rain is required in several parts. Sugarcane promises well. There was a flight of locusts in the Sonthal Parganas, but little or no damage is reported. The locusts in Dacca reported last week are destroying the young paddy plants in the Sadr and Munshiganj sub-divisions. Except for a slight rise in some districts, the price of common rice was generally stationary. \*No want of fodder is reported.

**North-Western Provinces and Oudh.**—*For week ending 14th June.*—Cloudy and unsettled weather prevailed during the week and rain fell in many districts. Harvesting of extra crops is nearly over. Irrigation is being resorted to where necessary. Sugarcane is thriving and is being weeded. A flight of locusts passed over the Allahabad, Hamirpur, and Partabgarh districts, but no damage is reported. Markets are adequately stocked. Fodder is sufficient. Prices show a rise in some districts, but are otherwise either stationary or fluctuating.

**Punjab.**—*For week ending 15th June.*—Rain has fallen in parts of the Umballa, Lahore, Amritsar, and Rawalpindi districts. Harvesting of spring crops is nearly finished. Sugarcane and cotton crops are being weeded. The standing crops are being watered, and ploughings and sowings of other autumn crops are in progress. Rain is badly wanted throughout the Province. The outturn of the spring crops is reported average or below average and that of extra spring crops is also expected to be generally average. The standing crops are fair on irrigated areas. Sugarcane has been slightly damaged by white-ants in Sialkot owing to drought. Cattle are reported to be in poor condition in Delhi and parts of the Hissar and Dera Ismail Khan districts. Fodder is scarce in Hissar, Delhi, Shahpur, parts of Peshawar, and in Dera Ismail Khan, and is sufficient elsewhere. Prices—especially of wheat—are rising in Umballa and Peshawar; falling in Mooltan, Amritsar, Rawalpindi, and Dera Ismail Khan; and are unchanged elsewhere. Wheat is selling from 16½ to 22½, barley 32, gram 20 to 23, maize 28 to 32, great millet 24, bulrush-millet 18 to 23½, and rice 13½ to 14½ seers per rupee.

**Central Provinces.**—*For week ending 13th June.*—The weather was very hot at the beginning of the week, but cloudy and unsettled at its close with heavy falls of rain in Chanda and Bilaspur; elsewhere the fall was moderate to light. In Saugor, Damoh, and Hoshangabad 4,277, 2,300 and 1,005 persons, respectively, are in receipt of village relief; and in the last district 228 persons are in receipt of gratuitous relief. The preparation of land for autumn sowings has been completed in Wardha; almost completed in Betul, Nagpur, and Chanda; and is in progress elsewhere. Sowing operations have begun in the Dhamtari tahsil of Raipur; and sowing of rice is in progress in parts of Mandla, Bhandara, Bilaspur, and Sambalpur. The excessive heat at the beginning of the week has slightly damaged the recent rice sowings in Sambalpur. Locusts appeared in parts of Saugor, but caused no damage. Insufficiency of water and fodder is reported from some districts. Prices show a tendency to rise. The price of wheat, gram, rice, and *juar* has risen in some districts, and has fallen in others. The cheapest prices are—wheat 20, gram 37, rice 21, and *juar* 29 seers per rupee; the dearest prices are—wheat 13½, gram 18, rice 10, and *juar* 18½ seers per rupee.

**Burma.**—*For week ending 10th June.*—In Lower Burma ploughing progresses everywhere and sowing has commenced in Pegu, Thongwa, Thaton, and Amherst. In Upper Burma reaping of dry weather paddy has been completed, except in Katha and in parts of Pakòkku. The crop has been damaged by rains or floods in Minbu, the Bhamo sub-division of Bhamo, the Mahlaing township of the Ruby Mines district, and the Legayaing sub-division of Upper Chindwin. Ploughing for and sowing of the early upland crops, early sesamum, and cotton are in progress. Sowing of cotton is completed in the Kyoukpadoung township of Myingyan. Sowing of paddy on hill sides continues in Bhamo, Myitkyina, and the Ruby Mines district, and is finished in the Northern Shan States. Ploughing for early wet weather paddy continues on low lands and sowing has begun in parts. The standing crops are generally promising, except in the Pagan township of Myingyan, where more rain is wanted. Price of paddy has fallen in Rangoon, Akyab, Pegu, Thongwa, Bassein, and Thayetmyo and largely in Tharrawaddy and Amherst. The price has risen in Myingyan; elsewhere it is stationary.

**Assam.**—*For week ending 13th June.*—The weather is rainy and unfavourable for tea. Ploughing for late rice; sowing of early rice; planting of sugarcane; and plucking and manufacture of tea are in progress. Sowing of late rice seedlings continues in Cachar, Darrang, and Lakhimpur. Tea blight is disappearing in Darrang, but is prevalent in Cachar and in parts of Kamrup. Late rice and sugarcane are somewhat damaged by floods in Sylhet. Early rice has been damaged by insects and rain in parts of Nowgong and late rice seedlings by insects in parts of Darrang. Prices—common rice—Silchar and Dhubri 16, Sylhet 19, Gauhati 17, Tezpur, Sibsagar, and Dibrugarh 12, and Nowgong 15 seers per rupee.

**Mysore and Coorg.**—*For week ending 13th June.*—**MYSORE:** Rainfall—40 cents in the Civil and Military station and rain general and good in parts of Hassan and Chitaldrug. Prospects are good. Prices have slightly risen in Kolar, Kadur, and Shimoga. *Ragi* (*Eleusine coracana*) has been sown in Tumkur and Mysore.

**COORG:**—Rainfall—4 inches 62 cents. Ploughing for rice continues. Prices of food-grains are stationary. Water and fodder for cattle are sufficient.

**Berar and Hyderabad.**—*For week ending 14th June.*—**BERAR:** The weather continues warm and cloudy. Preparation of land for the ensuing rain crop is in progress. Fodder is insufficient in the Wun district. A scarcity of water still prevails. Prices are almost stationary.

**HYDERABAD:** Rainfall during the week—one inch 6 cents. Preparations for autumn sowings are in progress. The winter rice harvest is over. Prices of grain continue steady. Prices—wheat 10, coarse rice 10½, and *jowari* 25 seers per current sicca rupee.

**Central India.**—*For week ending 14th June.*—Rain fell in Indore, Bundelkhand, Bhopawar, and parts of the Bhopal and Malwa Agencies during the week. Agricultural operations have been completed in Gwalior and Bundelkhand and are in progress elsewhere. Agricultural stock and pasturage are in good condition. Prices are above normal in Bundelkhand and normal in other parts of Central India.

**Rajputana.**—*For week ending 14th June.*—Rainfall—44 cents in Kotah. Agricultural operations are proceeding satisfactorily. Agricultural stock is in fair to good condition, but is getting lean and emaciated in Kherwara. Fodder is scarce throughout the greater part of Rajputana. Prices are rising in Deoli; slightly in Beawar and are steady elsewhere. Fourteen persons emigrated from Ajmere during the week. The total emigration from Merwara to date numbers—4,431. The numbers employed on relief works were—Ajmere 563, Merwara 7,682, and Marwar 974. There are 392 on ordinary works and 246 on gratuitous relief in Ajmere-Merwara. Prices—Ajmere and Beawar not reported; Marwar 15 seers per rupee. Final returns show number on relief works in Merwara last week as 6,235 and not 9,342.

**Kashmir.**—*For week ending 13th June.*—The weather is fine. Rain fell during the week. The prospects of the spring crops are excellent. Prices continue below normal. Rice—27 seers per rupee.

**JAMMU PROVINCE.**—*For week ending 14th June.*—No rain. Prices are generally stationary. Prices—wheat 16 to 19 and maize 25 to 29 seers per rupee. The condition of the standing crops is fair. Sowing of autumn crops is in progress. Fodder is sufficient.

**Nepal.**—*For week ending 10th June.*—Rainfall—1.59 inches. The weather is stormy and showery. Wheat has been harvested and the outturn is good. Rice—9½ seers per rupee.

M. FINUCANE,

*Offg. Secretary to the Government of India.*

GOVERNMENT OF INDIA.  
PUBLIC WORKS DEPARTMENT.  
RAILWAY STATISTICS.

STATEMENT OF APPROXIMATE GROSS EARNINGS OF INDIAN RAILWAYS FROM 1ST JANUARY TO 4TH JUNE 1898, AND FROM 1ST JANUARY TO 3RD JUNE 1899.

N.B.—As regards the figures in column Total earnings from 1st January 1899, audited figures have been used, as far as possible.

RAILWAY.	Average earnings per mile per week during the 1st half of 1898.	WEEK ENDING 4TH JUNE 1898.				WEEK ENDING 3RD JUNE 1899.				Earnings from 1st January to 4th June 1898.	Earnings from 1st January to 3rd June 1899.	Increase.	Decrease.

IMLA, the 10th June, 1899.

---

*Printed and published for the GOVERNMENT OF INDIA at the GOVERNMENT CENTRAL PRINTING OFFICE, Delhi.*

---

SUPPLEMENT TO  
**The Gazette of India.**

---

No. 25. | CALCUTTA, SATURDAY, JUNE 24, 1899.

---

**OFFICIAL PAPERS.**

*A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may be useful or more known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.*

*Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

*No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.*

GOVERNMENT OF INDIA.  
HOME DEPARTMENT.

RESERVATION OF A CERTAIN NUMBER OF CIVIL SURGEONCIES FOR CIVIL ASSISTANT SURGEONS.

Nos. 1084—93.

*Extract from the Proceedings of the Government of India in the Home Department (Medical),—under date Simla, the 22nd June, 1899.*

Read—

Home Department Resolution Nos. 1141—50, dated the 22nd August 1898, regarding the improvement of the position and prospects of Civil Assistant Surgeons.

RESOLUTION.

In paragraph 8 of the Resolution cited in the preamble, the Government of India sanctioned the reservation of 19 Civil Surgeoncies for Civil Assistant Surgeons, and stated that they were in correspondence with Local Governments with the object of increasing the number to 28. Arrangements have now been made to reserve 28 Civil Surgeoncies for Civil Assistant Surgeons, distributed amongst the provinces as follows:

Madras	...	...	...	...	...	5
Bombay	...	...	...	...	...	3
Bengal	...	...	...	...	...	7
North-Western Provinces and Oudh	...	...	...	...	...	4
Punjab	...	...	...	...	...	3
Burma	...	...	...	...	...	4
Central Provinces	...	...	...	...	...	2
TOTAL						28

The complete arrangement cannot be made at once; as occasion offers, the districts will be placed in charge of Civil Assistant Surgeons until the maximum number (28) is reached.

ORDER.—Ordered that a copy of this Resolution be forwarded to all Local Governments and Administrations (except Coorg and Hyderabad) for information and guidance, and to the Department of Finance and Commerce for information.

Ordered also that the Resolution be published in the Supplement to the *Gazette of India*.

[True Extract.]

A. H. L. FRASER,  
Offg. Secy. to the Govt. of India.

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

**Weather Review of India for the Week ending at 8 a.m. on  
Saturday, June 17th, 1899.**

Monsoon rainfall has continued steadily during the week in Burma, Bengal, Assam and on the west coast. On the 12th rainfall was more general and widely distributed than it had been at the commencement of the week and continued to be fairly general on the 13th and 14th. The Punjab, Sind, Rajputana and Gujarat have received only a few showers.

With the exception of the disturbed area in the Arabian Sea near the Bombay Coast and at the head of the Bay, winds have been fairly normal in direction, but have nearly everywhere been lighter than is usual at this time of the year.

The variations in temperature have been generally dependent on the distribution of rainfall. Temperature has been below the normal in Burma, Bengal, Assam and on the west coast, and the mean temperature of the whole country was lowest on the 13th and 14th, days of general and extended rainfall. In Sind and Rajputana temperature was above the normal on almost every day of the week. The greatest changes in temperature occurred in the Punjab where it was largely in excess at the commencement of the week, the mean temperature of the whole province being  $6.5^{\circ}$  above the normal. The temperatures reported on Thursday, the 15th, were on an average  $6.3^{\circ}$  below the normal, there having thus been in four days a change in the variation from the normal of  $+6.5^{\circ}$  to  $-6.3^{\circ}$  or nearly  $13^{\circ}$ .

**Daily Summary.**—*Sunday, June 11th.*—Pressure had risen over North-Eastern India, was steady along the west coast and had fallen elsewhere. A shallow depression lay over parts of the North-Western and Central Provinces, and there was an area of relatively low pressure over the Arabian Sea near the Bombay Coast. Easterly winds were extending in Northern India, but the wind force was lighter than usual in most parts of the country. Temperature was lower than usual in Burma, Assam, Bengal, Bihar and Berar and normal or above the normal elsewhere. General rain had fallen over Burma, Assam, Lower Bengal and the west of the Peninsula.

*Monday, June 12th.*—By a brisk rise in pressure along the foot of the North-West Himalayas the area of lowest pressure had been transferred southwards from the West Punjab to Upper Sind. The low pressure area over the Arabian Sea continued. Easterly winds had continued to extend in the north and were reported as far west as Rawalpindi. Temperature was about normal over Burma and Lower Bengal, above the normal in the Punjab and over the southern half of the Peninsula, and below the normal elsewhere. Rainfall had been general over Burma, Assam and the west coast.

*Tuesday, June 13th.*—The barometer had fallen everywhere, and the low pressure area in the Arabian Sea showed signs of intensifying. The direction of the winds was fairly normal, except on the Bombay Coast, where south-easterly winds were reported. Temperature was higher than usual in the West Punjab,

Rajputana, Gujarat and part of Madras and below the normal elsewhere. Rainfall had been more general and widely extended, and some moderately heavy falls were reported from Western India.

*Wednesday, June 14th.*—The barometric changes had been irregular. The low pressure area off the Bombay Coast was apparently growing deeper, and at the head of the Bay cyclonic conditions were developing, winds having cyclonic directions at the north of the Bay and in Deltaic Bengal where a small shallow depression was shown. Temperature was above the normal in the West Punjab, Sind, Rajputana, Gujarat, part of Madras and Lower Burma, and lower than usual in other parts of the country. With the exception of the Punjab, Rajputana, North Bombay and the central parts of India, where little or no rain had fallen, rainfall had been more or less general, and moderately heavy showers were reported from Burma, Bengal and the west coast.

*Thursday, June 15th.*—The low pressure area off the Bombay Coast had almost disappeared, but the depression at the head of the Bay continued, though it had hardly developed at all during the previous twenty-four hours. Very high winds were reported from the Bombay Deccan, but the winds on the west coast had veered to their normal monsoon directions. Higher temperatures than usual had been registered in Sind, Rajputana, Gujarat, the Central Provinces and the Madras Coast, but elsewhere temperature was below the normal. In Bengal, Burma and the West Peninsula rainfall had been general and in some places heavy, but there had been practically no rain over the central parts of the country, Sind, Gujarat and South Madras.

*Friday, June 16th.*—The distribution of pressure was somewhat irregular and unusual, a large area of low pressure occupying nearly the whole of Central and Northern India. Off the Bombay Coast pressure was again unsteady and conditions unsettled. The small depression at the head of the Bay had moved inland over Orissa. From Ratnagiri northwards light winds were reported, but in other parts of the west coast and in the Deccan winds were very strong. Temperature had fallen fast in Orissa and Gujarat and was below the normal in Orissa, Upper India and at Bombay. General rain had been received in Burma, Assam, Bengal and the west of the Peninsula, and some heavy showers were reported from the west coast and Bengal.

*Saturday, June 17th.*—Pressure had fallen briskly over the Punjab and risen generally over the Peninsula and Lower Burma, a tendency being thus shown to the re-establishment of the normal distribution of pressure. Small areas of squally unsettled weather existed over the head of the Bay and over the north-east of the Arabian Sea. At False Point and Veraval unsteady local north-east winds were blowing, but a fairly general south-easterly and easterly current prevailed over Bengal and up the Gangetic Plain as far as the Punjab. The mean temperature had risen fast in the Punjab and fallen fast in Chota Nagpur and the Bombay Deccan. There had been little or no rain in Upper and Central India and the centre and east of the Peninsula, but in the other parts of the country rainfall had been general and seasonable.

*Temperature.*—The mean temperature of the week has been lower than usual over the greater part of India. The deficiency has been considerable to large in Chota Nagpur, the North-West Provinces and Oudh, the mean temperature for the whole of the North-West Provinces and Oudh being  $8.9^{\circ}$  below the normal on the 13th, and  $9.8^{\circ}$  below the normal on the 14th. Temperature has been generally in excess in Sind and Rajputana and, during the first part of the week, in the Punjab. The changes in temperature have been large in the Punjab, the variations from the normal changing from  $+6.5^{\circ}$  on the 11th to  $-6.3^{\circ}$  on the 15th. In Burma temperature throughout the week approximated closely to the normal, as the largest variation was only  $-1.3^{\circ}$  on the 11th.

The following table gives the mean temperature variation data for the week :

Province.	JUNE 1899.							Mean variation of week.
	11th	12th	13th	14th	15th	16th	17th	
	°	°	°	°	°	°	°	°
Burma . . . . .	-1.3	-0.2	-0.2	-0.4	-0.6	-0.8	-0.2	-0.5
Assam . . . . .	-7.0	-3.7	-3.6	-1.4	-0.4	-0.7	-2.1	-2.7

Mysore . . . . .	+0.9	+0.5	-0.7	-0.6	+0.1	+1.7	-1.8	0
Madras Coast . . . . .	+3.7	+1.2	-0.8	+0.8	+0.7	-0.2	+0.4	+0.8
Madras Deccan . . . . .	+0.9	+1.8	-0.4	+0.3	-0.3	+1.4	+1.2	+0.7
South India . . . . .	+1.7	+2.0	+0.5	+0.1	-0.4	-0.5	-0.8	+0.4
Mean for whole of India . . . . .	0	-1.0	-1.9	-1.5	-1.0	-0.7	-1.2	-1.0

The mean temperature for the whole country was normal on the 11th, but for the whole of the remainder of the week it was in defect, the deficiency being largest on the 13th when it amounted to 1.9°. For the whole week the mean variation was -1.0°.

The following gives the highest maximum reported on each day :

June 11th . . . . .	117.1°	at Jacobabad.
" 12th . . . . .	116.1°	" Do.
" 13th . . . . .	114.2°	" Do.
" 14th . . . . .	113.2°	" Do.
" 15th . . . . .	112.2°	" Do.
" 16th . . . . .	107.7°	" Jodhpur.
" 17th . . . . .	111.3°	" Jacobabad.

**Rain.**—There has been a gradual extension of easterly winds and of monsoon rainfall in Northern India during the past week. On Sunday general rainfall was confined to Burma, Assam, Lower Bengal and the West Peninsula; on Monday to only Burma, Assam and the west coast, but showers were more numerous in Central India and the North-Western Provinces. Rainfall was much more widely extended on Tuesday, Wednesday and Thursday, the only provinces where it was insignificant or altogether wanting being Sind, Rajputana, the Punjab, the central districts and the greater part of Madras. On Friday and Saturday the rain reported was chiefly from Burma, Bengal, Assam and the west of the Peninsula.

Rain has fallen every day in Burma, Bengal, Assam, Bihar and the west coast, but it has been lighter than usual in Burma, Assam and Deltaic and North Bengal. It has been heavier than usual in the remaining districts of Bengal and on the west coast. Rainfall in excess of the normal has, during the past

week, also fallen in the North-Western Provinces, the south-eastern, southern, submontane and hill districts of the Punjab, Gujarat, Kathiawar and the East Coast (North). The largest absolute variations from the normal rainfall of the week occurred in the west coast districts, and were: Coorg + 11.52 inches, Malabar + 6.32 inches and the Konkan + 5.29 inches.

The last three columns of the table at the end show that the rainfall of the period 4th to 17th June was normal or in slight defect in Burma, normal in Deltaic Bengal and Bihar, in slight defect in North and East Bengal, and in excess in Assam and the remaining divisions of Bengal. Rainfall was slightly to considerably in excess in the North-Western Provinces and in Gujarat and Kathiawar and normal or in slight excess in the west coast districts. Less rain than usual has been received in the central, northern, western and hill districts of the Punjab, the Central Provinces, Rajputana, Central India and Madras.

The following were the principal large totals recorded at individual stations during the week:

Burma	Maungolaw (Akyab)	16.55 inches.
Assam	Cheera Poonjee (Khasia Hills)	16.99 "
West Peninsula	Kayetri (Malabar)	25.95 "
	Karkul (South Kanara)	27.85 "
	Virajpet (Coorg)	18.01 "
	Bhatkol (North Kanara)	28.62 "
	Rajapur (Ratnagiri)	24.52 "
	Chandgore (Belgaum)	18.33 "
	Bavda (Kolhapur)	20.04 "

W. A. BION,  
for Meteorological Reporter to the  
Government of India.

SIMLA, 22nd June, 1899.

M. FINUCANE,  
Offg. Secretary to the Government of India

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

## Weekly Report on the state of the Season and Prospects of the Crops.

**Madras.**—*For week ending 17th June.*—The rainfall was heavy on the West Coast and on the Nilgiris; good in the Northern districts and light in the southern part of the Circars, but there was little or none elsewhere. The water-supply is normal. Ploughing is very general and sowing is proceeding under the larger irrigation works and on the West Coast, but rain is now wanted for general sowing. The standing crop is generally in good condition. Such harvest as there is, is yielding fairly. Pasture is scarce, but fodder is sufficient. Cattle are in normal condition. Prices are slightly dearer in the Deccan; elsewhere they are almost stationary.

**Bombay.**—*For week ending 22nd June.*—There was rain throughout the Presidency Proper during the week; the fall was heavy in the Konkan and good or moderate elsewhere, except in Bijapur and in the greater part of Sholapur, where the fall was light and insufficient for general sowing. Ploughing and sowing operations are progressing generally and transplantation in Kanara and Hyderabad. Sowings are retarded by excessive rain in parts of Dharwar and Kanara. Fodder is sufficient, except in parts of Sind. A deficiency of water exists in parts of Sind and Baroda territory. Agricultural stock is healthy. Prices have risen in seven and fallen in two districts.

**Bengal.**—*For week ending 19th June.*—Cloudy and unsettled weather prevailed during the week, and good general rain fell in every district. The agricultural prospects of the Province are so far very favourable. The sowing of early rice and jute is nearly finished and the young plants are doing well. Lands are being ploughed and the sowing of the autumn crops and winter rice is going on. The condition of young sugarcane is generally good. A large flight of locusts passed through a portion of the Patna district, but no damage is reported. Locusts are still reported from Dacca. The fodder-supply is everywhere sufficient, except in one thana in Manbhum. No important change in the price of common rice is reported.

**North-Western Provinces and Oudh.**—*For week ending 21st June.*—Rain has been general in the Province. Preparations for the autumn crop sowings are in active progress everywhere, and early crops are being sown in some districts. Indigo and sugarcane are doing well. Supplies and fodder are sufficient. Prices have risen in places, otherwise they are almost stationary or falling slightly.

**Punjab.**—*For week ending 22nd June.*—Rain has fallen in all districts, except Amritsar, Shahpur, and Peshawar. Harvesting of spring crops is nearly over. Extra spring crops, as well as the standing autumn crops, are being watered. Rice and maize are being sown in Peshawar. Ploughings and sowings of autumn crops continue. More rain is urgently wanted. The outturn of the spring crops is reported average or below average and that of the extra spring crops is expected to be fair to average; but is below average in Ferozepore and Dera Ismail Khan. Recent rain has been beneficial to the standing crops and will help ploughings, but more is required for sowing purposes. Hail fell in parts of Lahore and damaged the crops. Cattle are said to be in fair condition, except in Hissar, Delhi, Shahpur, and Dera Ismail Khan, where they are getting lean. Fodder is scarce in Delhi, Shahpur, and parts of Hissar, Lahore, Peshawar and Dera Ismail Khan districts. Prices—especially of wheat—are rising in Hissar and Dera Ismail Khan; falling in Rawalpindi and Peshawar; and are unchanged elsewhere. Wheat is selling from 16½ to 22½.

barley 29 to 32, gram from 20 to 29, maize 26 to 32, great millet 19, bulrush-millet 18 to 23½, and rice 14 to 15 seers per rupee.

**Central Provinces.**—*For week ending 20th June.*—There has been general rain over the Provinces. Saugor received 3·09 inches; Seoni 3·44; and Sambalpur 4·09. In the remaining districts the falls have been lighter. Ploughing operations are almost completed and sowing is in progress in some parts of the Provinces. In Saugor, Damoh, and Hoshangabad 4,678, 2,383, and 589 persons, respectively, are in receipt of village relief; and in the last district 68 persons are in receipt of gratuitous relief. The demand for relief is apparently diminishing. Scarcity of fodder and water continues in parts of the Provinces. Prices are generally rising steadily; the price of wheat, gram, rice, and *juar* has risen in some districts, and has fallen in others. The cheapest prices are—wheat 21, gram 36, rice 21, and *juar* 27 seers per rupee; the dearest prices are—wheat 22½, gram 18, rice 10, and *juar* 19½ seers per rupee.

**Burma.**—*For week ending 17th June.*—In Lower Burma ploughing is progressing in all districts. Sowing has also commenced in six districts and young plantain are being transplanted in parts of Henzada. Sowing on hill sides in the Tavoy district is nearly completed. In Upper Burma reaping of the dry weather crop has been completed in parts of Katha and Pakòkku. The crop has suffered from excessive rain as reported last week. Early paddy is being reaped in Mandalay. Sowing on the hill sides in the Northern districts continues in Kyaukse. Transplanting of the early wet weather crop is completed. Ploughing for and sowing of the wet weather paddy crop and the early upland crops such as cotton, sesamum, and maize continue in most districts. The condition of the standing crops is fair, except in the Pagan sub-division of the Myingyan district, where more rain is wanted; and in three townships of Mandalay where the floods have done damage. The price of paddy has been stationary during the week, except for a slight fall in Rangoon, Amherst, Bassein, and Thongwa.

**Assam.**—*For week ending 20th June.*—The weather is wet and unfavourable for tea, but prospects are improving in Sibsagar. Sowing of early rice is finished in the Assam Valley. Ploughing for late rice, planting of sugarcane, and sowing of late rice seedlings are in progress. Prospects of early rice are fair on low lands, but the crop has been somewhat damaged by floods in the Surma Valley and partly in Nowgong. Tea blight is prevalent in Kamrup and Cachar. Fodder is scarce in parts of Sylhet. Prices—common rice—Silchar and Dhubri 17; Sylhet 19; Gauhati 17; Tezpur, Sibsagar, and Dibrugarh 12; and Nowgong 13 seers per rupee.

**Mysore and Coorg.**—*For week ending 20th June.*—**MYSORE:** Rainfall—16 cents in the Civil and Military station and rain general and good in parts of Hassan, Kadir, and Shimoga. Prices have slightly risen in Bangalore and Mysore. *Ragi* (*Eleusine coracana*) has been sown in parts of Tumkur and Mysore.

**COORG:**—Rainfall—18 inches 84 cents. Ploughing for rice continues. Prices of food-grains are stationary. Water and fodder for cattle are sufficient.

**Berar and Hyderabad.**—*For week ending 21st June.*—**BERAR:** The weather is warm with seasonable rainfall. Preparation of land for the monsoon crop is well advanced. Sowing of cotton has commenced. Fodder and water are insufficient in parts of the Province. Prices are fluctuating.

**HYDERABAD:** Rainfall during the week—76 cents. Autumn sowings have commenced in parts. Prices of grain are stationary. Prices—wheat 10, coarse rice 10½, and *jowari* 24½ seers per current sicca rupee.

**Central India.**—*For week ending 21st June.*—Good rain fell in Central India during the week. Agricultural operations have been completed in Gwalior and are in progress elsewhere. Agricultural stock and pasturage are in good condition. Prices are above normal in Bundelkhand and normal elsewhere.

**Rajputana.**—*For week ending 21st June.*—Good rain fell during the week—Abu received 3·04 inches; Serohi 1·80; Meywar 1·97; Shahpura 1·5; Bikanir 1·15; Merwara over 1·00 inch; Pertabgarh ·72; Bhurtpore ·60; and Ajmere ·38; the fall was slight elsewhere, but there was no rain in Marwar and Jey-sulmere. Agricultural operations are proceeding satisfactorily. Ploughing and sowing are progressing in parts. The condition of cattle and fodder is unchanged. Prices are rising in Kotah and Haraoti; slightly in Ajmere; and are steady elsewhere. Four persons emigrated from Ajmere during the week. The total emigration from Merwara to date numbers—4,431. The numbers employed on relief works were—Ajmere 568, Merwara 7,926, and Marwar 996. There are also 311 on ordinary works and 267 on gratuitous relief in Ajmere-Merwara. Prices have risen slightly in Ajmere, Beawar, and Marwar.

**Kashmir.**—*For week ending 20th June.*—The weather is fine. Prospects of the spring crops are excellent. Prices continue below normal. Rice—27 seers per rupee.

**JAMMU PROVINCE.**—*For week ending 21st June.*—Slight rain fell during the week. Prices are falling slightly. Prices—wheat 16 to 22, and maize 23 to 31 seers per rupee. The condition of the standing crops is fair. Sowings of the autumn crops are in progress. Fodder is sufficient.

**Nepal.**—*For week ending 17th June.*—Rainfall—2·26 inches. The weather is stormy and showery. Indian-corn and upland rice are doing well. Rice—8½ seers per rupee.

M. FINUCANE,

*Offg. Secretary to the Government of India.*

PUBLIC.

NO. 1.

*Calcutta, the 3rd January, 1899.*

The Right Honourable George Nathaniel, Baron Curzon of Kedleston, in the county of Derby, in the Peerage of Ireland, appointed by the Queen, Empress of India, to be Her Imperial Majesty's Viceroy and Governor General of India, arrived by the East Indian Railway at Howrah at 4-30 P.M. (Calcutta time) this day, attended by his personal staff and an Aide-de-Camp to the Viceroy. Lord Curzon was received at the Howrah Railway Station by the Secretaries to the Government of India, the Military Secretary and Aides-de-Camp to the Viceroy, the Commissioner of Burdwan, one of the Secretaries to the Government of Bengal, the Brigadier-General Commanding the Presidency District with the District Staff, the Commissioner of Police, Calcutta, the Chairman of the Commissioners of Calcutta, the Sheriff of Calcutta and the Magistrate of Howrah. Lord Curzon then proceeded to Government House, where he was received by His Excellency the Viceroy and Governor General, His Honour the Lieutenant-Governor of Bengal, and the Members of the Governor General's Council.

2. At 9-30 A.M. (Calcutta time) on the 6th instant Lord Curzon, accompanied by the Members of the Governor General's Council, will proceed from the Throne Room to the Council Chamber in Government House, where His Lordship's Commission from Her Majesty the Queen, Empress of India, will be read by the Home Secretary.

3. A Royal Salute will then be fired from the ramparts of Fort William in honour of Lord Curzon on his assumption of the office of Viceroy and Governor General of India.

A Guard of Honour of British Infantry and a Guard of Honour of the Calcutta Volunteer Rifles, will be drawn up opposite the grand entrance of Government House.

All Officers of Government stationed at Calcutta will be in attendance at Government House upon the occasion. Consular Officers and other Representatives of Foreign Governments at Calcutta and non-official gentlemen are invited to be present at the grand staircase.

Full dress will be worn by Civil, Naval and Military Officers and morning dress by gentlemen not entitled to wear uniform.

## MILITARY SECRETARY'S OFFICE.

### NOTIFICATION.

No. 2639-M.

*Calcutta, the 4th January, 1899.*

With reference to paragraphs 2 and 3 of the Home Department Notification No. 1, dated the 3rd January 1899, relative to the assumption of the Office of Viceroy and Governor General of India by the Right Honourable George Nathaniel Baron Curzon of Kedleston, at 9-30 A.M. on Friday, the 6th January 1899, it is notified that Gentlemen entitled to the Private Entrée at Government House will enter by the South-West Gate, alight at the South Entrance, and proceed through Government House to the top of the Grand Staircase.

The carriages of Gentlemen (except such as have the Private Entrée) will enter by the North-East Gate, set down at the Grand Staircase, and pass out by the North-West Gate.

The Public Gates of Government House will be closed at 9-15 A.M. Calcutta time, subsequent to which no carriages will be allowed to enter the gates till after the departure of the Earl of Elgin.

After the assumption of the Office of Viceroy and Governor General of India by the Right Honourable George Nathaniel Baron Curzon of Kedleston, His Excellency the Earl of Elgin will leave Government House for Prinsep's Ghat *en route* for England at 10 A.M. (Calcutta time) on Friday, the 6th January 1899.

The *cortège* will pass out by the North-East Gate, Government Place East, pass South of the Eden Gardens and along the Strand Road.

By Command,

The following Notification will be issued to-morrow morning and is now published in advance for the information of those concerned :—

## HOME DEPARTMENT.

### NOTIFICATION.

PUBLIC.

No. 35.

*Calcutta, the 6th January, 1899.*

The Right Honourable the Earl of Elgin will leave Government House *en route* for England at 10 A.M. this day. His Lordship will embark with his suite from Prinsep's Ghât on board the R.I.M.S. *Guide*.

His Excellency the Viceroy and Governor General desires that the same honours which were accorded to himself upon his recent arrival in Calcutta shall be paid to the Earl of Elgin upon the occasion of His Lordship's leaving Calcutta after resigning the office of Viceroy and Governor General of India.

A Guard of Honour of British Infantry and a Guard of Honour of the Calcutta Volunteer Rifles, will be drawn up opposite the grand entrance of Government House. A Guard of Honour of Native Infantry will be drawn up opposite Prinsep's Ghât.

The line of route from the entrance of Government House to Prinsep's Ghât will be lined throughout by troops under the orders of the Brigadier-General Commanding the Presidency District.

A Royal Salute will be fired from the ramparts of Fort William as the Earl of Elgin leaves Government House, and another Royal Salute will be fired as His Lordship embarks at Prinsep's Ghât.

All officers of Government (excepting those mentioned below) will be in attendance upon the grand staircase of Government House. Consular Officers and other representatives of Foreign Governments at Calcutta and non-official gentlemen are invited to be present on the grand staircase.

The Earl of Elgin will be escorted from Government House to Prinsep's Ghât by the Viceroy's Body Guard and the Calcutta Light Horse.

The Lieutenant-Governor of Bengal, attended by his personal staff, will be present at Prinsep's Ghât.

The Members of the Governor General's Council will also be present at Prinsep's Ghât.

The following officers will be in attendance at Prinsep's Ghât :—

Secretaries to the Government of India.

The Commissioner of the Presidency Division.

One of the Secretaries to the Government of Bengal.

The Brigadier-General Commanding the Presidency District with the District Staff.

The Commissioner of Police, Calcutta.

The Chairman of the Commissioners of Calcutta.

The Sheriff of Calcutta.

The Magistrate of the 24-Parganas.

An Aide-de-Camp to the Viceroy will attend upon the Earl of Elgin as far as Diamond Harbour.

The troops will not be withdrawn until the receipt of orders to that effect.

Full dress will be worn by the troops and by Civil, Naval and Military Officers on this occasion, and morning dress by all gentlemen not entitled to wear uniform.

## FINANCIAL STATEMENT FOR 1899-1900.

## PART I.

## INTRODUCTION.

In presenting my Financial Statement of March 1898 I alluded to the calamities of famine, war, pestilence, and earthquake which had fallen upon us during the year then closing, and I went on to refer to the promise of brighter times introduced by the abundant harvest of 1897. The recovery of the country has been more rapid than any of us anticipated at the time I allude to; another good harvest has been gathered, and although the plague still casts a shadow over the land, the general condition of the people as evidenced by the Returns of Trade and of Revenue is prosperous, and the famine of 1896 and 1897 is now little more than a memory, its effects being obliterated by the return of prosperous seasons. I cannot, however, pass from the subject without deriving from it one lesson which it seems to me to afford—namely, that the margin between prosperity and adversity in India must be a very parrow one, for if we have learned that one bountiful harvest suffices to restore the country after a widespread and severe famine, we have learned also that the failure of the seasonal rains in a single month of the year is sufficient to set back a full tide of prosperity; and that this is a possibility which in the administration of India, and in its financial administration especially, we dare not leave out of account.

2. In the two calamitous years of which I told the history last March, namely, 1896-97 and 1897-98, I had to shew that the accounts of the Empire were in deficit to the aggregate amount of, as nearly as possible, seven crores of rupees (Rx. 6,988,100 since increased to Rx. 7,064,233). In the two succeeding years (those of which I present the estimates to-day) I am glad to say that this deficit has been, or will be, more than covered, for so complete is the reversal of last year's position that in passing from 1897-98 to 1898-99 we pass from a deficit of Rx. 5,359,211 to a surplus of Rx. 4,759,400, and in my Budget Estimates for next year I anticipate a surplus of Rx. 3,932,600. I lay these figures before the Council at the very commencement of my Statement, as I have no doubt they are anxious to know, as soon as possible, the general drift of the figures which I now proceed to explain in greater detail.

## Accounts of 1897-98.

3. The Accounts of 1897-98 were, as usual, published in the first half of January, and the results then shewn compare as follows with the anticipations formed in March 1898:—

	Revenue.	Expenditure.	Deficit.
	Rx.	Rx.	Rx.
Estimated in March 1898 .	96,561,500	101,844,600	5,283,100
Actual Accounts . . .	96,442,004	101,801,215	5,359,211
Accounts { Better + Worse — . }	—119,496	+43,385	—76,111

The differences on the whole were very small, as the accounts under each of the heads of Revenue and Expenditure closely followed the Revised Estimate. Indeed, had it not been that we determined after the close of the year to make certain grants (aggregating Rx. 88,100) to the Provincial Governments of Bombay and of Bengal in further reimbursement to them of their famine expenditure, the difference in the whole account between Revised Estimate and Actuals would have been only Rx. 12,000.

## Revised Estimates of 1898-99.

4. In the Budget Estimate for 1898-99 I estimated the results of the year to be a surplus of Rx. 891,400. But we now find that mainly through abundant revenue, military economies on the North-West Frontier, and very favourable exchange, the result of the year will be a surplus, as I have already stated, of Rx. 4,759,400. I shall explain afterwards that on a review of the financial position of the several Local Governments, whose balances have been exhausted by famine and plague, and who have still to meet pressing demands for expenditure while the expansion of their revenues has for a time been set back by the calamities referred to, we have decided to make them grants in aid of their resources, out of the surplus that has accrued to us on the Imperial account. The total amount of these grants is Rx. 700,000, and thus the surplus of the year is reduced from Rx. 4,759,400 to Rx. 4,059,400. The money may be described as expenditure brought to account by anticipation, that is to say, it goes at present merely to swell Provincial balances, and when actually spent on the purposes in consideration of which it is granted, it has not again to be charged against the surplus of the year, but passes through the Provincial adjusting entry.

5. The detail of the differences between the Revised Estimates for 1898-99, as now presented, and the amounts taken in the Budget Estimates prepared twelve months ago are set out in the following statement:—

## Estimates of 1898-99.

	Budget.	* Revised.	Revised Better.	Revised Worse.
<b>ENGLAND.</b>				
STERLING IN ENGLAND—				
Revenue . . . . .	188,300	232,500	44,200

Irrigation . . . . .	3,211,500	3,218,200	...	6,700
Military Works and Special Defences . . . . .	1,135,300	1,113,700	22,100	
Civil Works . . . . .	4,702,100	4,493,600	208,500	
Army (Ordinary Charges) . . . . .	16,625,800	16,541,500	84,300	
“ Warlike Operations . . . . .	1,458,000	1,023,700	434,300	
Provincial Adjustment—	60,418,300	59,375,800	1,092,500	
Addition (+) or Deduction (—) made for increase or decrease of Provincial and Local Balances . . . . .	—116,800	+717,900	...	834,700
Special grants to Provincial Governments . . . . .	...	+700,000	...	700,000
NET EXPENDITURE CHARGED AGAINST REVENUE IN INDIA . . . . .	60,301,500	60,743,700	...	442,200
Surplus . . . . .	891,400	4,059,400	3,168,000	

(a) Including interest and receipts under Civil Works.

(b) This entry in the Indian portion of the accounts is a *minus* one, as the interest passed to the charge of Railway and Irrigation is greater than the whole amount of interest payable in India.

6. The first point to note is that, except for a small falling-off under Stamps and Registration, every one of the Revenue heads shews better results than anticipated in the Budget Estimates. The improvement under Land Revenue is mostly in Burma and the North-Western Provinces. In Opium we have got much better prices in Bengal than we estimated for, namely, Rx. 4,164,000 against Rx. 3,900,000, and in Bombay the low rate of the pass-duty, as compared with previous years, has led to a revival of the export which last year shewed a very considerable decline. The increase in Salt Revenue, which now produces 9 crores against the 8½ which it gave us in the two famine years, is a satisfactory indication of the improvement in the condition of the people, and the Customs Revenue continues to increase as trade continues to flourish.

7. Post Office and Telegraph shew a falling-off, due in the latter case partly to the cessation of hostilities on the North-Western Frontier, but chiefly to the more extensive use of deferred telegrams which are now delivered by hand, and in the former case to reduction of rates of postage. We calculate that by the increase, from one tola to one-and-a-half, of the unit of weight for inland postage we diminish the annual revenue by Rx. 60,000, and by adopting the Imperial Penny Postage (for India, one anna) we give up Rx. 40,000. A considerable portion of this last item will be recovered for us by an arbitration given in our favour, in respect of the distribution, between the English and the Indian Post Offices, of the subsidy charges payable to the Peninsular and Oriental Company and by reductions of the scale of charge in respect of continental transit.

8. Under Railways—Net Earnings—we have received Rx. 778,100 more than we estimated, the important items being—

		Rx.
1. North-Western	Better	410,000
2. Great Indian Peninsula	Better	416,000
3. Bombay, Baroda and Central India	Better	210,000
4. Rajputana-Malwa	Better	70,000
5. Eastern Bengal	Worse	110,000
6. Southern Mahratta	Worse	80,000
7. South Indian	Worse	50,000
8. Madras	Worse	55,000
9. Assam-Bengal	Worse	31,000
Net of the above		<u>780,000</u>

The improvement is due generally to large exports of grain consequent on good winter crops, and in one case to postponement of works of repair and renewal.

The Plague is responsible for the falling-off on the Railways in Southern India.

An inferior jute crop and the postponement of jute deliveries in Calcutta was the cause of the worse result on the Eastern Bengal State Railway, and inclusion in the Working Expenses of the revenue share of repairs of earthquake damages caused the reduction on the Assam Bengal-Railway.

9. On the expenditure side, the first considerable improvement is under Opium, and is due to our failure to obtain as good a crop as we hoped. We have been able to recommence the building up of our Reserve, but the good season for which for many years we have waited has not yet come, and the produce still remains short of our standard. There has also been a considerable saving in the expenditure of the Salt Departments, and fair amounts in the other Revenue Departments. The Civil Departments shew the usual considerable savings in their Budget Estimates, but the amount has been more than swallowed up in the expenditure caused by Plague. The head "Medical"

alone shews an excess over estimate of Rx. 327,800, most of which is in Bombay, and all of which for practical purposes falls on the Imperial Account, for the Provincial Governments are not able to bear the expenditure without assistance in the form of grants from Imperial.

10. The Army expenditure in India (ordinary) is less by Rx. 84,300 than estimated in the Budget, and of the Budget provision of Rx. 1,458,000 in India for Warlike Operations only Rx. 1,023,700 has been spent, the Military authorities having, from the very beginning of the year, found it practicable to reduce the forces maintained on the North-West Frontier.

### Rate of Exchange.

11. The rate of exchange taken for the purpose of the Budget Estimate last March was  $15\frac{3}{8}$  pence (or rather £1 = R15'6), that being the rate actually realized in 1897-98. At the opening of the year 1898-99 the current rate was  $15\frac{1}{16}$  or  $15\frac{1}{8}$ , but under the influence of a strong demand in April and May (in each of which months the Secretary of State sold two millions sterling of Council Bills) it quickly rose to 16 pence and over. This demand was due mainly to unusually large exports of Rice, Wheat, and Seeds, the figures of which for the five principal months of export are shown in the following table:—

*Exports (Value in Rupees) of Rice and Wheat (including Flour) and Seeds by Sea from British India during February to June 1896, 1897, and 1898.*

		February.	March.	April.	May.	June.
Rice	1896	2,39,79,157	2,35,35,019	1,28,19,258	87,78,324	1,05,82,552
	1897	2,05,74,378	2,26,73,146	85,42,095	74,73,502	72,22,083
	1898	2,11,33,697	2,39,73,430	1,74,35,984	1,39,93,271	1,00,28,152
Wheat	1896	13,68,050	14,41,371	20,32,888	27,38,742	21,72,359
	1897	3,28,052	1,83,682	3,47,801	5,03,124	6,14,133
	1898	9,99,271	55,10,041	1,09,23,719	2,85,78,798	2,28,64,833

	1898	58,76,128	74,23,872	88,45,785	1,25,27,552	1,16,97,108
Total all three.	1896	3,12,92,356	3,46,48,477	2,51,83,779	2,42,49,536	2,36,41,225
	1897	2,34,10,945	2,58,59,081	1,32,82,506	1,88,82,836	1,63,90,736
	1898	2,80,09,096	3,69,08,243	3,72,05,488	5,50,99,621	4,45,90,093

12. The position thus gained at the beginning of the year has never been lost, and the rate has continually fluctuated about 16 pence, now a little over it and now a little under it. In the latter half of the year the rate has never been below  $15\frac{5}{16}$  pence. The drawings have now for some time stood at Rx. 700,000 a week, and we expect when the year closes to have remitted by Council Bills £19,000,000 equal to Rx. 28,540,000, giving, as nearly as possible, an average rate of sixteen pence. The Revised Estimates for 1898-99 are accordingly made up at this rate.

13. For next year I have made the modest estimate of  $15\frac{1}{4}$ d. I fully anticipate we shall realize, as this year, something closely approaching to 16 pence, but our continual practice in India is to avoid sanguine estimating, and following this principle I am loth to take a figure which may have the taint of being, under existing circumstances, the best possible.

14. It may be noted that not only are the remittances of the current year the largest on record (there being hitherto only one year, 1881-82, in which they exceeded £18 millions), but we have in addition to these remittances received in India in exchange for silver at the rate of Rx. 15 per £ sterling, Rx. 2,616,400 of gold which we now hold as part of the currency reserve in addition to Rx. 255,400 similarly held on 1st April 1898.

#### Budget Estimates, 1899-1900.

15. The Budget Estimates of Revenue and Expenditure for the coming year 1899-1900 made up at this rate of exchange shew a surplus of Revenue of Rx. 3,932,600. It will be best perhaps to explain the figures by comparing them with the Revised Estimate for the current year, as exhibited in the Statement in paragraph 5 above.

#### Budget Estimates of 1899-1900 compared with the Revised Estimates of 1898-99.

	Revised, 1898-99.	Budget, 1899-1900.	1899-1900, Better than 1898-99.	1899-1900, Worse than 1898-99.

(a) Including Interest and Receipts under Civil Works.

16. Under Revenue heads in India the collection of arrears of Land Revenue still goes on, but we do not expect next year quite so much as in the current year. Under Salt and Customs we expect a slight advance over the Budget Estimates of 1898-99, but have not estimated to receive so great an advance over these as we shall certainly receive in the current year. The current prices of Opium warrant our estimating for a considerable increase in the revenue under this head.

17. Under Railways the estimates are for a small advance in net earnings. The details are as follow:—

	Budget, 1898-99. Rx.	Revised. 1898-99. Rx.	Budget, 1899-1900. Rx.
State Railways—Gross	19,382,600	19,695,800	20,237,100
Working Charges	9,770,500	9,876,600	10,047,000
Net	9,612,100	9,819,200	10,190,100
Guaranteed Railways—Net	2,424,000	2,995,000	3,192,500
<b>TOTAL NET</b>	<b>12,036,100</b>	<b>12,814,200</b>	<b>13,382,600</b>

18. The Great Indian Peninsula Railway contributes Rx. 130,000, the Madras Railway Rx. 65,000, and the East Indian Railway Rx. 60,000 of the improvement shewn in Budget, and we expect the Eastern Bengal and Southern Mahratta Railways to recover from their low figures of 1898-99. The increasing mileage of the East Coast Railway will also bring in better returns; on the other hand, there are heavy renewals on the North-Western Railway to be provided for. Under Civil Departments we have to provide for considerable additions to Police expenditure (partly due to Plague); and we have also made fairly ample estimates for Plague expenditure, the charges under "Medical" in India being as follows:—

	Total. Rx.	Including Plague Expenditure. Rx.
1894-95	1,003,438	...
1895-96	1,020,077	...
1896-97	1,065,158	19,000
1897-98	1,328,952	297,000
1898-99, Revised	1,542,900	508,900
1899-1900, Budget	1,678,100	354,200 + 209,500

The last-mentioned Rx. 209,500 is shewn separately, because it is in the nature of a reserve in the "India" Section of the Accounts, and if actually spent, it will not pass under "Medical" in the Imperial Portion of the Accounts, but be dealt with as a transfer.

19. We have increased the total provision for Military Works to Rx. 1,322,300, against expenditure in 1897-98 and 1898-99 of about Rx. 1,168,385 and Rx. 1,197,600, the purpose of the increase being to meet charges likely to fall upon us in respect of places of defence and similar works on the North-West Frontier.

20. The Military Estimates shew large savings in India as compared with the current year, the India figures being—

	Ordinary Expenditure. Rx.	Warlike Operations. Rx.	Total. Rx.
1896-97	17,243,137	18,206	17,261,343
1897-98	16,514,547	3,847,992	20,362,539
1898-99, Budget	16,625,800	1,458,000	18,083,800
1898-99, Revised	16,341,500	1,023,700	17,365,200
1899-1900, Budget	16,873,400	38,900	16,912,300

### No Remission of Taxation.

21. In view of the surpluses as shewn in the Revised and Budget Estimates, the Government of India have carefully considered the question whether they should propose, at present, any remission of existing taxation. The conclusion to which they have come is that any such proposal would be premature, and this mainly on two grounds. The first is that we have, as it were, to make up for arrears. As stated in my opening paragraph, we have had in the past two years deficits aggregating Rs. 7,064,233, and we ought to regard ourselves as under an obligation to recover our position by accumulating counterbalancing surpluses. The second and weightier reason is that we have in contemplation, as is well known, certain extremely important measures of currency reform, which are under the consideration of a Committee sitting at the India Office in London. Whatever the advice of that Committee may be, we consider we are bound to prepare for any measures that may result from it by preserving as strong a financial position as possible, and we consider we would act unwisely if we were to reduce our financial strength by remitting existing taxation and run the risk of finding ourselves, by our own action, less free than we would otherwise be to undertake any measures of currency reform that may seem desirable.

### Railway Construction.

22. I have, in former Financial Statements, referred to the policy recently established of laying down a programme of Railway Construction for three years in advance. The first of these programmes was for the three years ending 31st March 1899. This programme was at first intended to include an expenditure of 27 crores of rupees, but was afterwards extended to 29½ crores. Latterly, however, financial difficulties have obliged us somewhat to curtail the expenditure, and we expect to expend against the programme of 29½ crores the following amounts :—

	Rs.
In 1896-97 (actuals) . . . . .	8,658,800
„ 1897-98 ( „ ) . . . . .	8,145,500
„ 1898-99 (Revised Estimate) . . . . .	8,387,500
<b>TOTAL</b> . . . . .	<b>25,191,800</b>

23. I leave to my Honourable Colleague Sir A. Trevor the task of stating in detail the results of the expenditure. It is sufficient here to set them out in the most general form (the figures of the Railways of Native States and of other Railways that lie outside our accounts being omitted) :—

	Standard Gauge.	Metre Gauge.	Special Gauges.	Total.
<i>March 31, 1896—</i>				
Mileage open . . . . .	10,430	6,842	36	17,308
„ under construction . . . . .	1,490	1,086	...	2,576
<b>TOTAL</b> . . . . .	<b>11,920</b>	<b>7,928</b>	<b>36</b>	<b>19,884</b>
<i>March 31, 1899—</i>				
Mileage open . . . . .	11,728	7,522	35	19,286
„ under construction . . . . .	814	971	77	1,862
<b>TOTAL</b> . . . . .	<b>12,542</b>	<b>8,493</b>	<b>113</b>	<b>21,148</b>

24. I divide the Railway Construction in the present estimates, for convenience sake with reference to our accounts, into four categories, namely:—

*First.*—State Railway Construction; money found by Government, but also by debentures in the case of the East Indian and Assam-Bengal Railway Companies.

*Second.*—Construction by Assisted and Working Companies out of funds raised by them or in some cases advanced by Government to them. Also Branch Line Companies under a firm guarantee.

*Third.*—Open line capital and new construction by the old Guaranteed Companies.

*Fourth.*—Construction by Companies outside the accounts of the Government, and also construction by Branch Line Companies on rebate terms.

The above classification slightly differs from that of last year's Statement, as under new arrangements every portion of the above comes within the programme, except the fourth category, *viz.*, Company construction outside the accounts of Government, and Branch Line Companies not under firm guarantee.

25. The Estimates of Capital construction for the two years 1898-99 and 1899-1900 now stand as follows, the figures for programme expenditure in the Revised Estimate of 1898-99 being modified so as to correspond with the new classification:—

	Revised Estimate, 1898-99. Rs.	Budget Estimate, 1899-1900. Rs.
<b>FIRST CATEGORY—STATE RAILWAYS—</b>		
Funds available by Famine Grant	695,400	490,000
Grant under—		
48.—State Railway Construction	2,882,200	3,465,000
East Indian Railway Company's Debentures	1,573,800	750,000
<b>TOTAL</b>	5,151,400	4,705,000
<b>SECOND CATEGORY—ASSISTED COMPANIES</b>	3,155,300	3,009,900
<b>THIRD CATEGORY—OLD GUARANTEED COMPANIES</b>	851,600	1,107,800
<b>TOTAL "PROGRAMME"</b>	9,158,300	8,822,700
<b>Add—FOURTH CATEGORY (outside programme)</b>	1,470,100	950,300
<b>TOTAL</b>	10,628,400	9,773,000

\* N.B.—The Chittagong Port Works, connected with the Assam-Bengal Railway, shown in last year's Statement as Miscellaneous Public Improvements, are now included as "Railway Construction."

26. Having now carried to a fairly successful issue this policy of temporary activity in railway construction, we think it wise, both from a railway and from a financial point of view, to curtail for a time the rate of progress of railway construction. The nine or ten crores a year sanctioned in 1897 was not meant to be permanently adopted, and we deem it desirable now to allow a short time for the earning capacity of the lines recently constructed to develop itself, before again undertaking special burdens in the direction of capital outlay upon railways.

27. For these reasons we deemed it advisable to fix about 20 crores as the limit of our expenditure for the next three years; and a programme was accordingly prepared for expenditure as follows:—

	Rx.
1899-1900	6,772,700
1900-1901	6,728,400
1901-1902	6,821,000
<b>TOTAL</b>	<b>20,322,100</b>

but we have had to alter these figures for the following reason. In the Budget Estimates of 1898-99, we proposed to spend under the first three years' programme a sum of Rx. 10,788,900 in the year 1898-99, but the inability of the workshops in England to meet the demands which were made upon them by ourselves and the various constructing companies has reduced the expenditure of 1898-99 to Rx. 8,387,500. Many of the orders, however, will be completed and paid for in 1899-1900, and we have therefore to provide, under the new three years' programme, in 1899-1900 not only the intended Rx. 6,772,700, but a considerable amount in addition, which may be regarded as arrears of the old programme handed on to the new one. The amount estimated for is therefore Rx. 8,822,700.

28. The following are the entries under the first category (State Railways):—

<i>Expenditure by State Agency—</i>	Revised, 1898-99.	Budget, 1899-1900.
Open lines—	Rx.	Rx.
North Western . . . . .	238,300	212,300
Oudh and Rohilkhand . . . . .	95,700	72,800

TOTAL . . . . .		3,155,300	3,009,900

30. The estimate under the third category (old Guaranteed Companies) provides for :—

		Revised, 1898-99.	Budget, 1899-1900.
		Rx.	Rx.
Open Line Capital—			
Great Indian Peninsula . . . . .		73,600	74,000
Madras . . . . .		20,100	60,000
Bombay, Baroda and Central India . . . . .		459,100	410,000
Extensions—			
Calicut-Cannanore . . . . .		70,600	200,400
Amalner Palgaon-Chaliagaon Dhulia . . . . .		228,200	363,400
TOTAL . . . . .		851,600	1,107,800

31. The principal projects classed under the fourth category and outside the "programme" are:—

	Revised, 1898-99. Rs.	Budget, 1899-1900. Rs.
Bengal Doocars Extensions . . . . .	40,000	200,000
Bengal and North-Western Railway Exten- sions . . . . .	445,000	365,000
Tapti Valley . . . . .	650,000	230,000
South Behar . . . . .	204,000	77,500
Smaller Branch Lines . . . . .	131,100	77,800
<b>TOTAL</b> .	<b>1,470,100</b>	<b>950,300</b>

#### Capital Expenditure on Irrigation.

32. The amount of Rs. 750,000 has hitherto been provided for expenditure on Irrigation. In 1899-1900 a further amount of Rs. 100,000 is provided under this head. The grant for 1898-99 which was of the usual amount, Rs. 750,000, has not been fully worked up to, owing chiefly to the approaching completion of the Chenab Canal and partly to it not having been found possible to start work on the Jhelum Canal in the early part of the year.

33. The principal works under this head are at present:—

	Revised, 1898-99. Rs.	Budget, 1899-1900. Rs.
Mandalay Canal . . . . .	90,000	100,000
Fatehpur Branch of the Lower Ganges Canal	63,600	42,600
Chenab Canal . . . . .	151,500	80,000
Jhelum Canal . . . . .	36,200	210,000
Jamrao Canal . . . . .	142,200	133,900
Other Projects . . . . .	208,700	283,500
<b>TOTAL</b> .	<b>692,200</b>	<b>850,000</b>

#### Remittance and Debt.

34. The following account shews in a shortened form the requirements of the Secretary of State; the figures are drawn up so as to shew separately the transactions on account of Government, and the transactions arising out of the operations of Railway Companies:—

	Revised, 1898-99. £	Budget, 1899-1900. £
<i>Requirements on Government Account—</i>		
Excess of expenditure on Revenue Account	16,091,200	16,324,500
Expenditure not charged to Revenue .	791,100	682,100
Net payments on Remittance Accounts, etc . . . . .	225,400	268,800
<b>Total Requirements</b>	<b>17,107,700</b>	<b>17,275,400</b>
<i>Transactions of Railway Companies—</i>		
Net receipts on account of Capital .	2,183,100	1,970,000
Payments for Stores, etc. . . . .	2,718,000	3,181,700
<b>Net Outgoings</b> .	<b>534,900</b>	<b>1,211,700</b>
<b>Net Funds required</b> .	<b>17,642,600</b>	<b>18,487,100</b>

35. The following figures shew the manner in which the above requirements have been or are to be financed:—

	Revised, 1898-99. £	Budget, 1899-1900. £
By Council Bills (net Remittance) . . .	19,000,000	17,000,000
By addition to Permanent Debt . . .	1,912,800	...
Less reduction of Temporary Debt . . .	—1,500,000	...
By reduction of Cash Balance . . .	...	1,487,100
Deduct—Addition to Cash Balance . . .	—1,770,200	...
	<u>17,642,600</u>	<u>18,487,100</u>

36. In last year's Financial Statement I mentioned that the Secretary of State intended, besides renewing £6,000,000 outstanding temporary debt, to raise £6,000,000 permanent debt. This amount was raised in July in the form of India  $2\frac{1}{2}$  per cent stock, but it was issued at a considerable discount (namely at a rate of £88 10s. 5d. per cent), and produced only £5,297,700 in cash. With the money he discharged permanent debt to the extent of £3,384,900, so that the net amount raised by addition to sterling debt was £1,912,800. The Secretary of State has decided that the discount on the loan, *viz.*, £702,300, shall not be charged upon the revenues of the year, but shall be discharged by a Sinking Fund at the rate of interest borne by the loan, *viz.*,  $2\frac{1}{2}$  per cent, lasting over 50 years. There are already one or two Sinking Funds of the kind in connection with the sterling debt; £12,622 being the total charge appearing in the Accounts of 1897-98. The amount added by the new Sinking Fund is about £7,000.

37. The heavy drawings of the year, by Council Bills, enabled the Secretary of State to improve upon his intention of renewing the £6,000,000 outstanding temporary debt, and he renewed only £4,500,000 of it. The remainder of the excess of drawings went towards increase of the Cash Balance, which is estimated to stand, on 31st March 1899 at the unusually high figure of £4,304,400.

38. For next year, 1899-1900, the Secretary of State estimates to draw £17,000,000 by Council Bills, and though he does not estimate for any increase or decrease in either permanent or temporary debt, he considers that in view of the high balances which his Estimates, both Revised and Budget, show, he may find it possible to pay off some of the outstanding temporary debt.

39. In March last we estimated that we would have to raise a rupee loan of Rx. 3,000,000 in India, but as the time approached for our doing so, we found both that improved revenues had added to our resources, and the market was not favourable for so large a loan. We therefore limited our proposed loan to an amount of Rx. 1,200,000 under  $3\frac{1}{2}$  per cent conditions, and this amount was raised on August 24th at an average rate of Rs 4 12½ annas per cent. The price remained about this figure for some months, but has recently advanced to over par.

40. We reckon that in India we shall be able next year to meet all the demands upon our Treasuries without raising any new debt, but it must be understood that all these announcements about the amount of contemplated remittances and loans are subject to the usual reservation of entire liberty to the Secretary of State to alter his plans as he may find occasion.

### PROVINCIAL FINANCE, 1892 to 1899.

(The tabulated figures in this part are hundreds of Rx., that is, two ciphers are omitted.)

41. The progress of Provincial Finance is easiest studied by considering separately:—

*First.*—The amount of net Revenue, of which a definite portion settled by the terms of the "Contract" is at the disposal of the Provincial Government for its expenditure on Civil Administration.

*Second.*—The modification of this Provincial share of net Revenue, caused by special arrangements, different in each Province, in connexion with certain portions of Irrigation and Railway Administration, involving in some cases a small net outlay and in some a small net revenue.

*Third.*—The appropriation of the funds thus obtained towards the Provincial Expenditure, and especially the relation between the increase of expenditure and the increase of available funds:

42. The first figures to be set out are, therefore, the totals of the net revenues, that is, the revenues less expenditure directly charged against them. They are as follow, the figures being quite independent of any considerations as between Imperial and Provincial:—

*Total Ordinary Revenues—*

	Contract, 1892.	1892-93.	1893-94.	1894-95.	1895-96.	1896-97.	1897-98.	1898-99. Revised.	1899-1900. Budget.
Central Provinces . . .	1,248.6	1,244.0	1,231.2	1,171.3	1,252.9	1,089.8	1,048.5	1,322.9	1,398.7
Burma (a) . . .	3,643.3	...	...	...	...	...	3,948.2	4,142.0	4,012.8
Assam . . .	814.0	842.9	962.5	992.1	1,003.4	1,015.3	995.8	1,047.3	1,047.1
Bengal . . .	7,081.6	7,325.2	7,445.8	7,606.9	7,714.8	7,823.5	7,833.9	7,998.8	8,058.9
North-Western Provinces and Oudh . . .	7,677.8	7,716.1	7,778.9	7,589.1	7,866.2	6,655.6	7,264.8	8,419.1	8,470.1
Punjab . . .	3,060.1	3,133.8	3,261.1	3,223.5	3,290.5	3,224.3	3,400.8	3,561.8	3,530.4
Madras . . .	6,817.1	7,106.2	7,460.2	7,645.6	7,719.3	7,478.8	7,863.2	8,015.5	7,988.0
Bombay (b) . . .	5,412.1	5,489.1	5,646.1	5,559.6	6,018.2	5,367.0	5,625.2	5,950.2	5,943.0

(a) The figure against Burma in the column "Contract, 1892" represents the Contract of 1897.

(b) The figures relating to alienated Land Revenue, an entry peculiar to Bombay, are omitted from both sides.

43. The next statement shews the portion of these revenues which, according to the Provincial contract in each case, is credited to Provincial Account. The figures stand as follows, and it may be noted that the revision of the contract made with effect from 1897-98 onward, was such as to cause little change in the total of the Provincial share, except in the two Provinces of Bengal and Madras where it was reduced by Rx. 90,000 and Rx. 130,000 respectively, and in the North-Western Provinces where it was increased by about Rx. 120,000, namely, the cessation of a temporary reduction of Rx. 50,000, and a direct addition of about Rx. 70,000. (The figures are as they stand before the addition of the contributions from Imperial entered at the end of the table in paragraph 47 and the special grants-in-aid and expenditure therefrom of which mention is made in paragraphs 65 and 66 below):—

*Provincial Share of Revenues—*

	Contract, 1892.	1892-93.	1893-94.	1894-95.	1895-96.	1896-97.	1897-98.	1898-99. Revised.	1899-1900. Budget.
Central Provinces . . .	653.3	652.5	647.2	623.9	649.6	598.9	566.1	713.1	750.8
Burma (a) . . .	2,603.1	...	...	...	...	...	2,768.5	2,901.8	2,822.5
Assam . . .	477.1	501.3	549.7	556.4	566.9	575.9	584.3	626.0	626.3
Bengal . . .	2,767.1	2,899.4	2,941.4	3,049.2	3,102.6	3,160.9	3,552.1	3,517.5	3,549.3
North-Western Provinces and Oudh . . .	2,235.8	2,254.4	2,284.9	2,218.7	2,309.8	1,950.7	2,101.5	2,719.2	2,729.1
Punjab . . .	1,282.6	1,414.0	1,451.2	1,440.0	1,476.8	1,483.5	1,571.3	1,631.2	1,611.6
Madras . . .	2,368.7	2,491.0	2,587.9	2,653.5	2,676.7	2,627.1	2,588.5	2,655.7	2,632.4
Bombay . . .	2,404.4	2,451.5	2,490.8	2,481.2	2,601.2	2,405.4	2,475.9	2,554.9	2,569.7

(a) The figure against Burma in the column "Contract, 1892" represents the Contract of 1897.

44. I offer some comments on these two statements, shewing them in parallel columns :—

	Total Imperial <i>plus</i> Provincial.	Provincial Share only.																		
<i>Central Provinces.</i>	Fairly continuous progress—a small drop in 1894-95 due, as the details shew, to failure of Land Revenue—Recovery in 1895-96. Then a serious loss of Revenue in the two famine years 1896-97 and 1897-98. But complete recovery in the early future is anticipated.	The Province obtained in the earlier years little or no margin of revenue beyond that allowed for in the Contract of 1892, and in the famine years there was very great loss as compared with that standard. If the anticipations for 1898-99 and 1899-1900 are realized, it will be very fairly off.																		
<i>Burma</i>	No figures are here shewn for the years preceding 1897-98, the accounts having been completely changed in that year by the incorporation of Upper and Lower Burma as a single Province of account. The revenue is considerably in excess of that which was taken as the standard for the framing of the Provincial Contract of 1897. The falling-off in 1899-1900 is under "Forests," and may perhaps be due only to cautious estimating.	Revenue considerably in excess of the standard taken for the contract.																		
<i>Assam</i>	Revenue steadily progressive. The effect of the earthquake in 1897-98 is shewn only in a slight slackening of the rate of progress.	Has all along enjoyed a considerable excess of revenue—at present nearly 30 per cent (Rs. 170 to 190 thousands) over the contract figure of 1892. But of this amount Rs. 33,000 represent a special addition made to meet the South Lushai expenditure transferred to Assam.																		
<i>Bengal</i>	Also shews a steady progressive revenue. Owing presumably to the famine the progress from 1896-97 to 1897-98 was rather less than in other years. The falling-off was mainly under "Excise," as Land Revenue in Bengal is little subject to variation in consequence of famine.	The accounts of the Province were greatly affected by the withdrawal from the Province in 1897 of the extremely progressive revenue of the Eastern Bengal Railway the share of Revenue substituted therefor not being so progressive. Combining the ordinary revenue and the Railway account the figures stand thus:— <table><tr><td>Standard of 1892</td><td>2,806,3</td></tr><tr><td>1892-93</td><td>2,962,4</td></tr><tr><td>1893-94</td><td>3,011,0</td></tr><tr><td>1894-95</td><td>3,193,2</td></tr><tr><td>1895-96</td><td>3,235,7</td></tr><tr><td>1896-97</td><td>3,328,0</td></tr><tr><td>1897-98</td><td>3,297,8</td></tr><tr><td>1898-99</td><td>3,238,7</td></tr><tr><td>1899-1900</td><td>3,267,0</td></tr></table> which certainly may be called fairly progressive, the figures of the last two years being due in part, it may be hoped, to caution in estimating. The new contract, commencing from 1897-98, involved a reduction of about Rs. 90,000 in the Provincial share.	Standard of 1892	2,806,3	1892-93	2,962,4	1893-94	3,011,0	1894-95	3,193,2	1895-96	3,235,7	1896-97	3,328,0	1897-98	3,297,8	1898-99	3,238,7	1899-1900	3,267,0
Standard of 1892	2,806,3																			
1892-93	2,962,4																			
1893-94	3,011,0																			
1894-95	3,193,2																			
1895-96	3,235,7																			
1896-97	3,328,0																			
1897-98	3,297,8																			
1898-99	3,238,7																			
1899-1900	3,267,0																			

	Total Imperial plus Provincial.	Provincial Share only.
<i>North-Western Provinces.</i>	A fairly progressive revenue till the famine year, then a tremendous falling-off in Land Revenue (1896-97). Partial recovery in 1897-98 and in the following two years very high figures due to recovery of famine arrears.	The unequal operation of the Irrigation account and the change effected in it in 1897 renders it necessary to combine the figures for this Province as in the case of Bengal. They stand thus— Standard of 1892 . . . 2,215.4 1892-93 . . . 2,205.2 1893-94 . . . 2,314.5 1894-95 . . . 2,234.1 1895-96 . . . 2,170.3 1896-97 . . . 2,160.2 1897-98 . . . 2,432.4 1898-99 . . . 2,641.5 1899-1900 . . . 2,632.2 The story of these figures is shortly this,— At first a little improvement over the standard taken for settlement. In 1895-96 a failure of irrigation revenue, 1896-97 famine, and consequent failure of revenue. Thereafter the rapid recovery of the Province and the realizations of famine arrears of revenue bring in ample resources. The new contract, commencing from 1897-98, increased the assets by about Rx. 120,000. The same as in the other column.
<i>Punjab</i>	Steady progress as reckoned over the whole period, but a slight set back in the famine year.	
<i>Madras</i>	Shows a very progressive Revenue, the advance being only temporarily interrupted by famine.	Rapid increase of revenue up till the famine year—from that time figure fairly steady, but not advancing. The Provincial share from 1897-98 onwards would stand about Rx. 130,000 higher but for the revision of contract which came into operation from that year.
<i>Bombay</i>	An increase up to the famine year, then a considerable set back which has not yet been fully recovered.	The same remark as the first one in the case of Madras.

45. The sets of figures which I next shew are those relating to the Irrigation and Railway portion of the Provincial contracts, which I have described as coming in in modification of the amount of ordinary revenue otherwise at the disposal of the several Governments. The amount of modification thus imposed has, except in two cases, only slightly changed during the period under review, and the figures are, therefore, of no great importance except in the cases referred to, namely, Bengal and the North-Western Provinces, and these have been dealt with above:—

#### Railways and Irrigation Accounts—

	Contract, 1892.	1892-93.	1893-94.	1894-95.	1895-96.	1896-97.	1897-98.	1898-99, Revised.	1899-1900, Budget.
Burma *	-125.0	...	...	...	...	...	-116.5	-130.5	-157.0
Assam	-9.5	-13.0	-10.5	-9.3	-10.2	-13.9	-14.2	-22.4	-9.5
Bengal	+39.2	+63.0	+69.6	+144.0	+133.1	+167.1	-254.3	-278.8	-282.3

\* The figure against Burma in the column "Contract, 1892" represents the Contract of 1897.

46. The next step is to examine the expenditure of the various Governments and observe how far they have kept the increase of it within the limits imposed by the increase of revenue. I shew separately the ordinary expenditure and the direct expenditure upon famine and plague.

47. The details are as follow, and the figures have to be compared with the general statement of available resources in the right column under paragraph 44 above:—

*Expenditure Account—*

	Contract, 1892.	1892-93.	1893-94.	1894-95.	1895-96.	1896-97.	1897-98.	1898-99, Revised.	1899-1900, Budget.

\* The figure against Burma in the column "Contract, 1892" represents the Contract of 1897.

48. *Central Provinces.*—The expenditure up to the famine year rose 2 or 3 lakhs (Rs. 20,000 or 30,000) above the standard of 1892; and since, as already observed, there was no margin of revenue, this resulted in the exhaustion of the ample balance, Rs. 205,400 with which the Province started. The strain of the famine year reduced the balance (apart from direct famine expenditure) still further to a deficit of Rs. 52,600 in 1896-97, and a further deficit of Rs. 204,100

in 1897-98, both of which were made up by grants from the Imperial Exchequer. The Province started in 1898-99 without any balance at all, and it is now expected that there will be a deficit in the year of Rx. 11,200, which must again be made up by a grant from Imperial Revenues. In 1899-1900 its estimated expenditure is well within its means.

The Province has taken practically no share of the cost of famine, which has been entirely Imperial—Rx. 1,640,245.

49. *Burma.*—Has not spent up to the rate of its increase of revenue, and has in consequence an ample and increasing balance. It is arranging now to expend part of the amount in meeting certain demands for Provincial Public Works, and has also made other proposals for expenditure on the public services.

50. *Assam.*—Had a comfortable balance, all along, of 10 lakhs (Rx. 100,000) more or less, keeping its increase of expenditure well up to, but not in excess of, its increase of revenue. The repair of earthquake damages imposed heavy charges in 1897-98 and 1898-99, which have largely exhausted the Provincial balance of Rx. 94,400 and absorbed also a grant of Rx. 160,000 by the Government of India; the balance being reduced for 31st March 1899 to about Rx. 25,000. In 1899-1900, after providing for absolutely necessary expenditure for Public Works and for the repair of earthquake damages, the estimates shew a deficit of Rx. 54,900.

The expansion of ordinary expenditure has been very considerable during the period under review.

51. *Bengal.*—The revenue of this Province, as above shewn, has afforded a margin for expansion of Provincial expenditure—namely, Rx. 2,806,300 in 1892 to (say) Rx. 3,300,000 in 1899-1900. The expenditure, however, was kept well in hand, so that the balance increased from Rx. 225,500 in March 1893 to Rx. 582,000 in March 1896. But this high balance sank to Rx. 92,200 two years later, as Rx. 518,400 out of it were spent in direct famine and plague charges. The ordinary expenditure in the two years now under estimate is taken at Rx. 3,141,600 and Rx. 3,272,000, which may be regarded as within the means of the Province, though it leaves a small deficit on the estimates of 1899-1900.

The Imperial Exchequer incurred famine charges in Bengal up to a total of Rx. 576,821 (about half of the total), but did not otherwise contribute by grants-in-aid to the resources of the Province.

The Province of Bengal has not had much plague expenditure to bear out of its own account, but we have made to it in 1898-99 a grant-in-aid of Rx. 20,000 which it will distribute to those Municipalities and Local Bodies whose funds have been most severely affected by expenditure on plague.

52. *North-Western Provinces.*—The Province had the advantage of starting in 1892 with a large balance still remaining on the credit side, but the rate of its annual expenditure was in excess of its annual revenue (having been found by reduction of balances), and when in the year before the famine a very favourable monsoon caused a failure of irrigation revenue (an important item in North-Western Provinces finance), the Province found its balance on March 31, 1896, reduced below the stipulated minimum of 20 lakhs (Rx. 200,000), and, as already said, a rate of current expenditure in excess of its current revenue by between 10 and 15 lakhs. During the strain of the famine year nothing could be done to amend this state of things, and the balance was overspent by Rx. 263,600, the amount being accordingly made up by grants-in-aid out of the Imperial Exchequer in the two years 1896-97 and 1897-98.

Under these circumstances, the Province contributed nothing towards the direct famine expenditure, the whole of which, Rx. 2,064,025, was found out of Imperial resources.

For 1898-99 it stands, as explained, without any balance to its credit, and its estimates stand as follows:—

	1898-99. Rx.	1899-1900. Rx.
Revenue Accounts . . . . .	2,641,500	2,632,200
Expenditure Accounts . . . . .	2,421,500 (a)	2,607,700 (b)
Results . . . . .	+ 220,000	+ 24,500

(a) Includes Rx. 19,800, Plague.

(b) Includes Rx. 20,800, Plague.

The handsome surplus which comes in in 1898-99 is due to the recovery by the North-Western Provinces of the arrears of the revenue due in 1896-97 and 1897-98, in compensation for the loss of which Imperial made the grants-in-aid of Rx. 263,600 above alluded to. In the coming year, 1899-1900, the Government, North-Western Provinces, propose to increase their scale of expenditure all round to a rate which they will not be able to maintain after the arrear collections (which add some lakhs to the present scale of revenue) are exhausted and the revenue falls back to its ordinary amount.

In anticipation of this surplus of 1898-99 and 1899-1900 it was stipulated that the benefit of these arrear collections was (*quoad* the Provincial share) to be considered as not applicable to current expenditure, but to be reserved (to the extent of 75 per cent of it) for building up the exhausted Provincial balance. The Government, North-Western Provinces, have fulfilled this pledge, and are now appropriating these arrears to a temporary increase of expenditure bearing in mind the impending diminution in the amount of their annual income as compared with the figures of 1898-99 and 1899-1900.

53. *Punjab*.—The Province has all along proceeded on fairly prosperous lines. The balances which were continually diminishing before the famine year are now on the rise, and the expenditure is within the amount of revenue available. The Province escaped any severe share in the calamities of 1896 and 1897, and the Imperial expenditure on famine was less than 3 lakhs (Rx. 30,000), the Province itself contributing about 12 lakhs (Rx. 120,000) or, including "Local," nearly 16.

54. *Madras*.—The expanding revenues of this Province have carried it through its period of disaster. It contributed moderately, that is, a total of a little over 20 lakhs (Rx. 200,000), towards its famine expenditure, the Government of India having undertaken all the rest (*viz.*, Rx. 732,995) so as to leave the Province with an opening balance of Rx. 71,800 in 1898-99. The Government of India further propose to make a grant to Madras of the amount of direct famine and plague expenditure incurred by it in 1898-99, namely, Rx. 20,700, and to estimate for next year a similar grant of Rx. 64,100. They also grant a further sum of Rx. 30,000 in 1898-99, placing the amount at the disposal of the Local Government for grants-in-aid to such Municipalities and Local Bodies as have been most affected by plague expenditure. With its famine and plague expenditure thus made up the Province shows a fair surplus on its transactions of 1898-99, and a small deficit in 1899-1900.

The detailed figures are:—

	1898-99. Rx.	1899-1900. Rx.
Revenue Accounts . . . . .	2,655,700	2,632,400
Deduct—Railway and Irrigation Account . . . . .	310,900	313,900
Net available Revenue . . . . .	2,344,800	2,318,500
Proposed Expenditure, excluding Plague and Famine . . . . .	2,266,300	2,331,200
Plague and Famine . . . . .	20,700	64,100
TOTAL . . . . .	2,287,000	2,395,300

55. *Bombay*.—The continuous advance of the expenditure of the Province while the advance of the revenue was entirely set back by the famine year, has brought a strain upon the finances, irrespective of the direct effect of famine and plague expenditure. The figures may be set out as follows :—

	Revenue Account as modified by Irrigation and Railway figures.	Ordinary Expenditure Account.	Excess of Expenditure.
	Rx.	Rx.	Rx.
1892 standard	2,409,500	2,409,500	
1892-93	2,410,100	2,434,000	
1893-94	2,475,200	2,455,700	
1894-95	2,480,000	2,526,500	6,200
1895-96	2,604,900	2,560,200	
1896-97	2,403,200	2,588,900	185,700
1897-98	2,483,600	2,605,400	121,800
1898-99	2,560,800	2,534,600	26,200 (Excess of Revenue.)
1899-1900	2,378,400	2,604,700	26,300 (Excess of Expenditure.)

The above figures exclude all direct Famine and Plague expenditure, and shew that the revenue and expenditure were in equilibrium for the first four years of the period under review, but that in the next two (the years of calamity), by reason of the falling-off in revenue, without an intermission of the increase in expenditure, the Provincial balance had to bear a reduction of Rx. 307,500.

The actual condition of the account till the end of 1897-98 was as follows :—

Balance, March 31, 1892.	Rx.
	407,000
Reduced by excess of ordinary expenditure—	Rx.
1892-93 to 1895-96	6,200
1896-97	185,700
1897-98	121,800
	313,700
	93,300
Further reduction by direct famine and plague expenditure not included in the above—	
1896-97	35,400
1897-98	191,500
	226,900
Net over-expenditure of balance till 31st March 1898	133,600
Cancelled by general grant-in-aid in 1897-98 of	183,600
Leaving credit balance on 31st March 1898 of	50,000

The Revised Estimates for Bombay for 1898-99 show :—

Revenues Account	2,554,900	} Surplus on ordinary account Rx. 26,200.
Irrigation and Railway Account	+ 5,900	
Expenditure Account, excluding Plague and Famine.	2,534,600	
Plague and Famine Expenditure	354,800	

56. Putting the figures of the various provinces together, the following shews the facts up to March 31, 1898:—

Statement in Rx.	FAMINE AND PLAGUE EXPENDITURE (DIRECT).		
	From Imperial sources.	From Pro- vincial and Local sources.	Grants-in-aid by Imperial to Provincial.
Central Provinces . . . . .	1,540,245	8,820	256,700
Burma . . . . .	54,975	63,336	...
Assam . . . . .	...	..	80,000 (a)
Bengal . . . . .	576,821	553,951	...
North-Western Provinces . . . . .	2,064,025	...	263,600
Punjab . . . . .	27,502	157,920	...
Madras . . . . .	732,995	228,601	...
Bombay . . . . .	1,242,760	27,887	183,600

(a) For earthquake.

57. The Government of Bombay, both in respect of its Provincial account and in respect of its Municipalities, have been very hardly pressed by plague expenditure. They have submitted to us an examination of the financial condition of their principal Municipalities, and we have agreed to their giving out of their general revenues relief to their Municipalities to the extent of Rx. 228,078, of which the greater part goes to the City Corporation. Including this grant from their revenues, the Government of Bombay will have spent in direct charges of famine and plague—

	Famine. Rx.	Plague. Rx.	Total. Rx.
1896-97 . . . . .	24,000	11,400	35,400
1897-98 . . . . .	...	191,500	191,500
1898-99 . . . . .	24,800	330,000	354,800
TOTAL . . . . .			581,700

Out of the expenditure of the first two years, aggregating Rx. 226,900, the Provincial Government have met out of their ordinary revenues Rx. 43,300, and the balance Rx. 183,600 has been made up by special contributions by Imperial; in the same way its balance of Rx. 50,000, and Rx. 26,200, its surplus of 1898-99, fall far short of the charges Rx. 354,800 of 1898-99, and it is necessary for the Imperial Government to make a further grant-in-aid of Rx. 278,600 leaving the province, on April 1899, with an opening balance of nil. The total direct expenditure on plague and famine which has been borne by the province comes to Rx. 43,300 in the first two years and Rx. 76,200 in the last, or Rx. 119,500 in all.

It is anticipated that Rx. 126,400 of Plague expenditure will be incurred in Bombay in 1899-1900, and an equal amount of grant-in-aid from Imperial to Provincial has been estimated for in that year.

58. The grants shewn in the above paragraphs may be regarded as grants in the ordinary way of business, that is, grants made on the principle that in any case of extreme calamity, when Local aid has been exhausted, the charge must fall, as far as possible, on Provincial resources, and when they are exhausted the Imperial Government must bear the burden; and I think a liberal interpretation has been given to this Imperial responsibility, for we have taken over the direct Provincial expenditure on famine and plague of the two Provinces most affected by plague, without insisting upon their first defraying any part of it out of their own balances, and it is our desire at present to go still farther. On one or two past occasions, when Imperial finances have been subjected to great stress, we have called upon the Provincial Governments to give us aid out of their resources,

and under present circumstances, when Imperial finance by the recovery of exchange and from other causes is prosperous, and Provincial finance has been sore smitten by the consequences of famine and plague, we consider that a portion of our surplus cannot be better employed than in restoring the financial condition of the various provinces and relieving them from the financial difficulties which accompany the emergence from a state of famine and plague, so as to enable them to carry on their ordinary administration and meet their ordinary administrative necessities.

59. In the case of Bombay, though, as above described, we have made large grants towards the direct expenditure on famine and plague, yet the effect of these two calamities is still shewn in the falling-off in revenue and in indirect expenditure (on police and the like) which accompanies plague measures. We propose on these considerations to make to Bombay a grant of Rx. 150,000.

60. Bengal has not been affected by plague expenditure to anything like the same extent as Bombay; but, on the other hand, its finances have suffered from the very large extent to which the famine expenditure was met from Provincial and Local resources. We propose to make to it a similar grant of Rx. 150,000. This is in addition to the assistance already undertaken to be given from Imperial sources towards the European General Hospital at Calcutta, and also in addition to Rx. 20,000 mentioned in paragraph 51.

61. In Assam the only immediate difficulties arise in connection with earthquake damages. Towards this we have already given Rx. 160,000, and the Chief Commissioner has asked for Rx. 67,500 more. We propose now to close this account by a grant of Rx. 100,000.

62. The accounts of the Central Provinces are weighted only in respect of the very small balance it at present possesses, and the Estimates of 1898-99, as already stated, produces a deficit of Rx. 11,200; we propose to make it a grant of Rx. 50,000.

63. The claim of Madras arises mainly in respect of the fact that, at the last revision of the Provincial contracts, a larger resumption of revenue was made from it than from any other province. We propose to make a grant to it of Rx. 100,000, besides the above mentioned grants for the Famine and Plague expenditure, namely, Rx. 50,700 in 1898-99 and Rx. 64,100 in 1899-1900.

64. Burma in our opinion requires no assistance, nor, if we make a strict reckoning, do the North-Western Provinces or the Punjab. But the expenditure in these two provinces has been limited by the consideration of their general financial position, and they have also had to bear some expenditure, both direct and indirect, upon plague. We propose to give to the former a grant of Rx. 100,000, and to the latter a grant of Rx. 50,000.

65. All these amounts will be granted in the accounts of the year 1898-99, and the same amount (less the excess expenditure in the Central Provinces, Assam, Bengal, Madras, and Bombay already provided for by the Provincial Governments in their estimates) will be entered in the Estimates of 1899-1900 as expenditure out of Provincial balances under the head of Civil Works,—not as an invitation to the several Local Governments to expend the amounts in that year, but as a permission to them to do so (by re-appropriation or otherwise), if on a consideration of their general financial position and of the necessity of keeping a balance in hand, they deem it advisable. The amounts thus entered include in the case of Bengal and Madras the payments they may make against the grants of Rx. 20,000 and Rx. 30,000 referred to in paragraphs 51 and 54. The Provincial Governments should, however, bear in mind that the grants now made are grants made once for all, and that it will be dangerous for them to take them as warranting any expenditure of a recurring character; also that the Government of India in making the grants admits against itself no liability to make

good to Provincial Governments the loss or expenditure incurred by them in respect of the kinds of expenditure to which it has had regard in assessing the distribution of the grants; but admits merely that as in times of Provincial financial prosperity it has called upon the provinces to come to the aid of the general exchequer, so in times of Imperial financial prosperity it is reasonable and expedient that it should depart from a strict interpretation of its financial relations to the Provincial Governments and aid them when at the same time they have had, and have, special financial misfortunes pressing on them. Perhaps I may refer in this connexion to paragraphs 127, 128 and 129 of Major Baring's (Lord Cromer's) financial statement of 1883.

66. These several free grants, as they may be called, are specially entered in the figures attached to the Financial Statement and are in addition to those entered at the end of the statement in paragraph 47. They are:—

	Rx.
Central Provinces . . . . .	50,000
Assam . . . . .	100,000
Bengal . . . . .	150,000
North-Western Provinces . . . . .	100,000
Punjab . . . . .	50,000
Madras . . . . .	100,000
Bombay . . . . .	150,000
<b>Total . . . . .</b>	<b>700,000</b>

67. We have made fairly ample provision next year, namely, Rx. 126,400 in connection with the estimates of Bombay, Rx. 64,100 in Madras, and Rx. 209,500 not yet appropriated, for expenditure on combating the plague, which we may not unlikely have to meet in the future out of Imperial resources as we have done in the past. But we are not prepared, in a general way, to pay, out of Imperial resources, all the direct expenditure which the plague may cause, or to relieve Municipalities and other Local Bodies from the burden which necessarily falls upon them in respect of sanitary and medical expenditure caused by the approach or the advent of plague. Still less can we undertake to make up to Provincial Governments the excess expenditure which may have to be incurred under Police or in the other ordinary departments of Provincial Administration, or invite them to deal with ordinary administrative demands upon them with the same freedom which might be possible and even advisable, were we not all in the presence of a threatening calamity that necessitates our husbanding our resources as far as is possible.

### TWENTY YEARS' FINANCE.

68. Following up a purpose which I set before myself in last year's Financial Statement, I published, contemporaneously with the Finance and Revenue Accounts of last year, a summary of these accounts for the twenty years ending March 31, 1898. The summary was necessarily a statement of figures only, with no attempt at criticism, and I desire here to give some continuous account of the results which the figures shew, and explain where our Revenue and Expenditure have during these twenty years increased or decreased. The plan I adopt is to take one set of figures as the standard of the Revenue and Expenditure at the beginning of the period (or rather, say, for the year 1879), and another set as representing the standard for 1896 (that is, before the famine burst on the land). These seventeen years may be taken as a period of practically continuous financial history.

69. For the first of these two standards I take the average of the figures of 1878-79 and 1879-80. If we eliminate the war figures of these two years, which

in a comparison such as the present ought to be excluded, we obtain the following figures:—

	1878-79. Rx.	1879-80. Rx.
Surplus or Deficit . . . . .	+ 2,134,098	- 1,227,193
War Expenditure, India . . . . .	600,109	4,591,644
"    England . . . . .	£ 76,110	171,480
Surplus if war be excluded . . . . .	2,810,317	3,538,231

But we have still further to modify these figures by reason of the fact that they did not provide for the full famine liability of Rx. 1,500,000, the Famine Insurance being at the time in suspense, owing to the heavy war expenditure. This consideration adds Rx. 1,187,177 and Rx. 1,396,353 to the expenditure and reduces the surpluses to Rx. 1,623,140 and Rx. 2,141,878; or an average of Rx. 1,882,509.

That is, if we exclude consideration of war expenditure, and if we take Rx. 1,500,000 as the proper annual measure of famine liabilities, we had in 1879 a surplus of revenue of Rx. 1,882,500.

70. To find the similar figure for 1896, I take the figures of the Budget of that year which may be taken as expressing the standard of Revenue and Expenditure at the time. They are as follows, namely:—

	Rx.
Revenue in India (Budget) . . . . .	97,316,800
Expenditure, England, net (Budget) . . . . .	£ 15,735,300
Exchange (according to rate actually realized) . . . . .	10,222,300
India (Budget), less Rx. 20,000 war . . . . .	69,368,500
Add—Amount wanting to make up Rx. 1,500,000 Famine Insurance . . . . .	500,000
Total . . . . .	95,826,100
Surplus of Revenue . . . . .	1,490,700

71. We have therefore, comparing the standard of 1879 with that of 1896, a slightly worse position in the latter of the two years. I have made a careful analysis both of the increase of Revenue and of the increase of Expenditure between the two years, and I find it to be as follows:—

#### Imperial Account.

	Rx.	Rx.	Rx.
Increase of Revenue under Salt, Customs, Tributes and Miscellaneous . . . . .	...	3,810,000	
Imperial Share of Increase of Revenue under Revenues provincially administered . . . . .	...	5,419,400	
Increase of net Revenues under Post Office, Telegraph, and Mint . . . . .	...	457,400	
Improvements under Debt Services, Railways, and Irrigation (excluding consideration of exchange) . . . . .	6,327,500		
Deduct—Loss by exchange charged against Railway Liabilities . . . . .	2,608,300		
		3,719,200	
Famine Insurance reduced in account by transfer to the preceding head of charges for interest on Indian Midland and Bengal-Nagpur Railways . . . . .	...	401,500	
Cessation of Railway Construction out of Revenue . . . . .	...	845,800	
Total available improvement . . . . .	...	...	14,663,300

<i>Absorbed as follows:—</i>	Rx.	Rx.	Rx.
Deterioration of Opium Revenue	...	3,679,800	
Addition to charges for exchange. (Rate diminished from 19'85 pence to 14'45 pence)	7,337,300		
<i>Deduct</i> —Amount taken to Railway Account	2,608,300		
		4,729,000	
Deficit on Civil Administration of Upper Burma	...	455,300	
Army Services: net Charges increased from Rx. 16,693,700 to Rx. 22,167,800 (irrespective of exchange)	...	5,474,100	
Charges under "Political" increased from Rx. 427,100 to Rx. 893,700	...	471,600	
Civil and Miscellaneous charges in India increased from Rx. 1,169,200 to Rx. 1,541,300	352,100		
<i>Less</i> —Savings by decrease under Assignments and Territorial Pen- sions and Stationery	223,800		
		128,300	
Sterling Expenditure other than Army, Debt Services, and Railways in- creased (excluding exchange) from £2,486,400 to £2,920,200	...	433,800	
<b>Total</b>	...	...	15,371,900
Excess of demand over available means	...	...	708,600

#### Provincial Account.

Increase of Provincial share of Reve- nue under Revenues provincially ad- ministered (a)	...	4,102,700	
Increase in net charges for Provincial Civil Administration from Rx. 14,374,900 to Rx. 18,160,800	...	3,785,900	
<b>Balance of increase of Revenue not absorbed</b>	...	...	316,800

(a) That is,  $\frac{1}{4}$  of Land Revenue and of Excise :  $\frac{1}{4}$  of Assessed Taxes, Forest, and Registration :  $\frac{1}{4}$  of Stamps.

The deterioration on Imperial Account, Rx. 708,600, less the improvement on Provincial Account, Rx. 316,800, gives a net deterioration of Rx. 391,800, namely, a reduction in the surplus of Revenue from the standard of Rx. 1,882,500 in 1879 to that of Rx. 1,490,700 in 1896.

72. This list shews that the resources made available by increased revenue and careful administration have practically been absorbed by (1) Loss of Opium Revenue, (2) Increase of Exchange Charges, (3) Increase of Military Expenditure, (4) Increase of Political Expenditure, (5) Increase of Provincial Expenditure, i.e., of charges of Civil Administration, (6) Net Charges on account of Upper Burma.

73. On the first two of these no remark need be made here; they are misfortunes we have had to accept. The last may also be passed over without remark; the occupation of Upper Burma was a measure forced upon us by

political necessity, apart from any question of finance. The Province will, we trust, shortly meet the expenses of its civil administration, but naturally it does not as yet fully pay its way. The other three heads call for special explanation.

74. The subject of Military Expenditure is too vast to be entered on in detail. A general explanation of its increase was given by Sir Henry Brackenbury in the Budget Debate of 26th March 1896 and by Sir Edwin Collen on the same date in 1897. In respect of their military charges the Government of India feel the same necessity which presses upon all other Military Powers, and which has imposed upon even the most pacific nations increased burdens. Both our military system in its details and our general military and defensive policy are closely linked with those of England; and we cannot escape the necessity of increasing our defensive expenditure in the same way, though not perhaps to the same extent, that England does.

75. In illustration of this point I present the following figures; the English ones are taken from the Statistical Abstract of the United Kingdom, 1882 to 1895, pages 10 and 11:—

1895, pages 18 and 19.

DEFENSIVE EXPENDITURE, UNITED KINGDOM (a.)			DEFENSIVE EXPENDITURE, INDIA (b.)	
Army.	Navy.	Total.	Army and Military Works	
£	£	£	Rx.	
1882-83 .	15,133,451	10,259,853	25,393,304	16,928,587
1883-84 .	16,095,326	10,728,781	26,824,107	18,799,134
1884-85 .	18,600,338	11,427,164	30,027,402	16,955,165
1885-86 .	17,027,084	12,660,509	29,687,593	17,340,369
1886-87 .	18,429,272	13,265,401	31,694,673	19,413,293
1887-88 .	18,167,196	12,325,357	30,492,553	20,548,766
1888-89 .	15,919,738	12,990,895	28,910,633	20,305,140
1889-90 .	17,345,812	13,842,241	31,188,053	20,511,504
1890-91 .	17,550,023	14,133,358	31,673,381	20,821,160
1891-92 .	17,258,900	14,150,000	31,408,900	22,570,532
1892-93 .	17,511,700	14,302,000	31,813,700	23,705,932
1893-94 .	17,939,700	14,048,000	31,987,700	23,537,693
1894-95 .	17,899,800	17,545,000	35,444,800	23,966,973
1895-96 .	18,459,800	19,724,000	38,183,800	23,976,714
1896-97 .	18,269,800	22,170,000	40,439,800	24,384,447

(a) Excluding Expeditions and Naval Defence Fund.

(b) Excluding Special Defences and the following Expeditions: (1) Egypt, (2) Quetta, (3) Burma, (4) Chin-Lushai, (5) Chitral.

76. The result of these figures is to shew that while the Defence Expenditure in the United Kingdom has increased by 59 per cent, that in India has increased by only 44 per cent, even including the increase due to the fall of exchange, which affects Indian Military Expenditure in a special degree, owing to the

	£
Net English Expenditure . . . . .	4,000,000
British Soldiers' pay . . . . .	1,500,000
Total . . . . .	5,500,000
	Rx.
Difference of exchange 19'85d. and 14'45d. . . . .	2,526,000

large proportion of it that is measured by a sterling standard. The statement of expenditure in the United Kingdom is free from disturbance by this cause; while, on the other hand, the increase of Indian expenditure includes Rx. 2,526,000 directly due to this cause alone; and if this amount were excluded, the percentage of increase would be reduced to 29.

77. The two most recent measures causing considerable increase of Military Expenditure were the raising of the pay of native soldiers in 1895, and of that of British soldiers in 1898. The former of these concessions had been delayed on financial grounds for a length of time which all our military advisers considered to be open to objection. The second measure, the increase of British soldiers' pay, is the

result of the determination of Her Majesty's Government on a question of general imperial policy.

78. Under the head of Political Expenditure, the increase measured by percentage is even more considerable; in amount it is Rx. 471,600. A few remarks will shew that this increase has been caused solely by the necessities of external policy. Two-fifths of the whole amount arises from the one item of Rx. 180,000 for the subsidy of His Highness the Amir of Afghanistan; and the Afghan Refugees cost at least Rx. 60,000 more. The period under consideration, moreover, has witnessed the rise and development of the Baluchistan Agency, which now accounts for Rx. 130,000 of the outlay charged under this head; the appointment of an Agent on the Perso-Afghan Frontier (Rx. 13,000); the occupation of the Gilgit and Chitral Frontier (Rx. 16,000); and considerable new expenditure, say, Rx. 40,000, in controlling the tribes and employing levies along the North-Western Frontier. The head "Political" contained also in 1896 Rx. 14,000 expended on the African Coast of the Gulf of Aden (the corresponding revenues are under Miscellaneous), and the scheme of Imperial Service Troops has caused a further increase of Rx. 22,000.

79. I pass to the figures shewn against Provincial (including Local) net expenditure, which has increased during the period under review from Rx. 14,374,900 to Rx. 18,160,800. These are the charges of Civil Administration generally, and under such heads increasing outlay is not only justifiable but inevitable, in every country in which civilization is not stationary or retrograding. The system of Provincial finance is based on the theory that the increase in the Provincial share of the Revenues can be set aside for increase of expenditure upon Civil Administration, and that, if the increase is kept within this limit, we have by this limitation, under ordinary circumstances, sufficiently taken into consideration the financial difficulties arising from falling exchange, from the necessities of Military and Political Expenditure, from wars and famines. We proceed, therefore, on the assumption that there is no objection to the Provincial share of the normal growth of Revenue being, as fast as it accrues, spent on administrative improvements. As has often been pointed out, a Provincial Government can do nothing with its money except spend it; it cannot, for example, utilize a surplus for remission of taxation.

#### Conclusion.

80. The statement which I have laid before the Council exhibits, I think, a very favourable condition of Indian Finance. Some of these favourable elements are, I admit, temporary only, and due in a large measure to a specially active trade, others however are permanent and betoken the return of the prosperity and progress which I noted in my statement of March 1896, and which were so rudely interrupted by the outbreak of famine. The plague, though it is a great anxiety to both Imperial and Provincial Administrations, it is, financially speaking, well within our power to cope with, and as the first responsibility for the measures taken in connexion with it rests with the Provincial Administrations, I have been particular to examine the position of the Provincial Financial Accounts, and trust that the measures of relief and assistance sanctioned by the Government of India and set out in the statement will enable them to face the difficulties in which they are placed, though I take for granted they do not claim relief from their share in the anxieties which are inseparable from financial administration in India.

## PART II.

## DETAILS OF THE ACCOUNTS AND ESTIMATES.

## Section I.—The Accounts of 1897-98.

81. The Revised Estimate of 1897-98 was framed for a deficit of Accounts of Rx. 5,283,100; in the closed Accounts this figure rises to Rx. 5,359,211, or 1897-98. Rx. 76,111 worse than was anticipated when the Revised Estimate was framed.

The variations between the figures finally entered in the Accounts of the year and those assumed for the purposes of the Budget and the Revised Estimate are explained in the Appropriation Report published in the *Gazette of India* of the 18th instant.

The following statement compares the Revised Estimates with the Accounts of the year:—

		Revised Estimate.	Accounts.	Accounts, better.	Accounts, worse.
<b>REVENUE.</b>					
India	Rx.	96,262,000	96,139,287	...	122,713
England	£	192,000	193,602	1,662	...
Exchange	Rx.	107,500	109,055	1,555	...
<b>Total</b>	Rx.	96,561,500	96,441,004	...	119,496
<b>EXPENDITURE.</b>					
India—					
Imperial, Provincial, and Local	Rx.	77,136,300	76,939,069	197,231	...
Adjustment of Provincial and Local Surplus or Deficit	Rx.	—705,700	—457,678	...	248,022
<b>Net</b>	Rx.	76,430,600	76,481,391	...	50,791
England	£	16,200,000	16,108,263	91,737	...
Exchange	Rx.	9,123,000	9,121,502	1,498	...
<b>Total</b>	Rx.	101,844,600	101,801,215	43,385	...
<b>DEFICIT</b>	Rx.	—5,283,100	—5,359,211	...	76,111

82. The Revenue in India was less than the sum anticipated in the Revised Estimate by Rx. 122,713, and the Expenditure finally chargeable against that Revenue, after making allowance for the adjustment of the sums by which Provincial and Local Revenues were in surplus or deficit, exceeded the forecast by Rx. 50,791. In India, therefore, the Accounts as a whole turn out worse than the Estimate by Rx. 173,504. Against this must be set an improvement in Revenue in England of Rx. 3,217, and a decrease in Expenditure in England of Rx. 94,176—in all Rx. 97,393, including exchange. The sum of Rx. 76,111, being the difference between the results obtained in India and England, represents the total falling-off in the Accounts as compared with the Revised Estimate of the year. 1897-98. General Results.

83. The Land Revenue actually realised fell short of the Revised Estimate by Rx. 248,658. In the North-Western Provinces the collections were over-estimated by Rx. 157,820, and in Bombay by Rx. 104,384; while in Burma a sum of Rx. 46,270 was collected in excess of the Estimate. Owing to the fact that the largest instalment of Land Revenue falls due towards the close of the financial year, there is at all times a difficulty in making a precise forecast of the March collections, and in the past year the Estimate was also indirectly affected by the 1897-98. Revenue in India.

famine, which left it uncertain to the last moment to what extent it would be possible to enforce any given measure of compliance with the revenue demand of the year.

The Opium Revenue proved worse than the Estimate by Rx. 62,528, due to a decline in the exports of Malwa Opium to China. On the other hand, the realisations under Customs show an improvement of Rx. 63,895, and the Railway Revenue rose by Rx. 90,857 owing to a slight increase of traffic on some of the Railways towards the close of the year.

1897-98.  
Expenditure in  
India.

84. On the Expenditure side the outlay on Famine Relief during the last weeks of the year was less by Rx. 66,112 owing to the cessation of operations earlier than had been anticipated. In the Railway Revenue Account there was a saving of Rx. 125,704 on the Revised Estimate mainly under Working Expenses. Army Expenditure shows an excess of Rx. 62,239 due to increased payments to Native Troops on account of compensation for dearness of provisions and forage.

1897-98.  
Revenue and  
Expenditure  
in England.

85. The reduction in Expenditure in England of £92,737, or including Exchange Rx. 94,176, consists for the most part of a saving under Army Charges of £67,773. The increase in Revenue in England comes to the trifling sum of £1,662, or including Exchange Rx. 3,217, and consists mainly of recoveries on account of stores.

86. The Expenditure not charged to Revenue amounted to Rx. 4,328,541 as compared with Rx. 4,604,600 entered in the Revised Estimate.

#### Section II.—Revised Estimate of 1898-1899.

1898-99.  
Statement of the  
gross figures.

87. The following is a general comparison of the Budget Estimates with the Revised Estimates of 1898-99:—

	Budget.	Revised.	Revised, better.	Revised, worse.
<b>REVENUE.</b>				
India . . . . Rx.	98,791,700	101,217,400	2,425,700	
England . . . . Rx.	1,83,300	2,22,500	44,200	
Exchange . . . . Rx.	105,400	116,200	10,800	
<b>TOTAL . Rx.</b>	<b>99,080,400</b>	<b>101,556,100</b>	<b>2,480,700</b>	
<b>EXPENDITURE.</b>

1898-99.  
General features.

88. The leading characteristic of 1898-99 is the rapid recovery of the revenue from the effect of the unfavourable conditions prevailing in the two preceding years. Under all heads of Revenue, except Stamps and Registration, the sums actually realised are largely in excess of the forecast framed a year ago. The general prosperity of the people has added to the receipts under Salt and Customs; abundant harvests have increased the Railway Revenue; Opium has sold for higher prices and has cost less to produce; the burden of famine

relief has been removed; military expenditure has been reduced earlier and to a larger extent than was anticipated; and the charge for exchange has been less by a crore of rupees than that assumed in framing the Budget. The only adverse feature is the revival and extension of plague which has increased the medical expenditure in every Province and injuriously affected some branches of revenue.

89. The Revenue in India is expected to exceed the Budget Estimate by <sup>1898-99.</sup> Rx. 2,425,700, and besides this there will be a reduction of expenditure of <sup>General Results.</sup> Rx. 1,005,800 made up of Rx. 518,600 under Army, Rx. 305,200 under Opium, and Rx. 208,500 under Public Works—Buildings and Roads. Of this total improvement in India of Rx. 3,432,500, Rx. 1,534,700 occurs under Provincial and Local, and Rx. 1,897,800 under Imperial. The Revenue in England shows an increase of £44,200, and the Expenditure a decline of £151,100. Adding to these a reduction of the net charge for exchange by Rx. 1,074,900, the final result is an increase of the surplus of the year by Rx. 3,168,000 from Rx. 891,400 to Rx. 4,059,400.

90. The more important increases of Revenue in India occur under the following heads:— <sup>1898-99.</sup> <sup>Increase of Revenue in India.</sup>

	Rx.
Land Revenue . . . . .	111,200
Opium . . . . .	349,600
Salt . . . . .	319,200
Provincial Rates . . . . .	92,100
Customs . . . . .	307,900
Forests . . . . .	102,400
Miscellaneous . . . . .	102,100
Railway Receipts . . . . .	884,200
Irrigation Major Works . . . . .	193,200

91. The increase of Rx. 111,200 in the collections of Land Revenue <sup>1898-99.</sup> includes the following amounts in excess of the Estimate:— <sup>Land Revenue.</sup>

	Rx.
Burma . . . . .	100,800
North-Western Provinces and Oudh . . . . .	52,000
Bombay . . . . .	33,600

In Burma the continuous expansion of cultivation induced by a fertile soil and light settlements and the revision of assessment-rates have added to the ordinary revenue, and the yield of the Capitation Tax has been raised by the natural increase of population. In the North-Western Provinces and Oudh large sums are expected to be realised on account both of ordinary arrears and of revenue suspended during the famine. The enhanced collections in Bombay include arrears due to plague in some districts and to bad seasons in others; while in Sind the revenue has been raised not only by these causes, but by a favourable inundation greatly extending the area under spring crops.

Account must also be taken of the following decreases:—

	Rx.
Madras . . . . .	32,100
Central Provinces . . . . .	35,000
India . . . . .	10,900

The decrease in Madras is due to a fall in the sales of lands benefited by the Periyar Irrigation Scheme in Madura; the Central Provinces figures are affected by suspensions of revenue and smaller recoveries of arrears; and the decline under India General is caused by the failure of the rains and general scarcity in Ajmir, and by drought, locusts, and low prices in Baluchistan where the Land Revenue is collected in produce.

92. Although the collections of Land Revenue in 1898-99 are expected to exceed the Budget Estimate, the Imperial share of the total collections will be considerably less by reason of the special contributions given in aid of Provincial resources which involve a re-adjustment of the Imperial and Provincial shares of the revenue.

The following table compares the respective shares as they appear in the Budget and Revised Estimates :—

	LAND REVENUE, BUDGET OF 1898-99.		LAND REVENUE, REVISED ESTIMATES OF 1898-99.	
	Imperial share.	Provincial share.	Imperial share.	Provincial share.
	Rx.	Rx.	Rx.	Rx.
Distribution according to Provincial Settlement	16,237,900	11,330,300	16,254,300	11,415,100
Add or Deduct— Special contribution in aid of Plague and Famine expenditure and of General Re- sources of Provincial Governments	—150,000	+150,000	—1,129,300	+1,129,300
Distribution according to Estimates	16,087,900	11,480,300	15,125,000	12,544,400

The contribution of Rx. 150,000 entered in the Budget Estimate of 1898-99 includes Rx. 80,000 granted to Assam in aid of expenditure incurred on the repair of Earthquake damages, and Rx. 70,000 to Bombay in aid of Plague expenditure. The amount in the Revised, Rx. 1,129,300, is made up as follows :—

	Rx.
General contribution in aid of Provincial resources as stated in paragraph 66 of this Statement	700,000
Special contribution in aid of Earthquake expenditure in Assam	80,000
Special contribution in aid of Plague expenditure by Local Bodies in Bengal	20,000
Special contribution in aid of Famine and Plague expenditure in Madras (Provincial and Local)	50,700
Special contribution in aid of Famine and Plague expenditure in Bombay	278,600
<b>TOTAL</b>	<b>1,129,300</b>

1898-99.

Opium Revenue.

93. The receipts from Opium in Bengal are likely to exceed the estimate by Rx. 264,500, the bulk of which represents the difference between Rs. 1,000 a chest, the price assumed in the Budget for Bengal Opium, and Rs. 1,055, the average actually realised. At the same time the quantity sold during the last three months of the year has risen by 450 chests, representing an increase in revenue of Rx. 51,600. More favourable conditions in the China market, aided by the reduction of the pass-duty on Malwa Opium from Rs. 600 to Rs. 500 per chest, which took place in October 1897, seem to have brought about a substantial recovery of the trade, though the exports have as yet hardly returned to the

level at which they stood before the great decline of 1896-97 and 1897-98. The result is an increase in the receipts over the estimate of Rx. 84,000.

94. Of the increase of Rx. 319,200 under Salt, the sum of Rx. 215,000, which has been realised in Madras, represents mainly the recovery of revenue deferred under the credit system from the previous year. The revenue brought to account during the year has probably also been to some extent enhanced by the fact that the rise in the price of Government paper during the last few months has tended to discourage resort to the credit system and to stimulate cash sales.

The receipts of the Northern India Salt Department show an increase of Rx. 52,200 due partly to normal development, but mainly to the revival of trade in Kohat salt consequent on the pacification of the frontier.

95. An increase of Rx. 23,200 in Bengal is due to the receipts under Local having been under-estimated in the Budget. In the North-Western Provinces Rx. 17,100 and in Madras Rx. 22,900 have been added in the collection of arrears, and in Bombay the increase of Rx. 17,600 has followed the rise in Land Revenue.

96. Of the rise of Rx. 307,900 under Customs, Rx. 199,100 occurs in Burma, —Rx. 66,200 under Imports, chiefly Manufactured Articles, Liquors, and Articles of Food and Drink, and Rx. 130,000 under Export Duty on Rice. Bengal accounts for Rx. 105,000 distributed over Articles of Food and Drink, Silver Bullion and Coin, Oils, and Liquors; and Bombay shows Rx. 37,000 comprising considerable increases under Oils, Liquors, Silver Bullion and Coin, Articles of Food and Drink, and Excise on Cotton Goods, and substantial decreases under Manufactured Articles and Import Duty on Cotton Goods. A decline of Rx. 34,200 in Madras occurs under Spirits and Liquors, Imported Cotton Goods, and Miscellaneous Exports.

97. The increase of Rx. 102,400 under Forests is made up of a rise of Rx. 199,500 in Burma, mainly due to the large demand for, and high market value of teak timber, which has added Rx. 111,500 to the royalty paid by the Bombay-Burma Trading Corporation for the forests from which they derive their supplies. The increase also includes a sum of Rx. 12,000 paid by the same Company in connection with mal-practices committed by their employés. A reduction of Rx. 71,400 in Bombay is ascribed to the depression in trade caused by the continuance of plague, and to the smaller demand for locomotive fuel in Sind and for forest produce in general.

98. The increase of Rx. 102,100 under Miscellaneous Revenue includes one sum of Rx. 57,400 recovered from the Burma Railway Company for the value of work done by famine labour on the Meiktila-Myingyan Railway, and another of Rx. 37,500 realised in Madras by the sale of cloth manufactured at Government expense during the recent famine in order to afford relief to weavers in distress.

99. The great rise of Rx. 884,200 in Railway Revenue in India is mainly due to the general development of traffic of all kinds which results directly and indirectly from the opening of new sections of line, and to the large export of grain which was rendered possible by the harvesting of good winter crops. The more important increases occur on the following lines:—

	Rx.
North-Western . . . . .	310,000
Great Indian Peninsula (net) . . . . .	416,000
Bombay, Baroda and Central India (net) . . . . .	210,000
East Indian . . . . .	200,000
Rajputana-Malwa . . . . .	160,000

and the more important decreases on the following :—

	Rx.
Eastern Bengal . . . . .	110,000
Southern Mahratta . . . . .	115,000
South Indian . . . . .	70,000
Mysore . . . . .	55,000
East Coast, including Bezwada-Madras . . . . .	60,000
Madras (net) . . . . .	55,000

The reduction on the Eastern Bengal State Railway was due to a short jute crop, and that on the Railways in Southern India to the effect of plague on the passenger traffic. The falling-off on the East Coast Railway was caused by delay in opening the Bezwada-Madras Section.

100. The increase of Rx. 193,200 in Irrigation Revenue is distributed as follows :—

	Rx.
North-Western Provinces and Oudh . . . . .	56,200
Punjab . . . . .	120,800
Other Provinces . . . . .	16,200

In the North-Western Provinces the area irrigated during the past *Kharif* season was larger than had been anticipated. A similar expansion of irrigation occurred on the Bari Doab, Sirhind, and Swat River Canals in the Punjab and on the Deccan and Guzarat Canals in Bombay, while in Sind a better supply of water produced an enhanced demand. The receipts were also raised by the recovery of outstanding balances on the Western Jumna Canal and in the Deccan and Guzarat.

101. The only decrease of any moment in the revenue of the current year occurs under the head of Telegraph Receipts, which show a falling-off of Rx. 154,800 made up as follows :—

	Rx.
Indian Telegraph . . . . .	114,400
Indo-European Telegraph . . . . .	40,400

The falling-off under the former head is due partly to the cessation of military operations on the North-West Frontier, but chiefly to the fact that, since the practice of delivering deferred telegrams by hand instead of sending them by post has been introduced, this class of message has gained greatly in popularity, and has to a considerable extent taken the place formerly occupied by ordinary and urgent messages. The decline in the Indo-European receipts occurs in the message traffic with the Indian Telegraph Department transferred at Karachi.

102. The more important increases of expenditure in India are :—

	Rx.
Medical . . . . .	327,800
State Railways: Working Expenses . . . . .	106,100
Guaranteed Companies: Surplus Profits, Land, and Supervision . . . . .	106,100
Mint . . . . .	49,000

103. The large increase under Medical is due to the impossibility of making an accurate forecast of the expenditure required to guard against the spread of the plague in new directions, and to combat the disease where it has once become established. The cost of these operations continues to be far heavier in Bombay than elsewhere, and out of the total increase of Rx. 327,800 in the expenditure entered under Medical no less than Rx. 268,200 has been incurred in that province. The following statement gives an estimate of the cost in each province under Imperial, Provincial, and Local heads of the preventive and remedial

measures undertaken in 1896-97, 1897-98, 1898-99, and contemplated in 1899-1900:—

*Statement of direct and indirect expenditure connected with the plague under the various heads of accounts for the years 1896-97, 1897-98, 1898-99, and 1899-1900.*

104. The Statement illustrates the gradual spread of plague since its first appearance in Bombay in 1896-97. In that year the measures undertaken to check the progress of the disease cost Rs. 23,700, of which Rs. 18,100 was spent in the area where it was actually prevalent, the balance representing outlay on railway inspection and similar measures designed to guard against its extension to provinces not then infected. In 1897-98 the total expenditure rose to Rs. 348,600, including Rs. 252,000 in Bombay and Sind. In addition to this, Bengal devoted Rs. 32,200 to the development of protective measures on lines of railway and to watching arrivals from infected areas; the North-Western Provinces and Oudh spent Rs. 25,900 in suppressing the outbreak of plague at Hardwar; and the Punjab spent Rs. 15,400 on preventive operations in the districts of Jullundur and Hoshiarpur. In 1898-99 there was a further increase of the total expenditure, as shown in the Revised Estimate, to Rs. 580,900, including Rs. 390,100 in Bombay, Rs. 58,300 in Madras where the plague has appeared in several districts, Rs. 48,700 in the Punjab, Rs. 27,400 in the North-Western Provinces, Rs. 19,600 in Bengal where protective arrangements were maintained and an outbreak occurred in Calcutta, and Rs. 20,200 under India General which includes the cost of combating the outbreak in Bangalore.

105. The estimate for next year amounts to Rs. 617,600, and provides for an increase of expenditure in Madras from Rs. 58,300 to Rs. 147,700; while the charges in Bombay are taken at Rs. 179,400, or Rs. 210,700 less than the Revised figures of the current year. A provision of Rs. 209,500 has been made under India General in order to meet requirements which cannot now be foreseen.

106. During the four years covered by the Statement the total expenditure by Government and District Funds in India amounts to Rs. 1,570,800, to which must be added £22,560 (including Exchange Rs. 34,862) spent in England on payments to doctors and nurses engaged for service in India. Even where plague itself has not appeared the necessity of maintaining inspection camps on the chief lines of communication imposes a severe burden on Provincial finances and strains the resources of the medical staff. The Statement takes no account of the heavy expenditure incurred by Native States and Municipalities except so far as it includes grants made by the Bombay Government in aid of municipal outlay on plague.

The expenditure from the Home Treasury on account of pay, passage, etc., of medical officers and lady nurses in each of the four years has been or will be as follows:—

	Sterling. £	Exchange. Rs.	Total. Rs.
1896-97 . . . . .	1,013	669	1,682
1897-98 . . . . .	11,247	6,333	17,580
1898-99 (Revised) . . . . .	5,300	2,700	8,000
1899-1900 (Budget) . . . . .	5,000	2,600	7,600
<b>TOTAL</b> . . . . .	<b>22,560</b>	<b>12,302</b>	<b>34,862</b>

1898-99.

State Railways:

Working Expenses.

107. The rise in the Working Expenses of State Railways represents for the most part the cost of earning the increased revenue mentioned in paragraph 99 above. It is due chiefly to the heavier traffic worked, the greater lengths of mileage open, and to more extensive renewals of stock and permanent-way. Some lines have also had to provide for special repairs of the damage caused by the earthquake of 12th June 1897 and by floods. The more important increases occur on the following Railways:—

	Rs.
East Indian . . . . .	190,000
Rajputana-Malwa . . . . .	90,000
Assam-Bengal . . . . .	36,000

These are, however, to some extent counterbalanced by a decrease in the Working Expenses of the other lines noted below:—

	Rx.
North-Western	100,000
East Coast, including Bezwada-Madras	40,000
Southern Mahratta	35,000
Mysore	25,000
Oudh and Rohilkhand	20,000

108. The increase of expenditure under Surplus Profits, Land, and Supervision is made up of an increase under Surplus Profits of Rx. 197,200 and a decrease under Land and Supervision of Rx. 91,100. Under the former head no provision was made in the Budget Estimate for the payment of surplus profits to the Madras Railway Company, and the goods earnings of the Bombay, Baroda and Central India and the Great Indian Peninsula were under-estimated. The charges under Land and Supervision are reduced owing to less land being taken up for the Calicut-Cannanore Branch in Madras and certain minor lines in Bombay than had been originally expected.

109. The increase in Mint expenditure occurs partly under temporary establishment and overtime allowances for the recoinage of Bhopal and Kashmir rupees—an outlay more than counterbalanced by an increase in the Mint receipts. But the major portion of the increase is due to a loss of Rx. 40,000 on copper coinage in 1898-99. The gain or loss on copper coinage represents the difference between the face value of the coins actually put into circulation and the cost of making and distributing them. Of the enormous quantity of copper coin issued in the famine years for relief payments, a large proportion is now returning from circulation because it is in excess of the normal requirements of the people. The Estimate provides for the resulting loss on the coins so returned.

110. The more important decreases of expenditure occur under the following heads:—

	Rx.	Decrease of Expenditure in India.
Land Revenue	59,600	
Opium	305,200	
Salt	53,400	
Education	60,300	
Political	83,000	
Subsidised Railway Companies: Land and Subsidy	81,200	
Civil Works	208,500	
Army	518,600	

111. The decrease of Rx. 59,600 under Land Revenue occurs for the most part under the heads of Salaries, Exchange Compensation Allowance, Establishments, and Savings under Survey and Settlement in the North-Western Provinces, the Punjab, and Burma. The decrease of Rx. 15,400 in Madras is mainly under Local, and arises from delay in giving effect to a scheme for raising the pay of village accountants.

112. Under Opium the reduction of Rx. 305,200 in the estimated expenditure is almost wholly under Payments to Cultivators, which vary from year to year with the yield of the crop. The greater part of it occurs in Behar, where the sums likely to be required seem to have been greatly over-estimated.

113. Of the decline of Rx. 53,400 under Salt, Madras accounts for Rx. 25,100, more than half of which is under the Purchase and Freight of Salt. A decrease of Rx. 12,500 in Bengal is due to the whole of the Preventive Staff sanctioned for Orissa not having been appointed during the year. A similar decline in the expenditure of the Northern India Salt Department is due to smaller payments of salaries, reduction of charges for manufacture, and to the abolition of the Indus Preventive Line.

1898-99.  
Education  
Expenditure.

114. The decline of expenditure on Education is largest in Bengal (Rx. 17,200), owing to the charges on account of salaries being over-estimated, and in Bombay (Rx. 12,700) where the outlay was affected by the prevalence of plague.

1898-99.  
Political  
Expenditure.

115. Of the reduction of Rx. 83,000 under Political Expenditure, more than half is due to the subsidy to the Amir of Kabul not having been drawn in full. An apparent saving is also caused by the charges for the escort of the Burma-China Boundary Delimitation Commission being adjusted in the Military Accounts.

1898-99.  
Subsidised  
Railway Com-  
panies, Land and  
Subsidy.

116. The decrease in the payments to Subsidised Railway Companies occurs wholly in the item of land, and is due to the programme of the year not having been worked up to in the case of the Bengal and North-Western, Bhagalpur-Baidyanath, Mymensingh-Jamalpur, Amritsar-Sarhali, Jullundur-Hoshiarpur, and several other Railways.

1898-99.  
Civil Works.

117. Of the entire saving of Rx. 208,500 anticipated under the head of Civil Works, Rx. 118,800 occurs in the Local Section of the Estimates, and is due partly to the failure of District Boards to work up to their estimates, and partly to the estimates themselves having been revised in Bombay and Madras in order to provide funds for plague purposes. The former cause accounts for differences of Rx. 35,000 in Bengal, Rx. 21,400 in the North-Western Provinces and Oudh, and Rx. 12,400 in Burma; and the latter for decreases of Rx. 26,100 in Bombay, and Rx. 22,000 in Madras.

In the Provincial Section the savings amount to Rx. 69,600, of which the North-Western Provinces and Oudh contribute Rx. 9,000, Bombay Rx. 13,500, and Madras Rx. 18,400. In the North-Western Provinces the decrease is due partly to expenditure proceeding at a slower rate than was expected, and partly to the transfer of the Ghazipur Steam Ferry to the Bengal and North-Western Railway. In Bombay grants were reduced on general financial grounds after the Budget was passed, and in Madras savings were caused by a transfer to the Educational Department and by the non-payment of grants to Municipalities for water-supply projects.

1898-99.  
Army  
Expenditure.

118. The large decrease of Rx. 518,600 in Army Expenditure in India comprises the following important reductions:—

	Rx.
Military operations and special services due to the demobilisation of the Tirah Expeditionary Force in April 1898, and the substitution of the Khyber Brigade with moveable column for the Khyber Force as originally constituted . . . . .	291,100
Saving on Exchange Compensation Allowance owing to the rise in exchange . . . . .	41,200
Reduced expenditure under Army and Garrison Staff and Regimental Pay and Allowances with reference to recent actuals . . . . .	24,500
Saving arising from the short strength of the Army . . . . .	55,200
Saving on account of Troops serving in East Africa and Mauritius and charged to the Imperial Government . . . . .	33,400
Transfer to the Civil Estimates of charges for the pay of officers on plague duty . . . . .	24,100
Lapse of provision for increase of Commissariat-Transport Officers . . . . .	20,000
Reduced price of food and forage . . . . .	65,000

119. One cause of saving which affects not only Army Expenditure, but most of the important heads of Expenditure in India, is the rise in the rate of exchange, on the basis of which the Exchange Compensation Allowances have been calculated. The average rate assumed in the Budget Estimate of 1898-99 for this calculation was  $15\frac{1}{2}d.$ ; but the four quarterly rates with reference to which the allowances have been actually paid are  $15\frac{1}{2}d.$ ,  $15\frac{1}{2}d.$ ,  $15\frac{1}{2}d.$ , and  $15\frac{1}{2}d.$ , yielding an average for the whole year of  $15\frac{1}{2}d.$  The consequent saving amounts to Rx. 119,000.

1898-99.  
Exchange  
Compensation  
Allowances.

120. The Sterling receipts are expected to exceed the Budget Estimate by £44,200. The three important items composing this increase are: £18,000 under Interest on temporary investments of Cash Balance, the rates of interest realised being higher; £9,000 representing larger miscellaneous receipts connected with the supply of stores to India; and £10,400 under Army receipts, mainly in connection with the Indian Troop Service and other effective services.

1898-99.  
Revenue in  
England.

121. The Sterling expenditure is expected to be less than the Budget Estimate by £151,100. The important variations comprising this difference are (1) a reduction of £83,300 in the charge for interest on loans; (2) a saving of £145,200 in the Army effective and non-effective charges; and (3) increases of £36,300 and £24,400, respectively, under Civil Furlough Allowances and Military Works.

1898-99.  
Expenditure in  
England.

The Interest charges are less by £83,300, of which £35,400 represents a decrease in interest on India  $2\frac{1}{2}$  per cent Stock owing to the loan this year not having been issued so early as was expected; £44,900 comes under reduction in interest on India Bills, due to a smaller amount of Bills being issued; while in addition to these savings, £10,000 provided to meet interest on temporary loans from the Bank of England was not required. On the other hand, the discount on the loan of £6,000,000 India  $2\frac{1}{2}$  per cent Stock issued in July 1898 amounted to £702,300. As this sum is exceptionally large, it has been decided to depart from the usual practice of entering the whole of it as a charge on the Revenue of the year, and to reduce the amount of debt incurred in excess of the money actually raised by means of a Discount Sinking Fund spread over 50 years, the rate of interest adopted in the calculation for the Sinking Fund being  $2\frac{1}{2}$  per cent. A sum of £7,000 has accordingly been entered in the Revised Estimate as the first investment towards this Sinking Fund.

As regards Army charges, the reduction in the demands for stores—mainly Ordnance stores—amounted to £105,000, and the payments for pay and pensions of non-effective and retired officers of the Indian Service and for furlough allowances of officers of that service are expected to be less than the Estimate by £88,000. On the other hand, arrear payments of £34,500 due to the War Office for effective and non-effective Army charges of the year 1897-98 have been made in the current year; there has also been an excess charge of £17,000 under the head of Troop Service.

The payments for Civil Furlough and Absentee Allowances have exceeded the Estimates owing to the exceptionally large number of officers on furlough, and the demands for stores required for the Bangalore Water-works have swelled the expenditure on account of Military Works.

122. The net charge for Exchange on Sterling expenditure is less than in the Budget Estimate by Rx. 1,074,900. The net Sterling expenditure is less by £195,300, and the Exchange on this difference at the rate of £1 = R 15.6, the rate of the Budget Estimate, is Rx. 109,400, which is the saving in Exchange due to the decrease in Sterling payments. The direct saving from the rise in the rate of Exchange from £1 = R 15.6 to £1 = R 15 is, therefore, Rx. 965,500.

1898-99.  
Exchange.

## Section III.—Budget Estimate of 1899-1900.

1899-1900.

Statement of the  
gross figures.

123. The following is a general comparison of the Budget Estimate of 1899-1900 with that of 1898-99:—

		1898-99.	1899-1900.	1899-1900, better.	1899-1900, worse.
<b>REVENUE.</b>					
India	Rx.	98,791,700	101,615,900	2,854,200	
England	Rx.	188,300	207,100	18,800	
Exchange	Rx.	105,400	108,500	3,100	
<b>TOTAL</b>	<b>Rx.</b>	<b>99,085,400</b>	<b>101,931,500</b>	<b>2,876,100</b>	
<b>EXPENDITURE.</b>					
India—					
Imperial, Provincial, and Local	Rx.	72,610,100	73,762,600		1,152,500
Adjustment of Provincial and Local surplus or Deficit	Rx.	—116,800	—924,700	807,900	
<b>Net</b>	<b>Rx.</b>	<b>72,493,300</b>	<b>72,837,900</b>		<b>344,600</b>
England	Rx.	16,474,800	16,531,600		56,800
Exchange	Rx.	9,225,900	8,659,400	566,500	
<b>TOTAL</b>	<b>Rx.</b>	<b>98,194,000</b>	<b>98,028,900</b>	<b>165,100</b>	
<b>SURPLUS</b>	<b>Rx.</b>	<b>891,400</b>	<b>3,932,600</b>	<b>3,041,200</b>	

1899-1900.

Main features.

124. The year opens with fair promise. Except in limited areas in the Central Provinces and the Punjab the agricultural prospects are good, and the bulk of the population have returned to the standard of living which prevailed before the scarcity compelled them to reduce their consumption of all but absolute necessities. An expansion is accordingly looked for under all the principal heads of Revenues, except Registration fees, which are really payments for services rendered; and Railway receipts, which are a good test of general prosperity, are expected to show a corresponding increase. The only serious rise of expenditure is in the medical charges connected with the plague: the other increases represent improvements of administration, or outlay required to earn increased revenue.

1899-1900.

General Results.

125. The Revenue in India is expected to exceed the estimated receipts of 1898-99 by Rx. 2,854,200, while the Expenditure, after allowing for the adjustment of Provincial and Local surpluses or deficits, will be increased by Rx. 344,600. In England an improvement of £18,800 in Revenue is anticipated against a rise in Expenditure of £56,800. At the same time the net charge for exchange will be reduced by Rx. 569,600, so that the combined account works out to a surplus of Rx. 3,932,600, being Rx. 3,041,200 in excess of the estimated surplus of 1898-99.

1899-1900.

Increases of Re-  
venue in India.

126. The following are the most important increases of Revenue in India:—

Land Revenue	73,700
Opium	673,900
Excise	60,900
Provincial Rates	91,500
Customs	58,200
Assessed Taxes	55,900
Forest	55,100

## Railways—

State, Gross Receipts . . . . .	854,500
Guaranteed, Net Traffic Receipts . . . . .	768,500

## Irrigation—

Major Works—Direct Receipts . . . . .	139,800
Land Revenue due to Irrigation . . . . .	71,100

127. The growth of Land Revenue is most marked in Burma, where 1899-1900.  
 Rx. 107,900 is expected to accrue from revision of assessments and increase in Land Revenue.  
 cultivation. In the North-Western Provinces and Oudh Rx. 110,300 will be gained  
 by enhancements of revenue resulting from the regular revision of settlements.  
 An increase of Rx. 34,300 in the Central Provinces is due to provision having  
 been made for the recovery of famine arrears. Decreases of Rx. 113,500 in  
 Madras and of Rx. 25,400 in Bombay are caused by the reduction of the arrear  
 balances which swelled the receipts in the current year added in the latter case to  
 a less favourable inundation in Sind.

128. The Estimate anticipates an increase of Rx. 587,300 in the Opium Rev- 1899-1900.  
 enue in Bengal. Prices show an almost unbroken rise throughout the past year; Opium Revenue.  
 the average per chest has gone up from Rs. 1,023 in 1897-98 to Rs. 1,055 in the cur-  
 rent year and the price realised at the sale of March 1899 is Rs. 1,149 against Rs. 948  
 at the same time a year ago. Rs. 1,100 has accordingly been taken as the average  
 price for the ensuing year. In Bombay it is assumed that the revival of the trade  
 in Malwa Opium, which has followed on the reduction of duty, will continue un-  
 abated, and that the number of chests exported will be the same as in the current  
 year. On this basis an increase in revenue of Rx. 84,000 is looked for.

129. The Excise Revenue has been slow to recover from the depression 1899-1900.  
 caused by the famine, and the Estimate anticipates only the moderate Excise Revenue.  
 increase of Rx. 60,900. To this the North-Western Provinces and Oudh con-  
 tributes Rx. 67,500 due to the normal growth of revenue and to the introduction of  
 administrative reforms, while Burma, Bengal, and Bombay look forward to increases  
 of about Rx. 25,000 apiece. On the other hand, the actuals of the current year  
 in Madras point to a decline in revenue which is estimated at Rx. 110,000.

130. Of the increase of Rx. 91,500 under Provincial Rates, Bengal contributes 1899-1900.  
 Rx. 38,700 arising from the completion of revaluations in the Districts of Dinaj- Provincial Rates.  
 pur and Backerganj. In Madras an increase of Rx. 21,600 is looked for from  
 Village Service Funds.

131. In Bengal an increase of Customs Revenue, amounting to Rx. 55,000, 1899-1900.  
 is anticipated, mainly under Liquors, Articles of Food and Drink, and Silver Customs Revenue.  
 Bullion and Coin. In Burma an aggregate improvement of Rx. 51,200 is ex-  
 pected under Export Duty on Rice and various heads of Import Duty, specially  
 Liquors, Articles of Food and Drink, and Manufactured Articles. The Estimate  
 for Madras shows a decline of Rx. 34,200, chiefly under Liquors, Imported Cotton  
 Goods, and Exports.

132. The increase under the head of Assessed Taxes is largest in Bengal 1899-1900.  
 (Rx. 25,000) and in Madras (Rx. 15,000), and is due to progressive revision of the Assessed Taxes.  
 assessments and to general improvement in the administration of this head of revenue.

133. An increase of Rx. 69,700 under Forest Revenue anticipated in Burma 1899-1900.  
 really represents a decline from the abnormal receipts for which credit has been Forest Revenue.  
 taken in the Revised Estimates. The demand for teak at the present high prices  
 is expected to fall off; the Bombay-Burma Trading Corporation will reduce their  
 exports of timber from the Pyinmana forests, and the revenue obtained in the form  
 of royalty will be diminished in proportion.

1899-1900.  
Railway Revenue.

134. The Railway Revenue of the coming year is estimated at Rx. 1,623,000 in excess of the amount taken in the Budget of 1898-99. The forecast is justified by the excellent promise of the spring crops and by the additional mileage likely to be opened for traffic during the year.

1899-1900.  
Irrigation Revenue.

135. The Estimate of Irrigation Direct Receipts for 1899-1900 is based upon the normal expectations of Revenue, and anticipates a falling-off from the exceptionally high returns indicated by the Revised Estimate of the current year. As compared with the Budget of 1898-99, it provides for an increased Revenue of Rx. 139,800, which includes an increase of Rx. 80,200 in the Revenue from the Canals in the Punjab, and Rx. 54,100 from Canals in the North-Western Provinces and Oudh, due in each case to the growth of the demand for canal irrigation.

1899-1900.  
Decrease of Revenue.

136. The only important decrease of Revenue in India occurs under Telegraph Receipts, which show a falling off of Rx. 130,400 as compared with the Budget of 1898-99. This, however, represents an advance of Rx. 24,400 on the Revised Estimate of the current year, and indicates that the growth of operations in India is overtaking the decrease of Revenue brought about for the time being by the cessation of military operations, the extended use of deferred messages, and the falling-off in the Indo-European message traffic transferred at Karachi.

1899-1900.  
Decreases of Expenditure.

137. The chief reductions in Expenditure in India occur under the following heads:—

	Rx.
Army Services . . . . .	1,171,500
Interest on Ordinary Debt . . . . .	202,000
Famine Relief . . . . .	79,400
Construction of Protective Railway . . . . .	178,300

1899-1900.  
Army Expenditure.

138. The following are the principal causes which have contributed to bring about the important decrease of Rx. 1,171,500 in Army charges:—

	Rx.
Reduction of Military Operations and Special Services . . . . .	1,176,500
Saving under pay of British troops due to exchange being taken at 1s. 4d. instead of 1s. 3½d. the rupee . . . . .	100,000
Saving in Exchange Compensation . . . . .	20,800
Saving under Regimental Pay and Allowances . . . . .	45,000
Fall in the prices of food-supplies . . . . .	60,000
Saving due to the cost of the 1st Bengal Infantry stationed at Mauritius being debited to Her Majesty's Government . . . . .	21,200
	<hr/> 1,443,500

Against the above important decreases in expenditure the following increases are provided for:—

Provision of messing allowance made for the whole year instead of for part only as in 1898-99 . . . . .	114,600
Smaller deduction in India on account of excess provision in the Home Estimates . . . . .	46,300
Mobilisation Equipment of the additional corps included among the extra units of the field Army . . . . .	39,500
Reserve of compressed fodder to facilitate mobilisation operations . . . . .	37,600
Re-establishment of Cantonment Hospitals . . . . .	20,700
	<hr/> 260,700

139. As was explained in last year's Financial Statement, the decrease of 1899-1900. Interest charges represents for the most part the interest on the difference <sup>Interest on Debt.</sup> between the Capital Expenditure on Railways and Protective Works and ordinary loans contracted in India.

140. Except in a small portion of the Central Provinces where the people 1899-1900. have not yet recovered from the famine of 1897-98, and in the South eastern districts <sup>Famine Relief.</sup> of the Punjab where both the *kharif* and the *rabi* have suffered from want of rain and the area protected by irrigation is small, the prospects of the coming year are excellent, and it has not been found necessary to make any substantial provision for the relief of scarcity. Out of Rx. 85,000 provided last year to meet the probable wants of certain districts in Madras where the cold weather rains had partially failed, only Rx. 1,700 was spent and the small sum of Rx. 5,700 now entered is almost entirely intended to meet the possible requirements of Hissar and the neighbouring districts of the Punjab.

141. The Budget Estimate of 1898-99 provided Rx. 668,300 for outlay on the 1899-1900. construction of Protective Railways, and this was raised during the year to <sup>Construction of Protective Railways.</sup> Rx. 695,400 distributed as follows:—

	Rx.
East Coast Railway . . . . .	60,000
Bezawada-Madras . . . . .	689,400
Godavari Bridge . . . . .	166,400
Guntakul-Mysore . . . . .	— 400
South Indian . . . . .	— 200,000
	<hr/>
	695,400

For the coming year the Expenditure has been placed at Rx. 490,000 allotted to—

	Rx.
East Coast Railway . . . . .	40,000
Bezawada-Madras . . . . .	30,000
Godavari Bridge . . . . .	200,000
South Indian . . . . .	50,000
Madura-Pattinam . . . . .	100,000
Tinnevely-Quilon . . . . .	70,000
	<hr/>
	490,000

If to this latter sum be added Rx. 370,400, being the net charge for the Indian Midland and Bengal-Nagpur, two Protective Railways constructed by Companies; Rx. 603,900 set apart for Reduction of Debt; Rx. 30,000 allotted for Protective Irrigation Works; and Rx. 5,700 for the relief of distress, the resulting total makes up the sum of Rx. 1,500,000 set apart for expenditure on Famine Insurance.

142. The rate of exchange assumed in the Budget Estimates for 1899-1900 1899-1900. for the purpose of calculating Exchange Compensation Allowances is 15½d. the <sup>Exchange Compensation Allowances.</sup> rupee, and the total saving under the various heads of Expenditure affected by this item of charge, amounts to Rx. 56,400.

1899-1900.  
Increases of  
Expenditure in  
India.

143. The chief increases of Expenditure in India anticipated in the Budget occur under the following heads:—

	Rx.
3.—Land Revenue . . . . .	65,600
Police . . . . .	102,600
Medical . . . . .	463,000
Reduction of Debt . . . . .	278,100
State Railways:	
Working Expenses . . . . .	276,500
Interest on Debt . . . . .	98,900
Guaranteed Companies:	
Surplus Profits, Land, and Supervision . . . . .	250,700
Irrigation, Minor Works and Navigation . . . . .	51,500
Military Works . . . . .	163,800
Civil Buildings and Roads . . . . .	648,700

1899-1900.  
Land Revenue  
Charges.

144. The Madras Estimate under 3.—Land Revenue includes an increase of Rx. 38,700 mainly intended to provide for a long standing scheme for the improvement of the position of Taluk Gomastahs, for the revision of Village Establishments, and the extension of Survey and Settlement. In Burma the charges of District Administration are being raised by Rx. 27,800 to meet the increased demands of a young Province with a growing Revenue.

1899-1900.  
Police Charges.

145. In Bengal an addition of Rx. 30,200 has been allotted under Police charges for improving the investigating staff of the District Police, and for strengthening the force in Calcutta. A provision of Rx. 27,200 has been made in the North-Western Provinces for adding to the number of Assistant District Superintendents and introducing reforms in the Rural Police System of Oudh. There are also smaller increases in the Punjab, Madras, Bombay, and Assam due partly to plague charges and partly to the reorganisation of the force and the cost of supplying improved arms and accoutrements.

1899-1900.  
Medical Charges.

146. Every Province, except the Punjab, anticipates a rise in Medical Expenditure, the largest increases being Rx. 131,500 in Madras and Rx. 79,200 in Bombay, both mainly on account of the plague expenditure shown in detail in paragraph 103 above. As the general resources of both these Governments have been seriously reduced by famine and plague, the Government of India have as is explained above, come to their aid with contributions from Imperial Revenues. The specific contributions thus passed in the Estimates through the Land Revenue head are Rx. 64,100 in Madras, and Rx. 126,400 in Bombay. In addition to the increases shown under Provincial expenditure on plague a reserve of Rx. 209,500 has been provided under India General in order to meet any unforeseen necessities which may arise during the year.

1899-1900.  
Reduction of Debt.

147. As no necessity for the relief of Famine is anticipated and the expenditure on Protective Railways and Irrigation Works has been reduced, an additional sum of Rx. 278,100 required to make up the Famine Insurance grant to the full amount of Rx. 1,500,000 will be charged under Reduction of Debt.

1899-1900.  
State Railways.

148. The increase of Rx. 276,500 under the Working Expenses of State Railways is due to provision being made for heavier traffic, a greater length of open line, and extensive renewals of permanent-way and other works which have been left unfinished during the current year.

1899-1900.  
Railway  
Interest.

149. The increase in the Railway Interest represents the interest payable on the new capital outlay to be undertaken on Railways.

1899-1900.  
Guaranteed  
Companies.

150. The increase of Rx. 250,700 under Guaranteed Companies is accounted for by the fact that the moiety of surplus profits payable to the Bombay, Baroda and Central India Railway is estimated at Rx. 187,000 against Rx. 117,000 in

1898-99, while the amount due to the Great Indian Peninsula is expected to rise from Rx. 60,000 to Rx. 270,000. It is improbable that the Madras Railway will earn surplus profits during the coming year, but a small provision of Rx. 10,000 has been made to cover the contribution to the Provident Fund and any small amount of surplus profits that may be declared.

*Surplus Profits,  
Land, and  
Superintendence.*

151. The greater portion of the increase under Minor Works and Navigation occurs in Burma and Bombay, and is due to the gradual extension of the works classified under this head.

*1899-1900.  
Minor Works and  
Navigation.*

\* 152. The increase of Rx. 163,800 on account of Military Works includes a sum of Rx. 150,000 which has been added to the ordinary grant for Military Works in order to provide for defensive works beyond the administrative frontier of India.

*1899-1900.  
Military Works.*

153. The increase under Civil Buildings and Roads is occasioned by the fact that the greater part of the free grants made to Provincial Governments in aid of their general resources have been entered under this head with the object of rendering them available for immediate expenditure if the financial position of the Governments concerned admits of it.

*1899-1900.  
Civil Buildings  
and Roads.*

154. The increase of £18,800 in Sterling receipts in England occurs almost entirely under Army Receipts, and is due to larger receipts under the head of Indian Troop Service and larger recoveries on account of the value of clothing, accoutrements, etc., in the possession of Regiments on their transfer from the Indian to the British establishment.

*1899-1900.  
Revenue in  
England.*

155. The Sterling expenditure in England is estimated at £16,531,600 as compared with £16,474,800, the forecast for the current year.

*1899-1900.  
Expenditure in  
England.*

Of the variations which bring out this result, reduced interest payments account for £45,100. The charges on account of the Post Office are less by £17,400 owing to a more favourable adjustment of the cost of the Eastern Mail Service as between the English and Indian Post Offices.

The payments of interest on capital deposited by Railway Companies show an increase of £42,600 due to further deposits of capital made by the East Indian Railway, the Bengal-Nagpur Railway, and the Indian Midland Railway. A decline in the charges on account of the Assam-Bengal Railway is owing to the rate of interest guaranteed on the Company's share capital having been reduced from 3½ to 3 per cent.

The Civil Superannuation and Pension Charges show an increase of £43,300, owing to a gradual increase in the claims to pension.

Under Effective Army charges the total in 1899-1900 is about the same as in the Budget Estimate of 1898-99, but the cost of the Indian Troop Service and the Miscellaneous charges will be less by £8,000, while on the other hand, the estimate of the payments to the War Office in respect of British Forces serving in India is higher by £9,000.

Under Non-Effective Army Charges there will be a total increase of £21,000 made up of an increase in the payments to the War Office of £37,000, of small increases under Miscellaneous Pensions and other charges aggregating £4,000, and a reduction of £20,000 in the charges for pay and pensions of non-effective and retired officers of the Indian Service.

156. The charge for Exchange on the net Sterling expenditure during the coming year is less by Rx. 569,600 than in the Budget Estimate of 1898-99. The net Sterling expenditure is more than in the Estimate of 1898-99 by £38,000, and the exchange on this difference at the rate of £1=R15'6, being the rate assumed in the Budget Estimate for 1898-99, is Rx. 21,300. The direct saving from the rise in the rate of exchange from £1=R15'6 to 15'75d. the rupee, the rate taken for the coming year, amounts, therefore, to Rx. 590,900.

*1899-1900.  
Exchange.*

**Section IV.—Statements comparing the figures of the Estimates under the more important heads of Revenue and Expenditure with those of past years.**

157. Throughout the period covered by the statement the Land Revenue of the area included under India General, has been below the standard of Rx. 175,000 attained in 1893-94. It escaped the influence of the famine of 1896-97, but during the present year there has been a marked drop in the revenue owing to a failure of the rains and general scarcity in Ajmir. An improvement is looked for in the coming year.

158. In the Central Provinces the whole area was affected by famine which began earlier and lasted longer than anywhere else in India. The effect on the Land Revenue was marked and extended over 1896-97 and 1897-98. Since then there has been a return of prosperity and the Revised Estimate includes Rx. 56,000 and the Budget Rx. 36,000 on account of famine arrears. Recent information shows that there has been some failure of crops in the wheat-growing areas of Saugor and Damoh, and the Budget has been framed on more cautious lines than was proposed by the local officers.

159. The Land Revenue in Burma received only a slight check in 1896-97 and then resumed its normal course of steady progress due to extension of cultivation, revision of low assessments based on provisional data, and the enhanced yield of the capitation tax which follows the growth of population in a new Province with large areas of fresh land.

160. Assam was untouched by the famine, and the figures of 1896-97 show an increase in the Land Revenue. In the following year the revenue was affected by the earthquake which reduced for the time being the tax-paying capacity of the people, while in Kamrup and Nowgong large tracts of land have been rendered uncultivable by the sand that has been thrown up. The reduction of revenue from this cause is estimated by the Chief Commissioner at not less than a lakh of rupees. Allowance has been made for this in framing the Budget of 1899-1900.

161. In Bengal the Land Revenue being permanently settled at very low rates is to a great extent beyond the reach of famine, but the calamity of 1896-97, which extended to the whole of North Behar, to a large part of Chota Nagpur and Western Bengal and to isolated tracts in Central Bengal, directly affected the rental of Government Estates where the State is itself the landlord, and reduced the recoveries of survey charges in Behar.

162. Distress in the North-Western Provinces began early and was widely diffused but the recovery of the country has been rapid. The Revised Estimate includes Rx. 440,000 on account of suspensions of revenue, and the Budget anticipates recoveries of Rx. 417,300 on this account besides Rx. 77,800 due to revision of settlements.

163. In the Punjab the revenue rose directly the famine was over, and although during the current year the estimate has not been worked up to and suspensions of revenue have been necessary in Hissar and the neighbouring districts, it is hoped that this will be counteracted by extension of cultivation along the Chenab Canal and in the Montgomery district.

164. The Revenue in Madras is improving in the manner characteristic of the Province. The balance in arrear at the close of 1896-97 has been steadily reduced and the Budget anticipates an increase of Rx. 70,900 from the resettlement of the Kistna and Godavari districts and from extension of cultivation.

165. In spite of famine and plague in Bombay arrears of revenue amounting to Rx. 250,500 have been recovered in the current year and a favourable inundation in Sindh has swelled the revenue by expanding the cultivated area. In the coming year there will be smaller arrears to collect, and the conditions in Sindh are expected to be less favourable, but Rx. 51,000 will be added to the demand by revision of settlements.

### OPIUM.

166. Throughout the period comprised in the table the revenue derived from the sale of Bengal Opium follows the average price per chest offered at the Calcutta sales, which in its turn is determined mainly by the dollar and tael prices obtained in China. The growing competition of the Chinese drug has prevented the prices in China from rising in proportion to the increased value of the rupee due to the Currency legislation of 1893. The trade has also been handicapped by the uncertainties of exchange and the stringency of the Indian money market. These latter conditions have now improved and somewhat larger stocks are available for the China market. It is therefore hoped that the rise of Opium revenue in the current year, which was due largely to a scanty crop in China, may continue.

The decline in the exports of Malwa Opium which the table brings out, and its recent revival, are due to the same causes as those which affected Bengal Opium. The revival has been helped by the reduction of the pass-duty, which was found to be more than a declining trade could bear, to Rs 500 per chest.

The receipts from Excise Opium are governed by the same causes as Excise Revenue generally, but as the consumers of opium are a comparatively well-to-do class, the returns are perhaps somewhat less sensitive to the influence of famine.

167. The main items of expenditure are payments to cultivators, the amount of which varies directly with the number of chests of Bengal Opium produced, and the quantity of Malwa Opium purchased for excise purposes which depends on the anticipated demand. The increase in charges is also due to the fact that the position of the officers of the Opium Department, which had long been admitted to be unsatisfactory, has of late years been bettered.

#### SALT.

	Accounts, 1895-96.	Accounts, 1896-97.	Accounts, 1897-98.	1898-99.		1899-1900, Budget.
	Rx.	Rx.	Rx.	Budget. Rx.	Revised. Rx.	Rx.

<b>Total</b> . . . . .	<b>8,861,845</b>	<b>8,421,705</b>	<b>8,594,225</b>	<b>8,728,000</b>	<b>9,047,200</b>	<b>8,757,200</b>
<b>Charges</b> . . . . .	<b>521,044</b>	<b>523,354</b>	<b>473,747</b>	<b>519,600</b>	<b>456,100</b>	<b>537,300</b>

(a) Chiefly sales of local manufacture. (b) Chiefly duty on imported salt.

168. The fluctuations of the aggregate Salt Revenue correspond closely to the material condition of the mass of the people who consume salt. A sharp decline in the famine year 1896-97 has been followed by a gradual rise which in the Revised Estimate for the current year exceeded the standard of the revenue of 1895-96. The Bengal statistics, however, follow a somewhat different course. There the receipts rose in 1896-97 and fell in 1897-98 when the revenue of every other Province shows a rise. In explanation of this it may be observed, first, that large portions of the area supplied from Bengal escaped famine altogether, while the cultivating classes found their purchasing power greatly augmented by high prices; secondly, that the demand of 1897-98 was affected by the earthquake and cyclone of 1897; and thirdly, that imported salt is less sensitive to local influences than salt produced in the country.

The increase in the revenue in Northern India during the current year is mainly due to the revival of traffic in Kohat Salt since the cessation of the frontier disturbances. It is doubtful, however, whether the demand will continue on the same scale during the coming year; and reduced receipts are also expected from the salt produced at Sambhar, Didwana and Pachbudra. For Burma and

Bengal the estimate is normal; in Madras it assumes a consumption of about 70 lakhs of maunds. The Bombay estimate has been taken at a moderate figure in view of the uncertainty arising from the prevalence of plague.

169. The Stamp Revenue depends on such a wide variety of transactions that fluctuations in its aggregate yield can hardly be ascribed to any single cause. Scarcity, for example, exercises a converse effect on the demand for the two main classes of Stamps. On the one hand it compels self-denial in the pursuit of litigation, on the other it promotes the execution of documents for the purpose of raising money. Both these tendencies are reflected in the revenue returns. The receipts from Court-fees drop sharply in the famine year, but they recover at once, and their progress is so rapid that its effect was greatly under-estimated in framing the Budget of the current year. In the case of Commercial Stamps the course of development is reversed. The revenue rises in the famine year and falls continuously from that time to a level below that of 1895-96. It was over-estimated in the Budget of the current year, and the figure taken for 1899-1900 represents only a moderate advance on the standard of 1895-96.

## EXCISE.

170. The progress of Excise Revenue, like the growth of the receipts from Court-fees, is a fair test of the ability of the people to spend money on luxuries. The years of scarcity show accordingly a marked decline, and in Bombay, owing probably to plague and the apprehension to which it gives rise, the

standard of 1895-96 has not yet been regained. In Madras, on the other hand, the effect of the famine and apprehended plague in reducing revenue was for a time neutralised by the extension of the tree-tax system of raising revenue from toddy. This system attained its present maximum application in 1897-98. The increase of charges is due to the adoption of more efficient methods of administration and prevention.

### PROVINCIAL RATES.

171. As was pointed out last year, the revenue from Provincial Rates is determined by the causes affecting Land Revenue, to which in most Provinces the rates bear a definite relation. The rise of revenue in the last three years corresponds therefore to the recovery of Land Revenue from famine influences. It should be added, however, that in tracts where the Land Revenue is permanently settled the revenue from Provincial Rates is increased independently of the Land Revenue by the periodical revaluation of the aggregate rental of a district for the purpose of levying these cesses.

172 The decline in the revenue from import duties in 1896-97 was due not merely to the effect of the famine in reducing the demand for manufactured articles and metals but also to the exemption of cotton yarns from duty and the reduction of the duty on cotton manufactures from 5 to 3½ per cent. The volume of the trade in cotton goods was not affected until the following year when the imports declined greatly. Since then business has revived, but it is still suffering from the effects of the plague in Bombay, a great producing and distributing centre, and from the overstocking of markets in China and Japan. The revenue from oils is derived chiefly from kerosene. The trade in this article fluctuates greatly and the cheaper oils from Russia and Sumatra are now beginning to compete successfully with the finer American oil. The increase under articles of food and drink is due to the imports of beet-sugar, principally from Germany and Austria, which has been poured into India in considerable quantities. The extraordinary rise in the imports of silver, especially in a year when the effects of the famine were still severely felt, is a phenomenon of which no satisfactory explanation has been found, but the trade is now diminishing and with a large demand springing up for gold, the decrease next year is expected to be considerable. The export duty shows a great contraction in 1896-97 and 1897-98 owing to great quantities of Burma rice, which would otherwise have been exported to foreign countries and have paid duty accordingly, being diverted to India to meet the famine demand. The large exports of 1898-99 followed on a bumper crop in Burma, the chief exporting province, but such a harvest is not expected to recur and the surplus available for export to foreign countries during 1899-1900 is likely to be considerably less than in the previous year.

## ASSESSED TAXES.

	Accounts, 1895-96.	Accounts, 1896-97.	Accounts, 1897-98.	1898-99.		1899-1900, Budget.
	Rx.	Rx.	Rx.	Budget.	Revised.	Rx.
Deduction by Government from Salaries, Pensions, and Interest payments . . . . .	447,638	419,259	414,494	479,800	447,400	440,700
Other Collections . . . . .	1,387,501	1,433,550	1,450,771	1,413,100	1,482,700	1,499,100
<b>Total</b> . . . . .	<b>1,835,139</b>	<b>1,852,809</b>	<b>1,865,265</b>	<b>1,892,900</b>	<b>1,930,100</b>	<b>1,940,800</b>
<b>Charges</b> . . . . .	<b>99,868</b>	<b>30,323</b>	<b>32,278</b>	<b>32,700</b>	<b>33,100</b>	<b>33,500</b>

173. The progress of this branch of revenue depends upon the general prosperity of the classes from which it is collected and upon the improvements constantly being introduced in the methods of assessing and levying the tax. The people by whom it is paid are to a great extent either independent of adverse seasonal influences, or derive a profit from their direct or indirect results, and the revenue accordingly does not show any distinct variation in relation to scarcity.

## FOREST.

	Accounts, 1895-96.	Accounts, 1896-97.	Accounts, 1897-98.	1898-99.		1899-1900, Budget.
	Rx.	Rx.	Rx.	Budget.	Revised.	Rx.
Revenue . . . . .	1,650,501	1,731,869	1,739,514	1,733,600	1,835,000	1,790,700
Expenditure . . . . .	911,161	993,955	1,001,089	1,050,500	1,010,200	1,007,700
<b>Net</b> . . . . .	<b>749,340</b>	<b>739,914</b>	<b>737,425</b>	<b>685,100</b>	<b>827,800</b>	<b>723,000</b>

174. The revenue under Forest has recovered from the effects of the famine and has resumed its normal rate of progress. The great increase shown in the Revised Estimate of the current year is due to the exceptional demand for teak timber which is not expected to be maintained during 1899-1900.

#### INTEREST RECEIPTS.

Net . . . . .	-12,311	+94,812	+93,498	+12,700	-38,500	-5,200

177. The Postal revenue displays unbroken progress throughout the period, and its advance in the coming year would have been more marked but for the introduction of the one-anna rate of postage to the United Kingdom and British Possessions and the concurrent reduction in the inland rates of letter postage. At the same time a substantial addition has been made to the expenditure in order to provide for administrative improvements which have been needed for a long time.

178. The Telegraph receipts of 1897-98 were abnormally high owing to the great use of the telegraph in connection with frontier wars, famine, and plague. The decline experienced in the current year and anticipated in the next year is due partly to the cessation of military operations and partly to the increased popularity of deferred telegrams.

179. The increase in the Mint expenditure in 1898-99 is explained in paragraph 109 above.

## CIVIL DEPARTMENTS.

(a) Includes Upper Burma charges up to 1896-97.

180. The progressive increase of total expenditure during the first three years of the period was partially arrested in 1898-99, but has been resumed in the Budget for the current year. This includes a large increase under Medical rendered necessary by the persistence of plague in Bombay and its spread to Madras, and likely to be further enhanced by the recent appearance of the disease in Calcutta. Provision has been made in Burma for the appointment of an additional Judicial Commissioner and for increasing the salaries of the Civil Administrative Staff, while in Bengal two Additional District and Sessions Judges and several temporary Subordinate Judges and Munsifs are to be appointed. The Police are to be strengthened in Bengal, the North-Western Provinces, Madras and Bombay.

183. The Revised Estimate of net receipts on State Railways is better than the Budget Estimate for 1898-99 by Rx. 207,100. The improvement is chiefly on the North-Western and Rajputana-Malwa Railways, due to a large traffic in grain, seeds and cotton.

184. The reduction in the Interest charges in India follows on the smaller outlay on Construction due to short shipments of stores from England. The rise in the rate of Exchange has caused a considerable saving on the Sterling charges, thus making the net result considerably better than in the original estimate.

185. The net receipts from State Railways in 1899-1900 are estimated at Rx. 370,900 higher than the Revised Estimate for 1898-99 in anticipation of a further improvement in traffic based on the excellent prospects of the spring crops and on the additional mileage which it is expected will be opened during the year. The increase in the Estimate of Working Expenses amounts to Rx. 170,400 and is due to heavier traffic, increased open mileage, and provision

for heavy renewals of way and works unfinished in 1898-99. There is also an increase in Interest charges, chiefly in India, due to the progress of Capital Outlay.

186. The Revised Estimate of net receipts from Guaranteed Railways exceeds the original Estimate by Rx. 571,000. This result is due to a marked improvement in goods traffic on the Great Indian Peninsula and Bombay, Baroda and Central India Railways following on an amelioration of the unfavourable conditions which obtained during the last two years, as well as to a reduction in the outlay on renewals on the Bombay, Baroda and Central India Railway.

The increase in Surplus Profits and other charges in India is more than covered by the saving in Exchange on Sterling Interest, leaving the net result, Rx. 606,600, better than the original Estimate.

A further improvement in traffic is expected in 1899-1900, but owing to the increase in Surplus Profits, etc., payable in India, and to the lower rate of Exchange adopted, the net result falls short of the Revised Estimate by Rx. 30,700 only.

Capital Outlay to March 31 . . . . .	31,101,556	31,897,139	32,639,803	33,418,839	33,362,403	34,259,003

187. The Revised Estimate of direct receipts from Major Works is better than the Budget Estimate for 1898-99 by Rx. 193,200. The increase occurs chiefly in the Punjab and the North-Western Provinces and Oudh, and is due to a larger area having been irrigated in the past *kharif* season than was anticipated. The small increase of Rx. 22,700 in the receipts from Minor Works is due partly to the same cause, and partly to the revenue in the Montgomery District which was hitherto shown as Indirect, having been treated as Direct receipts in accordance with the new Schedule of Water-rates. The Budget Estimate for 1899-1900 has been based on normal demands for water in the *kharif* season of 1899 and besides allowing for an increase of Rx. 30,800 in the revenue from the Chenab Canal due to development of irrigation, provides also for favourable *rabi* irrigation in the Punjab generally. The increase of irrigation in 1898-99 caused a small increase in Working Expenses. The increase of Rx. 27,100 in Working Expenses provided for in 1899-1900 is due to additional lengths of canals and distributaries being opened for irrigation.

188. The financial results obtained during 1896-97 and 1897-98 from Irrigation Works, for which Capital and Revenue Accounts are kept, are given below :—

				1896-97.	1897-98.
MAJOR WORKS.				Rx.	Rx.
<i>Capital Outlay—</i>

Provincial—						
Expenditure	2,063,159	2,131,781	2,258,018	2,531,000	2,461,400	3,251,400
Receipts	305,041	279,888	278,562	280,300	291,900	289,500
Local—						
Expenditure	1,777,057	1,685,125	1,564,010	1,745,000	1,626,800	1,713,500
Receipts	292,671	295,521	281,069	293,400	294,700	292,900

189. The expenditure on Provincial and Local Civil Works during 1898-99 is expected to fall short of the Budget Estimate by Rx. 69,600 and Rx. 118,800. This is due partly to the expenditure having been over-estimated in some Provinces, and partly to the restriction of outlay in Bombay and Madras in order to provide funds for expenditure in connection with plague.

190. The estimated expenditure on Military Works in 1899-1900 is higher than the Budget Estimate of the previous year by Rx. 137,200. This is chiefly due to provision to the extent of Rx. 150,000 having been made for defensive works beyond the administrative frontier.

191. Under Imperial Civil Works the expenditure in 1899-1900 is less than the Budget Estimate of the previous year by Rx. 40,600, owing for the most part to the completion of the Bangalore Water-works.

In the Provincial and Local Section of the Estimates, the provision for expenditure depends chiefly on the state of the Provincial and Local balances, and in 1899-1900 considerable additions have been made in the Provincial Section in connection with the free grants to Local Governments of Rx. 700,000, as explained in paragraph 65; the total increase over this year in the Provincial Section is Rx. 790,000, and in the Local Section Rx. 86,700.

### Section V. — Capital Expenditure on Public Works not charged against Revenue.

193. In paragraph 177 of the Financial Statement for March 1898 the programme sanctioned by the Secretary of State for the construction of Railways in India during the three years 1896-97 and 1897-98 and 1898-99, which involved the expenditure of 29½ crores of rupees, was referred to and explained.

The year 1898-99 being the last of the three years to which the programme of 29½ crores applied, it was considered necessary to prepare a new programme of Railway Construction for the three years from 1899-1900 to 1901-2. The large Cash Balances in the Indian Treasuries, which justified the policy of extending Railway Construction which was adopted in 1895-96, have now been exhausted. The new estimate of expenditure has accordingly been framed at a moderate figure, and a programme for the next three years, working up to Rx. 20,322,100 has been sanctioned by the Secretary of State. In consequence, however, of the heavy lapse on the grant for 1898-99, amounting to Rx. 2,401,400, much of which is due to short outlay in England consequent on the engineering strikes and the failure of contractors to complete orders placed with them for stores, it has been decided, with the concurrence of the Secretary of State, to add a sum of Rx. 1,050,000, representing a portion of this lapse, to the grant for 1899-1900. A further addition of Rx. 1,090,000 has since been provisionally sanctioned under certain conditions, subject to the Secretary of State's approval. This new programme includes all Railway Construction for which Government undertakes any responsibility or gives any guarantee, and includes therefore, in addition to the classes of outlay provided for in the earlier programme, (1) the Capital expenditure of the three old Guaranteed Companies, and (2) outlay on branch lines of Railway incurred by Private Companies on firm-guarantee by Government. The details of the new programme may be compared as follows with the corresponding expenditure in the three years ending with 1898-99:—

	1896-97, Actuals.	1897-98, Actuals.	1898-99, Revised.	Total.	1899-1900.	1900-1.	1901-2.	Total.
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
<b>I.—State Lines—</b>								
(i) Managed by the State.	3,705,834	2,354,162	2,379,300	8,439,436	1,820,000	1,747,200	1,673,000	5,240,200
(ii) Managed by Companies.	1,973,841	2,258,587	2,771,900	7,004,328	2,876,000	2,552,000	2,755,500	7,183,500
<b>II.—Lines of three old Guaranteed Companies.</b>	285,348	427,819	851,600	1,574,767	1,107,800	550,000	471,400	2,129,200
<b>III.—Lines of other Guaranteed or Assisted Companies.</b>	2,979,194	3,526,515	4,937,300	9,443,009	2,841,900	1,820,000	1,921,100	6,583,000
<b>IV.—Branch Lines on firm guarantee.</b>	1,008	124,251	218,000	343,259	168,000	59,200	...	227,200
<b>Total</b>	<b>8,945,225</b>	<b>8,701,274</b>	<b>9,158,300</b>	<b>26,804,799</b>	<b>8,821,700</b>	<b>6,728,400</b>	<b>6,821,000</b>	<b>21,372,100</b>

194. The Budget Estimate of 1898-99 provided for an expenditure of Rx. 13,051,300 on Railways, Irrigation Works, and Miscellaneous Public Improvements, including Rx. 1,129,900 on account of expenditure under the head of Open Line Capital by the three old Guaranteed Companies and Rx. 334,500

for Branch Lines with a firm guarantee. The total sum was distributed as follows:—

	Rx.
34.—Construction of Protective Railways . . . . .	668,300
48.—State Railways—Construction . . . . .	4,951,300
49.—Irrigation . . . . .	730,000
50.—Miscellaneous Public Improvements . . . . .	48,000
Capital of Indian Railway Companies . . . . .	3,475,000
Guaranteed Railways—Open Lines . . . . .	1,129,000
"    "    Extensions . . . . .	750,000
Branch Line Companies . . . . .	334,500
East Indian Railway Company's Debentures . . . . .	944,300
<b>TOTAL</b> . . . . .	<b>13,051,300</b>

195. During the course of the year it became apparent that, owing to the late arrival of English stores consequent on the engineering strikes in England and other causes, it would be impossible to work up to the amount of the Budget Estimate. It was also decided that expenditure on the jetties at Chittagong should not be treated as Miscellaneous Public Improvements not charged to Revenue, but should form a part of the expenditure under "48.—State Railways—Construction," the necessary adjustment in regard to previous expenditure being duly carried out. The Revised Estimates for Capital expenditure on Railways and Irrigation Works during 1898-99 have accordingly been prepared as under:—

	Rx.
34.—Construction of Protective Railways . . . . .	695,400
48.—State Railways—Construction . . . . .	2,882,200
49.—Irrigation . . . . .	692,200
Capital Account of Indian Railway Companies . . . . .	2,937,300
Guaranteed Railways—Open Lines . . . . .	552,800
"    "    Extensions . . . . .	298,800
Branch Line Companies . . . . .	218,000
East Indian Railway Company's Debentures . . . . .	1,573,800
<b>TOTAL</b> . . . . .	<b>9,850,500</b>

or for a sum less by Rx. 3,200,800 than the amount of the Budget Estimate.

In addition to the above sum, the Branch Line Companies not in receipt of a firm guarantee and the Companies whose accounts are outside the Government accounts are expected to spend during the year Rx. 1,470,100 as under:—

Branch Line Companies—

	Rx.
Ahmedabad-Parantij . . . . .	600
Mymensingh-Jamalpur . . . . .	70,000
South Behar . . . . .	204,000
Tapti Valley . . . . .	650,000
	<b>924,600</b>

Outside the Government Accounts—

Bengal and North-Western Railway Extensions . . . . .	445,000
Segowlie-Raksaul . . . . .	20,500
Nilgiri . . . . .	40,000
Bengal Doars Extensions . . . . .	40,000
	<b>545,500</b>

Thus making a total of Rx. 11,320,600 for all Railways and Irrigation Works in India.

196. In Despatch No. 351 (Financial), dated 10th November 1898, from the Government of India, to the Secretary of State, it was proposed to incur expenditure to the extent of Rx. 20,322,100 on the construction of Railways during the three years 1899-1900 to 1901-2, distributed as under :—

	Rx.
1899-1900 . . . . .	6,772,700
1900-1 . . . . .	6,728,400
1901-2 . . . . .	6,821,000
<b>TOTAL</b>	<b>20,322,100</b>

The Secretary of State's approval to this forecast was conveyed in his telegram dated 10th January 1899.

197. The programme of proposed expenditure during 1899-1900 provides for a sum of Rx. 6,772,700. The reasons for the heavy lapse on the grant for 1898-99, amounting to Rx. 2,401,400, have already been stated in paragraph 193 above, and it has been explained that a sum of Rx. 2,150,000 has been added to the grant for 1899-1900. With this addition the total amount available for expenditure on construction of Railways will stand at Rx. 8,922,700. From this figure, however, it will be necessary to deduct a sum of Rx. 100,000 on account of the Capital cost of the Umaria Colliery which will be transferred to the Rewa Durbar with effect from 1st April 1899. The net amount entered in the Estimates for construction of Railways therefore stands at Rx. 8,822,700.

This sum has been distributed for expenditure on Railways as under :—

	Rx.
34.—Construction of Protective Railways . . . . .	490,000
48.—State Railways—Construction . . . . .	3,465,000
Capital of Indian Railway Companies . . . . .	2,841,900
Branch Line Companies . . . . .	168,000
Guaranteed Railways and Extensions . . . . .	1,107,800
East Indian Railway Company's Debentures . . . . .	750,000
<b>Total amount available</b>	<b>8,822,700</b>

In addition to the above, further Capital expenditure will also be incurred in 1899-1900 by Branch Line Companies not in receipt of a firm guarantee, and other Companies whose accounts are outside the Government accounts, to the extent of Rx. 950,300 as under :—

Branch Line Companies—		Rx.
Ahmedabad-Parantij . . . . .		2,100
Mymensingh-Jamalpur . . . . .		60,000
South Behar . . . . .		77,500
Tapti Valley . . . . .		230,000
<b>TOTAL</b>		<b>369,600</b>
Outside the Government Accounts—		
Bengal and North-Western Railway Extensions . . . . .		365,000
Segowli-Raksaul . . . . .		10,700
Nilgiri . . . . .		5,000
Bengal Doorga Extensions . . . . .		200,000
<b>TOTAL</b>		<b>580,700</b>

The provision for Irrigation Works amounts to Rx. 850,000.

The total Capital expenditure on Railways and Irrigation Works in 1899-1900 accordingly amounts to Rx. 10,623,000.

#### 48.—State Railways—Construction.

198. The Budget grant for 1897-98 amounted to Rx. 5,838,600 as under:—

	Rx.
Total provision in Forecast . . . . .	10,130,000
	Rx.
Deduct—Capital of Indian Railway Companies (Rx. 3,710,000 less Rx. 1,200,000 for East Indian Railway) . . . . .	2,510,000
Provision for Burma Railways . . . . .	1,000,000
Additional provision for expenditure in England on the Assam-Bengal Railway (Rx. 199,300—Rx. 80,000) . . . . .	119,300
	3,629,300
	6,500,700
Deduct—Amount provided for East Indian Railway from debentures raised by Company . . . . .	662,100
Grant available . . . . .	5,838,600

The whole amount was shown under the head 48.—State Railways—Construction.

The Revised Estimate provided for a total expenditure of Rx. 3,902,400 under the same head, against which the actual expenditure incurred amounted to Rx. 3,632,005, thus falling short of the Revised Estimate by Rx. 271,395 and of the Budget provision by Rx. 2,206,595.

199. The amounts provided for Railway Construction this year and next are—Revised Estimate, 1898-99, Rx. 5,151,400, and Budget Estimate, 1899-1900, Rx. 4,705,000. These figures include provision to the extent of Rx. 695,400 and Rx. 490,000, respectively, under the head 34.—Construction of Protective Railways. The distribution of the above totals is given in paragraph 28 of this Statement.

200. The distribution of the total expenditure on Railway Construction through State and Companies' agency in each of the three years from 1897-98 to 1899-1900, as given in paragraph 193, is as follows:—

	1897-98, Accounts.	1898-99, Revised.	1899-1900, Budget.
<i>Expenditure in England.</i>			
1. State Lines . . . . .	809,010	788,000	681,000
2. Old Guaranteed Railways . . . . .	761,182	937,600	828,800
3. Extensions of ditto . . . . .	763	86,300	30,000
4. Other Guaranteed or Assisted Railways . . . . .	748,921	756,800	796,000
TOTAL . . . . .	£ 2,319,876	2,568,700	2,626,700

	1897-98, Accounts.	1898-99, Revised.	1899-1900, Budget.
<i>Exchange on Expenditure in England.</i>			
1. State Lines	455,570	394,000	356,700
2. Old Guaranteed Railways at contract rate	69,198	85,200	74,500
3. Extensions of ditto at average rates	466	44,000	68,200
4. Other Guaranteed or Assisted Railways at contract rate	462,842	394,100	517,700
TOTAL Rx.	988,076	917,300	1,017,100
<i>Expenditure in India.</i>			
1. State Lines Rx.	3,348,109	3,969,400	3,667,300
2. Old Guaranteed Railways (net repayments) Rx.	—398,838	—470,000	—349,300
3. Extensions of ditto Rx.	5,048	168,500	304,700
4. Other Guaranteed or Assisted Railways Rx.	2,314,752	1,786,400	1,328,200
5. Branch Lines on firm guarantee Rx.	124,251	218,000	168,000
TOTAL INDIA	5,393,322	5,672,300	5,178,900
TOTAL OF PROGRAMME	8,791,274	9,158,300	8,822,700
To the above should be added the following amounts on account of expenditure on other Companies' lines and expenditure on Railway Construction from Provincial Revenues:—			
Other Branch Lines	563,685	924,600	369,600
Railways outside of Government accounts	903,550	545,500	580,700
Provincial State Lines	3,792	4,200	3,600
GRAND TOTAL	10,172,301	10,632,600	9,776,600

#### 49.—Irrigation—Construction.

501. The figures are:—

Accounts, 1897-98.	Budget, 1898-99.	Revised, 1898-99.	Budget, 1899-1900.
Rx.	Rx.	Rx.	Rx.
692,431	750,000	692,200	850,000

The expenditure during the current year is likely to fall short of the Budget Estimate by Rx. 57,800 owing chiefly to delay in starting work on the Jhelum Canal. In order to meet the heavy demands for expenditure on this and other projects, the Budget grant for 1899-1900 has been fixed at Rx. 850,000.

#### 50.—Miscellaneous Public Improvements.

Accounts, 1897-98.	Budget, 1898-99.	Revised, 1898-99.
Rx.	Rx.	Rx.
4,105	48,000	—4,100

202. As was explained in paragraph 185 of the Financial Statement of March 1898, this head was opened in the Accounts of 1897-98 to record the expenditure on the construction of certain jetties and landing-sheds at Chittagong in connection with the Assam-Bengal Railway. It has now been decided to classify this expenditure under the head "48.—Railways—Construction," and the expenditure of Rx. 4,105 recorded in 1897-98 has accordingly been written back in 1898-99.

### Section VI.—Ways and Means.

#### HOME TREASURY.

203. The following table sets out the transactions of the Home Treasury as they appear in the Budget and Revised Estimate for 1898-99 and in the Budget for the coming year :—

	Budget, 1898-99.	Revised, 1898-99.	Budget, 1899-1900.
RECAPTS.	£	£	£
Council Bills . . . . .	16,000,000	19,000,000	17,000,000
Permanent Debt incurred . . . . .	6,000,000	5,297,700	..
Temporary Debt incurred . . . . .	6,000,000	4,500,000	4,500,000
Capital Receipts from Railway Companies— for discharge of debt . . . . .	1,491,600	805,500	1,248,600
" expenditure . . . . .	1,676,000	1,226,300	1,473,000
Deposits and Advances, net . . . . .	...	200	...
Add—Opening Balance . . . . .	2,168,254	2,534,244	4,304,444
<b>TOTAL</b> . . . . .	<b>33,335,834</b>	<b>33,363,944</b>	<b>28,526,044</b>
OUTGOINGS.			
Excess of Expenditure over Revenue . . . . .	16,286,500	16,091,200	16,324,500
Expenditure not charged to Revenue . . . . .	1,119,900	791,100	682,100
Permanent Debt discharged . . . . .	3,384,700	3,384,900	...
Temporary Debt . . . . .	6,000,000	6,000,000	4,500,000
Issues to Railway Companies on Capital Account— for discharge of debt . . . . .	1,491,600	805,500	1,248,600
" expenditure . . . . .	2,316,500	1,823,900	1,948,700
Remittances from India, net— (a) Railway Companies' Remittances . . . . .	302,500	—62,700	736,000
(b) Family and other Remittances . . . . .	191,300	225,600	263,800
Add—Closing Balance . . . . .	2,242,854	4,304,444	2,817,344
<b>TOTAL</b> . . . . .	<b>33,335,854</b>	<b>33,363,944</b>	<b>28,526,044</b>

204. In the Budget Estimate of 1898-99 the net disbursements of the Home Treasury, excluding Loans and Council Bills, were taken at £18,540,700. The intention then was to provide £16,000,000 of this by the sale of Bills on India, and to meet the balance, £2,540,700, by raising Sterling loans in England. According to the Revised Estimates the net disbursements, apart from the discount on the loan raised during the year by means of 2½ per cent India Stock, will be £17,642,600, so that if the sales of Council Bills had been restricted to £16,000,000, loan funds would have had to meet only £1,642,600, instead of £2,540,700 as originally contemplated. But the new loan of the year was

raised at a heavy discount, amounting to £702,300, on a total debt of £6,000,000; while, on the other hand, the Secretary of State has taken advantage of the improvement in the cash balances in India and of the favourable prospects of the season to raise his drawings in 1898-99 to £19,000,000. The larger balances thus made available have enabled the Secretary of State to reduce temporary borrowing on India Bills from £6,000,000 to £4,500,000, and the cash balance of the Home Treasury at the end of the year is now expected to exceed the opening balance by £1,770,200. Although, for the reasons explained above, the sale of Bills on India to the extent of £18,000,000 only would have been more than sufficient to cover the net disbursements of the Home Treasury in 1898-99, the Secretary of State has drawn a million in excess of this sum with the object of fully meeting the large mercantile demand for remittance arising from the brisk trade of the year. The drawings of 1899-1900 will be reduced by a corresponding amount.

205. In accordance with the intention announced in paragraph 194 of the last Financial Statement, India Stock for £6,000,000 was issued in July 1898. The new stock was issued at  $2\frac{1}{4}$  per cent: but owing to the unfavourable state of the money market at the time, the loan was taken up at the heavy discount of £11 9s. 7d. per cent. The total amount tendered was £22,385,300, and the minimum rate of accepted tenders was £88 5s. 6d. It is usual, when the amount of discount on a new loan is moderate, to charge off the whole amount against the Revenues of the year in which the loan is raised; but as in the present case the discount comes to the large sum of £702,300, it has been decided, in accordance with an arrangement sanctioned in 1836, to create a Sinking Fund for its discharge by annual payments for 50 years at an interest of  $2\frac{1}{4}$  per cent per annum. Accordingly, the money actually raised by the loan, namely, £5,297,700, is shown in the table in paragraph 203 as a receipt on account of the loan, and the annual payment to the Sinking Fund, amounting to about £7,000, is, as already explained in paragraph 121, shown as expenditure.

In accordance with the programme settled at the beginning of the year, 384,700*l.* of Oudh and Rohilkhand Railway 4 per cent Debenture Stock was discharged on the 6th May 1898, and 3,000,000*l.* India Debentures bearing interest at  $3\frac{1}{4}$  per cent were also discharged on their expiry on 16th August 1898.

206. In March last it was intended to raise 6,000,000*l.* in 1898-99 by means of India Bills so as to replace an equivalent amount falling due in the year; but in consequence of the larger amount received for Bills of Exchange on India only 4,500,000*l.* of temporary debt had to be replaced, and the remainder was discharged by a reduction in the cash balances. Of the 4,500,000*l.* India Bills issued during the year, 2,500,000*l.* were issued in May 1898 and 2,000,000*l.* in September, both issues being for twelve months. The results of the loans were as follows—

Month of Issue.	Amount tendered.	Amount accepted.	Average rate of interest per cent per annum.
	£	£	£ s. d.
May 1898 . . . . .	18,809,000	2,500,000	2 2 6
September 1898 . . . . .	7,175,000	2,000,000	2 12 0

207. The net issues to Railway Companies in England in 1898-99 are now estimated to be 597,600*l.* against 640,500*l.* entered in the Budget Estimate, showing a reduction of 42,900*l.* only. The following are the usual details:—

Subscribed Capital—	RECEIPTS.	
	Budget. £	Revised. £
(a) State Lines . . . . .	1,335,100	1,151,800
(b) Guaranteed Lines . . . . .	1,829,500	836,800
Miscellaneous . . . . .	3,000	43,200
<b>TOTAL</b> . . . . .	<b>3,167,600</b>	<b>2,031,800</b>

ISSUES.	Budget. £	Revised. £
For discharge of Debentures—		
(a) State Railways . . . . .	835,100	600,000
(b) Guaranteed Lines . . . . .	656,500	205,500
For Stores, Establishment Charges, etc.—		
(a) State Railways . . . . .	865,300	759,700
(b) Guaranteed Lines . . . . .	1,451,200	1,064,200
<b>TOTAL</b> . . . . .	<b>3,808,100</b>	<b>2,629,400</b>

Debentures of the Rohilkhand-Kumaon, Southern Mahratta, Madras, and Bombay, Baroda and Central India Railway Companies, aggregating £686,100, were renewed instead of being replaced by fresh Capital as was contemplated in the Budget programme. The Capital receipts from the Bombay, Baroda and Central India, the Great Indian Peninsula Railway, and the Madras Railway were less by 541,700*l.* than the original estimate. On the other hand, the Indian Midland and Bengal-Nagpur Railways raised 51,800*l.* more, making the net decrease in the amounts of new Capital 1,176,000*l.* as shown above. The item "Miscellaneous" includes 37,490*l.* received from the Bombay, Baroda and Central India Railway Company as contribution from the Fire Insurance Fund towards the cost of renewing Warren girders.

The estimates of the demands of the Companies for stores, establishment charges, etc., have proved too high except in the case of the Bengal Central, the Bengal-Nagpur, and the Burma Railways.

208. The following are the details of the remittance transactions of Railway Companies working State lines in India, to which advances of funds are made in England for the purchase of stores, etc., against adjustment in India by debit to the Railway Accounts :—

	Budget. £	Revised. £
Advances for purchase of Stores—		
East Indian Railway . . . . .	700,000	714,400
Rajputana-Malwa . . . . .	65,000	70,600
South Indian Railway . . . . .	65,000	47,300
Bengal and North-Western Railway . . . . .	75,000	107,000
	<u>905,000</u>	<u>939,300</u>
East Indian Railway Debentures . . . . .	600,000	1,000,000
Transfer Fees, etc. . . . .	2,500	2,000
	<u>602,500</u>	<u>1,002,000</u>
<b>Net Remittance from India</b> . . . . .	<b>302,500</b>	<b>—62,700</b>

The East Indian Railway has been authorised to raise 1,000,000*l.* instead of 600,000*l.* entered in the Budget Estimate, and the advances for purchase of stores are now expected to be largely in excess of the original estimates furnished by the several Companies.

Family and other remittances.

209. The increase in the net payments on account of family and other remittances of £34,300 is the result of a number of large differences. The demands for Railway stores required by Native States have greatly exceeded the estimates sent from India, and the Revised Estimates also include 10,000*l.* estimated to be refunded to the Imperial Government in settlement of the expenses attending the employment of Native Indian Troops at Suakin. On the other hand, the repayments by Her Majesty's Government of expenses attending the employment of Indian Native Troops sent to Mombassa are expected to exceed the original estimate by 18,600*l.*

210. The net disbursements at the Home Treasury in 1899-1900, excluding Loans and Council Bills, are estimated at £18,487,100 against £18,540,700 in the Budget Estimate of 1898-99. As already stated in paragraph 204, the Secretary of State's present estimate of the drawings in 1898-99 will produce a large increase in his cash balances during the year, and this increase will be drawn upon to a considerable extent to meet the requirements of 1899-1900. It is therefore the present intention of the Secretary of State to draw during 1899-1900 £17,000,000 by Bills on India.

1899-1900.  
Home Treasury.  
Ways and Means.

No increase in the Sterling debt in 1899-1900 is contemplated at present, nor is it proposed to issue any India Stock in the year; but India Bills falling due in 1899-1900 will be covered by fresh issues of a corresponding amount.

According to the programme now announced, the net disbursements of the Home Treasury will be met, in the year 1899-1900, by the sale of Bills on India to the amount of £17,000,000 and by a reduction in the cash balances of £1,487,100.

211. It should be understood that in stating the present intentions of the Secretary of State no sort of pledge is given that he will adhere to the programme.

#### INDIA.

212. The following is a summary of the Estimate of Ways and Means in India:—

	1898-99.		1899-1900.
	Budget.	Revised.	Budget.
RECEIPTS.	Rx.	Rx.	Rx.
1. Excess of Revenue over the Expenditure charged against it . . . . .	26,298,400	28,196,200	28,808,000

<b>TOTAL</b> . . . . .	<b>47,019,652</b>	<b>46,960,843</b>	<b>48,204,543</b>

The headings in italics are connected with, and explained by, the corresponding figures of the Secretary of State's account in England. The others refer to purely Indian transactions.

1898-99.

General Summary.

213. The excess of revenue in India over the expenditure charged against it was taken in the Budget Estimate of 1898-99 at Rx. 26,298,400, and it was assumed that it would be possible to pay Rx. 24,960,000 on account of Council Bills during the year with the help of a rupee loan of Rx. 3,000,000 and with a reduction in the cash balances of Rx. 513,400. The early cessation of warlike operations on the frontier, the partial failure of the opium crop which reduced the payments to cultivators, and a satisfactory improvement in Railway and other revenues so far improved the cash balances as to enable Government to reduce the rupee loan of the year to Rx. 1,200,000 without curtailing the drawings of the Secretary of State in the early part of the year. As the year advanced, a steady increase of the revenue and large lapses in the grants for Capital expenditure added constantly to the balances and rendered it possible to meet without difficulty payments for Council Bills considerably in excess of the Budget Estimate. It is now estimated that the revenue in excess of expenditure will amount to Rx. 28,196,200; that the balances of Provincial Governments and Local Funds will be increased by Rx. 1,417,900 instead of being reduced by Rx. 116,800 as anticipated in the Budget; and that the Capital expenditure of Government not charged to Revenue will be Rx. 1,618,600 less than the original estimate. The net result of these and other variations is that in spite of the proposed rupee loan having been reduced by Rx. 1,800,000, Rx. 28,067,000 will be paid on account of Council Bills, and the year will close with a cash balance of Rx. 17,072,043, being Rx. 1,089,600 in excess of the opening balance of the year.

Rupee Loan of  
1898-99.

214. It was announced in paragraph 200 of the last Financial Statement that a new loan of Rx. 3,000,000 would be raised in India in 1898-99. But owing to the scarcity of loanable Capital, due partly to famine and plague and partly to the Exchange Banks having remitted their surplus balances to England, the prospects of raising such a large amount in the Indian market were unfavourable. As a review of the Ways and Means in June 1898 showed that owing to a general improvement in revenue prospects a loan of Rx. 1,200,000 might be sufficient, it was decided to borrow that amount only. The state of the market made it impossible to attempt a 3 per cent loan, and the loan was therefore raised at  $3\frac{1}{2}$  per cent as in 1897-98.

The loan of Rx. 1,200,000 was issued on 30th July 1898, and tenders for it were received on 24th August 1898. The unfavourable state of the money market affected the result, and the loan was raised at a discount of Rs-3 annas per cent.

1899-1900.

Main features.

215. The Revenue Account for 1899-1900 as now made up closes with a surplus of Rx. 3,932,600. The Capital expenditure on Railways and Canals not charged to Revenue must of necessity be provided for either from the surplus revenue, or by reducing the cash balances, or by contracting a loan. In 1899-1900 the requirements for Capital expenditure are—

	Rx.
(1) Government expenditure in India . . . . .	3,275,600
(2) Government expenditure in England (£ 682,100 converted at $15\frac{1}{2}d.$ the rupee) . . . . .	1,039,400
(3) Net disbursements to Railway Companies in India . . . . .	1,355,600
(4) Net disbursements to Railway Companies in England (£475,700 converted at $15\frac{1}{2}d.$ the rupee) . . . . .	724,900
<b>TOTAL</b> . . . . .	<b>6,395,500</b>

Of the total sum of Rx. 6,395,500 thus required in England and in India for the purpose of Capital expenditure during 1899-1900, £1,187,100 or

Rx. 2,266,100 has already been rendered available in the manner explained in paragraph 210 above by the increase in the Secretary of State's balances resulting from the larger drawings of Council Bills during the current year, and the remainder Rx. 4,129,400 will be more than covered by the surplus revenue estimated at Rx. 3,932,600 and an estimated reduction in the cash balances in India of Rx. 392,600. Accordingly no new rupee loan will be required in India for the purpose of Capital expenditure in 1899-1900.

Apart from the revenue surplus mentioned above, there will be a net receipt on account of Unfunded Debt—chiefly Savings Bank deposits—of Rx. 521,900, and Rx. 603,900 (included in "Other items" in the table in paragraph 212) out of the Famine Insurance Grant of Rx. 1,500,000 will be available for appropriation in reduction of debt. Against these important receipts there will be taken the expenditure of Provincial Governments from accumulated balances (Rx. 924,700), the payments for rupee debt discharged (Rx. 190,000), and the loans by Government (Rx. 248,800). The payments of Council Bills in 1899-1900 as entered in the Estimates will be Rx. 26,104,700 including exchange, or Rx. 1,144,700 more than the corresponding figure in the Budget Estimates of 1898-99.

216. As above stated, no rupee loan in India will be required in 1899-1900, and it is not the present intention of the Government of India to raise any such loan in the year. Full liberty is, however, reserved as usual to alter the programme, as now announced, to any extent that may be considered desirable.

217. The following table gives the details of the transactions of Savings Banks during the last few years and the estimated transactions for 1898-99 and 1899-1900:—

YEAR.	Net additions to deposits, cash.	Interest.	Total addition.
1890-91 . . . . .	250,700	279,700	530,400
1891-92 . . . . .	517,900	306,200	824,100
1892-93 . . . . .	548,900	339,400	888,300
1893-94 . . . . .	179,900	368,000	547,900
1894-95 . . . . .	—84,500	297,000	212,500
1895-96 . . . . .	247,700	338,500	586,200
1896-97 . . . . .	—581,100	340,600	—240,500
1897-98 . . . . .	—657,100	327,000	—330,100
1898-99, Budget . . . . .	156,700	327,500	484,200
1898-99, Revised . . . . .	—90,300	325,700	235,400
1899-1900, Budget . . . . .	126,500	336,600	463,100

218. The Budget Estimate of 1898-99 anticipated a small addition of Rx. 156,700 to the net deposits, but according to the present estimates there will be a net withdrawal of Rx. 90,300 apart from interest. This result is attributed to the low price ruling for Government securities throughout the greater part of the year having encouraged small investors to withdraw their money from Savings Banks and buy Government paper. The price of  $3\frac{1}{2}$  per cent Government securities is now above par, and in preparing the Budget Estimates for 1899-1900 allowance has been made for a small addition to the net deposits of Rx. 126,500.

219. The transactions during the year 1898-99 under the head of Loans by Government are now expected to result in a net receipt of Rx. 262,500 against Rx. 62,200 entered in the Budget Estimate, an increase in the receipts of Rx. 200,300. This increase is made up of an increase in the recoveries of Rx. 174,400 and a decrease in the advances of Rx. 25,900. As is usually the case, the allotments asked for by Provincial Governments on behalf of local

Loans by Government for local purposes.

authorities could not be fully utilised by reason of delays in maturing the schemes of improvement for which the loans were required. The amounts so lapsing are largest in the North-Western Provinces and Oudh.

The recoveries were also larger than the original estimates, chiefly in the Central Provinces and the North-Western Provinces.

Provision has been made in the Budget Estimate of 1899-1900 for net issues on account of loans to the extent of Rx. 248,800 made up of allotments of advances aggregating Rx. 989,600 and recoveries of past loans, Rx. 740,800. The following are the figures of gross recoveries and issues for the six years ending 1899-1900:—

	Issues.	Recoveries.
1894-95 . . . . .	686,806	512,267
1895-96 . . . . .	744,789	506,245
1896-97 . . . . .	1,337,194	542,638
1897-98 . . . . .	1,466,739	958,153
1898-99, Revised . . . . .	771,700	1,034,200
1899-1900, Budget . . . . .	989,600	740,800

It will be observed that the large issues of the later years of the period have been to a great extent met by large recoveries which in their turn were rendered possible by the liberal scale on which certain classes of loans were given in years of scarcity. The estimates for next year include a large provision for loans to agriculturists and cultivators in the Punjab required partly for the relief of distress apprehended in the Hissar District, but chiefly in connection with the Chenab Canal Colonisation Project from which a substantial increase of revenue is expected. Allowance has been made for plague loans as far as they can be foreseen at present. A sum of Rx. 100,000 representing the Capital cost of the Umaria Colliery is also included in the figures as a loan to the Rewa Durbar. The Colliery will be transferred to the Durbar with effect from 1st April 1899, and pending recovery of the cost the amount is written off the Capital Account of Railways by transfer to the Loan Account.

220. The year 1899-1900 is estimated to close with a cash balance in the Indian Treasuries of Rx. 16,679,443, which is less than the opening balance of the year by Rx. 392,600.

FINANCE AND COMMERCE DEPARTMENT;

## Memorandum by the Honourable Major-General Sir Edwin Collen, K.C.I.E., on Military Expenditure.

The estimates with which the Military and Marine Department of the Government of India is concerned, are—

- I—Indian Military Estimates.
- II—Home (India) Military Estimates.
- III—Military Works Estimates.
- IV—Marine Estimates.

2. They will be dealt with in this memorandum in the order given above.

### I.—Indian Military Estimates.

#### *Revised Estimates, 1898-99.*

3. The revised Indian Military Estimates for 1898-99, compared with the budget for the year, show a net saving of Rx. 520,800 caused by an increase in receipts of Rx. 2,200 and a decrease in expenditure of Rx. 518,600.

Comparison—  
Revised for 1898-99,  
and  
Budget for 1898-99.

4. The more important causes which have led to the decrease in expenditure are as under :—

- (a) There is a decrease of Rx. 344,300 on account of military operations and an increase of Rx. 53,200 on account of special services, thus giving a net decrease of Rx. 291,100 on account of military operations and special services. The decrease on account of military operations is mainly due to the large expenditure on account of field operations on the North-West Frontier, which was anticipated when the budget was framed, not having been incurred, owing to the cessation of those operations earlier than was expected, and also to various changes in the strength and organisation of the forces which were mobilised. On the other hand, the increase on account of special services is chiefly caused by the augmented garrisons in the Malakand and Tochi Valley not having been reduced on as early a date as was anticipated.
- (b) Another cause of decrease, amounting to Rx. 65,000, was the fall in the prices of food supplies for men and animals.
- (c) There was also a decrease of Rx. 41,200 on account of exchange compensation allowance, owing to exchange having been favourable during the year.
- (d) Again, savings accrued owing to the authorised strength of British infantry being short by one battalion for a part of the year (Rx. 36,700); to the employment of the 1st Bengal Infantry at Mauritius, and to the retention for service in East Africa of the 27th Bombay Infantry and the head-quarters wing of the 4th

Bombay Rifles for longer periods than were anticipated. The Military Estimates were relieved of expenditure on account of the two latter items to the extent of Rx. 18,000 and Rx. 15,400, respectively, the charges having been borne by Her Majesty's Imperial Government. The Military Estimates were further relieved of expenditure to the extent of Rx. 24,100 on account of the pay and allowances of officers whose services were placed at the disposal of the Civil Department for plague duty.

(e) A lapse of Rx. 20,000 has also occurred in the budget for 1899-99, as the orders of the Secretary of State on the question of increasing the establishment of Commissariat-Transport officers could not be given effect to in that year.

(f) In addition to the foregoing, the following are the chief causes which contributed towards reducing expenditure :—

(i) Under Grant 1 (*Army and Garrison Staff*) there are savings amounting to Rx. 14,500 owing chiefly to absence of officers on furlough.

(ii) Under Grant 3 (*Regimental Pay, Allowances and Charges*) there are savings to the extent of Rx. 29,000, owing to fluctuations in the strength of the troops.

(iii) Under Grant 4 (*Commissariat Establishments, Supplies and Services*) the savings aggregate Rx. 28,500, and are due to smaller purchases of malt-liquor owing to decreased consumption (Rx. 14,000); and to less expenditure on other accounts.

(iv) Under Grant 10 (*Ordnance Establishments, Stores and Camp Equipage*) the savings aggregate Rx. 20,000 owing chiefly to fluctuations in establishments and smaller purchases of camp equipage and other stores.

5. The total decrease in expenditure was, however, to some extent counterbalanced by certain increases, the more important of which are the following :—

(a) Special bounties and advances of deferred pay were paid to a limited number of men of certain British regiments serving in India, to induce them to extend their service with the colours. This causes an increase to the extent of Rx. 31,900.

(b) Judging from the experience of the first nine months there will be larger expenditure to the extent of Rx. 15,000 on account of the ordinary conveyance of troops and stores.

(c) Owing to the existence of plague in India, it has been found necessary to give additional grants-in-aid, to certain cantonments in the Bombay Command, to meet expenditure on plague operations.

(d) Under Grant 9 (*Medical Establishments, Supplies and Services*) there is larger expenditure to the extent of Rx. 10,000 chiefly in the purchase of medical supplies.

*Estimates, 1899-1900.**Comparison—*

Budget for 1898-99,

and

Estimate for 1899-1900.

6. The estimates for 1899-1900, in the net, amount to Rx. 16,095,700, or Rx. 1,155,100 less than the budget for 1898-99. This is due to a decrease in receipts of Rx. 16,400 and in expenditure of Rx. 1,171,500.

7. In comparing the estimates of next year with the budget for the current year, it will be found that the decrease in receipts is mainly due to less issues on payment of commissariat supplies being anticipated than in the current year owing to the cessation of field operations.

8. The decrease in expenditure is accounted for as follows:—

- (a) A saving of Rx. 1,176,500 occurs in the provision for military operations and special services.
- (b) In consequence of the higher rates of exchange adopted for the estimates of 1899-1900, a saving of Rx. 120,000 is anticipated in the pay of British troops and of Rx. 20,800 in exchange compensation allowance.
- (c) A saving, amounting to Rx. 60,000, is due to an anticipated fall in the prices of food supplies for men and animals as compared with the prices adopted for the current year's budget.
- (d) Again, savings to the extent of Rx. 21,200 will accrue owing to the cost of the 1st Bengal Infantry while stationed at Mauritius being borne by Her Majesty's Government.
- (e) Another cause of saving, resulting directly from the cessation of field operations, is that the provision for expenditure on account of non-effective services is reduced by Rx. 22,500 as regards extra pensionary allowances, and by Rx. 14,800 for war medals.
- (f) In addition to the foregoing, the following reductions in expenditure are anticipated:—
  - (i) Under Grant 3 (*Regimental Pay, Allowances and Charges*) savings to the extent of Rx. 45,000 are anticipated owing to probable fluctuations in strength and other causes.
  - (ii) Under Grant 4 (*Commissariat Establishments, Supplies and Services*) savings, amounting to Rx. 32,800, are expected, owing to (1) smaller purchases of malt-liquor Rx. 12,800; (2) to the special grant (Rx. 10,000) made in the preceding year for purchase of transport animals to complete the authorised complement of mobilisation animals not having been repeated; and (3) to smaller provision (Rx. 10,000) as against Rx. 20,000 in 1898-99 having been made for additional officers for the Commissariat-Transport Department.
  - (iii) Under Grant 6 (*Clothing Establishments, Supplies and Services*) reduced expenditure of about Rx. 17,400 is anticipated, owing to smaller purchases of certain articles being necessary.
  - (iv) Under Grant 10 (*Ordnance Establishments, Stores and Camp Equipage*) there will be savings, aggregating Rx. 10,300, due chiefly to anticipated variations in establishments, and also to a smaller provision having to be made for the conversion of the equipment of the batteries of the field army to that suitable for the 15-pounder projectiles.

9. The foregoing decreases in expenditure will, however, be partly counter-balanced by certain increases, of which the following are the more important :—

- (i) Increased provision to the extent of Rs. 114,000 has been made for messing allowance to the British Army. In this connection it may be mentioned that, as explained in my memorandum of last year, the details connected with the measures to be adopted in India, in furtherance of the improvements made in the position of the non-commissioned officers and men of the British Army in all parts of Her Majesty's dominions, were not settled when the budget for 1898-99 was closed ; provision, therefore, was made therein for only Rs. 200,000. During the currency of that year the matter was, however, finally settled, and with the sanction of the Secretary of State certain measures were adopted in India with effect from the 1st June 1898. These measures involve the abolition of deferred pay, and the grant of a gratuity on discharge or transfer to the Army Reserve ; also the grant of messing allowance of  $2\frac{1}{2}$  annas per diem in addition to usual pay and extra-duty pay, and the free issue of groceries, for which the soldier had up to that time been required to pay 9 pice per diem. I may mention that the soldiers who were in the service at the time these changes were introduced had the option of accepting them, or continuing under the arrangements they were intended to supersede. These considerations and the fact that expenditure for the whole, instead of a part, of a year has to be provided for, account for the increase in the provision for this allowance in the estimate of next year.
- (ii) Provision to the extent of Rs. 39,500 has been made for providing the mobilisation equipment of the additional corps (line of communications) included among the extra units of the field army ; and of Rs. 37,600 for maintaining a reserve of compressed fodder to facilitate mobilisation requirements. A sum of Rs. 18,400 has also been provided for the supply of 'camel saddles for the 3rd and 4th Divisions and extra units of the field army.
- (iii) A sum of Rs. 20,700 has been provided for the re-establishment of Cantonment Hospitals.
- (iv) There will also be increased expenditure to the extent of Rs. 17,200 due to the raising of an additional Native mountain battery.
- (v) Increased provision, amounting to Rs. 16,800, has also been made on account of the ordinary movements of troops and stores, as it is anticipated that the reliefs next year will be heavier than they were this year.
- (vi) Larger provision to the extent of Rs. 14,000 has been made for camps of exercise.
- (vii) Another cause of increased expenditure, amounting to Rs. 13,800, is the return of the head-quarters wing of the 4th Bombay Rifles and the anticipated return from Mombassa early next year of the 27th Bombay Infantry, the cost of which during its absence from India has been borne by Her Majesty's Imperial Government.
- (viii) There will also be larger expenditure to the extent of Rs. 10,000 on account of medical supplies and services.

(c) The expenditure side of the budget estimate for next year is also increased by reason of a smaller deduction in India to adjust excess provision in the Home Estimate.—R<sub>x</sub>. 48,300.

10. A statement is appended showing the net amounts under each of the 20 Grants for effective and non-effective services, and for military operations:—

\* The bulk of subscriptions of officers to Indian Military Service Family Pensions is received in India, while most of the expenditure is incurred at home. The receipts in India, therefore, exceed the expenditure in India, and hence, as the figures in the above statement are net, there must be a minus entry.

† In my memorandum on military expenditure last year the heading "Military Operations" did not appear, although it did appear in the Financial Statement, the charges being included in my memorandum under Grant 14. The figure adopted above differs from that in the Financial Statement for last year, by reason of a change in classification involving a redistribution between ordinary charges and warlike operations.

### II.—Home (India) Military Estimates.

#### *Revised Estimates, 1898-99.*

11. The second of the estimates with which the Military Department is concerned is the Home estimate for army effective and non-effective charges. The Home Budget Estimates for 1898-99 provided for a gross expenditure of £4,469,800, while in the Revised Estimates provision has been made to the extent of £4,324,100.

12. The saving of £145,200 in the Revised, as compared with the Budget Estimate for 1898-99, is chiefly due to decrease in the payments for ordnance stores, owing, to a great extent, to the reduction of demands made by India. It is also due to reduced payments on account of the furlough allowances of officers of the Indian Service, and of the pay and pensions of non-effective and retired officers of the Indian Service. These decreases are, however, partly counter-balanced by larger payments having been made to the War Office in settlement of their claims for 1897-98 on account of the effective and non-effective service of the British forces serving in India, than were anticipated when the Budget Estimate was framed.

13. There is also an increase of £10,400 on account of receipts in the Revised, as compared with the Budget Estimates for 1898-99, due chiefly to larger receipts being anticipated on account of the Indian Troop Service, and in the value of articles in possession of regiments on their transfer from the Indian to the British establishment.

14. The net figures of the revised, therefore, show a saving of £155,600 on those of the Budget Estimate for 1898-99 due, as explained above, to a decrease in expenditure of £145,200 and an increase in receipts of £10,400.

#### *Estimates, 1899-1900.*

Comparison—  
Budget for 1898-99,  
and  
Estimate for 1899-1900.

15. The receipts and expenditure for 1899-1900 are as follows:—

					Receipts.	Expenditure.	Net expenditure.
					£	£	£
Effective	...	...	...	...	51,900	1,996,300	1,944,400
Non-effective	...	...	...	...	15,500	2,496,800	2,481,300
Total				...	67,400	4,493,100	4,425,700

16. Compared with the budget for 1898-99, larger receipts to the extent of £18,100 are anticipated in 1899-1900, owing to the same causes as those which have led to the figures on account of receipts being increased in the Revised Estimate for 1898-99. The total gross expenditure for 1899-1900 is, however, higher by £23,800 than the amount provided in the budget for the preceding year, owing chiefly to larger amounts being provided for payment to the War Office on account of the effective and non-effective services of the British forces serving in India, as the amounts adopted in this account in the budget of the preceding year were too low. These increases in expenditure are partly counter-balanced by provision for one transport for troop service less than in the preceding year having been made, and by reduced expenditure being anticipated on account of pay and pensions of non-effective and retired officers of the Indian Service.

17. The gross charges on account of effective services include payments to the War Office in respect of the British forces serving in India, amounting, as estimated in the coming year, to £730,000, as against £721,000 in the estimates for 1898-99. These charges are based on the capitation rate of £7-10 for each man borne on the establishments of the British forces in India, with the addition of the charge for deferred pay issued to British soldiers on discharge or transfer to the reserve. In connection with the deferred pay, it may be mentioned that during the current financial year it was decided to abolish this concession and to substitute for it a gratuity, the effect of which will be to ultimately reduce military expenditure at Home. The other items included in the gross effective charges are furlough allowances and pay during the voyage of British forces serving in India (£103,000); furlough allowances of officers of the Indian Service (£230,000); Indian Troop Service (£260,600); passage of officers and troops otherwise than in transport (£19,000); miscellaneous (£19,000); and stores for India (£629,700).

The gross charges on account of non-effective services are made up of the retired pay, etc., of the British forces for service in India (£551,000); pay of the non-effective Colonels of Royal Artillery (£21,800); while the pay and pensions of non-effective and retired officers of the Indian Service amount to £1,800,000, the miscellaneous pensions to £86,000, and the Indian Military Service Family Pensions to £32,000.

18. The net expenditure for 1899-1900 is more by £5,700 than that for the preceding year; and, as explained above, this is due to an increase of £18,100 in receipts and an increase of £23,800 in gross expenditure.

19. Subsequent to the estimate of 1899-1900 being closed, it was decided to defer the supply from England of certain stores to the value of £11,033 for which provision was included in those estimates. This over-provision in the Home Estimates has been adjusted by a corresponding deduction in the Indian Estimates, with the result that, as compared with the net expenditure of 1898-99, there will be a saving in 1899-1900 of £5,393 in the Home Expenditure.

20. The figures of actual expenditure in 1897-98, of the *Budget* and *Revised Estimates* for 1898-99, and of the *Estimate* for 1899-1900, are given below in detail for convenience of comparison :—

	Accounts, 1897-98.	Budget Estimate 1898-99.	Revised Estimate, 1898-99.	Estimate, 1899-1900.
EFFECTIVE.	£	£	£	£
Payments to War Office in respect of British Forces serving in India	729,719	721,000	744,400	730,000
Furlough Allowances and Pay during voyage of British Forces serving in India	98,390	108,000	112,000	108,000
Furlough Allowances of officers of the Indian Service	165,800	230,000	202,000	230,000
Indian Troop Service	228,944	267,600	284,600	260,600
Passage of officers and troops otherwise than in transports	17,737	19,000	12,000	19,000
Miscellaneous	31,651	20,000	19,500	19,000
Stores for India	527,741	627,900	522,900	629,700
Total	1,829,382	1,993,500	1,897,400	1,996,300
NON-EFFECTIVE.				
Payments to War Office for Retired Pay, etc., of British Forces for service in India	506,847	517,000	527,500	554,600
Pay of non-effective Colonels of Royal Artillery	24,518	24,800	24,200	24,800
Pay and pensions of non-effective and retired officers of the Indian Service	1,771,591	1,820,000	1,760,000	1,800,000
Miscellaneous pensions, etc.	84,443	84,000	81,500	86,000
Indian Military Service Family Pensions	27,446	30,000	30,500	32,000
Total	2,414,845	2,475,800	2,426,700	2,496,800
Total, Effective and Non-Effective	4,244,227	4,469,300	4,324,100	4,493,100

21. The following table shows, in detail, the expenditure for stores (including freight) from 1893-94 to 1899-1900 :—

	ACCOUNTS.					Revised Estimate, 1898-99.	Estimate, 1899-1900.
	1893-94.	1894-95.	1895-96.	1896-97.	1897-98.		
	£	£	£	£	£	£	£

Tochi Field Force	...	...	...	...	1,716	1,000	...
North-West Frontier Field Operations	...	...	...	...	...	...	5,800
Total	805,259	578,043	495,157	523,811	527,141	522,900	629,700

**III:—Military Works Estimates.**

Excluding English expenditure and exchange, the budget estimate for 1898-99 amounted to Rx. 1,135,800; the revised estimate of expenditure amounted to Rx. 1,118,700. There has, therefore, been less expenditure in India of Rx. 22,100.

The budget estimate for 1899-1900, excluding English expenditure and exchange, amounts to Rx. 1,299,600, or Rx. 185,900 more than that of 1898-99. The difference is due to an extragrant of Rx. 14,500 for the Barrack Department duties in the Madras Command, now taken over by the Military Works Department, and to a provision of Rx. 150,000 for defence works on the North-West Frontier.

The heads of the Military Works estimate are in round figures:—

	Rx.
For original works, including works in progress and those to be commenced	400,800
„ repairs	849,000
„ establishment	298,000
„ Barrack Department establishment, supplies, and tools and plant	86,000

The new works, 168 in number, including 63 in progress and 105 not commenced, comprise fourtech water-supply works on which Rx. 47,300 is to be spent, and Rx. 22,100 for coast and inland fortifications, the balance being made up of drainage works, hospitals, barracks, and Ordnance, Commissariat, Marine, and Remount requirements. Many of these new works are of a minor character, or are renewals. The demands are very large, and no fewer than 354 works cannot be provided for. If they had been provided for it would have meant an addition of Rx. 940,000 to the budget.

The laborious task of re-constructing the organization for the performance of the military works services has been completed, and I hope that the new arrangements will come into force at an early date.

**IV.—Marine Estimates.***Revised Estimates, 1898-99.*

The net figures of the Budget Estimate of the Royal Indian Marine for 1898-99 were Rx. 142,500, the Re-

Comparison—  
Revised for 1898-99,  
and  
Budget for 1898-99.

vised Estimate stands at Rx. 123,200, showing a decrease of Rx. 19,300.

This decrease in the net expenditure is caused by excess receipts amounting to Rx. 17,500, and a reduction in expenditure to the extent of Rx. 1,800.

The excess under receipts is chiefly due to large recoveries from the Home Government in connection with the employment of Royal Indian Marine vessels on Imperial Service.

The increases in expenditure (aggregating Rx. 8,400) are chiefly due to smaller recoveries for stores issued to, and works executed for, other departments

The decreases in expenditure (aggregating Rx. 10,200) are principally due to savings in matters of establishments and up-keep; reduced expenditure on repairs to Her Majesty's ships in Indian seas and Royal Indian Marine vessels at outstations; smaller payments of exchange compensation allowance; temporary vacancies and other items.

Taking the increase against the decrease, there is a net decrease of Rx. 1,900, and adding these figures to the increased receipts, Rx. 17,500, the result is a decrease of Rx. 19,300 in the Revised as compared with the Budget Estimate.

#### *Estimates, 1899-1900.*

The net figures of the Marine Estimate for 1899-1900 are Rx. 136,950 against Rx. 142,500, the figures of the budget for 1898-99 showing a decrease of Rx. 5,550. This decrease is caused by an increase in receipts, amounting to Rx. 7,900, due to anticipated recoveries in connection with the employment of the *Olive* on Imperial Service, counterbalanced by increased expenditure to the extent of Rx. 2,350.

Comparison—  
Budget for 1898-99,  
and  
Estimate for 1899-1900.

#### **General Remarks.**

Having reviewed the estimates with which the Military and Marine Department of the Government of India is concerned, I would now offer the following remarks in connection with the work of the Army Departments under the administrative control of the Military Department.

The past year has happily been one during which the army of India has enjoyed a much-needed rest, but the experiences of the year 1897-98 have shown certain weak points in the military system, and every department has been engaged in considering what remedies shall be applied, while the whole question of the military position on the North-West Frontier has been examined.

The deficiencies in the transport service have also been engaging attention, and a strong Committee under the presidency of Lieutenant-General G. E. L. Sanford, was formed to consider the organisation of that important service. The Committee has submitted a valuable and elaborate report and their recommendations are now under our immediate consideration. The question of improving the ambulance transport has been taken up, and the proposals of a Committee have been submitted. Another weakness that made itself conspicuous during the late campaigns was the deficiency in mountain artillery. We have received the Secretary of State's permission to raise an additional battery.

A decision has been arrived at regarding the gauge of frontier railways; the Nowshera-Dargai line will be pushed on the 2-foot 6-inch gauge; and we have formulated proposals for providing a stock of the plant required for field service tramways and railways.

Another subject to which we have given our attention is that of house accommodation in cantonments. As is well known, difficulties have frequently occurred in obtaining house accommodation in cantonments for officers of the army, and the existing rules on the subject having been found inadequate, it has been considered expedient to make better provision for that purpose by means of legislation. A bill was introduced on the 4th November 1898. The memorials

from house-owners and the opinions of local Governments and Administrations are being carefully considered.

I have already alluded to the proposed re-organisation of the transport. Last year I mentioned that the insufficiency of the existing complement of commissariat-transport officers had been brought specially to notice in the late campaigns. After very full consideration a large increase to the establishment was recommended. The Secretary of State for India has sanctioned an immediate increase of twelve officers and has called for further information to enable him to decide what further addition is necessary.

With a view to supply the hospitals and British troops with pure milk, steps are being taken to improve the management of dairies generally, and to work dairy and grass farms in conjunction. The supply of grass to the mounted branches has been, in recent years, a matter for anxious consideration, but I hope that we are now in a fair way to attain something like success. An experimental training class for British non-commissioned officers and men in scientific grass farming has been opened at Allahabad, and other measures are being taken to generally improve the supervision of grass farms, and to make them paying concerns. The rules for the provision of grass lands for the horses of Native cavalry in the Bengal and Punjab Commands have been extended to the Native cavalry in the Bombay Command.

Considerable progress has been made in various matters connected with the manufacture and supply of munitions of war. Proposals have been made for the establishment of a factory for the manufacture of cordite on a large scale. This will enable us to be independent of England for our cordite supply and will effect a considerable economy. A site has been decided upon at Jubbulpore for the establishment of a Central Gun-Carriage Factory for all India. The three existing factories at Madras, Bombay, and Fatehgarh cannot be kept up to date economically, and the establishment of a central factory will effect a saving in the cost of establishments. The Harness and Saddlery Workshops in the Bombay Arsenal have been closed, and the work transferred to Madras. In dealing with the working of the Ordnance Department during 1897-98 in my last year's memorandum, I referred to the fact that in order to provide a central authority for the expeditious and economical supply of stores to the arsenals and depots in India, the whole of the ordnance factories in this country had been placed under the direct control of the Director-General of Ordnance in India. I would now add that as a necessary sequel to this arrangement a central office for dealing with the audit and accounts of these factories has been ordered to be formed with effect from the 1st April 1899. Pole draught is being substituted for shaft draught in batteries of horse and field artillery in India. Horse artillery batteries are also being equipped to take cordite cartridges with 12-pr. projectiles, while the field batteries are being altered to carry 15-pr. projectiles with cordite cartridges. It has been decided to carry out the re-armament of British cavalry in India with the Lee-Enfield Magazine carbine, and the artillery with the Martini-Enfield carbine as funds become available.

The equipment of additional corps of the field army for duty on the lines of communication under the plan of mobilisation will be proceeded with in 1899-1900.

The provision of remounts for the army is always a matter of the greatest importance. Various improvements and economies have been effected, and on the whole it may be claimed that satisfactory Australian and country-bred remounts are issued to the army. With a view to developing mule-breeding in India, the purchase of additional donkey stallions from Cyprus was sanctioned, and we have engaged to take a certain number of stallions annually. The increasing difficulty of obtaining donkey stallions from the continent renders it imperative that other sources of supply should be opened up.

There is no more important question than that of the sanitary condition of the army. A great deal remains to be done, but year by year we are making improvements, endeavouring to find out defects and how to remedy them. More troops are stationed in the hills during the hot weather, barracks rebuilt or renewed, and a supply of good water provided at an increasing number of stations. Investigations have been specially made into the sources of the water-supply at various places, and the most stringent precautions have been taken locally to protect the men, as far as possible, from impure water. In the Native Army a considerable progress has been made in re-building the lines; but there are still many lines which ought to be renewed. Valuable sanitary work has been done by the officers appointed for the purpose, and special investigations have been made at those stations which have been particularly afflicted by enteric disease; and water-supply and drainage schemes have been pushed on. It is hoped that the establishment of cantonment hospitals will do much to mitigate the severity of a certain class of diseases. Owing to the conservancy arrangements in cantonments in the Bombay Command being of an unsatisfactory nature, measures are being taken for gradually introducing into that Command the system which has proved successful in the Bengal and Punjab Commands. Funds have been specially provided for the improvement of the sanitary condition of the important military station of Quetta.

#### Marine Department.

During the past year the work in the dockyards at Bombay and Kidderpore (Calcutta) has been normal, notwithstanding the difficulties which the occurrence of plague in the former place gave rise to. The vessels of the Royal Indian Marine have been employed in the usual trooping service, which has extended to Mauritius and Durban. Experiments have been made, with some success, in sending convalescents for a sea trip during the trooping voyages. Two vessels of the Indian Marine have been many years in the service, and, although at present efficient, arrangements will have to be made to replace them before many years elapse.

EDWIN H. H. COLLEN,

Major-General.

The 20th March 1899.

Memorandum by the Honourable Sir Arthur Trevor, K.C.S.I.,  
on the conclusions of the Conference of 1898 on Railway  
extensions in India.

The Railway Conference of 1898 met at Viceregal Lodge, Simla, on the 15th and 16th August 1898, and was constituted as noted in the margin. A representative of the Revenue and Agricultural Department was not included on the Committee this year, as with the exception of a group of light lines in the Madras Presidency, which are not urgent and the projects for which are incomplete, there were no famine lines brought forward that had not already been discussed in former years.

PRESIDENT:  
His Excellency the Viceroy. (The Earl of Elgin).

MEMBERS:  
The Honourable Sir James Westland, K.C.S.I.  
The Honourable Major-General Sir E. H. H. Collett, K.C.I.E.  
The Honourable Sir Arthur Trevor, K.C.S.I.  
Mr. F. R. Upcott, Secy. to the Govt. of India, P. W. Dept.  
Mr. A. R. Becher, Accountant General, P. W. Dept.

SECRETARY:  
Captain W. J. McElhinny, R.E., Offg. Under-Secy. to the Govt. of India, P. W. Dept. (Railway Branch).

2. Twenty-three new projects were considered, of which five were set aside, one was recommended for construction by a Native State, and the remaining seventeen were held over as not yet ripe for a decision.

The line recommended for construction is the Tonk Branch, 30 miles in length and estimated to cost Rs. 40,000. It will connect Tonk with the Jeypore-Chambal Railway.

3. Of lines held over or set aside at the Conference of 1897, and neither hitherto included in the programme nor brought under negotiation outside the programme, two have now been recommended for construction by, or on the responsibility, direct or indirect, of Government, one by a Branch Line Company, and two for construction without assistance by Native States and private enterprise.

The lines in question are shown below:—

No.	Name.	Approximate length.	Approximate cost.	Locality and agency.
	(a) By or on the responsibility direct or indirect, of Government.	Miles.	Rs.	
1	Nowshera-Mardan	40	117,600	Punjab. As part of the North Western railway.
2	Midnapur-Jherria	122	1,227,200	Southern Bengal. As part of the Bengal Nagpur railway.
	(b) Open to Branch Line Companies.			
1	Chandipur-Tak	3	172,000	Bengal. Branch of Bengal Central railway.
	(c) Reserved for Native States.			
1	Shoranur-Cochin	64	917,700	Madras. Branch of Madras railway.
	(d) By private enterprise.			
1	Ammāyanayakanur-Kuruvanath	75	500,000	Madras. Branch of South Indian railway.

4. Of the two lines recommended for construction by, or on the responsibility of, Government, No. 1, the Nowshera-Mardan, has been estimated for, and provision has also been made in the ensuing programme of railway construction for its commencement.

No. 2, the Midnapore-Jherria, has been accepted for early commencement of construction for the reason that it will open out all the coal-fields at present demanding railway facilities, and at the same time provide a valuable connection for the traffic between Upper India and the east and south coasts of India. The line, which will also have a famine protective value, has been provided for within the programme.

The Chandipur-Taki Railway has been accepted for construction without any Government guarantee, and arrangements are being made by the Promoters for carrying out the survey and preparation of the detailed project by the agency of the Bengal Central Railway Company. The Shoranur-Cochin railway has also been accepted for construction by the Native State of Cochin without any Government guarantee, while the formation of an independent Company to construct the Ammāyanayakanur-Kuruvanath as a tramway without a guarantee under the provisions of the Indian Tramways Act, XI of 1886, has been agreed to, subject to certain conditions.

5. As has been explained on former occasions, the extent to which it is possible to give effect to the recommendations of the Conference in regard to Capital Expenditure on railways other than such as are made by Branch Line Companies under the terms of Government of India Resolution No. 514 R. C., dated 17th April 1896, or by Native States or private Promoters without financial assistance, has been governed up to the end of the year now closing by the limitations of a programme covering the three years, 1896-97 to 1898-99. This programme provided for a total expenditure of Rx. 29,660,000, against which we expect to spend the following amounts:—

	Rx.
In 1896-97 (Actuals) . . . . .	8,658,800
" 1897-98 ( " ) . . . . .	8,145,500
" 1898-99 (Revised Estimate) . . . . .	8,387,500
<b>TOTAL</b> . . . . .	<b>25,191,800</b>

The Budget Estimate for 1898-99 was prepared for Rx. 10,788,900, but owing to the late arrival of English stores consequent on the engineering strikes in England and other causes, the impossibility of working to the original programme was recognized some time ago, and the Revised Estimate has been reduced accordingly to the sum of Rx. 8,387,500, above shown.

For the three years, 1899-1900 to 1901-1902, on which we are about to enter, it has been thought advisable that we should work on a somewhat less ambitious programme, providing about 6 crores a year for new lines and extensions as against nearly 8½ crores under the previous programme. The chief object of this reduction is to give time for the earnings to overtake the expenditure. The forecast which has been prepared and approved by the Secretary of State works out accordingly to Rx. 20,322,100, distributed as under:—

	Rx.
1899-1900 . . . . .	6,772,700
1900-1901 . . . . .	6,728,400
1901-1902 . . . . .	6,821,000
<b>TOTAL</b> . . . . .	<b>20,322,100</b>

The additional amount, approximately Rx. 750,000 in each year, which it will be observed has been provided, is due to the inclusion in programme limits from this year of the open line Capital expenditure of the three guaranteed companies and the anticipated expenditure by branch line companies financed on the basis of a firm guarantee instead of a rebate, which items have hitherto been dealt with outside the programme.

The sum set down for expenditure during 1899-1900 is Rx. 6,772,700. In consequence, however, of the heavy lapse, amounting to Rx. 2,401,400, on the grant for 1898-99, to which reference has already been made and which was in a great measure due to short outlay in England consequent on the failure of contractors to complete orders placed with them for stores, it has been agreed, with the concurrence of the Secretary of State, to add a sum of Rx. 1,060,000, representing a portion of this lapse to the grant for 1899-1900, and a further sum of Rx. 1,090,000 subsequently reduced to Rx. 990,000 has been provisionally added under certain conditions with the concurrence of Finance Department, subject to Secretary of State's approval. With this addition the total amount available for expenditure on construction of Railways during 1899-1900 will stand at Rx. 8,822,700.

This sum has been distributed for expenditure on Railways as under:—

	Rx.
34.—Construction of Protective Railways . . . .	400,000
48.—State Railways—Construction . . . .	3,465,000
Capital of Indian Railway Companies . . . .	2,841,900
Branch Line Companies . . . .	168,000
Guaranteed Railways and Extensions . . . .	1,107,800
East Indian Railway Company's debentures . . . .	750,000
<b>Total amount available . . . .</b>	<b>8,822,700</b>

6. Statement A appended to this memorandum gives the programme as modified up to date, and shows also the progress made with such of the lines accepted by Government on the recommendation of the Conference for early construction as have been brought within the programme. The distribution of the amount it shows as available for expenditure during 1899-1900 and subsequent years will, of course, be liable to modification according to circumstances.

7. Statements B and C show how matters stand in regard to lines recommended for early construction at the cost of Branch Line Companies, Native States, etc., outside the programme, and either actually taken in hand or under consideration and negotiation with a view to construction; and statement D summarises the actual and anticipated progress of railway construction generally for the two years, 1898-99 and 1899-1900.

A. C. TREVOR.

## Appendix A.

---

Statement showing the expenditure actually incurred and the estimated further expenditure to be incurred on railways to end of 1901-1902.

## APPENDIX B.

Statement showing Railways recommended since 1895-96 for early construction outside the programme by the agency of—

(i) Branch Line Companies,

(ii) Native States,

(iii) Railway Companies to which free land and minor concessions are given, which have actually been commenced or arranged for, omitting those shown in last year's Appendix B as completed.

Railway.	Length.	Estimated or approximate cost.	REMARKS.
	Miles.	Rx.	
(I) BY BRANCH LINE COMPANIES.			
(a) Lines shown as under construction in 1897-98.			
Sagowlie-Rukeaul . . . . .	18	99,800	Completed and opened to traffic.
Open . . . . .	18	99,800	
South Behar . . . . .	79	1,129,407	Under construction by the agency of the East Indian Railway Company. More than $\frac{1}{4}$ th finished.
Tapti Valley (Surat-Nandurbar-Amalner) . . . . .	156	1,400,139	Under construction by the agency of the Bombay, Baroda and Central India Railway Company. More than $\frac{1}{4}$ th finished. First section to Vyara opened to traffic.
*Hurdwar-Dehra . . . . .	32	300,000	Under construction by the State for the Branch Line Company. Tunnels completed and nearly half of line finished.
*Brahmaputra-Sultanpur . . . . .	60	342,700	Under construction by the agency of the Eastern Bengal Railway. Nearly half finished.
Mymensingh-Jamalpur . . . . .	54	205,500	Ditto. More than $\frac{1}{4}$ th finished. First section to Jamalpur opened to traffic.
Jamalpur-Jagganathganj . . . . .			
Under Construction . . . . .	381	3,377,746	
(b) Recommended lines shown as under consideration or negotiation in 1897-98.			
Narwana-Kaithal Branch . . . . .	23	100,000	Completed and opened to traffic.
Open . . . . .	23	100,000	
Chandipur-Taki . . . . .	39	172,000	Concession granted pending arrangements for financing the project and preparation of necessary survey and estimate of cost.
Amritsar-Tarn Taran-Sarhali . . . . .	25	130,000	Concession granted. Commencement of work not yet authorised pending subscription of capital and submission of the detailed project.
	64	322,000	
(c) New projects since put forward.			
Nil.			
TOTAL (I) . . . . .	486	3,899,546	
(II) BY NATIVE STATES.			
(a) Lines shown as under construction in 1897-98.			
Wadhwan-Dhrangadhra . . . . .	21	65,200	Completed and opened to traffic.
Cooch Behar Town Extension . . . . .	3	15,000	
Open . . . . .	24	81,200	Opened to traffic.

\* Under new arrangements these two lines will be included in programme from next year.

APPENDIX B—*concd.*

Railway.	Length.	Estimated or approximate cost.	REMARKS.
(a) Lines shown as under construction in 1897-98— <i>contd.</i>	Miles.	Rx.	
Birur Shimoga Branch . . . . .	38	185,000	Under construction by the Mysore Durbar. Nearly $\frac{1}{2}$ th finished.
Hyderabad-Godavari Valley . . . . .	390	2,988,200	Under construction by the Nizam's Guaranteed State Railways Company. More than half finished.
Guna-Bars Extension . . . . .	74	602,500	Under construction by the Durbars concerned. About $\frac{1}{2}$ th finished.
Shadipali-Balotra (Jodhpore Section) . . . . .	135	427,700	Under construction by the Jodhpore Durbar. About half finished.
Jeypore-Chambal (Jeypore-Sawai-Madhupur) . . . . .	73	313,200	Under construction by the Jeypore Durbar. About half finished.
Cooch Behar-Aliport . . . . .	11	25,000	More than half finished.
Bikaner-Suratgarh . . . . .	114	247,330	Fifty miles opened for traffic, 64 under construction.
Pardi-Nandod . . . . .	18	60,690	Under construction for the Rajpipla Durbar. Pardi-Umalla Section, 5 miles, opened to traffic. About $\frac{1}{3}$ rd finished.
Under Construction	853	4,879,620	
(b) Recommended lines shown as under consideration or negotiation in 1897-98.			
Ludhiana-Dhuri-Jakkhal . . . . .	81	416,600	Construction sanctioned, but commencement as a railway project not yet authorised pending settlement of agreement with the Durbars concerned.
Gwalior-Bhind-Chambalghat . . . . .	46 <sup>a</sup>	86,300	Half finished.
	127	502,900	<sup>a</sup> Excluding 654 miles of the existing line, which will require slight alterations.
(c) New projects put forward since 1897-98 and commenced or arranged for.			
Tinnevely-Quilon (Native State Section) . . . . .	58	766,200	Accepted for construction without any Government guarantee.
TOTAL (II)	1,062	6,129,920	
(III) BY RAILWAY COMPANIES TO WHICH FREE LAND AND MINOR CONCESSIONS ARE GIVEN.			
(a) Lines shown as under construction or actually arranged for in 1897-98.			
Bengal and North-Western Railway Extension (Benares-Turtipur and Branches) . . . . .	210	1,313,100	Under construction. More than half finished.
Barsi Road-Pandharpur Extension . . . . .	33	133,925	Concession granted to the Barsi Light Railway Company. Work not yet commenced.
Nilgiri (Mettupalaiyam-Coimoor) . . . . .	17	355,000	Completed, but damaged by heavy rain as it was about to be opened to traffic.
	260	1,802,025	
(b) Recommended lines shown as under consideration or negotiation in 1897-98.			
Kalka-Simla . . . . .	68	700,000	Contract executed and capital partly subscribed, but commencement of work not yet authorised, pending submission of, and sanction to, the detailed project.
Bengal Doore Extensions . . . . .	125	611,100	Contract executed, estimates sanctioned and work commenced.
	194	1,311,100	
(c) New projects put forward since 1897-98 and commenced or arranged for.			
Nil.			
TOTAL (III)	454	3,118,125	
GRAND TOTAL (I) TO (III)	2,002	13,247,591	

## APPENDIX C.

Statement showing Railways recommended since 1895-96 for construction outside the programme by the agency of—

(i) Branch Line Companies,

(ii) Native States,

(iii) Railway Companies to which free land and minor concessions are given, but not yet actually commenced or arranged for.

Railway.	Length.	Estimated or approximate cost.	REMARKS.
	Miles.	Rx.	
<b>(I) BY BRANCH LINE COMPANIES.</b>			
<i>(a) Lines included in the list of 1897-98 as under consideration.</i>			
Bhagalpur-Bausi-Baidyanath . . . . .	90	239,700	Concession being arranged.
Ahmadpur-Baidyanath . . . . .	62	55,700	Negotiations in progress.
Gogri (Mani)-Baptisahi . . . . .	85	500,700	Concession being arranged.
Kurnool Road Branch . . . . .	36	120,000	Under consideration.
Jullundur-Hoshiarpur . . . . .	25	150,000	Ditto ditto.
Ahmedabad-Dholka (Sabarmati-Dholka) . . . . .	34	130,800	Ditto ditto.
Nadiad-Kapadvanj . . . . .	28	87,400	Ditto ditto.
Nilgiri Extension (Coonoor-Ootacamund) . . . . .	12	192,000	Ditto ditto.
Mutapet-Avadyarkoil . . . . .	45	150,000	Construction by the Tanjore District Board agreed to.
Shibnibash (Kisengunge)-Kotchandpur-Magura . . . . .	51	130,000	Under consideration.

<b>Bombay-Bombay</b>			

(a) Commencement of work not yet authorised.  
(b) The line between Hatal (New Hind-Bukhal) and Lamsar, 18 miles, is a part of the crown millage of the Khulavara branch.  
(c) Extension to the existing South Bhalun, Niter and, railway between Gudge and Naloga, 24½ miles, subsequently taken over and converted to the standard gauge.  
(d) The mileage given is exclusive of 64.04 miles of the existing Hyderabad-Bhadrachalam standard-gauge railway to be converted to the metre gauge.  
(e) Extending the Madurai-Venugopur conversion (86.50 km).  
(f) Includes the mileage of the Chennai-Compangudi railway, which is treated as a steam tramway for administrative purposes only.

4. The total length of open line at the commencement of 1899-1900, i.e., on the 1st April 1899, will, therefore, be 22,650.98 miles, comprising:

	Miles.	Miles.
<b>Standard gauge—</b>		
(i) State lines worked by companies	4,190.02	
(ii) State lines worked by the State	4,954.77	
(iii) Guaranteed companies	2,592.47	
(iv) Assisted companies	642.81	
(v) Lines owned by native states and worked by companies	632.87	
(vi) Lines owned by native states and worked by State railway agency	123.86	
		13,186.50
<b>Metre gauge—</b>		
(vii) State lines worked by companies	6,277.86	
(viii) State lines worked by the State	643.99	
(ix) Assisted companies	328.00	
(x) Lines owned by native states and worked by companies	188.80	
(xi) Lines owned and worked by native states	920.86	
(xii) Foreign lines	75.25	
		9,033.36
<b>Special gauges—</b>		
(xiii) State lines worked by the State	86.25	
(xiv) Assisted companies	171.97	
(xv) Lines owned by native states and worked by companies	102.83	
(xvi) Lines owned by native states and worked by State railway agency	38.92	
(xvii) Lines owned and worked by native states	168.16	
		481.10

(l) Although for convenience placed amongst State railways, this line is the property of the Bengal and North-Western Railway Company.		
(m) Worked by the Southern Mahratta Railway Company.		
(n) Worked by the South Indian Railway Company.		
(o) Worked by the Assam Railway and Trading Company.		
(p) Including 1.51 miles of Bhavagar Dock estates and Junagadh quarry.		
(q) Worked by the Bhavnagar-Gondal-Junagadh-Port-Bombay railway.		
(r) Treated as a steam tramway for administrative purposes only. Treated closed to traffic from 1st May 1899 on account of damage done by flood.		
(s) Reported for completion on 27th December 1899.		
(t) Worked by the Eastern Bengal State railway.		
(u) Extension 7.00 miles at the Lucknow-Bareilly railway between Dalga and Alkhan.		
(v) Worked by the Bengal and North-Western Railway Company.		

- (a) Although for convenience placed amongst State railways, this line is the property of the Bengal Central Railway Company.  
 (b) Worked by the Indian Midland Railway Company.  
 (c) Worked by the Bombay, Borenda and Central India Railway Company.  
 (d) Worked by the Great Indian Peninsula Railway Company.  
 (e) Although forming an integral part of the East Coast State railway, this line is shown separately as it is worked by the Nizam's Guaranteed State Railway Company.  
 (f) Worked by the Madras Railway Company.  
 (g) Including 0.12 miles of military line not used for public traffic, the Mushkai-Bokhi railway and the Kottai-Bokhi line.  
 (h) Worked by the North Western State railway.  
 (i) Including the Borenda extension, vide foot-note (e).  
 (j) Worked by the East India Railway Company.  
 (k) Including 2.18 miles, Trimbherry troop siding, constructed but not used for ordinary public traffic.

\* Correction of mileage.

† Made up as follows:—

Open at the commencement of 1900-01

Added—Opened during 1899-00

Deduct—Decrease due to minor correction of mileage

Add—Tanjore-Pallurupatti quarry extension of the South India railway, previously omitted

31,158.08

## HOME DEPARTMENT.

### NOTIFICATION.

#### ESTABLISHMENTS.

No. 184.

*Calcutta, the 29th March, 1899.*

A vacancy having occurred in the office of an Ordinary Member of the Council of the Governor-General of India owing to the vacation of office by the Hon'ble Sir James Westland, K.C.S.I., Her Majesty the Queen, Empress of India, has been graciously pleased to appoint Mr. Clinton Edward Dawkins to be an Ordinary Member of the Council of the Governor-General of India.

Mr. Dawkins has, on this day, taken upon himself the execution of his office under the usual salute.

A. H. L. FRASER,

*Offg. Secretary to the Government of India.*

# The Gazette of India, EXTRAORDINARY.

CALCUTTA, THURSDAY, MARCH 30, 1899.

## FINANCE AND COMMERCE DEPARTMENT.

### NOTIFICATION.

No. S. R.—1429 C.

*Calcutta, the 30th March 1899.*

In exercise of the powers conferred by the Indian Post Office Act, 1898 (VI of 1898), and in supersession of all existing notifications under that Act or the Indian Post Office Act, 1866 (XIV of 1866), the Governor General in Council is pleased to issue the following rules and orders:—

### Part I.—Rates of postage.

#### I.—Inland postal articles.

1. The following rates of postage shall be chargeable on postal articles where the postage is prepaid:—

##### Letters.

For a letter not exceeding half a tola in weight	Half an anna.
For a letter exceeding half a tola but not exceeding one tola and a half in weight	One anna.
For every additional one tola and a half or part of that weight	One anna.

##### Postcards.

For a single postcard	One-quarter of an Anna.
For a reply postcard	Half an anna.

##### Book, pattern and sample packets.

For every ten tolas or part of that weight	Half an anna.
--	---------------

##### Registered newspapers.

For a newspaper not exceeding four tolas in weight	One-quarter of an anna.
--	-------------------------

For a newspaper exceeding four tolas but not exceeding twenty tolas in weight . . . . .	Half an anna.
For every additional twenty tolas or part of that weight . . . . .	Half an anna.

**Parcels.**

For a parcel not exceeding twenty tolas in weight . . . . .	Two annas.
For a parcel exceeding twenty tolas but not exceeding forty tolas in weight . . . . .	Four annas.
For every additional forty tolas or part of that weight . . . . .	Four annas.

2. The following rates of postage shall be chargeable on the delivery of postal articles where the postage is not prepaid or is insufficiently prepaid :—

On an unpaid letter, postcard of private manufacture or packet . . . . .	Double the prepaid rate.
On an insufficiently paid letter or packet . . . . .	Double the deficiency.
On an unpaid registered parcel . . . . .	The prepaid rate (and registration fee).

**II.—Foreign postal articles.**

3. The following are declared to be the rates of postage chargeable on postal articles where the postage is prepaid :—

**Letters.**

<i>For Ceylon</i> . . . . .	Indian inland rates.

#### Registered newspapers.

<i>For Ceylon</i> . . . . .	Indian inland rates.
-----------------------------	----------------------

#### Parcels.

The Director General shall, from time to time, declare in the Indian Postal Guide the countries and places to which parcels may be transmitted by the Foreign post, and the rates of postage chargeable in each case. In the case of Ceylon the Indian inland rates of postage shall be applicable, provided that prepayment of postage, and registration, shall be compulsory.

4. The following are declared to be the rates of postage chargeable on the delivery of postal articles, other than parcels received by the Foreign post, where the postage is not prepaid or is insufficiently prepaid :—

When the postage is not prepaid	. Double the prepaid rate.
When the postage is insufficiently prepaid	. Double the deficiency.

## Part II.—Main conditions of transmission by post of postal articles.

### I.—Inland postal articles.

#### (a) Postcards.

5. Single and reply cards of private manufacture, with or without adhesive postage stamps affixed thereto in payment of postage, may be transmitted by post as postcards :

Provided that they are in conformity, as regards size and weight, with the inland postcards issued by the Post Office.

6. (1) Nothing shall be written on the address-side of a postcard except—

- (a) the heading "Postcard" or "Reply Postcard;"
- (b) the name and address of the addressee;
- (c) the name and address of the sender;
- (d) the date of posting;
- (e) engravings or advertisements, provided that sufficient space is left for a clear address and for the official marks of the Post Office.

(2) Nothing shall be affixed or attached to a postcard except,—

- (a) on the address-side, postage stamps in pre-payment of postage and the registration-fee (if any), or an address-label bearing the name and address of the addressee and not exceeding in size 2 inches in length by  $\frac{1}{4}$  of an inch in width;
- (b) on the other side, receipt stamps.

*Explanation.*—The sender of a reply-postcard may affix to the address-side of the reply-half an address-label bearing his name and address and not exceeding in size 2 inches in length by  $\frac{1}{4}$  of an inch in width.

(3) A postcard shall not be folded, cut or otherwise altered, except that the impressed postage stamp (if any) may be perforated with initials.

7. Should any of the conditions imposed by rules 5 and 6 be infringed, the postcard shall be treated as a letter.

#### (b) Book packets.

8. A book packet may contain any of the following articles :—

- (1) Newspapers and publications of all kinds; books, whether blank or printed; engravings, photographs, drawings, plans, maps, printed music, and proof sheets, with or without the manuscript relating thereto; blank paper, parchment, or card-board; and, generally, anything printed, engraved, lithographed or papyrographed on paper, parchment or card-board.
- (2) Business papers, written or drawn wholly or partly by hand, not being of the nature of a letter or having the character of a personal communication, such as deeds, bills of lading, invoices, accounts; and manuscript of all kinds, including manuscript music, not being of the nature of personal correspondence.

- (3) Written letters of old date which have previously passed through the post and served their original purpose.

With any of the above-mentioned articles may be sent anything that is necessary for their safe transmission through the post, such as rollers, etc., and with any of the articles mentioned in clause (2) may be sent any legitimate binding, mounting, or covering, loose or attached, and anything that ordinarily appertains to such articles, as pens and pencils in the case of a pocket-book, photographs in the case of a photograph-book, and card-plates in the case of visiting cards.

Manuscript for the press shall not be reckoned as having the character of personal correspondence within the meaning of clause (2), and may be sent as a book packet.

9. No communication of the nature of a letter, or having the character of a personal communication, shall be enclosed with, or written upon, the contents of a book packet :

Provided that nothing in this rule shall be held to prohibit inscriptions or entries stating who the sender is or to whom the articles are to be given, or to prohibit purely complimentary greetings from being entered, in writing or otherwise, on Christmas, New Year and Birthday cards and similar articles.

10. A book packet shall not contain "paper-money," which for the purposes of this rule includes unobliterated postage or other stamps, currency notes, hundies, cheques, bank-notes, bankpost bills, bills of exchange, and all orders or authorities for the payment of money.

*Explanation.*—This rule shall not apply to a book packet containing a stamped and addressed envelope, postcard, or wrapper, forwarded by the sender of the packet in order that such envelope, card, or wrapper may be returned through the post to the sender or sent to some other person designated by him.

11. The dimensions of a book packet, which may be of any shape, shall not exceed two feet in length by one foot in width and one foot in depth. When, however, the packet is in the form of a roll, the length shall not exceed thirty inches :

Provided that, if the length exceeds twenty-four inches (two feet), the diameter shall not exceed four inches.

12. A book packet shall be posted without a cover, or with a cover entirely open at both ends, or in an unfastened envelope or in a cover which can be easily removed so as to admit of a ready examination of the contents. The ends of the packet, however, may be tied with string.

*Illustration.*—A closed envelope notched at the sides or ends does not admit of a ready examination of its contents, and does not, therefore, fulfil the conditions prescribed by this rule.

13. If a book packet is found to contain anything not permitted by the rules, or to be in excess of the prescribed size, or to be packed in a manner not in accordance with the rules, it shall be charged on delivery with letter or parcel postage, whichever may be less. Any postage stamps that may be affixed to it shall, however, be recognised in assessing the charge.

#### (c) Pattern packets.

14. A pattern packet may contain *bond fide* trade patterns or samples of merchandise not having any saleable value, together with, or without, any matter which may be sent as a book packet. There shall be no writing upon or in a pattern packet, except the name and address of the sender, the name and address of the person for whom it is intended, a trade mark, numbers, prices, and indications as to the weight, size or quantity to be disposed of.

15. The dimensions of a pattern packet shall not exceed two feet in length by one foot in width and one foot in depth ; and the weight shall not exceed forty tolas.

16. A pattern packet shall be posted without a cover, or with a cover open at both ends, or in an unfastened envelope or other cover which can be easily removed so as to admit of a ready examination of the contents. Samples

of seeds, drugs, and other articles which cannot be sent in unfastened or removable envelopes may be sent enclosed in boxes or bags, provided that they are fastened in such a way that they can be easily opened. They may also be sent in air-tight cases when necessary, provided that the nature of the contents is certified on the cover under the full signature and address of the sender.

17. If a pattern packet is found to contain anything not permitted by the rules, or to be in excess of the prescribed size or weight, or to be packed in a manner not in accordance with the rules, it shall be charged on delivery with letter or parcel postage, whichever may be less. Any postage stamps that may be affixed to it shall, however, be recognised in assessing the charge.

(d) Registered newspapers.

18. Newspapers as defined in section 9 of the Indian Post Office Act, 1898 (hereinafter referred to as "the Act") shall be transmitted by post as registered newspapers, provided that they are posted in accordance with the following conditions:—

- (1) The newspaper shall be registered in the office of the Postmaster-General, or officer exercising the powers of the Postmaster-General, of the postal circle in which it is published. Such registration shall cease to have effect at the close of the calendar year following that in which it was effected, and must be renewed if a continuance of the privilege conferred by the system beyond that time is desired.
- (2) The postage shall be prepaid by postage stamps.
- (3) The newspaper shall bear in print immediately above the address the word "Registered" followed by the registration-number which shall be assigned to it by the Postmaster-General or other officer referred to in condition (1).
- (4) The newspaper shall be posted at the place of publication.
- (5) The newspaper shall be posted without a cover or in a short cover open at the ends.
- (6) There shall be no word printed on the newspaper after its publication or upon the cover (if any) thereof, nor shall any writing or mark be made upon it or upon the cover (if any) thereof, except the name and address of the person to whom it is sent, and, if desired, the name and address of the newspaper, or of the sender.
- (7) There shall be no paper or thing enclosed in or with any such newspaper other than an extra or supplement as specified in section 9 of the Act.

Nothing in this rule shall be held to prevent newspapers being transmitted by post, either singly or otherwise, at the rates, and under the conditions, prescribed for book packets.

(e) Parcels.

19. A parcel may contain one (but shall not contain more than one) written communication of the nature of a letter, or having the character of a personal communication:

Provided that the communication shall be addressed only to the addressee of the parcel itself.

20. A parcel shall not exceed 440 tolas in weight, unless it is registered, in which case the weight shall not exceed 25 seers (2,000 tolas). A parcel shall not be of a kind which, owing to size, shape, manner of packing, or any other cause, cannot be carried by post without serious inconvenience or risk.

21. The postage on a parcel, unless it is a registered parcel, shall be fully prepaid by means of postage stamps which shall be affixed either to the cover of the parcel or to an official label which can be obtained free at the post office. In either case, the sender or his messenger shall affix the stamps himself, postal officials being strictly forbidden to affix them.

The postage, including the registration fee, on a registered parcel may be either fully prepaid or wholly unpaid: partial prepayment of postage shall not be recognized.

22. Every parcel intended for transmission by post shall be presented at the window of the post office. Any parcel found in a letter-box shall be treated and charged as a registered parcel.

(f) Re-direction of postal articles.

23. A postal article re-directed to any place served by the inland post by an officer of the Post Office or by an agent of the addressee after its delivery shall be transmitted by post free of charge in respect of such further transmission:

Provided that,—

- (1) in the case of an unregistered article re-directed by an agent of the addressee,—the article has not been opened and has been either returned to the postman or re-posted at the place of delivery; and,
- (2) in the case of a registered article re-directed by an agent of the addressee,—the article has not been opened and has been returned to the postman at the place of delivery with the receipt unsigned.

24. A postal article re-posted after having been opened, or re-posted at any place other than the place at which it was delivered, shall be treated as a postal article posted for the first time, and charged with postage accordingly. A registered article of which delivery has been taken can be re-posted only under the conditions prescribed for the posting of registered articles for the first time.

II.—Foreign postal articles.

25. The Director-General shall, from time to time, notify in the Indian Postal Guide the conditions in force for the transmission of postal articles by the Foreign post:

Provided that the rules relating to inland registered newspapers shall be deemed to apply in the case of newspapers sent to Ceylon.

Treatment of postal articles from abroad bearing fictitious or previously used stamps.

26. Where a postal article has been received by post from any place beyond the limits of British India, bearing a fictitious or previously used postage stamp, and the addressee of such postal article has failed to attend, by himself or his agent, at the post office of delivery within the time specified in the notice sent to him in that behalf, or, having so attended, has refused to make known the name and address of the sender or to re-deliver the postal article or such portion thereof as may be required under section 27 of the Act, and, in consequence of such failure or refusal, the postal article has not been delivered to the addressee or his agent, the postal article shall be disposed of in the following manner:—

The officer in charge of the post office at which the postal article has been received for delivery, shall record a statement, in such form as the Director General shall prescribe, setting forth the action taken by him under the provisions of section 27 of the Act, and the fact of such failure or refusal as aforesaid on the part of the addressee or his agent; and shall forward the statement, together with the postal article, through the usual channel, to the Director General.

The Director General shall then, in due course, transmit the statement, together with the postal article, to the Postal Administration of the place beyond the limits of British India from which the article was received.

## Part III.—Registration of postal articles.

### I.—Inland postal articles.

27. Letters, postcards, book and pattern packets and parcels may be registered at any post office for transmission by post to any other post office.

28. In addition to the postage, the following further fees shall be charged for the registration of postal articles:—

For a letter, postcard, or book or pattern packet . . . 2 annas.

For a parcel not exceeding 20 tolas in weight . . . 2 annas.

For a parcel exceeding 20 tolas in weight . . . 4 annas.

29. The prepayment of the postage and registration fee shall be optional in the case of uninsured registered parcels, and shall be compulsory in the case of all other registered articles. Prepayment of the postage and registration fee on registered articles shall be made by means of postage stamps affixed to the articles.

30. Articles intended for registration shall be presented at the window of the post office.

31. A receipt shall be given to the person who presents an article for registration at the post office window during the hours prescribed for posting registered articles.

32. No registered article shall be delivered to the addressee unless and until he or his agent has signed a receipt for it in such form as the Director General shall prescribe.

33. The sender of a registered article shall be entitled to obtain an acknowledgment of its delivery signed by the addressee by paying a fee of one anna, in addition to the postage and registration fee, at the time of posting the article. The fee for a special acknowledgment shall be paid by means of postage stamps affixed to the article, in the case of registered postcards, letters, and packets, and in cash in the case of registered parcels.

34. The sender of a registered article may obtain an attested copy of the original receipt signed by the addressee on payment of a special fee of three annas, provided that he makes his application for it within six months of the date on which the addressee signed the original receipt.

35. Registration shall be obligatory in the case of—

(1) any parcel exceeding 440 tolas in weight;

(2) any parcel for which the postage is not prepaid;

(3) any insured parcel; and

(4) any parcel addressed to a place for which a customs declaration is required.

36. (1) A currency note, or any portion of a currency note, may be sent by post only in a registered cover. Registration shall be compulsory in the case of a postal article which contains postage or other stamps or labels, or a cheque, hundi, bank note, bankpost bill, bill of exchange, or the like, if the contents are either superscribed upon the cover, or are known or manifest to the officers of the Post Office owing to the transparency, insecurity or insufficiency of the cover, or to any other cause. Nothing in this rule shall be held to render registration of a packet compulsory only by reason that it contains a stamped envelope, postcard, or wrapper as provided by the explanation to rule 10.

(2) Twice the fee for registration shall be levied on the delivery of any postal article required under this rule to be registered at the time of posting on which the fee for registration has not been prepaid.

### II.—Foreign postal articles.

37. Letters, postcards and packets may be registered at any post office for transmission to countries and places served by the foreign post, subject to such exceptions as the Director General shall, from time to time, notify in the Indian Postal Guide.

38. In addition to the postage, a further fee of two annas shall be charged for the registration of any article to be sent by the foreign post.

39. The prepayment of the postage and registration fee on foreign registered articles shall be compulsory, and shall be made by means of postage stamps affixed to the articles.

40. Rules 30, 31 and 32, relating to the registration of inland postal articles, shall be equally applicable to registered articles sent or received by the foreign post.

41. The sender of a registered article addressed to any country belonging to the Universal Postal Union shall be entitled to obtain an acknowledgment of its delivery by paying, at the time of posting the article, a fee, in addition to the postage and registration fee, of one anna in the case of a registered article addressed to Ceylon, and of two annas in the case of a registered article addressed to any other such country.

## Part IV.—Insurance of postal articles.

### I.—Inland postal articles.

42. Registered letters, value-payable registered letters and registered parcels may be insured up to the value of Rs500 at such branch post offices, and up to the value of Rs2,000 at such other post offices, as may be authorized by the Director General to accept articles for insurance:

Provided that in no case shall such value exceed the real value of the contents of the article insured.

43. Insurance shall be of two kinds, complete and partial. Complete insurance shall cover all risks in course of transmission by post. Partial insurance shall cover all risks in course of transmission by post in British territory, and all risks, except those arising out of highway robbery, in course of transmission by post in such Native State territory as may be specified in this behalf by the Director General in the Indian Postal Guide.

44. In addition to the postage and the fee for registration, the following further fees shall be charged for insurance:—

	Annas.
Where the value insured does not exceed Rs50 . . . . .	2
Where the value insured exceeds Rs50 but does not exceed Rs100 . . . . .	4
For every additional Rs100 or fraction thereof . . . . .	4

The further fees in the case of partially insured articles shall be charged at only half the above rates.

45. The prepayment of all charges on insured articles, namely, postage, registration fees and insurance fees, shall be compulsory. Payment in all cases shall be made by means of postage stamps affixed to the articles.

46. The cover of a letter intended for insurance shall be of strong paper or other substantial material, securely closed and sealed at intervals not exceeding two inches along each fold or seam. A parcel intended for insurance shall be securely packed in an outer covering of cloth, waxcloth or wood. If the parcel is packed in cloth or waxcloth, it shall bear seals at intervals not exceeding three inches over each seam. All the seals affixed to an insured article shall be of the same kind of wax and shall bear distinct impressions of the same device. The device shall not be that of a current coin or merely a series of straight, curved or crossed lines.

47. The minimum size for an insured parcel shall be 12 cubic inches.

48. An article intended for insurance shall be presented at the window of the post office with the amount for which the sender wishes it to be insured, clearly written, in words and figures, on the cover. The name and address of

the sender shall also be written on the cover in the lower left-hand corner, or on a separate slip of paper, to be presented with the article, should there be no room for his name and address on the cover.

49. A receipt shall be given to the person who presents an article for insurance at the post office window during the hours prescribed for posting insured articles.

50. The sender of an insured article shall be entitled to obtain, free of charge, an acknowledgment of its delivery signed by the addressee.

51. There shall be payable to the sender of an insured postal article compensation not exceeding the amount for which the article has been insured, for the loss of the postal article or its contents or for any damage caused to it in course of transmission by post :

Provided that the compensation shall in no case exceed the value of the article lost or the amount of the damage caused and provided that in the case of loss the sender shall furnish full particulars of the contents of the postal article and their value :

Provided, also, that no compensation shall be payable—

- (a) where there has been misdelivery arising out of incorrectness or incompleteness of the address written by the sender ;
- (b) where there has been fraud on the part of the sender or addressee ;
- (c) where the insured article has been delivered to the addressee and he has signed and returned the receipt therefor ;
- (d) where the sender has not given intimation of the loss within three months from the date of posting ;
- (e) where the damage was due to improper or insecure packing ;
- (f) where there is no visible damage to the cover or seals ; or,
- (g) in the case of partially insured articles, where the loss or damage was caused by highway robbery during the transit in respect of which the insurance is partial only.

52. Compensation shall be payable one month after the date on which intimation of loss is given by the sender to the Post Office, except in cases in which the Postmaster-General may consider that the circumstances demand the withholding of payment pending inquiry. When compensation has been paid for the loss of a postal article or its contents, the Post Office shall be entitled to retain, and dispose of, such postal article or its contents should they be subsequently recovered, and the compensation paid not be refunded on demand being made.

53. Coin, bullion, precious stones, jewellery and articles of gold or silver may be sent by post only in insured registered letters or insured parcels. If a letter or parcel presented at the post office window is found to contain any such object of value, it shall not be accepted for transmission by post, unless the sender insures it ; and, if an uninsured article manifestly containing any such object of value is found in course of transmission by post, it shall be either intercepted and returned to the sender or forwarded to destination and delivered to the addressee subject to the payment of a fee of one rupee. The payment of this fee shall not impose any liability on the Government.

*Explanation.*—In this rule, the expression "articles of gold or silver" includes articles made wholly or partly of gold or silver, but not electro or other plated goods or gold or silver lace or embroidery.

## II.—Foreign parcels.

54. The Director-General shall, from time to time, notify in the Indian Postal Guide the countries and places for transmission to which foreign parcels may be insured, and the limit up to which such parcels may be insured in each case :

Provided that in no case shall such value exceed the real value of the contents of the parcel insured.

55. In addition to the postage, the following further fees shall be charged for insurance:—

(a) *For insurance to Ceylon.*

	Annas.
Where the value insured does not exceed R100 . . .	4
For every additional R100 or fraction thereof . . .	4

(b) *For insurance to other countries or places.*

Where the value insured does not exceed £5 . . .	6
For every additional £5 or fraction thereof . . .	6

56. The prepayment of all charges on insured foreign parcels shall be compulsory. Payment in all cases shall be made by means of postage stamps affixed to the parcels.

57. A foreign parcel intended for insurance shall be packed securely and substantially, with due regard to the nature of the contents and the length of the journey, in an outer covering of cloth and canvas or other substantial material shall bear seals of wax or lead at intervals not exceeding three inches along each line of sewing or join. All the seals affixed to an insured foreign parcel shall be of the same kind of wax or lead and shall bear distinct impressions of the same device. The device shall not be that of a current coin or merely a series of straight, curved or crossed lines.

58. A foreign parcel intended for insurance shall be presented at the window of the post office with the amount for which the sender wishes it to be insured, clearly written, in words and figures, on the cover, and accompanied by such form or forms duly filled up as may be prescribed by the Director-General, from time to time, in the Indian Postal Guide. The name and address of the addressee of a foreign parcel intended for insurance shall be written in ink on the actual covering of the parcel.

59. A receipt shall be given to the person who presents a foreign parcel for insurance at the window of the post office during the hours prescribed for posting insured foreign parcels.

60. There shall be payable to the sender, or, in default or at the request of the sender, to the addressee of an insured foreign parcel, compensation not exceeding the amount for which the parcel has been insured, for the loss of the parcel or its contents or for any damage caused to it in course of transmission by post; and the sender shall, in the case of loss, also be entitled to a refund of the postage, but in no case of the insurance fee paid:

Provided that the compensation shall in no case exceed the value of the article lost or the amount of the damage caused.

Provided, also, that no compensation shall be payable—

- (a) where the loss or damage has been caused by the fault or negligence of the sender, or arises from the nature of the article;
- (b) where the insurance has been fraudulently made for a sum above the real value of the contents, or there has been any other fraud on the part of the sender or addressee;
- (c) where the insured article has been delivered to the addressee and he has signed and returned the receipt therefor;
- (d) where the sender or addressee has not given intimation of the loss or damage within twelve months from the date of posting;
- (e) where the loss or damage was due to improper or insecure packing;
- (f) where there is no visible damage to the cover or seals; or
- (g) In cases beyond control (e.g., tempest, ship-wreck, earthquake, war, etc.).

61. Where a foreign parcel contains coin, bullion, precious stones, jewellery, watches or articles of gold or silver, it shall not be accepted for transmission

by post unless the sender wishes to insure it. If a foreign parcel containing any such object of value is addressed to a country or place to which insurance is not available, the parcel shall be insured for its inland transit within the limits of British India, and in such cases the fee charged for insurance shall be calculated as follows :—

(a) *When the value is expressed in rupee currency.*

	Annas.
Where the value insured does not exceed Rs 50 . . .	2
For every additional Rs 50 or fraction thereof . . .	2

(b) *When the value is expressed in sterling.*

Where the value insured does not exceed £3 . . .	2
For every additional £3 or fraction thereof . . .	2

If an uninsured foreign parcel, declared to contain or manifestly containing any of the objects of value specified above, is received from a country with which, as notified by the Director-General in the Indian Postal Guide, insured parcels can be exchanged, the parcel shall either be intercepted and returned to the sender or forwarded to destination and delivered to the addressee subject to the payment of a fee of one rupee. The payment of this fee shall not impose any liability on Government.

*Explanation.*—In this rule, the expression “articles of gold or silver” includes articles made wholly or partly of gold or silver, but not electro or other plated goods, or gold or silver lace, or embroidery.

62. Where an insured foreign parcel is received in India subject to a fresh insurance fee by reason of its having been re-directed, such fee shall be recoverable on delivery as if it were postage due under the Act.

## Part V.—Value-payable post.

### I.—Value-payable postal articles.

63. Registered and unregistered parcels, registered letters, registered book packets, newspapers prepaid at newspaper rates of postage, and fully prepaid unregistered book packets, may be transmitted by the inland post as value-payable postal articles, provided that the amount to be recovered on any such postal article shall not be less than 4 annas or more than 1,000 rupees, and shall not contain a fraction of an anna.

Postal articles as aforesaid, with the exception of unregistered parcels, may be transmitted by post to Ceylon as value-payable postal articles, provided that the amount to be recovered on any such postal article shall not exceed Rs 150.

64. No such postal article as aforesaid shall be accepted for transmission by post as a value-payable postal article unless the sender declares that the contents have been sent in execution of a *bond fide* order received by him.

65. Legal documents, bonds, policies of insurance, promissory notes, railway goods and parcel receipts, bills of lading, or ordinary bills for collection may be sent as value-payable postal articles, provided that the sender declares that they are so sent in execution of a *bond fide* order received by him.

*Explanation.*—In the case of a railway receipt or bill of lading sent as a value-payable postal article, it will be sufficient for the purposes of this rule if the article to which the railway receipt or bill of lading relates, has been sent in execution of a *bond fide* order.

66. Every postal article intended to be transmitted by post as a value-payable postal article shall be presented at the post office with a printed form, to be prescribed by the Director-General and obtainable at the post office, in which the sender shall specify the sum to be recovered from the addressee, fill in the required entries and sign the declaration that the article is sent in execution of a *bond fide* order. If the article is an unregistered parcel, unregistered book packet, or newspaper prepaid at newspaper rates of postage, a fee calculated

according to the schedule below on the amount specified for recovery from the addressee shall be prepaid by the sender by affixing postage stamps of the value of the fee to the form presented with the article in the space provided for this purpose. The sender of a postal article intended to be transmitted by post as value-payable shall write his name and address clearly on the article itself.

*Schedule of fees.*

On any sum specified for recovery not exceeding R10 . . . . .	2 annas.
On any sum specified for recovery exceeding R10, but not exceeding R25 . . . . .	4 annas.
On any sum specified for recovery exceeding R25 . . . . .	4 annas for each complete sum of R25, and 4 annas for the remainder, provided that, if the remainder does not exceed R10, the charge for it shall be only 2 annas.

67. When the sum specified is recovered from the addressee, the amount for payment to the sender shall be remitted to him by means of a money order. In the case of a value-payable unregistered parcel, book packet or value-payable newspaper prepaid at newspaper rates of postage, the whole amount specified for recovery shall be remitted to the sender; in the case of any other value-payable article, the amount specified for recovery, *minus* a fee calculated as in rule 66, shall be remitted. If the addressee of a value-payable article refuses or omits to take delivery of it, the article shall be returned to the sender, who will be required to pay any postage that may be due on it, and, in the case of a value-payable unregistered parcel, book packet or value-payable newspaper prepaid at newspaper rates of postage, to acknowledge receipt of the article by signing the form presented by the postman. Under no circumstances will the fee prepaid in stamps, in the case of a value-payable unregistered parcel, book packet or value-payable newspaper be refunded.

68. The Government shall not incur any liability in respect of the sum specified for recovery on a value-payable postal article unless and until that sum has been received from the addressee.

**II.—Transmission by post of railway receipt-notes open as value-payable articles.**

69. A railway receipt-note for goods may be transmitted by post open as a value-payable postal article:

Provided that—

- (1) the goods to which the railway receipt-note relates, does not exceed R1,000 in value; and
- (2) the railway receipt-note shows on its face that the goods to which it relates, have been consigned to the sender himself, is endorsed to the person to whom the goods are to be delivered, and is signed by the sender.

70. The open railway receipt-note shall be presented at the post office with the printed form prescribed by the Director-General for registered value-payable postal articles, in which the sender shall specify the sum to be recovered from the addressee, fill in the required entries and sign the declaration that the article is sent in execution of a *bona fide* order.

71. A fee of two annas shall be paid on each railway receipt-note presented for transmission by post open. The fee shall be paid in postage stamps, which shall be affixed by the sender to the receipt-note.

72. The Post Office will transmit the open railway receipt-note to the post office of destination, and will deliver it to the person to whom it has been endorsed by the sender, on his paying the amount specified for recovery, in such

manner as the Director-General may from time to time appoint for the delivery of registered value-payable postal articles.

73. The amount when recovered will be remitted to the sender in accordance with the rules for the time being in force relating to registered value-payable postal articles.

74. A railway receipt-note for goods may be transmitted by post open under the foregoing rules, without compliance with the conditions laid down in the second proviso to rule 69, if—

(1) it relates to goods sent—

(a) between stations on such railways as are for the time being specified in this behalf by the Director-General in the Indian Postal Guide, or

(b) between offices on the Kalka-Simla Government Bullock Train-line, or between such offices and stations on the North-Western State Railway; and

(2) shows on its face that the goods so sent have been declared at the booking office as being sent under the value-payable system,

75. These rules apply also to receipt-notes for goods conveyed by steamer within the limits of British India.

76. Nothing in these rules shall be construed to prevent the transmission by post of receipt-notes under the rules for the time being in force relating to the value-payable post generally.

## Part VI.—Money orders.

### I.—Inland money orders.

#### (a) *Ordinary inland money orders.*

77. The amount for which a single money order may be issued, shall not exceed R600, and shall not include a fraction of an anna, except in the case of money orders issued by, or in favour of, any Department of the Government, or by, or in favour of, a District, Local or Municipal Board.

78. Money orders may be issued on the following Native States, but the amount for which a single money order may be issued on these States, shall not exceed R150:—

Chamba.		Gwalior.		Nabha.
Faridkot.		Jhind.		Patiala.

79. A commission on the issue of inland money orders shall be charged at the following rates, namely:—

On any sum not exceeding R10 . . . . .	2 annas.
„ „ „ exceeding R10, but not exceeding R25 . . . . .	4 annas.
On any sum exceeding R25 . . . . .	4 annas for each complete sum of R25, and 4 annas for the remainder, provided that, if the remainder does not exceed R10, the charge for it shall be only 2 annas.

80. The Director-General may, at any time, suspend the issue of money orders upon any particular post office, or group of post offices, or direct that money orders shall not be so issued except on payment of special rates of commission higher than those prescribed by rule 79.

81. The remitter of a money order shall fill in, in ink, on a money order form prescribed by the Director-General such particulars as the Director-General may require. Such particulars may be written in English or in the vernacular of the district.

82. The money order form duly filled in, together with the amount of the money order and commission, may be presented at the post office during the hours prescribed by the Director-General for money order business.

83. A receipt shall be given to the remitter for the amount paid by him on account of the money order and commission.

84. The remitter of a money order shall be entitled to obtain, free of charge, an acknowledgment of the payment of the amount of the order signed by the payee.

85. The payment of a money order shall ordinarily be made at the address of the payee on his signing the money order and acknowledgment.

86. The money order and acknowledgment shall be signed by the payee named by the remitter, or by some person authorized in writing by the payee in this behalf. The signature shall be written in ink in the space provided for the purpose.

87. If the remitter or payee of a money order is illiterate, his mark shall be obtained and shall be verified in such manner as the Director-General may direct.

88. A money order shall be re-directed to the payee on his written request free of charge.

89. The remitter of a money order which has not been paid, may require that the address of the payee shall be altered or that the name of the post office, at which the order was originally made payable, shall be changed. The required change shall be made without additional charge on the remitter's applying in writing to the post office at which the order was issued.

90. The remitter of a money order which has not been paid, may require that the amount be paid to some person other than the payee named in the order. The required change shall be made, on payment of a second commission equal to the first, on the remitter's applying in writing to the post office at which the order was issued.

91. The remitter of a money order which has not been paid, may stop payment and require that the money be re-paid to himself. This shall be done without additional charge on the remitter's applying in writing to the post office at which the money order was issued, and producing the receipt and giving full particulars of the payee's address as entered in the money order. In no case, however, shall the Post Office be responsible for inability or failure to stop payment of a money order in compliance with the remitter's request.

92. If the payee of a money order cannot be found, or if the payee refuses to take payment, the amount of the order shall be returned at once to the remitter free of charge. The commission shall in no case be refunded.

93. If payment of a money order to the payee cannot be effected and the amount cannot be re-paid to the remitter owing to the latter not being found, the order shall be void and its value credited to the Government. But, if the payee or remitter subsequently applies for payment, the amount of the order shall be paid to him on a fresh money order issued by the Comptroller, Post Office, provided that application is made before the expiration of one year from the date of issue of the original order.

*(b) Telegraphic inland money orders.*

94. The amount for which a single telegraphic money order may be issued, shall not exceed Rs 600, and shall not include any sum less than a rupee, and, if the amount exceeds Rs 150, the telegraphic money order shall not be for a sum which is not a multiple of Rs 10.

95. The following fees (which include the cost of the telegram) shall be charged for the issue of telegraphic money orders:—

				R s.	
On sums not exceeding R 25				1	4
" " exceeding R 25 but not exceeding R 50				1	8
" " " " 50	"	"	75	1	12
" " " " 75	"	"	100	2	0
" " " " 100	"	"	125	2	4
" " " " 125	"	"	150	2	8
" " " " 150	"	"	200	3	0
" " " " 200	"	"	250	3	8
" " " " 250	"	"	300	4	0
" " " " 300	"	"	350	4	8
" " " " 350	"	"	400	5	0
" " " " 400	"	"	450	5	8
" " " " 450	"	"	500	6	0
" " " " 500	"	"	550	6	8
" " " " 550	"	"	600	7	0

96. The Director-General may, at any time, suspend the issue of telegraphic money orders upon any post office, or group of post offices, or direct that telegraphic money orders shall not be so issued except on payment of special fees higher than those prescribed by rule 95.

97. The remitter of a telegraphic money order shall fill in, in ink, on a money order form prescribed by the Director-General, such particulars as the Director-General may require.

98. The money order form duly filled in, together with the amount of the telegraphic money order and fees, may be presented at the post office during the hours prescribed by the Director-General for telegraphic money order business.

99. A receipt shall be given to the remitter, showing the total amount paid by him, the payee's name and the hour at which the telegraphic money order was presented.

100. The remitter of a telegraphic money order shall be entitled to obtain free of charge, by post, an acknowledgment of the payment of the amount of the order signed by the payee.

101. The payment of a telegraphic money order shall ordinarily be made, as soon as practicable after receipt of the telegraphic advice by the office of payment, at the residence of the payee on his signing a receipt for the amount paid and the acknowledgment.

102. The receipt and acknowledgment shall be signed by the payee named by the remitter, or by some person authorized in writing by the payee in this behalf. The signature shall be written in ink in the space provided for the purpose.

103. If the remitter or payee of a telegraphic money order is illiterate, his mark shall be obtained and shall be verified in such manner as the Director-General may direct.

104. If the payee of a telegraphic money order has removed from the place at which the order was originally payable, and has left written instructions with the post office for the re-direction of articles to his address, the telegraphic money order shall be re-directed to him by post on receipt of the postal confirmation of the telegraphic money order, and the order shall be payable at the revised address without any extra charge.

105. The remitter of a telegraphic money order which has not been paid, may require that the address of the payee shall be altered, or that the name of the office at which the order was originally made payable, shall be changed. The required alteration shall be made in the ordinary course of post, without

additional charge, on the remitter's applying in writing to the post office at which the money order was issued.

106. The remitter of a telegraphic money order which has not been paid, may require that the amount be paid to some person other than the payee named in the order. The required change shall be made in the ordinary course of post, on payment of the commission chargeable on an ordinary money order for the same amount, on the remitter's applying in writing to the post office at which the order was issued, and presenting the receipt granted for the original order.

107. The remitter of a telegraphic money order which has not been paid, may stop payment and require that the money be re-paid to himself. This shall be done on the remitter's applying in writing to the post office at which the money order was issued, producing the receipt and giving full particulars of the payee's address as entered in the money order. Payment may be stopped by telegram, the remitter paying the necessary charges at the ordinary rates for it. In no case, however, shall the Post Office be responsible for inability or failure to stop payment of a money order in compliance with the remitter's request.

108. If the payee of a telegraphic money order cannot be found, or should the payee refuse to take payment, a reference will be made to the office of issue, and the telegraphic money order, if still undeliverable, will then be re-issued by telegraph, free of any further charge, for repayment to the remitter. The fees shall in no case be refunded.

109. If payment of a telegraphic money order to the payee cannot be effected and the amount cannot be repaid to the remitter owing to the latter not being found, the order shall be void and its value credited to the Government. But, if the payee or remitter subsequently applies for payment, the amount of the void order shall be paid to him on a fresh money order issued by the Comptroller, Post Office, provided that application is made before the expiration of one year from the date of issue of the original order.

## II.—Foreign money orders.

### (a) *Foreign money orders.*

110. (1) Foreign money orders shall be of two kinds, namely:—

- (a) Money orders expressed in rupee currency; and
- (b) Money orders expressed in sterling.

(2) The Director General shall, from time to time, notify in the Indian Postal Guide the countries and places with which money orders of each kind may be exchanged.

111. (1) The amount for which a single foreign rupee money order may be issued, shall not exceed Rs 50, and shall not include any fraction of an anna.

(2) The amount for which a single foreign sterling money order may be issued, shall not exceed £10, except in the cases specially notified by the Director General in the Indian Postal Guide. No such money order shall include any fraction of a penny.

(3) The amount of a foreign sterling money order shall be paid to the Post Office in rupee currency at such rate of exchange as the Director-General shall, from time to time, direct.

112. (1) In the case of foreign rupee money orders the rates of commission shall be the same as those for the time being charged on inland money orders.

(2) In the case of foreign sterling money orders the rates of commission shall be the following, namely :—

	R	a.
On sums not exceeding £2 . . . . .	0	4
" " exceeding £2 and not exceeding £5 . . . . .	0	8
" " " £5 " " £7 . . . . .	0	12
" " " £7 " " £10 . . . . .	1	0
" " " £10 " " £12 . . . . .	1	4
" " " £12 " " £15 . . . . .	1	8
" " " £15 " " £17 . . . . .	1	12
" " " £17 " " £20 . . . . .	2	0

(3) Where foreign sterling money orders have to be remitted through the agency of the British Post Office as notified by the Director General in the Indian Postal Guide, a further reduction will be made by the British Post Office from the amount payable to the payees at the following rates, namely :—

For sums not exceeding £2 . . . . .	3d.
" " exceeding £2 but not exceeding £6 . . . . .	6d.
" " " £6 " " £10 . . . . .	9d.

113. In the case of foreign sterling money orders the same remitter shall not be entitled to obtain in one day more than four money orders payable to the same payee, except under special permission conveyed to the issuing office by the Comptroller, Post Office.

114. (1) The remitter of a foreign rupee money order shall be entitled to obtain, free of charge, an acknowledgment of the payment of the amount of the order signed by the payee, except in the cases specially notified by the Director General in the Indian Postal Guide.

(2) The remitter of a foreign sterling money order from any post office except that at Aden shall be entitled to obtain, free of charge, an intimation from the Indian Post Office of exchange (at Bombay or Madras, as the case may be) that the money order has been communicated to the country of payment.

115. (1) In the case of a foreign sterling money order the remitter may, by application in writing accompanied by the money order receipt, require the Indian Post Office of exchange (at Bombay, Madras or Aden, as the case may be) to request the country of payment to alter the address of the payee in the money order, or to pay the amount thereof to some person other than the payee named in the order, or to stop payment of the order. The office of exchange will communicate the result of the reference without charge to the remitter, and, if payment is stopped, the amount of the order shall be refunded to the remitter, but the commission shall not be refunded.

(2) In the case of a foreign rupee money order the remitter may require similar services in accordance with rules 89, 90 and 91, relating to inland money orders.

116. Rules 80, 81, 82, 83 and 87, relating to inland money orders, shall be equally applicable to the issue of foreign money orders.

117. Foreign sterling money orders received for payment in India shall be paid as if they were inland money orders, the amount in sterling of the original money order being converted into rupee currency by the Indian post office of exchange (at Bombay, Madras or Aden, as the case may be) at such rate of exchange as the Director-General may, from time to time, direct.

118. The payment of a foreign money order shall ordinarily be made at the address of the payee. It shall be made on his signing the order and acknowledgment (except when otherwise provided by the Director-General) in the case of a foreign rupee money order, and on his signing the order in the case of a foreign sterling money order.

119. Under no circumstances can a foreign money order, whether a rupee money order or sterling money order, be paid after the expiration of one year from the date of its receipt in India.

120. Rules 86, 87, 88 and 92, relating to inland money orders, shall be equally applicable to the payment of foreign money orders.

(b)—*Indo-Ceylon telegraphic money orders.*

121. The amount for which a single Indo-Ceylon telegraphic money order may be issued in India shall not exceed **Rs 150** and shall not include any fraction of a rupee.

122. The following fees (including the cost of the telegram) shall be charged on Indo-Ceylon telegraphic money orders issued in India, namely :—

		R a.	
On sums not exceeding <b>Rs 10</b>		1	6
" " exceeding <b>Rs 10</b> but not exceeding <b>Rs 25</b>		1	8
" " " <b>25</b> " " <b>50</b>		1	12
" " " <b>50</b> " " <b>75</b>		2	0
" " " <b>75</b> " " <b>100</b>		2	4
" " " <b>100</b> " " <b>125</b>		2	8
" " " <b>125</b> " " <b>150</b>		2	12

123. Rules 96, 97, 98, 99 and 103, relating to telegraphic inland money orders, shall be equally applicable to the issue of the Indo-Ceylon telegraphic money orders.

124. The payment in India of an Indo-Ceylon telegraphic money order shall ordinarily be made, as soon as practicable after the receipt of the telegraphic advice, at the address of the payee on his signing a receipt for the amount paid.

125. If the payment of an Indo-Ceylon telegraphic money order cannot be made by the post office in India to which it was addressed, the money order shall be re-issued by telegraph, free of any further charge, for repayment to the remitter.

126. Rules 102 and 103, relating to telegraphic inland money orders, shall, as far as may be, apply to the payment in India of Indo-Ceylon telegraphic money orders.

## Part VII.—Official postal articles.

### 1.—Inland official postal articles.

127. The following shall be the rates of postage chargeable on official postal articles where the postage is prepaid :—

	Postcards.	Letters.	Book Packets.	Parcels.
	Anna.	Annas.	Annas.	Annas.
Each postcard	$\frac{1}{2}$	...	...	...
Not exceeding $\frac{1}{2}$ tola	...	$\frac{1}{2}$	}	}
Exceeding $\frac{1}{2}$ tola and not exceeding 10 tolas	...	1		
Exceeding 10 tolas and not exceeding 20 tolas	...	2	1	}
Exceeding 20 tolas and not exceeding 30 tolas	...	3	2 $\frac{1}{2}$	
Exceeding 30 tolas and not exceeding 40 tolas	...	4	3	}
Exceeding 40 tolas	...	{ 1 anna per tola.	{ 1 anna per 10 tolas.	
Exceeding 40 tolas and not exceeding 80 tolas	...	...	...	8
and every additional 40 tolas	...	...	...	4

*Illustration.*—A letter weighing 41 tolas shall be charged with 41 annas.

*Note 1.*—Articles which exceed 40 tolas shall be treated, and charged with postage, as packets or as parcels unless specially marked by the senders for transmission as letters, or prepaid at letter rates.

*Note 2.*—The prepayment of postage on unregistered parcels shall be compulsory. Parcels weighing more than 440 tolas shall be registered.

*Note 3.*—Postal articles for transmission to Ceylon may also be prepaid at the above rates. Official parcels for transmission to Aden or Ceylon shall be registered.

128. The postage chargeable on the delivery of official postal articles, when the postage is not prepaid or is insufficiently prepaid, shall be as follows :—

On an unpaid letter or packet . . . . .	The prepaid rate.
On an insufficiently paid letter or packet . . . . .	The deficiency.
On an unpaid registered parcel . . . . .	The prepaid rate (and registration fee).

In cases where it is not thought advisable to entrust postage stamps to a subordinate official who has to correspond with, or to send returns to, a superior, he may be allowed by his superior to post official articles (except unregistered parcels) to him without prepaying the postage, and the same course may be adopted in other cases where it is found convenient or proper to make the postage charge fall on the receiving office.

129. The following persons shall be entitled to send postal articles at the official rates of postage, subject to the conditions noted against each :—

- (1) All Government officials, except those who are on leave or have retired from the service; provided that the articles posted by them are *bona fide* and exclusively on Her Majesty's Service.
- (2) The Registrars of the Universities of Calcutta, Madras, Bombay, Allahabad and the Punjab, and of the Educational Syndicate, Burma, provided that the articles posted by them relate solely to the public business of the Universities.
- (3) The Astronomer in charge of the G. V. Juggarao Observatory, Vizagapatam, provided that the articles posted by him relate solely to the business of the Observatory.

130. Correspondence sent by an officer of a local authority, or by any officer of the Government acting in a capacity connected with a local authority, such as the President or Secretary of a Local Fund Committee, shall not be deemed official correspondence within the meaning of these rules, and may not be superscribed as on Her Majesty's Service. But nothing in this rule shall be held to prevent the transmission on Her Majesty's Service of correspondence sent by an officer of the Government acting as such, although the correspondence may relate to the affairs of a local authority.

*Illustration.*—The Commissioner of a Division, writing in that capacity to the Secretary of a Local Fund Committee concerning its affairs, may superscribe the letter on Her Majesty's Service.

131. The postage on an official postal article can be properly prepaid only by a proper service stamp or stamps. Where, however, an ordinary postage stamp instead of a service stamp is used on an official postal article, the article shall be recognised as an official postal article by the Post Office; but the irregularity shall be brought by the officer in charge of the post office at which the article was so posted, to the notice of the officer concerned, and, if of frequent occurrence, to that of the Post Master General.

*Note.*—Service stamps, envelopes and postcards shall not be sold at post offices, but shall be obtainable by Government officials at Government Treasuries.

132. Postal articles shall be transmitted by post at the official rates of postage, provided that they are posted in accordance with the following conditions :—

- (1) The weight of an official postal article, whether a letter, packet, or parcel, shall not exceed 600 tolas.
- (2) The conditions as to size, shape, manner of packing, and contents prescribed for the different classes of ordinary postal articles shall be applicable to official postal articles of the same class.
- (3) Official postal articles, whether the postage is prepaid or not, shall bear the superscription "On Her Majesty's Service," and this shall be supported by the signature and official designation—to be entered in the lower left-hand corner of the article—of the officer who sends the article, or of the Head Clerk or Superintendent of his office or other responsible officer to whom the duty of despatching is confided.

*Explanation 1.*—Service postcards bear the words "On Her Majesty's Service" printed in full round the impressed stamp. In their case, therefore, no further superscription shall be required.

*Explanation 2.*—Postmasters may recognise abbreviated designations, provided they are generally known; but no official can claim the recognition of an abbreviation, the rule being that the designation shall be entered in full.

*Explanation 3.*—Postmasters may recognise fac-simile impressions of signatures made by means of stamps, but not such impressions when lithographed or otherwise produced. Public officers who use such stamps, shall make arrangements for their proper custody and use; and where there is any reason to suspect the misuse of any such stamp or the absence of proper precautions against its misuse, postmasters may decline to recognise the stamp impression and require strict adherence to the rule. Printed names shall not be recognised in lieu of signatures except in the case of official Gazettes in open covers, posted in large numbers by the office of publication.

- (4) Any irregularity or incompleteness of the address, superscription, or signature on an article, shall render it liable to be treated as an ordinary unpaid article, any service stamps which it may bear not being recognised. Service stamps affixed to an article which does not bear the prescribed superscription shall not be recognised by the Post Office in payment of postage.
- (5) The delivery and re-direction of articles superscribed "On Her Majesty's Service" shall be governed by the official designation (when given) of the addressee; the delivery and re-direction of articles not so superscribed shall be governed by the name (when given) of the addressee.

133. (1) Letters, packets, and registered parcels, sent by officers of the Government in their official capacity, which relate nevertheless to the private interests and concerns of the individuals addressed, may be endorsed according to the specimen form given on the margin, under the full signature and official designation of the person by whom they are sent. Such articles, when so

Service Unpaid.	
To	A. B.,
	CALCUTTA.
	C. D.,
	Accountant-General.

addressed, shall be regarded by the Post Office as private articles, but shall be charged, on delivery, with postage at the rates to which they would have been liable if postage had been prepaid by ordinary stamps, and not at double rates as in the case of ordinary articles.

*Explanation.*—Under the provisions of this rule may be sent replies from officers of the Government to petitions, applications for appointments, requests for transfer, enquiries about title to leave and such like communications from individuals, whether private persons or officers of the Government.

(2) Letters, packets, and registered parcels, sent by private persons to officers of the Government relating to the affairs of the Government, if superscribed "Service Unpaid," shall be charged, on delivery, with postage at the rates to which they would have been liable if the postage had been prepaid by ordinary stamps, and not at double rates as in the case of ordinary articles: Provided that any article so sent is addressed to the full official designation of the officer for whom it is intended, and that it has been endorsed under the full signature of the sender, according to the specimen form

Service Unpaid.	
To	THE DISTRICT SUPERINTENDENT OF POLICE,
	LUCKNOW.
Signature of Sender.	

given on the margin.

*Explanation.*—Under the provisions of this rule may be sent reports regarding the occurrence of crime from a zemindar to a police officer, returns required to be sent from employers of labourers to the Protector, and any similar reports or returns authorized to be so sent.

134. The amount of postage marked as due on postal articles delivered under the superscriptions of "Service Unpaid" or "On Her Majesty's Service" shall

be initialed by the postmaster, or other officer, authorized in this behalf by the Postmaster-General, of the office of delivery. Officers of the Government shall be bound to receive, and to pay any postage which may be due on, articles addressed to them under the superscription "On Her Majesty's Service" and bearing the signature in full of the sender.

135. (1) Postal articles posted by officers of the Government under these rules may be registered, insured, or sent value-payable, in accordance with the ordinary rules, provided that the postage, registration and insurance fees shall be paid by means of service stamps, instead of ordinary postage stamps.

(2) The sender of an official registered article may obtain an acknowledgment signed by the addressee, by paying the ordinary fee for an acknowledgment, provided that, if the article is a registered postcard, letter or packet, the fee shall be paid by means of service stamps affixed to it, and that, if the article is a registered parcel, the fee shall be paid in cash.

(3) The fee chargeable on a value-payable unregistered parcel or book-packet, as well as the fee chargeable on railway, or steamer receipt-notes sent open, shall be paid in the same way as under the ordinary rules, provided that the stamps to be used for the purpose shall be service stamps.

NOTE.—Official postal articles, prepaid at inland official rates, may also be sent value-payable to Ceylon under the rules applicable to private value-payable articles for Ceylon, the postage and other fees being paid in the manner prescribed in this rule.

## II.—Foreign official correspondence.

136. Official correspondence transmitted by the foreign post, with the exception of correspondence exchanged with Ceylon, shall be subject to the same rates and governed by the same rules as ordinary private correspondence. If, however, service stamps are used for the prepayment of postage, they shall be supported by the superscription and signature prescribed by clause (3) of rule 132 relating to inland official postal articles.

137. The amount of postage marked as due on postal articles received by the foreign post for delivery to officers of the Government shall be initialed by the postmaster, or other officer, authorized in this behalf by the Post Master General, of the office of delivery.

138. In the case of official letters (not newspapers or other articles) sent by British Packet to or from the public functionaries, departments, etc., in London having special accounts for foreign letter postage with the London Post Office, the prepayment of postage is not necessary if such letters are superscribed as "On Her Majesty's Service," under the full signature and official designation of the sender; but when such letters are presented for registration, the registration fee shall always be prepaid by means of service stamps affixed to the article in the ordinary way.

## Part VIII.—General rules.

### I.—Manner of prepayment of postage on postal articles.

139. Where the postage on a postal article is prepaid, the prepayment shall be made by means of a proper stamp or stamps provided for the purpose by the orders of the Governor General in Council under section 16 of the Act.

140. The postage on a postal article shall not be deemed to be prepaid by means of a proper stamp—

- (a) if the stamp is a stamp which has not been provided for use as a postage stamp under section 16 of the Act; or
- (b) if the stamp has been obliterated, defaced, torn, cut, or otherwise rendered imperfect; or
- (c) if the stamp has upon it any word, letter, figure, or design printed or impressed upon it, otherwise than by the authority of the Government before posting; or
- (d) if the stamp has been cut or otherwise separated from the embossed envelope, or from a postcard or wrapper; or

(e) if the stamp is on an embossed envelope, and that envelope is used as a wrapper for a newspaper, or is wholly or partly cut open; or

(f) if the stamp is on an embossed registration envelope and that envelope is used for the transmission of unregistered correspondence:

Provided that nothing in this rule shall prevent the perforation of postage stamps with initials traced in minute holes.

## II.—Price of stamps.

141. Adhesive postage stamps shall be sold in each case for the denoted value of the stamp or stamps.

142. The small half-anna oblong envelopes and postcards shall be sold, in each case, for the denoted value of the stamp or stamps which they bear.

143. The envelopes and wrappers specified below shall be sold at the following prices, namely:—

### *Half-anna square envelopes.*

		R.	a	p.
Any number less than 16	Each	0	0	8
Packets of 16	Per packet	0	10	6

### *One anna square envelopes.*

Any number less than 8	Each	0	1	2
Packets of 8	Per packet	0	9	3

### *Registration envelopes, small size.*

Any number less than 16	Each	0	2	2
Packets of 16	Per packet	2	2	6

### *Registration envelopes, large size.*

Any number less than 8	Each	0	2	8
Packets of 8	Per packet	1	5	3

### *Envelopes for international correspondence.*

Any number less than 12	Each	0	2	8
Packets of 12	Per packet	2	0	0

### *Half-anna wrappers.*

Any number less than 6	Each	0	0	7
Packets of 6	Per packet	0	3	6

### *One anna wrappers.*

Any number less than 6	Each	0	1	1
Packets of 6	Per packet	0	6	6

## III.—Certificates of posting.

144. A certificate of posting may be obtained in respect of any postal article for which a receipt is not given by the Post Office subject to the following conditions, namely:—

- (1) the certificate of posting written in ink shall be presented to an officer on duty at the post office along with the article to be posted during the hours fixed for the posting of such articles;
- (2) the certificate shall contain an exact copy of the address on the article to which it relates, and shall have a half-anna postage stamp affixed thereto;
- (3) the officer on duty shall compare the address of the article with the certificate, and, if it be correct, shall obliterate the postage stamp and impress the date stamp upon the certificate. The certificate shall then be returned to the person who presented it.

Subject to the conditions aforesaid, any person posting at one time any number of unregistered parcels (ordinary or value-payable) not exceeding six or any number of value-payable unregistered book packets not exceeding six, may obtain a certificate of posting in respect of such unregistered parcels or value-payable book packets for a fee of half an anna :

Provided that there shall be a separate certificate for each class of article headed with the words "Certificate of posting for unregistered parcels" or "Certificate of posting for value-payable unregistered book packets," as the case may be, and that the articles (not exceeding six) to which a certificate relates shall be separately presented with it.

#### IV.—Late letters and late letter fees.

145. Late letters shall mean letters posted after the hour fixed for the closing of a mail, which cannot be forwarded by the mail then being prepared for despatch without the payment of an additional fee.

146. The ordinary late letter fee for postal articles other than parcels to be transmitted by the Inland or Foreign post shall be half-an-anna for each postal article.

147. The late letter fee in respect of registration for articles to be transmitted by the Inland or Foreign post shall be two annas for each postal article.

148. In special cases, a higher fee than half-an-anna, but not exceeding four annas, for each postal article, may be charged on postal articles, other than parcels, posted for transmission by the inland or foreign post at Presidency-towns, or on board steamers or in other special circumstances. The Director General shall, from time to time, notify in the Gazette of India the amount of such fees and the circumstances in which they are chargeable.

149. Late letters shall be presented at the window of the post office within the hours prescribed for this purpose by the Postmaster General, and the postage and late letter fee shall be fully prepaid by means of postage stamps.

#### V.—Re-delivery to the sender of postal articles in course of transmission by post.

150. Inland letters, postcards, book and pattern packets and parcels, and foreign registered letters and parcels, which have not been despatched from India, may be recalled when in course of transmission by post without reference to the consent of the addressee, subject to the following conditions, namely :—

- (1) No such postal article as aforesaid shall be re-delivered to the sender except under the orders of—
  - (a) the chief postal authority in a postal circle ;
  - (b) the Director General ;
  - (c) the Local Government ; or
  - (d) the Governor General in Council.
- (2) A fee of one rupee shall be paid in respect of each postal article for the re-delivery of which to the sender an application is made.
- (3) An application for the re-delivery to the sender of a postal article may be presented in writing to any of the authorities aforesaid, either direct or through any officer in charge of a post office.
- (4) An application shall be received only from the sender of the postal article or from some person authorized in this behalf by the sender in writing.
- (5) Every application shall be accompanied by a statement (which may be enclosed in a sealed cover) of the reasons why re-delivery is sought. Such sealed cover shall be opened only by the authority to which the application is presented, or, where such authority is a Local Government or the Governor General in Council, by a Secretary to the Local Government or the Government of India, as the case may be.
- (6) Upon receiving such application and statement, together with the prescribed fee as aforesaid, the officer in charge of the post office shall immediately send the same to the chief postal authority in the postal circle in which he is serving.

- (7) If the postal article, of which re-delivery is sought, is in his possession, the said officer shall, instead of forwarding it to the addressee, keep it in deposit, and send the application to the said authority.
- (8) If the postal article is not in his possession, the said officer shall require the officer in charge of the post office of address in the case of an inland postal article, and of the office of foreign exchange in the case of a foreign registered postal article, to abstain from delivering it to the addressee or from sending it to its address, and to keep it in deposit. The requisition to such other officer may be sent by telegraph, but all expenses attending its transmission shall be borne by the applicant.
- (9) When the application reaches such an authority as is named in condition (1), that authority may order the re-delivery to the sender of the postal article upon being satisfied that the applicant is the sender, and that sufficient reasons have been given for the re-delivery, otherwise the postal article shall be sent at once to its address.
- (10) A letter or postcard in course of transmission by post shall not be re-delivered to any one but the sender or some person authorized in this behalf by the sender in writing.

#### VI.—Detention in the Post Office of book and pattern packets and parcels.

151. Book packets (other than newspapers) and pattern packets shall not be detained at the post office at which they were posted, for a period exceeding one day.

152. (1) Book packets (other than newspapers) and pattern packets received from abroad shall not be detained in the post office at the port of arrival for a period exceeding one day exclusive of the day on which the mail steamer reaches such port:

Provided that nothing in this rule shall prevent any further detention at the port of arrival that may be necessary for the purpose of customs examination or enquiries.

(2) Book packets, containing printed papers obviously without value such as circulars, price lists and advertisements, when received from abroad at Bombay, shall not be detained in the Bombay post office for a period exceeding two days exclusive of the day on which the mail steamer reaches Bombay.

153. The delivery of book packets (other than newspapers), and pattern packets shall not be delayed beyond the delivery next following that by which they would ordinarily be delivered.

154. Parcels shall not be detained at the post office at which they are posted for a period exceeding one day.

155. Parcels received from abroad shall not be detained at the post office at the port of arrival for a period exceeding two days exclusive of the day on which the mail steamer reaches such port:

Provided that nothing in this rule shall prevent any further detention at the port of arrival that may be necessary for the purposes of customs examination or enquiries.

156. Subject to the limitations expressed in rules 154 and 155, parcels shall be delivered at such times and by such deliveries as the Director-General of the Post Office may direct.

#### VII.—Detention and disposal of undelivered postal articles.

(a) *At the post office of address.*

157. An undelivered postal article the addressee of which cannot be found, shall ordinarily remain in the post office to which it was addressed—

- (1) for a period of three weeks from the date on which it reached the post office, when that office is a head office;

- (2) for a period of ten days from the date on which it reached the post office, when that office is a sub-office:

Provided that—

- (a) an undelivered postal article, on which the words "Poste Restante," "To await arrival" or similar instructions have been written, shall remain in the post office to which it was addressed—
  - (i) for a period of four months from the date on which it reached the post office if the office is at a Presidency of seaport town;
  - (ii) for a period of one month in all other cases;
- (b) an undelivered postal article shall ordinarily not remain in a post office to which it has been re-directed, after it has been ascertained that the addressee cannot be found;
- (c) an undelivered telegram which is in course of transmission by post, shall remain in the post office to which it was addressed, for a period of three days from the date on which it reached that office.

158. An undelivered postal article, of which the addressee has refused to take delivery, shall not be detained in the post office to which it was addressed.

*(b) In the office of the Postmaster-General.*

159. Packets containing printed papers, obviously without value, such as trade circulars and price lists, which cannot be disposed of under section 38 of the Act, may be disposed of forthwith by being sold as waste paper or destroyed.

160. Postcards which cannot be disposed of under section 38 of the Act, shall be detained for a period of one month, on the expiration of which they may be destroyed by being burnt.

161. Book-packets, other than the packets mentioned in rule 159, newspapers and pattern packets, which cannot be disposed of under section 38 of the Act, shall be detained for a period of three months, on the expiration of which they may be disposed of by being sold or destroyed. Magazines, periodicals and newspapers may, at the option of the Postmaster-General, be used for any public purpose.

162. Subject to the provisions of section 39, proviso (b), of the Act, parcels which cannot be disposed of under section 38, shall be detained for a period of three months, on the expiration of which the contents, if of no saleable value, may be destroyed.

163. Letters which cannot be disposed of under section 38 of the Act, shall be detained for a period of six months, on the expiration of which they shall be destroyed by being burnt.

164. Nothing in these rules shall prevent the immediate destruction of any postal article in exercise of the powers conferred by section 23, sub-section (3), of the Act.

### VIII.—Complaints against the Post Office.

165. Letters containing complaints against the Post Office may be transmitted by the inland post free of postage, provided that they are addressed to a postal official and provided that it is certified on the cover, under the full signature of the sender, that they are complaints against the Post Office.

### IX.—Gratuities to be paid to masters of ships.

166. With effect from the first day of April, 1899, gratuities shall be payable to the masters of ships, not being mail ships, in respect of postal

articles received by them for conveyance on behalf of the Post Office, at the following rates, namely :—

	R	a.	p.	
Letters and postcards . . . . .	1	8	0	per pound.
Packets . . . . .	0	2	0	per pound.
Parcels . . . . .	0	1	0	per pound or part of that weight.

NOTE.—As regards letters and postcards or packets, for a lower or higher weight than one pound the gratuity payable shall be proportionately lower or higher, as the case may be.

167. The gratuities shall be payable at the time when the mail bags are made over to the masters of the ships by which they are to be conveyed, and on the granting of a receipt for the bags in the form below.

### FINANCE AND COMMERCE DEPARTMENT.

#### NOTIFICATION.

ACCOUNTS AND FINANCE.  
PUBLIC DEBT.

No. 2710.

*Simla, the 15th of June, 1899.*

Whereas by the terms of the Notification No. 2005, dated the 12th of August 1878, Promissory Notes or Loan Certificates of the seven shillings sterling per cent. portion of the Transfer Loan of 1879 can be paid off and discharged at any time on or after the 15th of September 1893 on the expiration of a previous notice of three months to that effect, which notice may be given at any time on or after the 15th of June 1893;

And whereas the amount of the said Promissory Notes and Loan Certificates now outstanding is two lakhs and twenty-three thousand rupees (Rs. 2,23,000);

And whereas by the terms of the said Notification the said Promissory Notes and Loan Certificates can be discharged by the payment of the equivalent in rupees of eight pounds fifteen shillings sterling for each hundred rupees of their amount, the said equivalent being calculated at the rate of exchange fixed by the Secretary of State for India in Council, with the concurrence of the Lords Commissioners of the Imperial Treasury, for the adjustment of transactions between the Indian and Imperial Governments at the date of the expiry of the notice of the discharge of the Notes and Certificates as aforesaid;

And whereas the Governor General in Council has determined to pay off the said Promissory Notes and Loan Certificates on the 15th of September 1899;

And whereas by the terms of the Notification No. 1487-A., dated the 7th of April 1899, the rate of exchange for the adjustment of transactions between the Indian and Imperial Governments for the official year 1899-1900 has been fixed by the Secretary of State for India in Council, with the concurrence of the Lords Commissioners of Her Majesty's Treasury, at 1s. 4d. the rupee, and the equivalent of eight pounds fifteen shillings at this rate is rupees one hundred and thirty-one and annas four only:

2. Notice is hereby given that, on the 15th day of September 1899, all the Notes (or Stock Certificates issued in lieu thereof) and Loan Certificates of the seven shillings sterling per cent. portion of the Transfer Loan of 1879 aforesaid will be paid off at the Public Debt Office, Bank of Bengal, Calcutta, at the rate of rupees one hundred and thirty-one and annas four only for each hundred rupees of their amount; and that from the said 15th day of September 1899 interest on the said Promissory Notes (or Stock Certificates) and Loan Certificates will cease.

3. Promissory Notes and Certificates hereby notified for discharge will be received at the Public Debt Office, Bank of Bengal, Calcutta, from and after the 11th of September 1899, and will be discharged in full together with interest up to the 14th of September 1899, inclusive, as soon as they can be examined and passed for payment.

By order of the Governor General in Council,

J. F. FINLAY,

*Secretary to the Government of India.*

(7) 2.
